Measuring up

ANDY ARENTZ/TIMES-NEWS

Stephen Anderson sets his sights on the top of the College of Southern Idaho tower through a transit. An assignment for an engineering measurements class, Anderson and fellow students were recording coordinates on some of the campus' taller objects. So, how tall is the tower? The students were not sure. They had to compute their figures through trigonometry formulas first.

Utah cold fusion scientists vanish, leave no word

The Associated Press

SALT LAKE CITY — As if political pressures, worldwide skepticism and demands for review aren't headache enough, directors of Utah's cold fusion research now can't find their top scientists.

They not only don't know the whereabouts of electrochemists B. Stanley Pons and Martin Fleischmann, they can't say if the pair will return.

"That, at the present time, is not clear to us," Eric Will, director of the National Cold Fusion Institute at the University of Utah, said.

"We have tried to be in communication with both of them via the fax machine and the phone. We have been totally unsuccessful," Will said.

Their absence casts more uncertainty

over the much-maligned Utah cold fusion program, which was launched with the pair's stunning announcement on March 23, 1989, that they had achieved a sustained nuclear fusion reaction at room temperature.

Their claims sparked an ongoing debate over the validity of the experiments. Many researchers tried and failed to replicate the work. A few have succeeded, but can't explain why.

Depending on the source, Pons is rumored to be working in Japan, soliciting funding for his research in Europe, or vacationing. Will said Fleischmann reportedly is on a medical leave in his native England, but he isn't sure.

Pons' son, Jon, was withdrawn last week from the second-grade at Roslyn Heights Elementary School.

Bush rights veto survives

The Associated Press

WASHINGTON — The Senate failed Wednesday to override President Bush's veto of a major civil rights bill sustaining his objection that the measure would lead to firing quotas.

The 66-34 vote was one shy of the two-thirds majority needed to enact the bill, and marked the 10th time Bush has made a veto stick without a single reversal.

Civil rights supporters, rebuffed in enacting their top legislative priority, vowed to turn the issue into an election-year cause in

the final weeks of a midterm political campaign.

The bill would overturn six job discrimination decisions that caused a furor when the Supreme Court handed them down in 1989. It would have banned racial discrimination in the workplace and defined punitive damages in extreme discrimination cases.

But GOP Leader Bob Dole, R-Kan., said

the bill would enable lawyers to reap huge profits in the name of racial justice" and result in "quotas, quotas, quotas and more."

Freed hostages report riot, lack of medical attention

The Associated Press

Several Westerners who were held hostage in Iran said Wednesday that their captors starved them and refused them medical attention, prompting a brief riot at one strategic site.

The accounts came as separate groups of British and American hostages arrived in London following their release Tuesday. The 32 Britons and 14 Americans were among hundreds of Westerners held by Iraq since its invasion of Kuwait on Aug. 2.

Two senior officials told Congress that

the release of the hostages, and an agree-

ment to free Frenchmen held in Iraq and Kuwait, were part of a broad effort by Iraqi President Saddam Hussein to weaken the resolve of his opponents by dangling the possibility of hostage release.

Nine of the freed Americans arrived in London on Wednesday and were to fly home Thursday.

The other five flew to New York on a flight with a stopover in Amsterdam. They appeared healthy and in good spirits when they disembarked at John F. Kennedy International Airport.

Jack Frazier, of Santa Ana, Calif., said

leaving other hostages behind "was the

hardest thing I've ever done in my life."

The nine freed Americans who arrived in London had little to say to reporters. They asked us very nicely not to say anything," said Peter Timko, from Pennsylvania.

John Charlton, 19, from Tampa, Fla., said the detainees didn't have much warmth before they were told they could leave.

Some returning Western hostages de-

scribed abysmal conditions in Iraq, such as

lack of food and inadequate toilet facilities.

"We were in really bad shape," said

Briton Jim Thompson, told reporters on the

flight home from Iraq. He said meals con-

sisted of rice and stale bread.

New budget deal near; government keeps limping on

The Associated Press

WASHINGTON — Budget negotiators all but reached final agreement Wednesday on a long-sought plan to slash the federal deficit by boosting taxes on the wealthy, raising levies on gasoline and increasing costs for Medicare recipients.

The White House said Wednesday night final details remained to be worked out, but "sufficient progress has been made" to allow Bush to sign another stopgap resolution to keep the government from running out of money for three days, the fifth such resolution this month.

White House spokesman Marlin Fitzwater said all federal workers should report to work as scheduled Thursday. Bush will not officially sign the continuing resolution until Thursday morning.

"This three-day Continuing Resolution includes budget savings that approximate those envisioned in the first year of the bipartisan budget agreement," said the White House spokesman.

Earlier, House Speaker Thomas S. Foley, D-Wash., said after a meeting of Democratic members he believed a deal could be reached in time.

Foley said the compromise could be

wrapped up in time to reach the floor for a vote Thursday. He said Democrats had reached "a very strong consensus" to support the package — an important development because most House Republicans were ready to oppose the plan. But Bush canceled several campaign stops for Thursday and planned to spend the day drumming up GOP support for the measure.

The plan would raise taxes on cigarettes and luxury items and force spending cuts for a variety of federal programs. But the Democrats are no longer insisting on imposing a surtax on the rich. Rather, Foley said, the new plan "fully supplants the import of the surtax."

Democratic negotiators expressed confidence they had found a formula that could end months of negotiations that alternated between bipartisanship and election-year politics.

If so, it would pave the way for savings estimated at \$500 billion over five years, avert the threat of a partial shutdown of government services at midnight and signal the final days of the 101st Congress.

And not a moment too soon, this year's session had run on longer than in any other election year since World War II.

City of Rocks, Hagerman hunting gains Senate OK

The Times-News

WASHINGTON — The Senate Wednesday cleared the way for hunting at City of Rocks National Reserve and the Hagerman National Monument.

The measure, which was included in the Interior Department's appropriations bill for 1991, was passed by the Senate 92-6 and now goes to a House-Senate conference committee.

If it is approved by the conference committee and subsequently OK'd by the House and Senate, the bill will open the City of Rocks and Hagerman parks to hunting regulated by Idaho law.

The federal legislation that created the two monuments did not specifically permit hunting. The National Park Service, which administers the two federal enclaves, refused to allow hunting within the two parks without specific authorization under law.

"The (National Park Service) refused to

say restrictions on hunting 'shall be put into effect only after consultation with the appropriate state agency having jurisdiction over hunting, fishing and trapping activities.'

Please see HUNTING/A2

McClure

At City of Rocks, McClure said the measure stipulates that say restrictions on hunting "shall be put into effect only after consultation with the appropriate state agency having jurisdiction over hunting, fishing and trapping activities."

New farm bill contains disappointments for Idaho

The Times-News
and The Associated Press

WASHINGTON — The final version of the 1990 Farm Bill passed the U.S. House of Representatives Tuesday without some of the price support provisions Idaho congressmen were hoping for.

"I certainly would have written a different bill if it were solely up to me," said Rep. Richard Stallings, D-ID, a member of the House Agriculture Committee. "Although the final plan did not address all of my concerns, it was the best package we could put together under the circumstances."

Two of the programs Stallings fought hardest for — the embattled sugar program and barley growers' exclusion from market

price calculations in determining federal deficiency payments — made it into the Farm Bill, but cutbacks in federal support programs for wheat and other crops disappointed Stallings and other Western congressmen.

The new Farm Bill increases the financial pressure on wheat producers, Stallings aid, and has left agriculture in general "bearing too much of the burden to reduce the deficit."

The bill passed the House 318-102 Tuesday and was awaiting Senate action Wednesday. The legislation extends major federal agriculture and food programs through 1995.

Stallings aid cuts in support programs reflect a Bush administration plan to get government out of agriculture. He conceded

Thompson, 50, an engineering company manager, said he was among 15 foreigners held as "human shields" at an Iraqi armaments factory. Saddam has kept some Western detainees at strategic locations to guard against attack.

"We told the guards, unless you do something, we are going to have a disturbance," Thompson said.

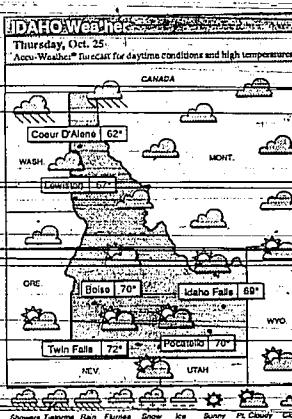

He said that when nothing was done, the detainees tore down fences, broke windows, daubed anti-Saddam remarks on walls and shouted anti-Saddam slogans until guards forced them back into their rooms at gunpoint.

Weather

The Accu-Weather® forecast for noon, Thursday, Oct. 25.

VIA ASSOCIATED PRESS GRAPHIC/HTR

Weather summary

A ridge of high pressure drifted eastward across Idaho Wednesday. This ridge produced mostly sunny skies and the temperatures were 3 to 10 degrees warmer in the afternoon. Little change should take place in the south today, but increasing clouds and a chance of rain is expected in the north.

The north and southwest was mostly clear Wednesday afternoon, while high clouds covered the central and southeast portions. The north reported local winds of 10 to 20 mph, but elsewhere speeds were generally less than 10 mph.

A low of 3 p.m., Boise and Burley had reported the warmest readings with 67 degrees. Salmon was the coolest at 54.

The morning temperature in the interior Wednesday was 26 degrees at Hailey. Stanley reported the coldest at 20 degrees.

Elsewhere in the nation Wednesday, the highest temperature was 102 degrees at Monrovia, Calif. The lowest was 11 at Baker and Pleasantwood, Mont.

Eastern half of U.S. dampened by rain; snow hits Alaska

The Associated Press

Wet weather will widely scatter over the eastern half of the nation Wednesday, with snow on part of Lake Superior's Michigan shore, and some rivers in the Northeast ran high after a night of heavy rain.

Afternoon showers were scattered from southwestern Missouri across northeastern Missouri into west-central Illinois, over northern Maine, east-central Florida, eastern Ohio and northwestern Pennsylvania.

Snow, rain and rain mixed with snow were scattered over western Upper Michigan, which sits against the shore of chilly Lake Superior.

Heavier rainfall during the six hours up to 2 p.m. EDT included 1.36 inches at Caribou, Maine; 1.29 inches at

Forecasts

Twin Falls, Burley, Rupert, Jerome and Gooding: Today sunny and warmer. Variable winds 10 mph. Highs in the lower 70s. Tonight partly cloudy. Lows 35 to 40. Friday mostly sunny and cooler. Highs in the mid-to-upper 60s.

Extended forecast: Southern Idaho — Partly cloudy Saturday. A slight chance of rain Sunday and Monday. Highs in the 60s. Lows in the mid 30s to the mid 40s.

Northern Utah and Nevada: Unh — Today and Friday sunny mid days and fair at night. Highs in the low-to-mid 70s. Lows tonight 40-45.

Nevada — Mostly sunny this morning with increasing high cloudiness this afternoon. Variable high cloudiness Friday. Warm with high temperatures in the lower 60s to middle 70s. Lows in the middle 20s to middle 30s.

The weather temperature in the interior Wednesday was 26 degrees at Hailey. Stanley reported the coldest at 20 degrees.

Elsewhere in the nation Wednesday, the highest temperature was 102 degrees at Monrovia, Calif. The lowest was 11 at Baker and Pleasantwood, Mont.

The Associated Press

Limestone, Maine; 1.25 inches at Bangor, Maine; 1.17 inches at Houlton, Maine; and 0.91 inch at Mount Washington, N.H., the National Weather Service said.

Levels of small streams fell in the Northeast as water from heavy rain Tuesday and during the night drained into larger rivers, which were rising.

Flood warnings were posted for some streams in eastern New York state.

The arctic coast of Alaska had blizzard conditions as wind near 35 mph with stronger gusts caused blowing snow, drifting snow along with uncomfortably low wind chills.

Deeps closed some roads in the barrow area, the weather service said.

On the opposite corner of the continent, Miami warned to a record high of 90 degrees.

Wandering whale swims beneath Golden Gate span, out to sea

SAN FRANCISCO (AP) — A whale, escorted by a flotilla of small boats, swam under the Golden Gate Bridge Wednesday and headed toward the open sea, ending a four-day visit that saw one wrong turn after another.

The 45-foot humpback whale passed under the span about 5 p.m.,

escorted by a flotilla of small boats, Coast Guard vessels and private cruisers.

People on the bridge cheered as he headed back to the ocean where he belongs a day after he was freed from a stranding on mud flats along the shore of San Francisco.

For a time, the mammoth mammal seemed to be re-enacting his 1985 tour of San Francisco bay.

Then, the wayward whale was tracked by legions of well-wishers as he meandered, far from the open ocean where he belongs, for 25 days.

Senate rejects endowment curbs, votes to penalize artists instead

WASHINGTON (AP) — The Senate decisively rejected a move Wednesday to slap tough anti-obscenity controls on National Endowment for the Arts and voted instead to penalize artists whose federally subsidized works are deemed obscene by the courts.

Ignoring charges by Sen. Jesse Helms, R-N.C., that the endowment is financing obscenity produced by "sleazeballs" at the taxpayers' expense, the Senate approved scrapping current restrictions on the kind of art eligible for federal support.

On a 32-29 roll call, the Senate embraced a bipartisan compromise offered by Sen. Orrin Hatch, R-Utah, that would require the endowment to recoup its money from grant recipients who are subsequently convicted of violating obscenity or child pornography laws.

GUILTY ARTISTS: Guilty artists would be barred from receiving any new federal grants for three years.

The House approved a similar proposal last week as part of its \$11.9 billion version of a fiscal 1991 appropriations bill for the Interior Department and several other federal

agencies, including the NEA, the Forest Service, the Smithsonian Institution and some Energy Department programs.

The Senate version, totaling \$11.7 billion and including the NEA compromise, was approved Wednesday night on a 92-62 roll call.

The Senate bill contains \$170 million for the arts endowment, \$5 million less than President Bush had requested and a slight reduction from the NEA's \$171 million budget last year.

The House had voted to boost endowment spending to \$180 million.

Differences between the two measures will have to be reconciled by House and Senate negotiators before a final bill is sent to the president for his signature.

Sen. Hatch said his proposal was aimed at "protecting taxpayer funds and artists' freedom of expression at the same time."

Said Congress must continue to encourage artistic excellence and diversity through the federal arts agency, and "I believe we can do this without compromising the bounds of good taste."

Sen. Edward M. Kennedy, D-Mass., said in a last-ditch appeal for support:

"The American people are damn well sick of this," said Helms, who grabbed the spotlight as the Senate began debate on a proposed \$170 million appropriation for the federal arts agency in the 1991 fiscal year, which began Oct. 1.

Before the fight was over, the Senate approved a Helms proposal to forbid the NEA to support any work that "denigrates the objects or beliefs of the adherents of a particular religion."

But Helms was defeated by voice vote in a separate attempt to block endowment grants to affluent artists, which his formula defined as any individual whose annual income is \$94,665 or more.

Sen. Edward M. Kennedy, D-Mass., said in a last-ditch appeal for support:

"The Senate has taken one short of the two-thirds needed to pass the bill over presidential objections."

Eleven Republicans joined 55 Democrats in opposing Bush.

Sen. Rudy Boschwitz, R-Minn., who originally opposed the bill, supported the override.

The sharpest clash came over intricate provisions that would have made it easier to win discrimination cases against employers. Bush countered that those forms were harsh that employers would adopt hiring quotas to provide themselves with a ready-made defense if they were taken to court.

THE SHARPEST CLASHES WILL BE OVER THE FORECASTS OF THE HOUSE AND SENATE AS THEY TRY TO REACH A COMPROMISE ON THE BUDGET.

Democrats said they abandoned their demand for a 7.5 percent surtax on people earning more than \$41 million yearly after Bush made it clear he would never accept that demand.

EVEN WITH THE PLAN, THE BUDGET GAP FOR THE FISCAL YEAR THAT BEGAN OCT. 1, WAS PROJECTED AT A RECORD \$250 MILLION. THE BUDGET IS EXPECTED TO TOTAL ABOUT \$1.2 TRILLION THIS YEAR.

THE DEFICIT REDUCTION PACKAGE WOULD:

Raise the 9-cent-a-gallon gasoline tax to 14 cents;

Impose a new 10 percent tax on expensive cars, private planes and boats, jewelry and furs;

Boothe the 1-cent-per-pack cigarette tax by 8 cents and increase levies on alcohol and airline tickets;

Increase the earned-income tax credit claimed by the poor;

Raise the wage ceiling, from which the 1.45 percent Medicare payroll rate is deducted from its current \$53,000 to \$125,000.

BESTOW BILLIONS IN TAX BREAKS FOR SOME BUSINESSES.

IT'S UNLIKELY THE CHANGES WILL BE APPROVED.

COME OFFICIAL IN TIME TO BENEFIT HUNTERS THIS SEASON. THE PROCESS OF RESOLVING THE HOUSE AND SENATE VERSIONS OF THE INTERIOR DEPARTMENT APPROPRIATIONS BILL COULD TAKE ANOTHER WEEK OR TWO, AND THEN THE MEASURE GOES TO PRESIDENT BUSH FOR SIGNATURE.

ONCE THE CHANGES HAVE BEEN APPROVED, FEDERAL OFFICIALS AND THE IDAHO DEPARTMENT OF FISH AND GAME MUST RESTORE REGULATIONS FOR HUNTING AT THE TWO SITES.

At Hagerman, the park service only began enforcing the hunting ban earlier this month because it lacked the manpower and money to do so previously.

Farm

Continued from A1

ed farmers might be hurt by some provisions, but said Congress was "driven by budget constraints and by the White House to approve a bill that President Bush would sign."

Another section of the House-Senate conference committee — reported adopted portions of a bill introduced by Stalling and West Virginia Rep. Rob Wise earlier this year. The bill advanced telecommunications and economic development Act is aimed at promoting partnerships between schools, universities, educational laboratories and local business communities to better take advantage of development opportunities.

The Stalling-Wise language provides a pool of grant money for economic development projects designed and administered by local governments involving the business and education communities.

This legislation will provide technical assistance and funding to improve the quality of rural schools, hospitals and businesses through access to affordable, advanced telecommunications services not now available in rural areas, Stalling said.

BOISE (AP) — The winning numbers drawn Wednesday night in the Idaho Super Lotto-Lotto America draw were 29, 38, 45, 52, 54, 59 (nineteen, twenty-five, thirty-eight, forty-five, fifty-four, fifty-four).

Estimated jackpot is \$2.2 million, lottery officials said.

Pollsters, politicians see less GOP support

WASHINGTON (AP) — Less than two weeks before Election Day, politicians and pollsters are reporting a nationwide drop in support for Republican candidates.

Enraged GOP Sens. Mark Hatfield of Oregon and Rudy Boschwitz of Minnesota are among those endangered.

"The bottom has dropped out," said David Keene, a Republican political consultant and conservative activist.

"In the last ten days Republicans have taken a nosedive," said Rep. Vin Weber, R-Minn.

Poll results that have Republicans nervous include these:

In Oregon, Democrat Harry Lonsdale leads Hatfield 50 to 44 in

the race for senator.

Democrat Paul Wellstone pulling

within 3 points of Boschwitz, who

insist their internal polls say it isn't

that close.

Sen. John Kerry, D-Mass., who

was looking like a possible victim of

virtuous anti-incumbent backlash,

holds a 14-point lead over Republi-

cans challenger Jim Rapaport. The

race was a dead heat in polls two

weeks ago.

Also in Massachusetts, a new

survey puts Democrat John Silber 6

points ahead of Republican William

Weld in the race for governor.

In Ohio, Democrat Tony Cele-

bazzi said an internal poll shows

him leading Republican George

Voinovich in the race for governor.

Independent polls have said Voin-

ovich was holding a double-digit

lead through most of the race.

Democrat Harvey Gant contin-

ues to lead Republican Sen. Jesse

Helms in North Carolina. The latest

survey put Gant's lead at 8 points.

Symptomatic of the siege mentality

among the Republicans was the

sudden shift away from President

Bush by candidates in his own party.

Nation**Briefly****Soviet Union agrees to join consortium**

STONY BROOK, N.Y. — The Soviet Union has agreed to join a consortium that hopes to build a large detector at the superconducting super collider in Texas, Stony Brook University officials said Wednesday.

The Soviets will contribute \$200 million to Impact-Texas, said Michael Marx, a physics professor at Stony Brook who is coordinating Impact's proposal. Others involved in the consortium are the Grumman Corp. and Martin Marietta.

Operation results in drug sweep

MIAMI — An operation dubbed "Southern Star" led to the capture of 3,743 drug suspects who were tracked across 32 states and through foreign countries, U.S. Attorney General Dick Thornburgh announced Wednesday.

Fugitives on state, federal and international charges from New Zealand to Bermuda were rounded up in the 10-week effort, along with \$5.5 million in cash and property and \$7.3 million worth of drugs, guns and other contraband.

Thornburgh said the sweep marked a new level of coordination between the U.S. Marshal's Service and 28 state and local agencies in the war on drugs.

Lovel Canal site sold to school board

BUFFALO, N.Y. — The company that created the Love Canal toxic-waste dump ignored its own employees' warnings and sold the filled-in site to a school board without explaining the dangers, a State lawyer charged Wednesday.

Also at the start of a trial over liability for cleanup costs, the president of that company's parent apologized for the problems the dump created. But a company lawyer argued it didn't hide conditions at the site. Hooker Chemicals & Plastics Corp. built the dump in 1942 and sold the land to the Niagara Falls school board in 1953.

Toxic chemicals eventually leaked into basements and backyards of a middle-class neighborhood built on the dump and made Love Canal a symbol of America's toxic-waste problems in the late 1970s. About 2,500 people fled their homes.

Senate approves foreign aid package

WASHINGTON — The Senate on Wednesday approved a \$15.5 billion foreign aid bill that includes a cut in El Salvador's military and debt forgiveness for El Salvador after an abortion controversy over the bill evaporated.

The Senate voted 76-23 for the bill, sending it to negotiations to work out differences with a House-passed version. Since last week, the measure had been stalled because of a dispute over whether to reverse a Reagan policy that bars U.S. aid to international population control agencies that offer abortion as an option.

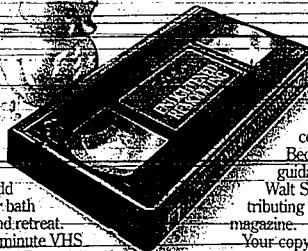

Souter has rapport with colleague

WASHINGTON — Supreme Court Justice David H. Souter apparently is getting along well with his new colleague Thurgood Marshall, despite Marshall's biting comment about Souter's appointment last July.

Justice Antonin Scalia, speaking to students at George Washington law school Tuesday, said Souter and Marshall have established a good rapport. "They have met and they're getting along. There's no reason they shouldn't. They're both very likeable people," Scalia said.

Dole first Bush Cabinet member to resign

WASHINGTON (AP) — Labor Secretary Elizabeth Dole, the first member of President Bush's Cabinet to resign, said Wednesday she was leaving for new challenges, not because of a perceived lack of influence at the White House.

Mrs. Dole, the highest-ranking woman in the Bush administration, said that after 25 years of government service, she was looking forward to her new job as president of the American Red Cross.

She denied reports that she had been frozen out by White House policy-makers. Aides and union leaders have said she had little input at Bush's Cabinet table, and many labor policy decisions were left to chief of staff John Sununu.

"I can't say right who was saying this.... Most definitely, I feel very much a part of the circle that's making the decisions here at the White House," Mrs. Dole said after announcing her resignation with the president at her side.

Mrs. Dole, wife of Senate Republican leader Bob Dole, also denied she might use the Red

Cross position to try to countervail for some term political goals.

"I'm on my way to the Red Cross. I have no plans to run for anything," she said.

Bush said Mrs. Dole had "earned the respect of the American people" and as secretary of Labor has made the workplace safe, healthier and more secure.

Mrs. Dole, 54, said the choice of her successor was "up to the president." What she

President and I have discussed, I think, has to remain between the two of us, but that is his decision, obviously."

Four women are among those who have been mentioned as possible successors. They are Constance Newman, head of the Office of Personnel

Management; Rep. LeAnn Martin, R-Ill., who she lost her bid for in the Nov. 6 election; Elaine Chao, who holds the No. 2 job at the Transportation Department; and Connie Horner, an undersecretary at the Health and Human Services Dept.

She said she made her decision now, even though the Red Cross vacancy has been open for some time, because the organization's board meets this week. "It's very important that they have their president in place as they look to the new year. It was now or never," she said. The Red Cross job pays \$185,000 a year. Cabinet secretaries make \$59,400.

As labor secretary, Mrs. Dole offered few new initiatives. Some union leaders argued that she was limited by what they perceived as a pro-business administration. Others criticized her "low profile" within the administration, citing last year's debate on the minimum-wage bill when they say, Sununu — not Mrs. Dole — took the lead role.

Senator Gore seeks curbs**on genetic test standards**

WASHINGTON (AP) — Congress should safeguard workers' rights before employers begin widespread screening for genetic diseases, Sen. Albert Gore Jr., D-Tenn., said Wednesday.

Gore released a report by the Office of Technology Assessment which showed that few U.S. companies now require genetic testing of their employees and applicants. But he said Congress should move now, before the practice becomes more widespread, head off discrimination against workers on the basis of genetic characteristics.

"To a large extent there are few clear guidelines on how these tests can be used or how workers can be protected from having their rights violated," said Gore, who requested the report.

Genetic screening can help save lives by alerting an employer to a worker's susceptibility to a particular

occupational exposure, the report noted. But it expressed concern that employers might deny jobs to anyone whose test shows they are at risk of genetic disease and could prove a burden to a company's health insurance program.

Genetic tests are available to detect sickle cell anemia, cystic fibrosis, Huntington's disease, hemophilia, Duchenne muscular dystrophy and other diseases. Future tests could screen for such things as hypertension, dyslexia, Alzheimer's disease and cancer, the report said.

The OTA's 1989 survey of the nation's 500 largest companies produced responses from 330 companies. Twelve reported current use of genetic monitoring or screening and eight others said they had conducted these tests at some time since 1970.

Briefly**South Africa offers new political model**

JOHANNESBURG, South Africa — The government offered a model for a new political system Wednesday, proposing a two-chamber parliament that would allow some black rule but preserve substantial power for whites.

The report by the President's Council, a body controlled by the governing National Party, could serve as the basis for the white-led government's bargaining position in planned negotiations on a new constitution. President F.W. de Klerk has called for negotiations with black and white opposition groups on a new constitution that would end apartheid and give the black majority national voting rights.

Bhutto party trailing right-wingers

ISLAMABAD, Pakistan — Former Prime Minister Benazir Bhutto's party was trailing her right-wing opponents Wednesday as early returns from parliamentary elections widely viewed as a verdict on her ouster.

The balloting was marked by violence and accusations of舞弊 (cheating). Election officials said the turnout was high. Ms. Bhutto and the army-backed centrist government of Vice-President Zia ul-Haq denied allegations. Late Wednesday, unofficial results from the Federal Election Commission indicated Ms. Bhutto's opponents had won five seats over candidates from her Pakistan People's Party.

Hindu, Moslem clashes leave 29 dead

NEW DELHI, India — At least 29 people were killed Wednesday in clashes between Hindus and Moslems, and Prime Minister V.P. Singh said he will seek a vote of confidence to see if his government can survive.

The deaths came during a nationwide strike called by the right-wing Hindu party, whose defection has jeopardized the future of the Singh government. Singh said his minority centrist government would survive despite the loss of support from the Bharatiya Janata Party. But other members of the prime minister's Janata Dal party were less optimistic.

Soviet national trade union to dissolve

MOSCOW — The 70-year-old Soviet national trade union organization voted Wednesday to dissolve itself and to form a voluntary association of unions, the state news agency Tass reported.

The meeting in Moscow coincided with a congress of miners occurring in the Ukrainian city of Donetsk to form the nation's first independent trade union. During their weeklong conference the miners plan to consider a national strike to enforce their economic and political demands. The congress is an outgrowth of the nationwide coal strike that gripped the country in July 1989.

With President Mikhail S. Gorbachev in attendance, 2,500 delegates to the Central Council of Trade Unions meeting in Moscow voted to end the council out of existence and formed an alliance of industrial and regional unions, Tass said.

Compiled from wire service reports

Violence leads to fears, economic distress

JERUSALEM (AP) — Tractors stood dusty and idle at a Jerusalem construction site Wednesday, and a nervous Jewish shopkeeper kept a steak knife near his cash register.

The scenes revealed an Israeli suddenly fearful of the Arabs in its midst after a wave of attacks on Jews. The violence prompted the government to adopt the unusual tactic of sealing off the occupied territories.

Roadblocks kept Palestinians from the West Bank and Gaza Strip out of Israel, while police swept out those left behind. Tel Aviv police said they fielded more than 1,700 calls from Israelis reporting on the presence of Arabs who should have stayed at home.

The scenes, ordered by Defense Minister Moshe Arens after a wave of Arab-Jewish clashes, virtually removed the backbone of Israel's blue-collar work force and disrupted many industries.

Most Israelis, still shaken by the violence, were not sure the ban would work.

"People are afraid," said Charlie Maman, a grocer in Pisgat Zeev, a Jewish neighborhood wedged between two Arab districts of Jerusalem.

He showed a visitor the steak knife he put next to his cash register. "This is only a minute—not to kill," he added.

Arab knife and hammer attacks have killed three Israelis and injured eight more in the past four days.

On Tuesday, an Arab was killed by gunshots in an apparent vengeance attack, and another who stabbed and injured two unarmed soldiers was beaten in the hospital Wednesday.

The atmosphere of communal violence elicited a despairing reaction from Zahar Shemesh, a Jerusalem clothing store owner. "What are we going to do, close them off? What will that work? The solution is to get out of here, to go abroad."

Police Minister Roni Milo said he hoped the closure of the territories would vacate some of Israel's more than 100,000 Arab-held jobs for Soviet immigrants. "Let's not be ashamed that we want Jewish labor in the state of Israel," he told Parliament.

Many construction sites, stripped of their Arab work forces, were almost idle. Ironically, they included housing projects being built for Soviet

immigrants, who are pouring in at a rate of 20,000 a month. Aharon Sapir, deputy president of the Construction Union, said the situation was grave. "We need a quick solution because the need for housing is urgent both for the immigrants and the population, and we don't have the workers who can build," Sapir said in an interview.

Professor Moshe Asimyomov of Tel Aviv University said that banishing the Arabs would create an "unsettling atmosphere" and damage industry, agriculture and construction, but not irrevocably.

Israel says the ban is for a few days, until passions cool. But if it becomes permanent, Asimyomov said, the jobless Arabs "will oil the wheels of the interface, the 34-month-old Palestinian uprising."

Many Arabs complained that they were being penalized for the violence of others. "This is sheer starvation," said Shlomo Saad, head of the Workers Union Federation in the West Bank. After Israel captured the West Bank and Gaza Strip in 1967, it opened its borders and Arabs became an inexpensive work force of street sweepers, garbage collectors, waiters, cooks and construction workers.

165 deaths disclosed in past Soviet launch

MOSCOW (AP) — An army newspaper revealed Wednesday that 165 people—including a top general—were killed 30 years ago when a rocket exploded on the launch pad, making it the worst known space-related accident in the Soviet Union.

Secrets have shrouded this incident at the Baikonur Space Center ever since the explosion shot flames into the Central Asian sky on Oct. 24, 1960. No official death toll or technical details of the accident have ever been released, despite several articles describing the event.

A monument to the victims lists only 54 names and published obituaries claimed that Field Marshal Mitrofan Nedelin, commander in chief of the Strategic Rocket Forces, died in an unrelated airplane crash.

The Red Star newspaper reported on the accident's 30th anniversary Wednesday that "the tragedy at the cosmodrome caused the deaths of 165 people."

James Oberg, an American expert on the Soviet space program, said Western observers estimated the death toll to be as high as 300. He said in an interview from his Houston home that many victims were immediately shipped back to Moscow for burial.

Police to braid hair

OTTAWA (AP) — Native Indians in the Royal Canadian Mounted Police will be allowed to wear their hair in braids while in uniform, Commissioner Norman Inkster said Wednesday.

Inkster said in a written statement he wants to ensure that native people are free to pursue a career with the force "without giving up their traditional spiritual needs." There had been months of debate within the force—and among native groups—on whether braids were an Indian tradition or a religious symbol.

The newspaper said the rocket was a new design, and Oberg said he believes it was a new type of missile. He said space officials told him the explosion came after the first stage failed to ignite, and technicians tried to replace one component.

"Somebody plugged an umbilical cord into the wrong connection," igniting the second stage, Oberg said.

The flames caused fuel trucks to burst into fire, unleashing fireballs.

People in the vicinity "just burst into flames like candle wax," he said.

The Red Star account said the explosion was caused by an "unnecessary sequence of events" in carrying out one of the operations while the value of the second stage were opened, starting the engine.

The newspaper said the rocket's launch was repeatedly delayed "for technical reasons," including leaking fuel. It quotes Stanislav Pavlov, then chief of the launching group, as saying a few drops of fuel burned holes in technicians' rubber gloves when the rocket's joints and tubes were checked for leaks.

World**Briefly****Burma military crackdown continues**

RANGOON, Burma — The military government raided monasteries and rounded up opposition leaders in an escalating crackdown on dissent, sources said Wednesday.

A dozen members of the opposition National League for Democracy were arrested Tuesday night after authorities searched its headquarters and district offices in Rangoon, party members said on condition of anonymity.

The League overwhelmingly won a national election in May, but the 2-year-old military government led by Gen. Saw Maung has arrested its leaders and refused to turn over power.

The arrested League members included four members of its central executive committee. Also arrested were a member of the party's general work committee, two divisional leaders, and five youth members of the party, the sources said.

Chinese find new remains of Great Wall

BEIJING — Archaeologists have found a new section of China's famous Great Wall, extending its eastern boundary more than 600 miles to the border with North Korea, official reports said Wednesday.

The reports in the English-language China Daily and in the Beijing

Daily said the finding coincided with historical records.

Chinese archaeologists conducted a field survey from February to July in northeast China's Liaoning province, where they found remains of the wall, including 12 beacon towers, important tablets dating back to the 14th to 17th centuries, ceramics and weapons, the reports said. The new section adds another 644 miles to the wall, which previously was said to be 3,700 miles long.

Bangladesh protesters, police clash

DHAKA, Bangladesh — Protesters campaigning for the president's resignation clashed with police and government supporters, leaving 300 people injured, news reports said Wednesday.

Violence broke out Tuesday at opposition-sponsored protests in at least 25 of Bangladesh's 460 rural districts, according to the United

News of Bangladesh and the Sangbad newspaper.

The demonstrations outside Dhaka, the capital, were intended to broaden the opposition's campaign for the resignation of President Hussain Muhammad Ershad and a general election under a caretaker government.

Plutonium leak discovered near Paris

PARIS — Concrete drums containing nuclear waste have leaked plutonium into the ground near an area where hundreds of children play each day, a newspaper reported Wednesday.

The daily Le Parisien said the discovery of plutonium in soil samples shows there is a radioactive threat to residents of Saint Aubin-a-town on the outskirts of Paris.

But the official Atomic Energy Commissariat, in charge of France's nuclear program, said the plutonium discovered measured well below minimum danger levels. Le Parisien reported that an independent German scientific team from the University of Bremen conducted random samples on about 9 pounds of soil gathered near the site.

French demand more education funds

PARIS — Thousands of high school students across France joined marches and rallies Wednesday, demanding that the government spend more on education and combat a wave of campus violence.

At least 5,000 students participated in the largest march, in Paris. The youths walked through a light rain to the National Assembly, some carrying banners that said: "End rape, theft and racketeering."

The recent surge of crime at high schools has included the rape of a girl in a school lavatory, assaults on several teachers, and cases of extortion.

Cuban plane with 31 aboard crashes

MEXICO CITY — A Cuban passenger plane with 31 people on board crashed near an airport in eastern Cuba Wednesday, two news agencies said. One of the reports said no one survived the accident.

The Soviet-made turbo-prop went down near the Antonio Maceo Airport in Santiago de Cuba, a provincial capital, the official Cuban news agency, Prensa Latina, said.

The report said the number of dead and injured had not been determined. However, the official Mexican news agency Notimex reported from Havana that no one survived the crash.

Gulf**Inventiveness makes life bearable in desert**

IN EASTERN SAUDI ARABIA (AP) — Soldiers in the desert find creature comforts any way they can. A water bag is turned into a shower; a 35-gallon drum and a block of ice convert it into a cool seat. An overturned stretcher is a cool table...

They may have no choice about being in a scorching desert, but the troops try small touches to make their hard-scrabble home as comfortable as possible...

"This is either the world's biggest beach or the world's biggest ash tray," said Pvt. Scott Tenhagen, 19, of the 92nd Field Artillery.

"We're waiting for our grass to grow, but since we don't have a lawn mower, we hope it doesn't," Tenhagen, of Burlington, Ky., said from his tent.

The division, normally based in the arid lands of central Texas at Fort Hood, has been encamped in Saudi Arabia's fierce desert for 10 days. The 2nd Platoon calls its area "Six Flags Over Saudi Arabia," although it hardly looks like an amusement park.

The olive-colored military tents are one of the few green things sprouting from a tortured landscape that supports only the hardest camels, goats and sheep.

"These guys really know how to adapt. They'll do anything they can to make life a little easier," said Lt. William Moore, 23, of Orange County, Calif.

The platoon has erected wooden mail boxes outside their tent flaps. Inside, a section of canvas serves as wall-to-wall carpet to cover the

Army Sgt. William Carter retrieves water from makeshift cooler. Gear is stored in cardboard boxes that once contained food rations.

— For recreation, the soldiers have a football, a volleyball court and ping-pong cards.

Nearby, the group has created a shower—with a water bag hung from a tent pole and protected by two ponchos. A couple of planks serve as a floor.

There is also training to keep them occupied...

One morning, the battery practiced setting up two multiple-launch rocket systems. The system uses radar to track incoming shells, then plots the trajectory back to its source so a rocket will hit it.

The system is touted as faster, deadlier and more accurate than conventional artillery. Each system can fire 12 rockets in 36 seconds.

U.S. embassy in Kuwait digs well for water

WASHINGTON (AP) — The U.S. embassy in Kuwait has been able to overcome a water shortage from a surprise source: a shallow well dug in the back yard.

Iraqi occupation forces shut off the water at all embassies in Kuwait two months ago in a bid to force them to close down. The U.S. embassy is one of a few that have remained open.

U.S. Ambassador Nathaniel Howell told Secretary of State James A. Baker III by telephone on Wednesday that the backyard well tapped into some brackish water which has been used for long overdue baths and to clean clothes.

"To show the Iraqi guards that they can manage and are very resourceful, they washed their cars," Baker's spokeswoman, Margaret Tuvalier, said.

She said the discovery was a relief because it enabled the embassy to conserve drinking water.

In addition to water, the Iraqis also have shut off electricity. The embassy has been using a generator as an alternate power source.

The United States has kept the embassy open as a symbol of its non-recognition of Iraq's annexation of Kuwait. Iraqi guards have prevented embassy personnel from leaving or entering the embassy grounds since Aug. 24, the deadline for all embassies to shut down.

The British and the French embassies also remain open, but other countries have been forced to withdraw their diplomatic personnel because of the deteriorating living conditions.

Soviet: U.S. should use restraint in gulf

SALT LAKE CITY (AP) — The United States must avoid being "trigger-happy" in the Middle East and should "think four times over before pulling the Colt out of the holster," said Soviet broadcaster newscaster Joseph Adamov.

Adamov, a longtime radio and television anchor, held a civic gathering Tuesday that Saddam Hussein's Iraq can be "shocked economically through blockades."

He said the Soviet Union is willing to join the United States in an armed conflict if doing so "is the decision of the U.N. Security Council and we go in under the U.N. flag."

Until then, "Holster that Colt," said Adamov, who was educated in the United States.

2 contested District 24 races make for difficult decisions

Only two of six races in Legislative District 24 are contested this year, but the voters will have some tough choices.

For Senate Seat B, Lynn Tominaga of Rupert is being challenged by Rupert farmer George Grant, who despite a late start is mounting a formidable challenge to the three-term Republican incumbent.

For House Seat A, Albion rancher Jim Kempton, a Republican, and Oakley farmer Mike Cranney, a Democrat, are running an extremely close race to succeed First Dist., who retired this year after 20 years in the Legislature.

Sen. Denton Darrington, R-Declo, Rep.

Bruce Newcomb, R-Burley, and Rep. Steve Antone, R-Rupert, have no general election opponents. First-term Rep. Maxine Bell, R-Jerome, was being opposed by Democrat S. Dean Higgins of Burley, but he withdrew last month. His name, however, will appear on the ballot.

Here are our recommendations for the district's two-contested races:

Senate Seat 24B: George Grant

This is a contest between one of the Legislature's fastest-rising young Republicans and his neighbor, a former president of Idaho Sugar Beet Growers Association.

In six years in the Senate, Tominaga has become majority caucus chairman and vice chairman of the influential Senate Resources and Environment Committee.

Grant, a former Minidoka County Farmers Home Administration committee man who homesteaded in Minidoka County in the 1950s, got into the racing ring of Congressmen Richard Stallings. It's his first foray into elective politics.

Tominaga has distinguished himself in the Senate leadership, but the issue in this race is representation. We think Grant has the edge in that respect.

While Tominaga has been dealing with other legislators, Grant has been listening to his constituents.

He is by nature conservative, but reasonable. He would have opposed House Bill 625, the measure that would have imposed the nation's most restrictive anti-abortion legislation on Idaho, and he thinks all of the Magic Valley should share the cost of the College of Southern Idaho.

But at the same time he's a fiscal realist. He thinks the cost of fixing Idaho's monumental road problem is probably going to have to come in large part from user fees, not from the taxpayers, and he is opposed to expanding the state's higher education system to more than Idaho can support in lean financial years.

From a political standpoint, he is one of the most electable candidates the Democrats have fielded in a long time in the Magic Valley. Grant and candidates like him go a long way toward restoring the two-party system in this area.

Tominaga is a capable, intelligent and knowledgeable young man, but he needs

to pay more attention to legislative business. His error on legislation to provide \$70,000 for smoke reduction research in the Snake River Plain Airshed is an example.

Southern Idaho got \$40,000 instead, which was enough to start the study to measure the potential impact of grass burning on the valley's air quality but far from the \$140,000 the Legislature originally allocated for northern and southern Idaho.

We'd like to see what Grant can do.

House Seat 24A: Jim Kempton

It's been years since there has been a matchup of candidates in this valley of the caliber of Kempton and Cranney.

Kempton, an Albion native who retired from the Air Force 10 years ago to become a cattle rancher, has an impressive resume: former assistant professor of physics at the U.S. Air Force Academy; former Air Force flight instructor; former assistant to the U.S. secretary of commerce. Since returning to Idaho, he has

served on the Minidoka Development Commission and the Mini-Cassia Jail Commission and as campus coordinator for the Albion Centennial Commission.

Cranney, who was president of the National Potato Council in 1989, is a member of the executive board of the NPC and has served on its steering committee for 10 years. He is a member of the Idaho Potato Commission, served as a water district committee man and was a flood control district director.

Both are moderate conservatives who understand Idaho's need for an improved education and the limits of its ability to pay it.

Kempton's advantage is that he has a grasp on the issues facing rural Idaho that few others, inside or outside of the Legislature, can command. He genuinely understands tax law, water law, environmental law, land use policy, the financing of medical-indigency and rural-economic development. His claim that he could legitimately sit on eight of the 14 standing committees in the House is probably accurate.

Cranney has more experience dealing with state, county and local government. He understands how politics works in rural Idaho, and he knows his district, from Jerome to the Utah border, probably as well as anyone. He'd make a terrific legislator.

Whether it's Kempton or Cranney, District 24 can't lose. But it will be hard for the voters of District 24 to turn down a candidate of Kempton's extraordinary background.

Going into his first session, Kempton might already be one of the dozen best-qualified lawmakers in the state.

Letters

Rap music degrading to women

I am writing this letter in response to the letter over the rap group, 2 Live Crew.

I've listened to the tape, "As Nasty as They Wanna Be," and have come to see an issue which I view as being much more insidious and harmful than the pointless repetition of their limited and offensive vocabulary.

That issue is the total degradation and assault of dominance over women, whose existence apparently serves no purpose other than the gratification of these male victims of testosterone poisoning. In addition to numerous references to force is a lot of name-calling of women (words which certainly couldn't be printed here), leaving no doubt as to what they are regarded by these men.

It's easy to see why many groups are protesting, but what about you women out there? It's a sad day when our supposedly enlightened and liberated country buys into this blatant woman bashing! Is this what you want your sons and daughters to believe about themselves and others?

What's most frightening is that this underlying attitude is one that is too often fostered by our culture in which all things feminine are seen as sources of shame and weakness and generally deviant. Can we not expect and receive respect for our natural femininity?

As a man-hating-to-this-group, I think my reaction would be one of embarrassment and anger that this sick and hateful portrayal

of masculinity is being sold to the next generation.

Speaking of which, parents: How about talking with your kids about these issues? And teenagers and young adults – are you willing to look beyond what may be enticing and popular and look at the real issues before this kind of music gets into your head?

Let's work together for a health sexuality which regards each person, male and female, to be worthy of honor and respect.

CONNIE COPPS SINCLAIR

Two Falls

Bicycle riders, exercise caution

This is the time of year that is extremely dangerous to bicycle riders. There is not enough sky light for a motorist to see clearly and yet kids can be playing on their "wheels" in the early dusk. Extra caution is called for and most people do practice that.

Why I'm writing this is because I see so many bicyclists riding on the wrong side of the roadway. Parents tell them that they must walk facing traffic on the streets – even lead them to school that way; but when they are on their bicycles, it is a different story. All wheeled vehicles are required by the laws of Idaho to stay with the flow of traffic. Motorists have an obligation to the bicycle riders and that is to give them the right hand lane and use extra caution in passing them.

Most motorists know these rules and don't try to be rude and crowd the two-wheeler off

the road. I would strongly advise all parents and everyone else to pick up a copy of the Idaho Drivers Manual before you say that you will always do it this way and lose a child this way. If your child was riding the wrong way and was the cause of an accident, he might be held responsible.

This should be taught in the schools.

WILLIAM A. MANSFIELD

Twin Falls

Support Robbins in November

If you are a skilled practitioner – well-established and performing a valuable service to many, should you abandon what you do so well? It is my opinion, the good doctor should remain a doctor. That is Dr. Russ Newcomb at the Twin Falls Clinic and Hospital, who is seeking to become state senator in the 25th District. The question is, can he give adequate attention to both positions?

Would it not be wise to elect someone who would give full and undivided attention to his position as a state senator in the 25th District? That is Gary Robbins – tried and tested, firm in what he believes as fine-tempo steel drum and open-minded in his line of communication for all of us. Gary has served as our state legislator with a plus

for the last 10 years. He is a CPA, knows taxes and fees with a fair responsibility in our interest. In business, he's been there – he wants to stimulate strong economic growth for our state.

As for education, he addresses adequately

funding, decent pay for our teachers, etc. In my home town, Farmer, he knows the plight of the farmer, and remember, he will never forget you.

There are, for women, some deep and personal rights the state should not interfere with.

JEANNE SCHLAGENHAUF

Twin Falls

Republicans back only the rich

In the 1920s and '30s, there were two classes of Americans – the rich, called Republicans, and the poor, called Democrats.

Then came the 1940s, World War II, full employment, migration of a large segment of the poor to areas of good jobs and a higher standard of living.

This was the beginning of the middle class of Americans making good money and the ability to buy nice cars, houses, furnishings, clothes, etc., after the war was over.

This did not sit well with the rich because for the first time in their history, they had to rub shoulders with the middle class.

Something had to be done about this situation, so the Republicans set out on a plan to eliminate the middle class status and return to the good old days.

They have succeeded and good old

Eisenhower, a popular figure who would make a good figurehead and not interfere with the professional politicians. They could expand the military/industrial complex to make as many more millionaires as possible

and keep Ike in the closet to come out only when they wanted him to say "yes" or "no" and then show him where the golf course was.

Some gains were made in reducing the number of middle class but it wasn't going as fast as the Republicans wanted.

DAVID R. DAVIS

Twin Falls

McDevitt ads are misleading

It is rare that a citizen of the Magic Valley can say that a Republican candidate is desperate. I believe it is safe to say that Sean McDevitt is desperate.

His current television ad, which shows a sweet-looking grandmother type and a pretty little girl, demonstrates his willingness to bully, exploit and deceive. The ad attempts to imply that Congresswoman Rosalynn Cragg is pro-abortion and irresponsible. Parading these two people in front of a camera and giving such a fat-fetched and cruel message can also be considered pornographic. The ad is closed with the lady saying: "Shame on you, Richard."

I close by saying to Sean, "Grow up and attempt to recover and maintain some semblance of dignity."

JOHN WALKER

Hixton

Now we have Bush and "What's his

name?" as vice president, and it seems the same old objective is still on the burner.

"I can't remember" Reagan arrived on the scene. He was not too smart on being president but terrific on making more millionaires and lowering the number of middle class. I think it was the "trickle-down" theory of giving the wealthy evermore money and a few pennies to the middle class and poor.

Let your voice be heard loud and clear in Washington.

Let's vote every incumbent senator and congressman out of office.

KURT HALVERSON
Twin Falls

Darrell deFabry misses meeting on highways

In a recent issue of the local papers, Darrell deFabry ran an ad stating his concern for Highway 75. On Oct. 9 in Twin Falls, a legislative committee held hearings to gather information on local highway needs.

The committee wanted to hear from the public. The Highway Department was there and so was Sen.

John Peavey, who drove the hour and a half to Twin Falls to testify on our behalf.

deFabry was not there. Why? Was he home designing his ads? Now concerned can he really be about our highway needs?

In every campaign, there is a lot of nasty stuff. But I caution voters to be careful. It is much easier to be a critic than to be a part of the solution. Sen. Peavey has always been there for us when we've needed him. Think about it.

LLOYD BETTS
Ketchum

Experiments on animals are not ethical or proper

A few days ago, I read an article about 825 beagle dogs whose radioactive bodies were packed in 50-gallon drums and were shipped from one of the university research centers in California to Hanover, Wash., for disposal. I can't believe this!

How could any group of people do this to any of God's innocent creatures? Who gave them the right?

I'm sickened to say when I think of how they must have suffered with radiation sickness and Lord knows what else. It is obvious that they were experimenting on them. In this age of computer technology, surely a way can be found to gain information without resorting to torturing or destroying dogs, monkeys or any other living thing.

The Bible says God gave us dominion over the animals, but I can't believe he meant us to abuse them.

believe there will be a judgement and if there is a hell, these people will burn for what they did.

I had this letter laying on my table by my chair and my little Siamese kitty cat left her claw mark on the envelope. Perhaps she was adding her protest also.

BETTY ELLIS
Buhi

deFabry ad uses picture without permission

I was very annoyed to see my husband in Mr. deFabry's newspaper advertisement and in his brochure. This picture was used without his permission and without his endorsement.

As a staunch supporter of Sen. John Peavey, I know he would never do anything as dishonest. Sen. Peavey has real respect for us. Mr. deFabry clearly does not!

LINDA LEGUINECHE
Gooding

Vote for Joyce McRoberts for District 23 senator

Incumbent Republican State Sen. Joyce McRoberts deserves your vote on Nov. 6, as she not only knows the issues of this campaign but is busy working on the numerous committees that will prepare her to assume a leadership role on the floor of the senate when the legislature meets again in January.

Her opponent says she won't discuss the issues; the fact is that she is already working hard on the issues of the next legislative session. Joyce is co-chairman of the Specialty Care Committee on Health Care. She serves on the Agriculture Board, the "Safe and Sound Work Act" and the Interagency Work Group. And she sits on the Juvenile Detention and the Juvenile Justice Committee. She serves on the Twin Falls Road and Bridge Assessment Committee and the Magic Valley Regional Medicaid Council Long Range Planning and the External Sub-Committee.

As an experienced, informed, dedicated legislator, my vote is for Sen. Joyce McRoberts for Legislative District No. 23 for state senator position A.

DONNA T. BRIZZEE

Disputes article by Owen on Oman, range policy

As a local rancher, I feel the truth should be told regarding the article by Wayne R. Owen in the opinion section of *The Times-News* Oct. 4 issue.

If Mr. Owen, who lives in Davis, Calif., would visit the rangeland in this area, maybe he would know what is going on. He would know why we are asking a hero out of Ranger Don-Oman for what is happening in armed deputies and state brand inspectors to count cattle at gathering of local ranch families. This incident was long before any so-called threat to Ranger Oman by Mr. Whiteley.

Regarding the incident with Mr. Winslow Whitley - let's remember Mr. Whitley is 80 years old and I doubt if a cut of cattle would put him under as Mr. Owen suggests.

If Ranger Oman has no friends,

among livestock people and a lack of support among go-workers, he has brought it on himself. There have been no serious problems with range conditions in the past twenty years insofar as prior rangers were concerned, nor is there a problem with expert grass specialists.

Ranger Oman is not a grass specialist. Grass is a rancher's livelihood and over-grazing is not in their best interest. Rangeland in this area is better than it has been in many years.

Mr. Owen states ranchers run the BLM; ranchers do not run the BLM or the U.S. Forest Service. Our advisory board is for advice only and has no say in any final decision.

Mr. Owen says the cattle industry has sought farm subsidies and has gotten them. Cattlemen get no government subsidies. He states that grazing is dirt cheap - about one-third the cost of administering the program; this is not bad considering the unnecessary spending of the U.S. government in areas that do not return the dollars to the economic well-being of a state that caters to ranching does. Also, with other activities on forest or BLM land pays it's way.

The fee paid by cattlemen for running livestock on public land is just a small part of the expense. Ranchers have full-time cowboys hired to distribute; to gather and to sort cattle; fencing, repairing and developing water facilities for the benefit of wildlife as well as cattle are all extra expenses not incurred with private pasture rental. The private landowner provides most of these services - private pasture is just that - private - and is not shared with any of the myriad of other users of our public lands.

Without grazing on public lands there would be many businesses hurt besides the family rancher that has been ranching in many cases for four or five generations. Apparently Mr. Owen doesn't consider this of any value. We know there will be a target when certain people trying to stop grazing on public land either through reduction in numbers or by pricing the ranchers out of business, but please consider that this is just a first step for some groups. There is already a movement gathering force to eliminate hunting on public lands who know what group will be targeted next!

WILLIAM J. WILLIAMS
Twin Falls

Anti-crime legislation ignores Bill of Rights

This is an open letter to Sens. Steve Symms and James McClure and Rep. Larry Craig.

I noticed where all of you sponsored Anti-Crime Bill S2245 and

grazing on public land either through reduction in numbers or by pricing the ranchers out of business, but please consider that this is just a first step for some groups. There is already a movement gathering force to eliminate hunting on public lands who know what group will be targeted next!

WILLIAM J. WILLIAMS
Twin Falls

Anti-crime legislation ignores Bill of Rights

This is an open letter to Sens. Steve Symms and James McClure and Rep. Larry Craig.

I noticed where all of you sponsored Anti-Crime Bill S2245 and

interested in speaking your mind about the election campaign? Better hurry.

Our deadline for election-related letters to the editor is Oct. 31.

That's next Wednesday. Letters must be received in our office by 5:30 p.m. that day.

All letters must be signed and must include the writer's address

HR4079 by Newt Gingrich of Georgia, who is not famous for America's First policies.

How many of your constituents know that what you did, in fact, was to sign away their "Bill of Rights?"

I suppose Larry Craig was too busy to answer my questions concerning this issue until after election day.

This bill could be used to invoke a state of emergency in the event of war in the Middle East. Those opposing will be "rounded up" (Americans included) and interned in concentration camps as were the Japanese-Americans of which some were my friends during World War II.

The two bills employ nearly the same identical language.

These bills are used as the guise of saying the U.S. justice system is failing. The "basic objective of protecting the innocent and punishing the guilty." Sounds great, but forget it! The bills define "violent criminals" as every person who is convicted in a federal court of a crime of violence... or a drug trafficking crime to receive a sentence of not less than five years. Now, this means if a thief, burglar, rapist or federal police (and in their case, without just cause) invades a person's property and the owner attempts to block their intrusion and protect his property, even with the "threat" of physical force, the owner could be charged with a "violent crime."

Self-defense would be banned and you would be put away!

The right to bear arms would become null and void if this bill is allowed to become law.

Remember, it is because of your Bill of Rights you people out there can enjoy what you're now doing.

If McClure, Symms and Craig have their way, you will not be having these same privileges for long. A clearing out of the House and Senate is long overdue!

E. M. BRODY

Twin Falls

Voting a straight party line doesn't make sense

There has been comment on my support for candidates in both parties. I have never been a party voter and will never be. I vote for the best person for the job, be that person Democrat or Republican. I do not believe I am different from most Idaho citizens. Anyone who votes a straight party line is saying they are not interested in individual issues. They will let the party do this for them. I am not willing to concede that decision to any party. I will not vote for a candidate who allows the party to tell him how to vote. I

voted for the candidate. I expect him to vote his conscience in the legislature, not how the party tells him to vote. Gary Robbins has definitely shown he has the guts to do this.

This year I will vote for Democrats Cecil Andrus, Richard Stallings and Gary Robbins. I will also vote for Republicans Laird Noh, Doug Jones and Pat Cole. I vote for these people because they are the best people for the job, not because of their party affiliation. I urge you to support them also.

LEO RAY
Twin Falls

Robbins commercials are insult to electorate

Gary Robbins current radio spots, as well as many of his political districts around the valley, are an insult to the political process. The well-informed will not be fooled by such tactics, however, just for the record.

Robbins claim: Dr. Newcomb resigned from the legislature.

Fact: Russ fulfilled his entire term; he did not fail to run again because he had three children in college at the same time.

Robbins claim: Dr. Newcomb voted against the INEL oversight by the state of Idaho.

Fact: Senate Bill 1266, Idaho National Engineering Laboratory Oversight passed March 27, 1989, when Russ Newcomb wasn't even a member of the legislature. However, his brother Bruce Newcomb voted in favor of the oversight bill. Mr. Robbins was absent for this very important and critical vote.

Robbins claim: Dr. Newcomb voted against gay marriage.

Fact: Senate Bill 1127, Child Care Licensing passed March 10, 1987, and Dr. Newcomb voted in favor of that bill.

Robbins claim: Dr. Newcomb voted against legislation that would require safe transportation of PCBs.

Fact: Senate Bill 1085, Hazardous Waste Bill (provides transporter to obtain certain permits prior to transporting PCBs), passed March 31, 1987, and Russ Newcomb voted in favor of that bill. Dr. Newcomb also

voted for House Bill 593, another hazardous waste bill which adopts rules and regulations more stringent than the Resources Conservation and Recovery Act which passed Feb. 25, 1986. Gary Robbins was absent once again.

Robbins claim: Dr. Newcomb voted against the Services and Child Abuse Center.

Fact: House Bill 365, Youth Services and Appropriation, passed March 30, 1987, when Russ Newcomb voted in favor of this legislation. Russ Newcomb also voted in favor of this same appropriation on March 24, 1983. Mr. Robbins voted "nay" on this appropriation.

So those of you that don't know the facts, he "Wary of Gary" for his record is one of deceit, distortion and complete dishonesty. Had he been a man and resigned when he decided to change political parties, most would have admired him and felt it to be a courageous act in favor of deep-seated political convictions.

By remaining on as a Democrat, he deceived his constituency and failed to follow through on his promises to them.

DAN OBENCHAIN
Twin Falls

Rep. Tom Morrison has outstanding record

It has been my pleasure to know and serve with Rep. Tom Morrison in this part-term in the Idaho Legislature. I want to tell you, he has shown knowledge of legislative issues pertinent to Idaho well beyond that expected of first-term legislators.

Tom hit the legislative ground running and as a result, gave District 22 veteran representation even though he was a freshman. It is both productive and enjoyable to work with someone with the common good sense that Tom Morrison brings to the Idaho House of Representatives.

I Idaho and District 22 need all the "Tom Morrisons" it can find. Please send him back.

Idaho**Candidates return to abortion issue in closing weeks of Idaho campaign**

BOISE (AP) — After playing second fiddle to other issues for months, abortion is back at center stage as Idaho's 1990 political campaign enters its final weeks.

Candidates in a number of legislative races, along with the Democrats' running for the U.S. Senate, and the 1st Congressional District, are airing more radio and television advertisements touting their pro-choice stand on the issue that seemed to energize thousands of Idahoans last spring.

The latest, and most intense, started airing statewide this week. In it, Democrat Ron Twilegar blasts Republican Congressman Larry Craig, favored to win the seat of retiring GOP Sen. James McClure, for his repeated support

of legislation banning abortion, even in cases of rape and incest, during a 10-year federal career.

The 30-second spot that will air until Nov. 6 says Craig "wants to turn the clock back for women" to the "days of illicit and usually physically dangerous abortions. It includes striking video of a woman in an alley and lines of coat hangers moving along a rack.

"From what I've heard, it sounds gruesome," Craig campaign manager Al Henderson said. "It'll be interesting to see how people will react to this."

Reaction is exactly what the Twilegar camp and the campaigns

of other pro-choice candidates are banking on.

Unlike past Idaho campaigns, abortion is not a back-burner issue and last-minute maneuvering does not appear to be coming from the anti-abortion camp. This year has seen a large number of candidates wearing their pro-choice stand like an armband and lines of coat badges of honor.

But the intensity of the thousands of people last March who rallied each night at the Capitol or telephoned lawmakers and Gov. Cecil Andrus to declare their pro-choice beliefs seems to have subsided after Andrus vetoed what would have been the nation's most restrictive state abortion law.

BOISE (AP) — Democrat Larry LaRocco pumped another \$50,000 into television advertising during the first half of October as his race for Idaho's 1st Congressional District against Republican Skip Smyser headed for the wire.

The campaign finance report for the first 2½ weeks of the month, filed Wednesday with the secretary of state's office, showed LaRocco spending more than \$100,000 in the final stretch.

Smyser, whose report was filed a day earlier, generated another \$34,000, a record for any Democrat in the Idaho district.

But he spent over \$79,000 in preparing for the final voter turnout, to draw down his balance below \$25,000 with three weeks to election day.

Smyser, whose report was filed a day earlier, generated another \$34,000 during the first part of the month to push total support for his

bid to \$367,000. Smyser's expenditures were \$10,000 below LaRocco's with only \$34,000 earmarked for television ads.

The infusion of cash by the Democrat into his advertising effort put him into the lead for commercials at \$166,000, about \$5,000 more than Smyser has purchased through Oct. 17.

Democratic Congressman Richard Stallings, favored to win a tenth term in southern and eastern Idaho over Republican newcomer Sean McDevitt, raised another \$30,000

during the period to push his financial support to nearly \$287,000.

Boise (AP) — The Idaho Supreme Court has ordered magistrates to open preliminary hearings in criminal cases to the public unless the accused shows his right to a fair trial would be prejudiced and no alternative is closing the courtroom can be found.

The 4-1 ruling in a case brought by Coulee Publishing Co. against Kootenai County Magistrate Peter Hutchinson applies the principles of a 1986 U.S. Supreme Court decision in California case to preliminary hearings statewide.

Most magistrates had been following the principles of that federal

court decision, but those in the northern Idaho's 1st Judicial District had been relying on a decision by District Judge Richard Magnuson that a state law allowed preliminary hearings closed simply at the request of the defendant.

"When a preliminary hearing is closed, the public is denied the opportunity to observe the criminal justice system at work and is denied the assurance that justice has been fairly and properly administered," the opinion written by Justice Larry Boyle said.

Joining Boyle were Chief Justice Robert Bakes and Justices Byron Johnson and Charles McDevitt. Justice Stephen Bistline dissented, maintaining there should be no greater right for public access to a preliminary hearing than there is for public access to grand jury proceedings, which are never open.

Preliminary hearings in Idaho are the functional equivalent of a grand jury proceeding, but the magistrate rather than the grand jury determines whether there is enough evidence to warrant a trial on the charges.

The court's decision came over the preliminary hearing for Joshua Frazier, who was accused of murder.

In addition to ordering the hearing

LaRocco, Smyser oppose tax plan

The Associated Press

wealthy Americans.

But Smyser, a five-term state legislator who had Vice President Dan Quayle in Boise last week to raise money for him, stuck to the anti-administration no-tax theme set by the man he wants to succeed, GOP Congressman Larry Craig, who is running against the deal to end the federal budget crisis.

But in their hour-long statewide televised debate, Democrat Larry LaRocco and Republican Skip Smyser justified their opposition differently, though both lashed out at the agreement's nickel increase in the gasoline tax.

"It is primarily a duty for us to say we don't need additional taxes in Washington," D.C., at this time," Smyser said. "Ultimately, it's going to be in the middle class that are going to share the overwhelming burden of this \$90 billion-plus tax increase that they're proposing."

Smyser stuck with the conservative clarion call for a budget freeze.

LaRocco adds to television advertisement spending

BOISE (AP) — Democrat Larry LaRocco, making his second bid for the congressional seat, added another \$65,000 to his campaign fund, pushing total financial support to

\$344,000, a record for any Democrat in the Idaho district.

But he spent over \$79,000 in preparing for the final voter turnout, to draw down his balance below \$25,000 with three weeks to election day.

Smyser, whose report was filed a day earlier, generated another \$34,000 during the period to push his financial support to nearly \$287,000.

Earlier in the week, McDevitt reported pushing financial support for his campaign to almost \$100,000, but that included a \$30,000 loan from his parents that his father has now determined was improper and must be repaid. His campaign treasury also includes a \$30,000 loan signed by himself.

Craig, who is leading all candidates in funds raised at nearly \$1.5 million through last week, reported receiving another \$6,000 in major contributions over the weekend to further pad his already huge money lead over Twilegar.

Boise (AP) — The Idaho Supreme Court has ordered magistrates to open preliminary hearings in criminal cases to the public unless the accused shows his right to a fair trial would be prejudiced and no alternative is closing the courtroom can be found.

The 4-1 ruling in a case brought by Coulee Publishing Co. against Kootenai County Magistrate Peter Hutchinson applies the principles of a 1986 U.S. Supreme Court decision in California case to preliminary hearings statewide.

Most magistrates had been following the principles of that federal

court decision, but those in the northern Idaho's 1st Judicial District had been relying on a decision by District Judge Richard Magnuson that a state law allowed preliminary hearings closed simply at the request of the defendant.

"When a preliminary hearing is

closed, the public is denied the opportunity to observe the criminal justice system at work and is denied the assurance that justice has been fairly and properly administered," the opinion written by Justice Larry Boyle said.

Joining Boyle were Chief Justice

Robert Bakes and Justices Byron

Johnson and Charles McDevitt. Justice Stephen Bistline dissented, maintaining there should be no greater right for public access to a preliminary hearing than there is for public access to grand jury proceedings, which are never open.

Preliminary hearings in Idaho are the functional equivalent of a grand jury proceeding, but the magistrate rather than the grand jury determines whether there is enough evidence to warrant a trial on the charges.

The court's decision came over the preliminary hearing for Joshua

Frazier, who was accused of murder.

In addition to ordering the hearing

closed, Hutchinson ordered records of the hearing sealed.

Cowles Publishing, which publishes The Spokesman-Review and Spokane Chronicle newspapers, appealed after its reporter was ejected from the hearing.

The high court majority held that the case was an excellent example of the need for public access to preliminary hearings as the final occasion for the public to observe the criminal justice system.

"When the preliminary hearing was concluded, the conspiracy count against Frazier was dismissed," Boyle wrote.

Magic Valley

Around the valley

Burley, group agree on access to city hall

BURLEY — A settlement has been reached between the city of Burley and a citizens group over handicapped access to the City Hall.

Fifth District Magistrate William Hart has approved the settlement that gives Burley until 1993 to resolve the problems, which include violations of state and federal access requirements.

The Idaho Citizens Network took such action as forming a human barricade across the City Hall steps and building the "Burley Wall" of cardboard boxes there to point out that wheelchair-bound residents could not enter the building to accomplish any business inside.

The city filed suit against the Network in 1989, admitting the building was not accessible, but adding Burley did not have the money to renovate it.

And until the city can remodel the steps, builds a new City Hall or relocates, Patti Reward of the Idaho Citizens Network said the settlement requires that all city council and zoning commission meetings be conducted in an accessible location.

Tenant takes up residence in business incubator at CSI

TWIN FALLS — The first tenant has moved into Magic Valley's business incubator, a building on the College of Southern Idaho campus designed to help infant businesses through their first few years.

Don Siplon, 60, a local technical writer, has taken up residence at the incubator. For the next few years, he will write manuals, such as employee guides, and tap the resources of the incubator to expand.

"One of my biggest problems is I don't know how to market," Siplon said. "I don't have any feel for how to market this service."

The incubator is housed in the Southern Idaho Development Center. Several economic-development programs are also in the building, which was funded by a variety of government entities and business contributions.

The incubator has been open since August. Incubator Manager Ron Black said two other businesses should decide soon whether they want to move in.

Legislative, county hopefuls meet voters in Hailey tonight

HAILEY — Legislative and county candidates will be on hand to meet with voters tonight during a forum that begins at 7 p.m. at the Old Blaine County Courthouse meeting room at Croy and First Avenue.

Candidates will each give short speeches and then take questions from the audience.

Larry Craig campaign bus returns to Magic Valley

BURLEY — The Larry Craig for Senate campaign bus comes back to the Magic Valley at the end of the week — but organizers still aren't sure whether the congressman will be on it.

Ongoing budget deliberations have kept the GOP Senate candidate in Washington, but campaign organizers hope he will join them when the Craig bus arrives in Burley Friday, where the congressman is scheduled to attend a Republican rally from 7:30 to 9 p.m. at Burley Junior High School, West 16th Street.

On Saturday, the campaign caravan will stop in Rupert, Dietrich, Shoshone, Richfield, Carey, Hailey, Ketchum, Sun Valley and Fairfield.

Craig is running against Democrat Ron Twining for the seat to be vacated by retiring Sen. James McClure.

The Stallings campaign caravan will come through Magic Valley today and Friday — again without its candidate.

Stallings' supporters plan visits in Burley this morning with stops in Jerome, Wendell and Twin Falls in the afternoon. On Friday, the Stallings crew will pass through Stanley, Butte, Haigman, Bliss and Glenns Ferry.

Republican Sean McDevitt is challenging Stallings for his 2nd District seat.

Judging the judges

Survey yields 'report card' on judges up for election

By Anita Dennis
Times-News writer

TWIN FALLS — They haven't been on campaign signs or bumper stickers; but the names of four of the Magic Valley's 11 magistrate judges will be on the November ballot.

To help voters learn a little bit about them — without going to court to deal with a traffic ticket — The Times-News this fall conducted a survey to assess judges' efficiency and competence. We present those "judicial report cards" and interviews with each judge beginning today.

But the attorneys who participated — and those who didn't — have mixed opinions about the usefulness of the survey.

The Times-News sent the survey to all 226 attorneys in the 5th District Bar Association and asked them to grade the four magistrate judges on a scale of "A" (outstanding) to "F" (as failure) in 12 categories. The magistrates who were graded are Charles P. Brumbach and R. Michael Redman of Twin Falls, Thomas R. Cushman of Gooding and Roy C. Holloway of Cassia County.

Attorneys were asked to not grade anyone with whom they are unfamiliar, and confidentiality was promised to protect their clients' welfare.

A total of 72 attorneys responded, for a return rate of 31.9 percent. Results were tabulated and averaged on a computer.

The survey is not a scientific study. It was modeled after a survey conducted by The Indianapolis Star in 1984. The Times-News last used it in 1988. Other newspapers most recently the Idahoan in Moscow, and the Idaho Bar Association have conducted similar surveys.

Asked their thoughts on the usefulness of the survey, 5th District attorneys expressed widely varying opinions.

Greg Fuller of Twin Falls did not complete it because, he said, "It isn't a valid result. It simply isn't valid."

Measures must be taken to make the survey "open, honest and objective," he said.

"A lot of these people (who respond)

About magistrates

Magistrate judges handle the bulk of trial court proceedings, so someone goes to court is likely to appear before a magistrate judge. Among other things, magistrates handle civil proceedings when the claim involved is less than \$10,000, probate, small claims, traffic, misdemeanors, juvenile offenses, adoptions, divorces, restraining orders and, finally, felony cases.

Judges are initially appointed to the bench. They serve four-year terms. Under the retention system, magistrate judges need a simple majority to stay on the job — 50 percent plus one vote.

If a magistrate fails to get the majority vote, which happens rarely, a commission comprised of eight county commissioners, three mayors and two governor-appointed citizens choose a new magistrate.

There are 11 magistrates in the 5th Judicial District; four are on the ballot this year, and the other seven will be up for retention in 1992.

have an ax to grind. It's almost like the fox watching the chicken coop," Fuller said.

Those with something good to say don't respond, Fuller said. To prevent negatively skewed results, the survey needs to assess if and how often attorneys who respond appear before the judges. And the survey shouldn't be anonymous, at least to the newspaper, because the judge has no way to respond.

"It's almost unconstitutional. It just reeks of that," Fuller said.

Twin Falls County Prosecutor K. Ellen Baxter agreed that the results are invalid and "unnaturally skewed" — but that's exactly why she always completes this type of survey.

Brumbach is happily unpredictable

By Anita Dennis
Times-News writer

TWIN FALLS — Fifth District Magistrate Judge Charles P. Brumbach is not bothered that attorneys find him — frustratingly unpredictable.

"Good," he said in a recent interview. "I don't think a judge should be predictable because that means he's prejudged."

Brumbach, a Twin Falls County magistrate judge who is up for retention by voters next month, defended his one C-plus grade, for temperament and courtesy, by attorney in a recent Times-News survey. Fifth District attorneys were asked to grade the four magistrate judges slated for retention in a dozen categories from courtroom presence to legal knowledge.

"All are judges which are worth retaining," one attorney commented. "Judge Brumbach is the most frustrating to lawyers because he is the most unpredictable."

Brumbach received an average overall

grade of B from the 60 who graded him. He scored highest with a B-plus in keeping case flow moving and making rulings promptly.

His lowest score, for temperament, is not a negative reflection of his abilities, the judge said.

"Emotions are intense, stakes are high, egos in the courtroom are sensitive and I'm not there to be most loved."

Moreover, attorneys judging judges is not pot calling the kettle black," he said. "No one has a bigger ego, no one has a

more sensitive temperament than a trial attorney," Brumbach said. "When they come into the courtroom, to expect a judge to react with kid gloves to a controversy that is rooted in distressing emotions is silly."

On the bench, Brumbach said, he tries to live up to the promises he made when he took the job: to make legal, not politically popular, decisions; to be practical, fair and exercise common sense, and to take the job very seriously but "take myself with a grain of salt."

But one attorney who responded to the Times-News survey questioned whether Brumbach succeeded.

"I fear that Judge Brumbach enters to public opinion in drunk driving cases, thereby favoring the prosecution-unfairly," the attorney wrote.

If he is still driving under the influence cases, Brumbach said, "Good."

"Virtually all first-time offenders are placed on probation, the judge said, and he praised the county's probation officers for

Moon continues battle to regain job from Edwards

By Michelle Cole
Times-News writer

TWIN FALLS — After fulfilling her duty as featured speaker for the Twin Falls County Democrats' end-of-the-summer picnic, Marjorie Ruth Moon wrapped a lifetime of volunteerism and headed west to her Boise home.

It was the last campaign appearance Moon would make this election year.

Early the next morning, she summoned paramedics. By midday Moon, underwent surgery for a ruptured aorta.

Ill health forced Moon to sit out September. Many counted her out of the state treasurer's race. But a deep-rooted desire to return to a job she held for 24 years prompted Moon to keep her name on the ballot.

If campaigning from her living room hasn't been frustrating for Moon, it's been no picnic either for her Republican opponent Lydia Justice-Edwards.

No face to face debates

During Moon's convalescence, Edwards insisted that she intended to run her campaign as planned.

"Very little distracts me," said Edwards, who was elected state treasurer in 1986. She is the first Republican to hold the job in 33 years.

But in a later interview, Edwards confessed that she is a little frustrated about doing the "legwork" for both herself and her opponent.

Even more frustrating was the fact that Edwards couldn't afford to hold off her

Lydia Justice Edwards

Age: 53

Born in Carter County, Ky. Graduated from Pritchard High School in 1955. Attended San Francisco State and the University of California.

Her professional experience includes work as an assistant to Alaska Gov. Walter Hickel and accounting work for a San Francisco manufacturing firm.

She served four years in the Idaho House of Representatives, 1982 to 1986. Edwards was elected to the state treasurer's office in 1986. She was the first Republican elected to that office in 33 years.

campaign until she had a "clear picture" of her opponent's health. A June poll showed Moon with higher name recognition than Edwards. Not only did Moon serve more than two decades as state treasurer, her mother — another Moon — held the office in the '40s and '50s.

Awkward though it may be, Edwards had

Marjorie Ruth Moon

Age: 64

Born in Pocatello. Graduated from Pocatello High School. Attended Pacific University, Forest Grove, Ore. for two years before transferring to the University of Washington. Graduated with bachelor's degree in journalism.

Moon owns weekly newspapers in Idaho. She served as state treasurer from 1986 to 1988 when Moon resigned to run for lieutenant governor.

She returned to her newspaper work after losing the race to Republican Butch Otter.

Moon puts her interest earnings closer to \$212 million during her 24-year tenure.

Either way, Edwards maintains she generated more interest income. Moon said Edwards was able to work with "huge surplus" for the past three years.

Despite her letter complimenting Moon, Edwards said that when she took office, she found Moon's budget a mess — peppered with hidden costs that should have been reflected in Moon's dealings with the Legislature.

That charge is backed up by state Sen. Atwell Parry, R-Melba, who serves as co-chair of the Idaho Budget Committee.

Please see TREASURER/B2

Judge rules for Indians over farmers

YAKIMA, Wash. (AP) A will likely rule when a final judge says the Yakima Indian Nation's fishing rights should take precedence over irrigation needs during periods when the Yakima River is low.

Left unanswered was the question of how much water is necessary to protect the fish.

Yakima Superior Court Judge Pro Tem Walter A. Stauffacher left the decision on water levels to a biologist committee.

Stauffacher's Tuesday memorandum decision in the Yakima River Basin water-rights adjudication case is not binding but indicates how he

will likely rule when a final judge is made, said Don Bond, a Yakima lawyer representing several non-Indian irrigators.

The water-rights case, filed 13

years ago, is to establish the amount and priority of all claims to water in the Yakima River drainage basin. The basin extends from the near the crest of the Cascade Mountains to the Yakima River's confluence with the Columbia River.

Bond said Wednesday it was too early to say whether his clients will appeal a ruling. He said he didn't expect Stauffacher to rule until at least mid-November.

This is a serious threat. In

water years, it could take away water from irrigators," Bond said.

Charles O'Connell, a U.S. attorney

for the Yakima Nation, said the tribe's reserved water rights do

not return a telephone call Wednes-

day for comment on the ruling.

In giving Indian fisheries priority over irrigation, Stauffacher wrote that the Yakima Nation's fishing rights on the river have existed since "time immemorial."

The *adversandum* opinion was filed as an amendment to an opinion Stauffacher issued in May.

Solid backing

MIKE SALSBURY/The Times-News

Wendell 8th-grade student Lonnie Friel roasts as Gov. Cecil Andrus signs his autograph for her Wednesday afternoon. He was at Wendell High School to participate in a Red Ribbon drug awareness assembly.

Hanford tank releases hydrogen, other gases

JERICHO, Wash. (AP) The release of gases, caused by a buildup of pressure in the tank, had been anticipated, said Bill Klink, spokesman for Westinghouse Hanford Co.

"The tank's 'bump' came less than a week after a visit by Energy Secretary James Watkins.

The release of gases, caused by a buildup of pressure in the tank, had been anticipated, said Bill Klink, spokesman for Westinghouse Hanford Co.

"Health physics technicians from Westinghouse Hanford Co. quickly determined there was no release of radioactive or any other contamination from the tank," he said.

ing reservation for the U.S. Department of Energy.

Instead of paying what Edwards called "horrendous" check processing fees, Moon said she negotiated each bank's compensation—a common practice among states.

Both candidates say the treasurer must be a creative, as well as a prudent money manager.

Shortly after taking office, Edwards said she introduced legislation that required large tax payments of \$100,000 or more to be paid electronically. Instead of taking days for a paper transaction, Edwards said her office could invest the payment promptly.

The method earned \$300,000 immediately, she said.

Moon is proud of creating an investment pool that allowed local governments to secure a higher interest return by pooling their money.

"This is the type of thing I think we need more of," she said.

Expand treasurer's responsibilities

The state auditor was added to the Land Board in 1910, Edwards said. In 1911, the state treasurer was convicted of embezzlement, so perhaps, under her leadership, she said those check fees have been reduced to 10 cents.

"This is one of the biggest issues in the treasurer's race," Moon countered.

But both candidates see no reason for not adding the treasurer to the Land Board now.

"I have an impeccable record of productivity," she said. "Professional. I have an impeccable record."

Moore also has her record as treasurer's job should reflect her for the treasurer's office," Klink said.

"I want to return the office to prudent fiscal management," she said.

"By January, health should not be a problem," Moore added. "I look forward to meeting you," he said.

"I have no reason to believe that time will be returned to my office so she can then work to," he said.

"I have an impeccable record of productivity," she said. "Professional. I have an impeccable record."

Moore also has her record as treasurer's job should reflect her for the treasurer's office," Klink said.

"The question is, Kershaw said, does it have any effect on voters?"

"Do they pay any attention to it?" he asked.

"With the judicial system," said Tom Kershaw of Twin Falls.

"The question is, Kershaw said, does it have any effect on voters?"

"Do they pay any attention to it?" he asked.

Environmentalists don't agree with McClure over forest roads

By N.S. Neukirchen
Times-News writer

TWIN FALLS - Slashing the Forest Service road-building budget would cripple the U.S. timber industry, Sen. Jim McClure says.

But Idaho environmentalists counter that road-building in national forests is already a losing proposition.

"This isn't a scalpel; it is a meat ax," the Idaho Republican told the Senate Tuesday, referring to a proposed 55-percent cut in the forest road-building budget.

The Senate earlier this week rejected an amendment to the Interior Department appropriations bill introduced by Sen. Wyche Fowler, D-Ga., by a 52-44 vote.

McClure told the Senate that Idaho counties would lose \$12.8 million in fiscal years 1991 through 1993.

The Forest Service expects to pay Idaho counties \$12.9 million for all

forest roads in 1990. That payment is 25 percent of the fees the Forest Service receives from timber, grazing, mining, reclamation and other land uses, which the service is required to pay back to the counties.

McClure told the Senate that, according to projections supplied to him by the Forest Service, the proposed forest road budget cut of \$100 million would result in a loss of \$1,000 jobs in the timber industry and a loss of \$400 million to the federal treasury.

"His statements make no sense," said Mike McElberry, public lands coordinator for the Idaho Conservation League. "The Treasury is already losing money."

According to Forest Service figures obtained by the Wilderness Society, the Forest Service lost \$124 million on timber sales nationwide in 1989.

The \$400 million loss to the Treasury includes the \$16,000 per employee it would cost the Forest Ser-

Low betting receipts hurt commission, futurity

BOISE (AP) — Disappointing betting receipts from Idaho horse tracks, and especially from its only dog-track, have left state Racing Commission finances in shambles and the Centennial Futurity Committee with thousands of dollars in unpaid bills.

But Paul Girdner, of Meridian, chairman of the Centennial Futurity, the attorney general's office is reviewing the legality of an Oct. 4 transfer of \$40,000 from the Idaho Department of Law Enforcement to tracks outside Idaho offers a ray of hope for the future, the near-term deficit.

Key Bank reports record net income

The Times-News
and The Associated Press

BOISE — Key Bank of Idaho has reported a record net income of \$8.4 million for the first nine months of 1990, up 55.5 percent from the same period last year.

The bank also reported a return on investment of 1.68 percent and a return on equity of 24.15 percent during the first three quarters of the year, said Edmund J. Kean Jr., president and chief executive officer of Key Bank of Idaho.

He said that ranks the bank as a top performer in Idaho as well as within the KeyCorp organization.

Key Bank opened a Twin Falls office in 1988 when it purchased Ida-

Boise Bank & Trust. Since then, it has moved into a corner building at 103 Main Ave. E., the old Idaho First National Bank building.

A subsidiary of Albany, N.Y.-based KeyCorp, Key Bank reported earnings up sharply from the \$5.4 million from January through September of 1989.

"We continue to meet or exceed our very aggressive 1990 business plan goals," Kean said in a news release.

The rapidly growing Key Bank is one of the best performers among Idaho's strong banking industry.

First Interstate Bank of Idaho reported a net income increase of 22.6 percent.

Official: More AIDS education needed

MOSCOW (AP) — Idaho isn't doing enough to educate its children about acquired immune deficiency syndrome, the director of the state's AIDS education program says.

"We've done a lot, but we take three steps forward and two steps back," Joy Hummer told about 20 people Wednesday at a University of Idaho workshop on talking to children about AIDS.

Unlike neighboring Washington,

which has mandated that all schools adopt a state-approved AIDS education curriculum, Idaho leaves it up to each of its 113 school districts to decide what students should and shouldn't know about sex and sexually transmitted diseases, including AIDS.

Idaho is conservative state, Hummer said, and some communities are more conservative than others. In those places, adults do not

want their children to know about condoms or homosexuality, making it difficult to get specific about how AIDS is spread.

Many parents also are uncomfortable with their sexuality, Hummer said, making it difficult for them to talk to their children about the subject.

She said the combination leads educators to some strange arrangements.

Landowners oppose hydroelectric project

BOISE (AP) — About 1,150 High Valley landowners are united in their opposition to a hydroelectric project that would create a 900-acre reservoir at their doorstep.

Residents say, "We vowed to work with them right from the start."

Their concerns about Gem creating a reservoir outlet from a 900-acre reservoir could be answered by closing off the reservoir to public use, Mooney said. Their worries about the reservoir turning into a mud flat also could be addressed.

"We like the valley the way it is," said Don Chance, a High Valley resident since 1975. "We want to maintain our lifestyle and we don't want anyone screwing it up."

Chance said 114 High Valley families signed a petition opposing Gem Irrigation District's proposed 500-megawatt hydro project on the North Fork.

The project would pump water from the Payette near Smith's Ferry to a reservoir in High Valley and then run water down a large tube to a power station at Banks.

The city of Tacoma, Wash., has a 30 percent option to purchase electricity from the project.

Bob Mooney, project manager for

Gem, said Gem's concern appears to be typical of landowners near the envisioned reservoir.

"We respect these people's opinions," Mooney said. "We vowed to work with them right from the start."

Their concerns about Gem creating

a reservoir outlet from a 900-

acre reservoir could be answered by

closing off the reservoir to public

use," Mooney said. Their worries

about the reservoir turning into a

mud flat also could be addressed.

Even if landowners are united

against the project, Gem could con-

demn properties if need be, Mooney

said. "We think that their issues can

be addressed."

Chance disagreed, reiterating the

petitioners do not want the intrusion

of Gem's hydro project.

"Those of us who have selected

the serenity of this valley as a cho-

sen lifestyle of recreation will not

permit out-of-state power-hungry

interests to usurp our way of life by

stealing a valuable hydro resource

and construct a 900-acre lake at our

back door," he said.

They envisioned Boiseans may

choose to relocate to Horseshoe

Bend, creating a new bedroom com-

munity.

"There are two diversified eco-

nomic developments that can only

help Horseshoe Bend; some type of

protection for the Payette River and

the new highway," said Craig

Gehrke, replacement director for the

Wilderness Society.

"If people are commuting right

now from Garden Valley, they'll

certainly find Horseshoe Bend ap-

pealing as a mountain getaway."

Environmentalists report town is not 'endangered'

BOISE (AP) — Two environmental groups are taking issue with a National Association of Counties report that lists Horseshoe Bend as an "endangered community."

The Wilderness Society and Idaho Conservation League officials Tuesday disputed that environmental restrictions on timber cutting in Idaho have hurt the logging town of Horseshoe Bend, 30 miles north of Boise.

The two groups point to record logging levels now ongoing in the two national forests that feed the town's mill.

"The much-heralded timber supply shortage in Idaho is a sham," said Mike Medberry of the Idaho Conservation League.

"In 1982 the timber harvested in

Idaho was at the highest level in the past 10 years," he said. "If Horseshoe Bend is an endangered town, it's not due to lack of timber."

They added the increasing

tourism and recreation economy de-

veloping around the skyrocketing

use of the Payette River will only

serve to improve Horseshoe Bend's

economy.

And, they said, the new highway

will do more than increase tourism.

When the highway is completed

to the small farming and logging

town, they said, it may actually in-

crease the town's population.

They envisioned Boiseans may

choose to relocate to Horseshoe

Bend, creating a new bedroom com-

munity.

"There are two diversified eco-

nomic developments that can only

help Horseshoe Bend; some type of

protection for the Payette River and

the new highway," said Craig

Gehrke, replacement director for the

Wilderness Society.

"If people are commuting right

now from Garden Valley, they'll

certainly find Horseshoe Bend ap-

pealing as a mountain getaway."

Appeals Court upholds life terms

SPOKANE (AP) — An appeals court has upheld two consecutive life terms without parole for a man who pleaded guilty to the 1988 stabbing death of an elderly woman in Yakima County.

In a decision issued Tuesday, the three-member state Court of Appeals in Spokane upheld a lower-court decision setting an exceptional sentence for Russell Duane McNeil.

McNeil pleaded guilty to the aggravated murder of Dorothy Nickoloff and as an accomplice to the aggravated murder of her husband, Mike Nickoloff. The state initially sought the death penalty in the case, but agreed to forego death in exchange for guilty pleas by McNeil.

ACLU will delay prayer suits

SALT LAKE CITY (AP) — The American Civil Liberties Union will delay its graduation prayer suit against two school districts while a similar Rhode Island prayer action is appealed to the U.S. Supreme Court.

"We've yet received any settlement offers [from the school districts]. So as far as I'm concerned it's still steam ahead," ACLU Executive Director Michele Parish-Pixler said.

"We tried to resolve this ahead of time, out of court. All of our attempts were rebuffed. We didn't want to initiate litigation, but we've not heard any reason to stop," she said.

Parish-Pixler's comments came following a plea by Utah authorities Tuesday for all parties involved in the graduation prayer lawsuit to suspend legal action during the prayer lawsuit appeal of a Providence, R.I., school district to the nation's highest court.

The ACLU filed federal complaints against Granite and Alpine school districts last July, challenging prayer at graduation ceremonies and other school activities. The ACLU contends that junior and high school students and faculty are forced to participate in religious activities that violate their personal convictions.

In the Rhode Island case, the 1st Circuit Court of Appeals upheld a federal court decision invalidating prayer at public graduation and commencement ceremonies. Representatives for both Utah school districts Tuesday afternoon said their school boards have not taken positions on the Rhode Island suit.

John Robison, attorney for Granite School District, said while the district has not formulated an official response, "We have always been interested in looking at a stay [of the Rhode Island case] pending the Supreme Court decision in the Rhode Island case."

The pivotal issue in such a decision is how the matter would be treated in the interim, he added.

"The ACLU has consistently insisted on a ban on graduation prayers next June," Robison said.

"The district has been unwilling to agree to that stipulation. The same is true of Alpine. The Alpine District Board of Education has not taken a position on the merits of the Rhode Island case regarding graduation prayer," Superintendent Steven Baugh said.

Republican reiterates anti-abortion stand

CŒUR D'ALENE (AP) — With Election Day less than two weeks away, underdog GOP challenger Roger Fairchild has reasserted a tough stand against abortion in his bid to unseat Democratic Gov. Cecil Andrus. It stands that he would outlaw abortion even when pregnancies are caused by rape or incest.

Only a threat to the life of the mother justifies abortion, a fetus, Fairchild said Wednesday, drawing a difference between his position and that taken by Andrus in vetoing restrictive legislation last March.

The governor said at the time that House Bill 625 was not sufficiently flexible to guarantee women the right to an abortion in cases of rape

or incest.

"I do not believe in killing the victims of a crime," Fairchild said Tuesday night in Cœur d'Alene.

"I do not believe that a child should be killed for the sins of his father."

He made his comments at a debate that Andrus declined to attend because he was previously scheduled to address a Grange gathering Tuesday in Nampa.

Fairchild told an audience of

about 175 that he supports the anti-abortion bill approved by the last Legislature and vetoed by Andrus.

But he said he would go further on the issue, not stopping until we save them all (fetus).

The "graveland" businessman and former state Senate leader said he believes most abortions are performed for convenience alone. At the point of conception, he said, people should be responsible for the unborn.

"It's time we stand on responsibility, not choice," Fairchild said.

Andrus had pledged not to rest until the U.S. Supreme Court's 1973 Roe vs. Wade decision, which legalized abortion nationwide through the first

two trimesters of pregnancy, is overturned. He called it the second-worst decision ever made by the high court, topped only by the pro-slavery Dred Scott case of the mid-19th century.

He said Idaho should press the Supreme Court to overturn Roe vs. Wade, but not at taxpayer expense. "I've seen that doesn't cost the taxpayers one dime," Fairchild said. "We'll raise the money in the private sector." He continued to criticize Andrus for his veto of House Bill 625, saying the governor "looked at the national TV cameras in the eye" before deciding to veto the bill and "twisted and turned" for political convenience on the issue.

West

SkyWest families settle

SALT LAKE CITY (AP) — A court order forbids disclosure of the size and terms of the settlement until after the conclusion of the trial.

Families of the four pilots killed in the collision — two in the SkyWest McDonnell and two in a single-engine aircraft — will receive \$1 million over three years ago than claimed 10 lives.

When the ongoing federal trial reconvened Wednesday morning, the court was advised that the families of SkyWest pilot Michael D. Gammill, Helena, Mont., and Walter F. Ray, Chubbuck, Idaho, had accepted the settlement on Tuesday.

They argued that controllers at Salt Lake International Airport were more interested in landing planes as quickly as possible than they were in safety.

Earthquake closes roads to Yosemite

Yosemite National Park

CALIF. (AP) — Huge boulders knocked loose by an earthquake blocked one road into Yosemite National Park Wednesday, and two of the three other highways leading into the park also were closed by rockslides.

No injuries were reported from the quake, which was felt Tuesday night from San Francisco to Nevada and shook up casinos and hotels in South Lake Tahoe and Reno. It registered a preliminary 5.8 on the Richter scale, according to the United States Geological Survey.

Six-foot-high boulders forced the closure of Highway 120 on the west side of the park. A three-foot section of the highway was gone and a retaining wall was lost.

"It's not a big pile of small rocks; it's a small pile of big rocks," U.S. Park Service ranger Kelly McClaskey said.

A rockslide half a mile away closed Highway 140 into the park, but that was expected to be cleared up during the day, ranger Scot Bowen said. State highway crews also were clearing a slide on Highway 120 on the east side of the park. A road from the south was unaffected.

The quake's center was in Lee Vining, a town of 400 people northeast of Yosemite National Park in the Sierra Nevada and about 190 miles southeast of San Francisco, said Pat Jorgenson, spokeswoman for the U.S. Geological Survey.

"It was a rolling, strong jolt and lasted about 25 seconds," said Robin Bergmann, a resident of Matilteca, about 20 miles from Lee Vining.

"We had lots of calls but no reports of injury," said Mono County Sheriff's Deputy Sumner Sturtevant, who said the quake lasted about 45 seconds.

Elinor West, a telephone operator at Caesar's in South Lake Tahoe, said the quake left "a lot of frightened guests" at the hotel and casino. System Staff, an employee at Harrah's in Reno, said guests reported feeling the quake and immediately realize a quake had struck.

South Lake Tahoe is about 80 miles northwest of Lee Vining. Matilteca is about 30 miles north of South Lake Tahoe.

Portland judge bans reporters in Metzger case

PORLTAND (AP) — Two news organizations are challenging a judge's decision to bar reporters from calling jurors who delivered a \$12.5 million verdict against white supremacist Tom Metzger.

Multnomah County Circuit Judge Ancer L. Haggerty issued the ruling at the end of the trial late Monday, but said he would hold another hearing Friday to consider the challenge filed by lawyers for The Oregonian and KOIN-TV.

Haggerty told reporters they would be held in contempt of court if they tried to interview jurors about the verdict against Metzger, leader of White Aryan Resistance, his son, John, and others.

The Metzgers were sued by the family of Mengede-Sorow, 27, a black man from Ethiopia who was beaten to death by racist skinheads. The jury decided that Metzger instigated Sorow's killers and was responsible for his death in November 1983.

Operation Dear Abby has sailor's 21-year marriage to its credit

DEAR ABBY: I would like to thank you personally for the many years that you have striven to increase the morale of our service members stationed overseas. I am one of the individuals who benefited greatly from your efforts.

While stationed on the USS Kitty-hawk (CVA-63) off the coast of Vietnam at Christmastime in 1967, I received a letter through your Operation Dear Abby that interested me.

It was from a young lady living in Minnesota. I was all of 19 at the time, away from home, very lonely, and it eased my loneliness, so I started writing to her.

After numerous letters, telephone calls and a visit to Minnesota, we knew we were right for each other.

so we were married in the autumn of 1969, after I left the Navy.

I returned to the Navy in 1975, and now have a son who has been in the Navy for more than two years. He's stationed on an aircraft carrier in Norfolk, Va. We also have a daughter commencing her sophomore year in high school.

Abby, thank you. On Oct. 25 we will celebrate our 21st wedding an-

Dear Abby

Abigail
VanBuren

niversary, and we owe it all to you and your concern for servicemen stationed overseas. Keep up the excellent work!

CHARLIE IN BRUNSWICK, MAINE

DEAR CHARLIE: Congratulations to you and your family. May you have many more happy anniversaries. God bless you and yours.

DEAR ABBY: Regarding the person who requested money instead of flowers for a funeral: Japanese-Americans have a tradition called "koden." When a person dies, everyone brings envelopes containing money, which is given to the family of the deceased. The amount ranges from as little as \$10 to sums in the hundreds (usually from a company or club that is familiar with that tradition). The total is usually enough

to pay for the bulk, if not all, of the funeral expenses.

This was extremely helpful when my aunt died following a long and costly illness. The medical expenses drained the family's savings, and the funeral would have been too much

for them to handle. The "koden" they received paid for her funeral.

LIVE IN TORRANCE, CALIF.

DEAR F.Y.I.: The tradition you mention is also practiced in Hawaii

and in the Philippines, and I hope it takes hold in other countries. What a wonderfully considerate gesture.

TESTED, TRIED AND TERRIFIC! To order, send a long, business-size, self-addressed envelope, plus check or money order for \$2.95 (\$4.50 in Canada) to: Dear Abby, Cookbooklet, P.O. Box 447, Mount Morris, Ill. 61054. (Postage is included.)

Valley happenings**Single Again slates Halloween potluck**

TWIN FALLS - Single Again, a support group for people who have lost a spouse through death or divorce, will hold a Halloween potluck at 7 p.m. today at the Church of the Nazarene, 401 Sixth Ave. N. For information, call 734-1883.

Bazaar this weekend at Blue Lakes Mall

TWIN FALLS - Blue Lakes Mall will sponsor a Community Bazaar Friday through Sunday during mall hours. Non-profit organizations from the Magic Valley will sell Christmas items and baked goods to raise funds for their organizations.

Jerome schools to hold recycling drives

JEROME - Washington and Jefferson elementary schools will hold recycling drives Friday to collect recyclable items and earn money for instructional supplies. Newspapers, flattened aluminum cans, glass and plastics with the symbols "1" or "2" will be taken from 8:30 a.m. to 2:30 p.m. at Washington School, 500 S. Lincoln, and from 8 a.m. to 1 p.m. at Jefferson School, 600 N. Fillmore. Please separate items by type.

Wedding**Emerson-Turner**

LOGAN, Utah - Danette Grace Emerson and Curtis Dean Turner were married Oct. 19 at the Maranatha Baptist Church in Logan.

Officiating was the Rev. Don Emerson, father of the bride. Cheryl Turner, sister of the bridegroom,

played the processional and accompaniment on the piano.

Special guests included grandparents of the bride and bridegroom, Dell Emerson, Bonnie Turner and Opal Dethlefs. Other special guests were Vicki, Jamie and Tori Archer, all of Jerome, Rheva Jonathan and Nicholas Turner, both of Arimo and Shari Turner of Grand Junction, Colo.

The bride is a 1988 graduate of Liberty University in Lynchburg, Va. She is employed at the Center for Atmospheric & Space Sciences and the physics department at Utah State University. The bridegroom is a graduate of Jerome High School and Idaho State University. He is employed at Anderson Lumber Co. in Lewiston, Mont., and Cheryl Turner of the bride served as the bride's maid of honor. Carle Mulfred of Jerome is the ring bearer.

Mary Emerson, sister-in-law of the bride, served as the bride's mother of honor. Carle Mulfred of Jerome is the ring bearer.

West**Seattle shelters already filled with homeless**

SEATTLE (AP) — Severe cold and snow may force many women and older transients off doors, but weekend shelter managers are already having to turn away dozens of people each night.

Shelter managers fear that if extra space is not found soon to house all of Seattle's estimated 2,700 to 3,000 homeless, some might not make it through the winter.

"Last night was the worst night we've ever had in the system," Downtown Emergency Service Center director Bill Hobson said after his shelter was completely filled by 10 p.m. Sunday.

The problem of a growing homeless population was compounded by closure of the 100-bed Salvation Army Red Shield Lodge in June. In addition, street violence appears to be on the rise,

forcing many women and older transients off doors. Last weekend several drifters were stabbed near the waterfront, Seattle police said.

The lobby of the city's Municipal Building, which is traditionally opened to the homeless during the worst cold spells of January and February, is already open and filled to capacity, Hobson said.

Those who make it inside receive a floor mat and a blanket. But many men have been turned away even from that emergency site, Hobson said. Women are never denied refuge, he said.

"We're already into overflow and there's no life-threatening weather out there yet. But it's going to get worse," Union Gospel Mission executive director Herb Pfister said.

The mission usually has sleeping space for 206 men and 93 women or family members. But for several days the mission has lived overtime home to 750 men.

Grace Brooks, program director of the Lutheran Compass Center, said she recently had to turn away about 15 men a night from her 82-bed shelter.

"When it's cold and wet outside and you have to turn them away, that's the most difficult part," she said.

Shelter officials and homeless advocates who make up the Seattle-King County Coalition for the Homeless are trying to get lobby space opened in either the King County Courthouse or the Administration Building.

Metzger trial expensive

PORTLAND, Ore. (AP) — stemmed in part from the bonding of the federal courthouse in two-week trial of white-supremacist Tom Metzger cost the unknown white-supremacist group \$300,000 in overtime.

The full cost of security for the trial still is being calculated and won't be known for several days, Morris Dees, the Southern Poverty Law Center attorney who sued Metzger, received a letter this week.

Tight security was needed at the Multnomah County Courthouse to protect trial participants, to help prevent a musical, not to prevent confrontations between opposing factions, Deputy Chief Dan Noelle said.

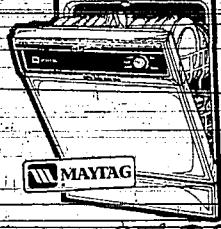

The concern about violence ended Monday with a jury returning a \$12.5 million verdict against Metzger and four other defendants.

Survivor insurance popular

The uninsured marital deduction is good news. It lets you defer estate taxes until both you and your spouse have died. However, that still leaves a problem. Within nine months of the second spouse's death, heirs have to pay an estate tax that can add up to 50 percent or more of their inheritance. If you estimate assets are not liquid but in property like real estate or a family business, there may be no cash to pay those taxes. And this cash shortage can lead to the forced sale of assets at greatly reduced prices.

**Sylvia
Porter
Finances**

Americans increasingly are turning to survivor life insurance, which eliminates the problem by providing a benefit only after both spouses have died.

There's no such thing as a "lastest society," but survivor life insurance goes a long way toward reducing the risk in estate planning. The survivor life policy ensures that the cash will be there when it is needed. It was introduced less than a decade ago, says the American Council of Life Insurance.

"Because the policy pays a benefit only after both spouses have died," the premiums can be less than half the cost of a single life policy," says Robert Stuchiner, an executive of Mayer & Meyer Associates, a large New York insurance and estate-planning firm. The cost of the policy can be as little as 10 percent of the benefit that is paid — leverage that is one of the great attractions of survivor life insurance in estate planning.

For example, a couple in their mid-50s could purchase a \$1-million survivor-life policy with an annual vanishing premium of \$7,000. Based on current dividend projections, the premium would be paid — for the next 12 years — after both spouses have died, which the actuaries expect to be about 30 years; the insurance company would pay the \$1 million.

The death benefit under this or any life insurance policy is paid free of income taxes and, if properly structured, can escape estate taxes as well. The result is that this couple would have had to invest the premiums at an annual interest rate of 14 percent compounded over 30 years to equal the performance of the survivor life policy, according to the calculations of Mayer & Meyer Associates.

Due to the low cost, their value in estate planning and the favorable tax treatment accorded life insurance, these policies are becoming more and more popular. The American Bar Association recently published instructions for estate lawyers to help them evaluate individual policies. With more than \$7 trillion in the hands of senior citizens, the market is huge and the insurance industry has developed a broad range of policies to tap.

"With insurance policies, options can be tailored to fit most budgets (though premiums with lower premiums may hold the risk of higher premiums or

Cadillac begins a comeback

By Scott Heimer
Knight-Ridder News Service

Sly Stallone, Jr., Ewing, Bert Reynolds (and his Significant Other), Lori Anderson and other People of Weight may drive Atlantes around Beverly Hills, but the 1991 Cadillac that's the real Stoplight Sleeper is the Seville STS.

It may look like a sedate four-door sedan, but it's now got 200 horsepower, enough to get from 0 to 60 in eight seconds. There's also 5.7 ratios of torque, so the STS has the muscle to go with its fleet feet.

Finally, what really counts is that Cadillac of any kind has been on the scene with the in-ground for much of the last decade — and with a good slice of the rest of the country.

But now General Motors' flagship arm seems to be coming back strongly, with engineering, function, control, anti-lock brakes, that kind of stuff, and much improved quality — the lack of which was what drove loyalists away in droves about 10 years ago.

The STS (Seville Touring Sedan) is the limited-edition performance version of Cadillac's sedan entry in the international market sweepstakes. It's the one designed to compete directly with the Jaguar, Acura, Baby Benz, BMW, Infiniti, Lexus — you get the idea.

It ought to win its share of buyers — if Cadillac marketers can get word to the buyers that the car to drive it. That's the turn-on.

The speed and power come from a stroked version of the V-8 stroke engine that drives the front wheels. Giving the pistons a longer ride up and down increases the displacement to 4.9 liters (from 4.5, or from 273 cubic inches to 300), increasing the horsepower from last year's 180. It doesn't increase the fuel type requirement, because that was as high as it could go last year.

Not does it appear to have had a disease effect on fuel mileage. This is a 3,644-pound (curb) big car with a four-speed lock-up automatic transmission that's designed to go from 0 to mid-20s mileage on the frequent.

Can't complain about that, though an 18-gallon fuel tank isn't as large as I'd like. Comes to me like a slice in the 14.1 cubic feet of the trunk could be made to add five or ten gallons' capacity without seriously hurting cargo space.

The engine also has larger injectors, which should make them less susceptible to

The 1991 Cadillac STS is designed to compete with Jaguar, Acura, BMW and others.

Division's independence yields dividends

By Janet Brauer
Knight-Ridder News Service

The fruits of Cadillac's independence are evident for 1991

General Motors' flagship division, which has separate control over its own engineers and manufacturing, is working with a new, international definition of luxury.

Cadillac, in fact, has decided to educate the customer. Some models, for ex-

ample, have notches on each side of the steering wheel's upper half. These make nice places to rest the thumbs and encourage the driver to keep both hands on the wheel — the exact opposite of luxury.

In other words, new suspensions and steering systems are firmer and more precise. They offer quicker, more positive response on corners and on the highway without sacrificing comfort — while giving Cadillac a better chance to attract young buyers.

New for 1991 is a 4.9-liter, 200-horsepower V-8 engine, which powers all models except the Brougham sedan and Allante two-seater. It is paired with a new electronic four-speed automatic transmission.

Nearly 18 feet long, the rear-drive V-

Passive solar house makes fine investment

Q. We want to build a house with the lowest utility bills possible, but we want it to look "normal." Is passive solar (no collectors on the roof) a good choice and what design options do we have? N.T.

A. Designing a house to use solar energy for winter heating and summer cooling is an excellent investment. A passive solar house should cost about the same to build as a conventional house. With a 50 percent to 70 percent reduction in utility bills, it should have higher resale value.

Passive solar houses are attractive, open, and can be conventional or unique-looking. Both the large window areas and an interior layout for free-flow of warm and cool air contribute to the spacious open feeling.

Basic passive solar options are direct gain, solar walls, greenhouses, and solar roofs. You can use one or several of these in your house. Many super-energy-efficient house manufacturers — some modular, log, circular — now offer passive solar built into their house kits.

Direct solar gain, utilizing large south-facing windows, is most common. The glass is set into thick concrete floor which stores the solar heat.

This provides more even heating during the day and comfortable warmth that slowly radiates up from the floor at night.

James Dulley
Cut your utility bill

Ceramic tile is an attractive and very effective solar floor covering.

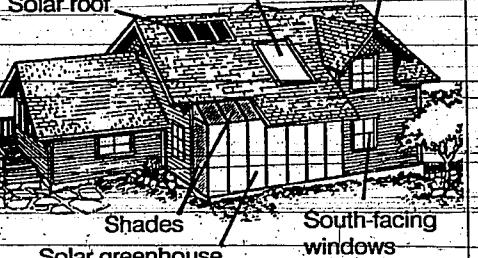

A solar wall is a heavy masonry wall that is built just inside large south-facing windows. As the sun shines on the wall, it stores the heat during the day. At night, the heat is given off into the room.

A solar greenhouse is effectively a giant solar collector. Some of the solar heat is stored in the greenhouse floor and walls. The remainder of the heated air circulates throughout the rest of the house.

In the summer, solar energy can be used in several ways to help cool your house. First, design your house with adequate roof overhangs. This naturally shades the windows during the day, especially the windows that are highest in the summer sky.

The heavy-masonry solar walls or floors tend to moderate and delay the daily summer temperature rise in your house.

Large roof overhang Skylight

Passive solar houses are efficient, attractive.

This allows you to take better advantage of nighttime cooling and lower off-peak electric rates.

For free ventilation, locate a fireplace with a solar masonry chimney on the south or west side of your house. When

Percy Ross

Thanks
a million

Dear Mr. Ross: My girlfriend's ex-boyfriend just committed suicide. While she is not really responsible, she doesn't want him lying in the morgue indefinitely. My dad has no job or insurance and was living in his car. Neither we nor his family have much money. We made enough to survive, and little more.

His mother lives in Alabama. She wants to have him cremated and the ashes sent to her, but she has to wait until she can save the money. I am writing to see if you could send the money for the cremation. If you would, I could get the money together and send his ashes to his mother.

This would help out a great deal. I am

my letters to you, I tried to explain the severity and urgency of their situation. You chose to either ignore the letter, or it was deemed unimportant by your staff. Whatever the case, it doesn't matter now.

However, I was appalled to read that you chose to give \$500 to a local school. All I can say is, for the price of buying a \$500 book, you could have helped a lot more people.

You said that life is the biggest gift I have come to know, and I hope it is not catching. Thanks for nothing! Nothing!!

P.S. Are you courageous enough to print this one?

Dear Reform'd: I'm not sure if it takes courage or if I'm just plain foolish or print letters like yours. But do you honestly believe that?

can say the same, so what do you have to lose?

Pearl Ross: I wrote to you a couple of months ago but, I guess, to no avail. Right now, I am faced with another dilemma. My sink has been stopped up for over a year, and I can't afford a Roto-Rooter or plumber. I need \$100 and would appreciate if you would send me a check in that amount. Thanks.

Mr. R.D., Jr., Wilkes-Barre, Pa.

Dear Mr. D.: If a sink stopped up for one year is a new dilemma, I'm curious what you considered a priority two months ago. You better not be a snake in the sink trying to rip me off. One hundred bucks is the way.

You may write to Percy Ross c/o, The Times-News, P.O. Box 35000, Minneapolis, Minn. 55435. Include the telephone number if you wish. All letters sent to Mr. Ross are read. Only a few are answered in this column, although others may be acknowledged privately.

Friend asks for money to cremate homeless suicide victim

Minneapolis millionaire Percy Ross is internationally known for his philanthropic works and likes to encourage others to help solve problems for those in need. He has earned a fortune and a wealth of knowledge during his lifetime and wants to share both before his death. His motto is "He who gives, while he lives, also knows where it goes."

Dear Mr. Ross: My girlfriend's ex-boyfriend just committed suicide. While she is not really responsible, she doesn't want him lying in the morgue indefinitely. W.I.C., State College, Pa.

Dear W.I.C.: I did attend my 50th re-

union, but not because I'm rich or thin. I had the attitude, "What do I have to lose?"

After weathering the last 30 years of setbacks and mistakes, I was thankful to still be alive and kicking and lucky enough to have a few lights on upstairs. I'm sure you

Professor makes Mitsubishi manuals understandable

By Jeffrey Bair
The Associated Press

PITTSBURGH — The manual on your fancy new home entertainment system says to "access the next highest programmed station setting" on the TV. But warns "the audio could be muted" with improper handling.

If you didn't understand the instructions to "change the channel, and press the right button or risk losing sound," welcome to the growing ranks of "techno-dolts."

Millions of Americans have trouble doing things like setting VCR clocks or taping television programs; they are thoroughly confused by many home electronics instruction books written in engineer-speak, and cluttered with graphics, says Karen Schriver, an English professor at Carnegie Mellon University.

Ms. Schriver was recruited by Mitsubishi Electronics America Inc. to rewrite its manuals so the average consumer can understand.

Over the past two years she has made hundreds of revisions. Technical terms and abbreviations were "zapped" and complicated drawings cleared up.

The better manuals were published on glossy paper with warning boxes, full of white space, colorful photos and detailed indexes. The older manuals were flimsy, crowded and dull.

The new manuals were packaged with this year's Mitsubishi television sets and stereo gear. New books will accompany 1991's videocassette recorders, video cameras and laser disk players, the company said.

Mitsubishi is among a slowly growing number of Japanese companies trying to improve communications with customers.

Sansui USA Inc., for example,

claims its new VCR on-screen program can be used by 5-year-olds and will make you a technical wizard in no time.

But Japanese companies are still in a period of learning what's expected of a manual in the United States," said John Hatch of the American Electronics Association in Santa Clara, Calif.

Ms. Schriver says consumers ultimately are being cheated by all the technical language and drawings that "look like spiders" in many current electronics manuals.

"We're buying a VCR that costs more because it has new features, but in the end we use three buttons — play, record and rewind," she said.

At Carnegie Mellon's Communications Design Laboratory, students interviewed 50 people trying to use Mitsubishi products and noted their stumbling blocks with the old instructions.

There were several in this 65-word mouthful on how to record from one VCR to another:

"The M-AV1 and M-AV2 incorporate S-VHS inputs for S-VHS VCRs and an S-monitor output for connection to another VCR." When two S-VHS VCRs are connected to the receiver with S cables, it is not possible to dub from one to the other through the receiver.

When S-VHS to S-VHS dubbing using S-VIDEO cables is desired, connect the VCRs directly to one another."

With the hub's help, it became:

"You cannot record from one Super VHS VCR to another through the receiver when you use S-Video cables. To do this, you must connect the VCRs directly to each other."

The changes are making Mit-

subishi an industry leader in showing customers how to use products," said Ms. Schriver. She said several Japanese electronics companies inquired about applications of her research on their products.

Ms. Schriver said the writers of manuals often have been entry-level engineers who typically dwelt on the equipment's new capabilities and forgot about "the poor consumer who still wants to know about setting the clock." Stand-up comics across the country often target VCR owners whose machines forever are blinking "12:00 Sunday" because they can't set the day and time.

Recent guests on "The Oprah Winfrey Show" tried unsuccessfully for 30 minutes to program VCRs for taping.

Charlene Guyer, a self-proclaimed "techno-dolt" and guest on the "Oprah" show, says she is confused by booklets for answering machines, cameras, VCRs and stereo components from several companies. She says she has owned a Panasonic VCR for four years but never taped a program.

"Part of my personality is negative. If I can't do it quickly, I don't want to do it," said Ms. Guyer, a Philadelphia marketing consultant.

She says she has spent days trying to figure out how to use a VCR. "It's not that I'm stupid," she says. "I just don't have the time to do it."

Even at Carnegie Mellon, an institution known for computer science and engineering students regularly go to Ms. Schriver's lab to plead for help hooking up electronic gear.

Assisting such people is serious business, said Christopher Freibee, a Mitsubishi communications design specialist and former student of Ms. Schriver's.

AP Laserphoto

Carnegie Mellon student Michele Matchott shows off the easier-to-understand manual.

Dramatic changes clarify instructions

The Associated Press

* Before: "The audio output will be muted."

* After: "You won't hear any sound."

* Before: "This VCR employs direct function switching where the counter works by depressing a any playback mode may be direct control signal, accurate time displayed from any other playback, play will be maintained even through fast forward or rewind operations."

* After: "To access the next highest programmed station, set or to switch to a lower programmed station, the Scan buttons must be repeatedly pressed."

* After: "When you use a feature like Play or Rewind, you can go directly to another feature (like speed search) without first pressing the scan control."

* After: "How long the tape has run (in hours, minutes and seconds). The time counter is accurate even when you rewind or fast-forward the tape."

reduced benefits later on). The benefits can be increased or decreased as the individual estate tax needs change, and the policy can even be split into two separate policies if the spouse divorces," Stuchiner points out.

In other words, if you're standing on it trying to leave a four-foot patch or get out of a snowdrift, the torque limiter will do its thing to prevent

clogging and fouling (the peril of the early fuel-injected VWs and Audis of 15 or more years ago) and a torque-limiter (a reduction-in-spark advance and, if necessary, a fuel shut-off) during what Cadillac calls "abusive" maneuvers.

In other words, if you're standing

on it trying to leave a four-foot patch or get out of a snowdrift, the torque limiter will do its thing to prevent

you from hurting the new Hydramatic (which, interestingly, has a higher-torque capacity than its predecessor). New engine mounts and other soundproofing improvements of '91 have made the STS really quiet.

On the road, there's not just the power to match the bulk of the big European cars. There's also a stiffer suspension, including thicker front

and rear anti-sway bars and larger

16-inch rims (aluminum) mated to wide and low (60-series) Goodyear Eagle GT-4s.

Those alone give the car cornering power that would leave traditional Cadillacs in the dust, but the STS' further competition is—Cadillac's Computer Command Ride (CCR), a Computer-aided Ride system, which adjusts to one of three modes of ride firmness, depending on speed and road conditions (the slower the speed, the softer the setting).

Stopping is by four big (10.25 inches front, 10 inches rear) discs, backed up by the Bosch Anti-Lock Braking System (ABS). It's nearly impossible to get the STS mixed up with any kind of equipment: The ABS monitors the rotational speed of the wheels and modulates brake hydraulic pressure to prevent wheel lockup under panic braking or on slippery surfaces, allowing you to keep control of your ship.

If you try a dealer's demo or rent an STS and the light-bulb goes off over your head as the flash appears inside your head: "Hey! This thing

goes and handles like a really neat European car. It doesn't feel like a Cadillac," then you had the same reaction as I did in California's Chuck Herrington's maroon STS. Definitely not a car for maroons.

The inside, though, retains its Cadillac genes, with Ultrasoft Beechwood (a brand-name, not my term) leather, cushy (though not race-car supportive) 10-way power buckets with power recliners

and lumbar adjustments and real wood trim, slim but high-gloss in the door panels, instrument panel and floor console.

It's also one of the few General Motors cars that comes standard with a rear defroster. Most time, you gotta pay up to \$150 extra for what's basically a \$1.50 switch and a printed circuit.

There's also a burglar alarm and an air-bag for those with the two unrelated worries.

Considering its competition, the STS sounds like good value at \$37,135—as long as (A) it is, as its makers trumpet, better-built for the long haul and (B) buyers believe that.

We'll see.

Dead Ending: How about Dodge's survey of 2,000 high school kids throughout the country that found 70 percent say they drink al-

reduced benefits later on). The benefits can be increased or decreased as the individual estate tax needs change, and the policy can even be split into two separate policies if the spouse divorces," Stuchiner points out.

Survivor life policies also are used for estate equalization and charitable gifts," he says. "In situations involving estate equalization, a valued asset such as the family home or business may have been left to one child and a survivor life policy of equal value is left to another child."

The experts agree that buying a survivor life policy is a major decision and a complex one. Here are some suggestions from Mayer & Meyer Associates:

* Know the company. Look for a highly rated insurance carrier. The leading rating services of life insurance companies are A.M. Best, Moody's and Standard & Poor's. All review a carrier's financial stability.

* Deal only with an agent you know and trust. Ask your insurance agent about these ratings. Further, the agent should explain the factors that could affect the policy and lead to performance less favorable than

illustrated in the sales proposal.

* Shop around and ask to see the variety of policies on the market.

* With an exposure to the various survivor life policy designs, an understanding of how the policies work and a properly conceived estate plan, you will be able to pass on your estate to your children without it being diminished by taxes," says Stuchiner.

Sylvia Porter writes on matters of interest to consumers. Her columns appear in the consumer/finance and business sections of The Times-News.

Changes for '91 include speed-sensitive steering and a stiffer frame and anti-roll bar to reduce wallowing.

The Brougham is the only Cadillac model that uses passive front belt-safety instead of a driver-side air bag. It's also one of Cadillac's two gas-guzzlers. The Brougham and the Allante are assessed a \$550 federal gas-guzzler tax per car.

To wean Brougham buyers away from the thirsty optional 5.7-liter V-8, most opt for a Cadillac that boosted the horsepower on the standard 5.0-liter V-8 to 170 and added a more responsive four-speed automatic transmission.

Fuel-saving devices are a waste of money

Q. Is it worthwhile to buy a fuel-saving device for my car which is advertised to increase gas mileage by 20 to 40 percent?

A. No. It will probably be a waste of money. With fuel prices increasing on a daily basis, there is a sense of urgency created in the minds of consumers to use their fuel more efficiently. When consumers are put into this situation, they are a perfect target for unscrupulous fly-by-night promoters of fuel-saving devices.

These promoters will consistently advertise that they have the answer to solve the problems created by the fuel shortage. These promoters will generally make the same claims about their particular fuel-saving device. These claims are: (1) You can increase gas mileage by 20 to 40 percent; (2) To increase the percentage of fuel remaining in the engine; (3) That the product was government approved; and (4) That the company received a government award for the development of their product.

The Better Business Bureau warns consumers not to fall victim to such claims. The BBB does not know of one of these types of companies that has been able to properly substantiate any of these claims. These types of companies have one purpose - to take advantage of economic condi-

tions to create a need for their products. The BBB expects these types of programs to increase until the Gulf Crisis is resolved.

Better Business Bureau

Q. We just moved to the Boise area and would like to get wood for our fireplace. Could you give us some ideas on what to look for?

A. Yes. The BBB would like to offer some helpful tips on buying wood without getting burned in the process.

First of all, call around to different sellers to compare prices. Watch out for those drastically low, out-of-line prices; for you may end up with less wood than bargained for or wood that is too green to burn. Also, verify whether delivery is included in the quoted price and that there are no other hidden costs.

A standard cord of wood is defined as a well-stacked pile of logs, 8 feet by 4 feet by 4 feet. This is the equivalent of 128 cubic feet of wood and weighs about two tons. Since no

comes to my knowledge can burn wood that is 4 x 8 feet long, wood is usually sold as a "face cord" or "tier." This is a pile 4 x 8 feet on a side and cut into desired lengths. Be sure to understand which type of cord is being purchased and for what weight. If you "buy" firewood by weight, ask for the dried wood available.

It is important to remember that wood makes a big difference in the type of fire. Hardwoods will burn slowly with a minimum of smoke, while softwoods are easier to ignite and will burn more rapidly. Wood from fruit trees burns with a

steady, aromatic flame. Hardwoods are oak, birch, hickory and maple. Softwoods are pine, spruce and other evergreens. The BBB would like to remind you to be careful when using your fireplace. Be sure it is safe, and have a warm and cozy winter.

LEGAL NOTICE

BEFORE THE IDAHO
PUBLIC UTILITIES
COMMISSION
CASE NO. 31-NR-90-1

IN THE MATTER OF THE
PROMULGATION OF
RULES UNDER THE
COMMUNICATIONS ACT
ACT OF 1934, CHAPTER
6, TITLE 16, 16A, IDAHO
CODE.

WE ARE HEREBY NOTIFIED THAT the Idaho Public Utilities Commission has proposed to adopt new rules in the administration of the Communications Act of 1934, Idaho Code 62-601 et seq. The Commission's ruling may affect the following categories:

Rule 1. Explanation of General Provisions, which introduce the rules and define terms used throughout the rules.

Rule 2. Flings by Telephone Corporations, which contain the requirements for telephone companies to follow the Communications Act of 1934, Idaho Code 62-601 et seq.

Rule 3. Universal Service Fund, which establishes the administration of the Universal Service Fund intended to assist rural telephone companies in the provision of telephone service.

Rule 4. Regulatory Function, which contains the requirements that telephone corporations subject to the Telecommunications Act of 1992 must follow to regulate their territories in the interest of the public.

Rule 5. Defendants, which describes the above administrative proceedings.

Rule 6. Plaintiff, which describes the above administrative proceedings.

Rule 7. Defendants, which describes the above administrative proceedings.

Rule 8. Plaintiff, which describes the above administrative proceedings.

Westside Bolt Route	Pole Line Road to and	93'

(B) Area of Impact: All front yard setbacks on roads, streets and highways designated on the current Highway Designation Map, a copy of which is available for review from the City Clerk, shall conform to the setbacks required by that map. The setback requirements listed on the "Highway Designation Map" are pursuant to Twin Falls County Ordinance No. 21, Art. 7-Para. 7-23 and shall supersede all other setback requirements.

SECTION 2 That Twin Falls City Code Title 10, Chapter 7 be amended by the addition of a New Section, 10-7-12, as follows:

10-7-12-SPECIAL LANDSCAPING REQUIREMENTS FOR GATEWAY ARTERIALS

(A) Gateway Articals: Gateway articals include the following streets: Addison Avenue, Addison Avenue, East Addison Avenue, West, Blue Lakes Boulevard, Blue Lakes Boulevard, North, Blue Lakes Boulevard, South, Kimberly Road, Washington Street from Addison Avenue to Second Avenue West, Washington Street North, Washington Street South, Pole Line Road from Washington Street North to Euclid Drive North, and Euclid Drive from Pole Line Road East to Kimberly Road.

(B) Landscaping Requirements: In addition to and as part of the landscaping requirements as applied elsewhere in Title 10, the following landscaping shall be provided, retained and maintained on all properties in commercial or industrial zoning districts and fronting gateway arterials: A landscaped strip at least one foot (1') in width shall be provided immediately behind the sidewalk or future sidewalk. Any continuous landscaped strip extending forty-four (44') in length shall contain a twelve inch (12") minimum height berthing berm. Each separate section of the landscaping strip shall contain trees or shrubs. The plant types in each portion of the landscaping strip shall be as set forth in Section 10-11-2(A), except that evergreen trees shall not be required. Each landscaped strip shall be kept clean and free of noxious and other weeds.

(C) Hardship: In the case of the expansion of existing commercial developments, those requirements may be modified by the Commission if it can be shown by the developer that strict compliance with these requirements will result in the removal of existing and proposed parking spaces below 85% of the number of spaces required to serve the existing and proposed development.

SECTION 3 That Twin Falls City Code Section 10-9-2(L) be amended as follows:

10-9-2 ALLOWED USE OF SIGNS:

(L) Freestanding Signs:

1. Definition: A sign which may be illuminated and which is supported on the ground rather than a building.

2. Maximum Number: Each premises may have one sign per street frontage, except that a gasoline service station may have an additional trade name sign if the premises has only one street frontage, and except that an automobile dealership may have one sign per car dealership stating the name of the new car being sold if the number of street frontages would not allow such. The election of one sign per new-car dealership excludes the right of the premises to have one sign per street frontage in addition to one sign per each new-car dealership. In no case may a new-car dealership have more than four (4) signs. Premises with two (2) or more businesses, each of which is a separate legal entity and housed separately from another business may have one additional sign per street frontage.

3. Maximum Size:

a. Two-hundred (200) square feet in area in any projection, except as provided below. The total square footage of all non-lettered areas including, but not limited to, base, poles, pole covers, non-lettered symbols, etc., shall not exceed two hundred (200) square feet.

b. Three hundred (300) square feet in area in any projection for directory type signs for multiple occupancy premises in lieu of an additional sign as provided in subsection 10-9-2(L), except as provided below. The total square footage of all non-lettered areas including, but not limited to, base, poles, pole covers, non-lettered symbols, etc., shall not exceed two hundred (200) square feet.

c. Fifty (50) square feet in area in any projection in the RA and P-1 Parking Overlay. The total square footage of all non-lettered areas including, but not limited to, base, poles, pole covers, non-lettered symbols, etc., shall not exceed fifty (50) square feet.

4. Projection: Refer to Section 10-9-1(a) of this Title, but beyond the property line.

5. Height: Not lower than a point twelve feet (12') above State property or nine feet (9') above City property, Refer to Section 10-9-1(K) of this Title.

6. Location: Allowed in all zoning districts and sub-districts except Residential, AP and OS Zoning Districts and Subdistricts.

SECTION 4 That this ordinance be effective upon passage and publication.

PASSED BY THE CITY COUNCIL October 15, 1990
SIGNED BY THE MAYOR October 15, 1990

Golden Eagles intrasquad meet today and Friday

TWIN FALLS — The College of Southern Idaho track team will take to the track today and Friday for an intrasquad meet. Eagles Coach Rick Neill announced.

The meet is being held in place of a scheduled decathlon competition that was canceled due to Ricks College being unable to attend.

The intrasquad meet will get underway at 1:30 p.m. each day at the Twin Falls High School track.

Grade school Red Ribbon run today at Canyon Springs

TWIN FALLS — Magic Valley third through sixth-grade students are eligible to compete in the Red Ribbon anti-drug run at Canyon Springs Golf Course this afternoon.

Ann Durham said the mile run is open to boys and girls in the four grades and will begin at 4 p.m. Medals and ribbons will be presented to winners. All competing will get the say no-to-drugs red ribbon that is the banner of anti-drug week.

Ore-Ida Women's Challenge undergoes changes for 1991

BOISE — One year after it was the longest and most arduous women's bicycle race in the world, the Ore-Ida Women's Challenge in Idaho will have six fewer days next summer and only 75 fewer miles.

Race Director Jim Rabdal said the 1991 Women's Challenge will have 12 races in 11 days and cover 588 miles, compared to 17 races in 17 days and 663 miles in last year's Centennial Tour of Idaho.

ISU's leading scorer quits basketball for church, family

BOISE — Idaho State University basketball standout Steven Garrity has quit the Bengal team, saying he refuses to juggle the game with church and family.

"I will not give up my church responsibilities and my family," said Garrity, who is married and active in the Mormon Church. "It's not that I have to do these things; it's because I want to do them."

The 23-year-old quit Monday, saying he had spent a month in a world of "fulfilling days and sleepless nights." The two-year starter averaged 12 points and 7.2 rebounds per game last season. His 45-point performance ranks fourth on ISU's career list.

First-year coach Herb Williams was unsure whether what ever the loss of Garrity, a 6-foot-6 forward and the top returnee off a 6-21 team, might have on his Bengals.

"Not one at all—in fact, we've had some great practices since he's been gone," he said.

Coach Rod Malone and his Vikings close in on what could be Valley's first perfect season.

Golden Eagles sweep volleyball match

By Larry Hovey
Times-News writer

TWIN FALLS — Another northern division volleyball test mounted another northern division sweep for College of Southern Idaho Wednesday night.

Coach Ben Strout's Eagles overpowered Treasure Valley 15-3, 15-5, 15-2 to take three straight for the second time. CSI also has done that to North Idaho and Ricks, giving the Eagles the edge in case the road isn't kind to them next week.

CSI will beat Ricks Tuesday night and then travel to Coeur d'Alene next Saturday for the windup at North Idaho.

Because North Idaho beat Ricks in one game while losing their first match 3-1, CSI has all the advantages toward earning the host designation for the Region 18 finals next month.

CSI could clinch it all-by-beating Ricks Tuesday night. Ricks would have to have a sweep of CSI to get even in the head-to-head competition. If CSI wins one game at Ricks, it has the advantage on the head-to-head tie-breaker. But CSI, then, would have to beat North Idaho to clinch it.

The overpowered Chukars were unable to give the Eagles much of a test. In the first game they were within 4-3 when Timmie Clark served CSI out to a 10-3 lead and the Eagles then closed it out at 15-3. It was never close in the second two games with Jenny Griffin serving back-to-back for the final two points of the night.

Strout said his crew didn't show a lot of intensity because of the easy time it had had in Ontario earlier this year.

"But the one thing we talked about before coming out was getting the serve in. Then we come out and miss four out of five at one stretch," he said.

Strout said the improvement of CSI defense is pleasing, noting "in the last few matches our defense has not been letting the ball hit the floor. We're making it tough for our opponents to score and we're scoring. Also, I thought our freshmen played very well tonight."

Mortensen hopes to run away with title

By Brad Bowlin
Times-News writer

RUPERT — Jenny Mortensen tried to out for the cross-country team to get in shape for basketball, but now the 5-foot-2-inch freshman has her eyes set on the state cross-country championship.

At last week's regional meet in Locatello, Mortensen blew away the Spartans to an upset over the hosts.

"Basketball is still my favorite sport," Mortensen insists, but her outdoor accomplishments leave no doubt as to where she excels:

At last week's regional meet in Locatello, Mortensen blew away the Spartans to an upset over the hosts.

"Her time of 19:19 over the 5,000 meters shattered the Red Hills course record of 19:43 set by Twin Falls' Jenny Hamann in 1987."

And Hannah was a senior, when she set the record, points out Minico cross-

country coach Wes Patterson. He thinks his 14-year-old sensation has

Valley High Vikings sail toward A-3 football title

By Ron Gates
Times-News writer

EDEN — Last weekend was something of a vacation for Valley High School football coach Rod Malone. The regular season completed on Thursday, he headed for the hills to do a little hunting.

That the hunt ended without success bears no stigma. For a man accustomed to short order triumphs, it is surprising.

Fact is, Malone's unbeaten Vikings, ranked at the top of the A-3 classification by the Associated Press six weeks running, have sent five of eight opponents packing on the 32-point "mercy" rule.

"We're just going through a great group of athletes right now," he said. "There's a lot of enthusiasm and desire and they're working hard on defense."

In two of those abbreviated victories the Vikings inflicted the necessary damage before halftime and, had the rule been in effect a year ago, their first six 1989 contests would have ended in like fashion.

The Vikings' 30.8 per game scoring average rivals last year's 35.6, especially considering they've spent 60 fewer minutes on the field. Yielding just 28 points all season, their defense is the stingiest in the fourth district.

"They've got a good group of guys over there," promised Glenna Pettywood, Edie's press representative. "They're a real cohesive. Looking in front of me, I see Rod and his staff get them ready and outside. I see him come out and play hard."

It's been a particularly fine season for the team's 19 seniors, many of whom labored on a 2-2 club as freshmen. Since Malone took over in 1988 they're 23-3 (.855), twice-time undefeated Canyon Conference champs and approaching Valley's first ever perfect and state championship seasons.

"I don't think any of our kids have paid much attention to our ranking," said Malone, whose newly elevated charges were eliminated 20-18 by Grangeville in the last year's first playoff round. "It was kind of disappointing to go up there as No. 1 and lose. Rankings don't win many games and we've got to win more to win it all."

Among the architects of the school's most recent gridiron successes are four of its eight 1989 all-Canyon Conference representatives.

A bulked up Brian Hardy (5-8, 175) garnered first team honors at both running back and linebacker and 6-foot, 3-inch, 255-pound tackle Travers Olsen earned similar recognition on both sides of the line. Each was named all-state as well.

This year's quarterback, Chuck Springer (28 of 51 passing for 464 yards and six TDs), an all-state wide receiver and all-conference defensive back, was selected as the year's most valuable player.

The Hardy and Simpson are averaging nine and seven yards per carry, attributable to another formidable Viking strength — the offensive line, redounding from left to right, Jim Rife, Brian Steinmetz, Ken Montgomery and Olson. Average weight 194.

Mike Mitchell starts at tight end, while Keith Yost and Ryan Jarvis share time at split end. Wingback Bryce Shindle rounds out the offense.

The first hurdle is New Plymouth (4-4), comes calling at 7 p.m. Friday. Valley hasn't lost at Eden since Oct. 16, 1988. That translates to 11 consecutive home-field victories. To pull the plug on that string would be quite an achievement for the unranked Pilgrims.

Only the postseason defeat punctuates the blue and gold streak.

Please see VIKINGS/D3

Tigers are serious about state volleyball tourney

By Brad Breland
Times-News writer

JEROME — Did you hear the joke about the Jerome volleyball team? There isn't one.

The Tigers are no joke anymore. For the first time in recent history, the Jerome-Tigers are going to the Idaho State Class A volleyball tournament in Post Falls this weekend.

That's right, Jerome. Not Buhl or Wood River. The Tigers, 20-1 this season with a loss early in the year to Shoshone, take a 19-game winning streak into the state tournament. Jerome will play Bishop Kelly at noon Friday in the first round of the double elimination tournament. A victory in the first round would put the Tigers into the winner's bracket against the winner of the Salmon-Lakeland winner at 9:30 p.m. Friday. If they lose, a game on Saturday morning awaits the Tigers, but they're not thinking about losing.

Why the sudden turnaround? What made this volleyball team that wasn't close to a state playoff berth in the 1980's to the team of the 90's?

"I wish I could say it was the coaching," said Jerome Coach Brent Clark with a laugh. "I just went in and recruited girls like athletes and expected a lot out of them. It also helps to have good athletes on the team."

The coach didn't sell himself short.

The reason for the turnaround is easy for senior hitter Kim Gilbert.

"Coach Clark," she said without hesitation. "He gives us confidence and a winning attitude."

It was something that had been missing in the years that Gilbert had to endure with Jerome, looking at a bye to most teams when the schedule came out.

With Bishop Kelly waiting in the wings, Clark

Pressure builds once again for CSI's Golden Eagles

By Brad Bowlin
Times-News writer

With the exhibition season upon us and the regular season just two weeks away, the pressure is building again for Coach Fred Trenkle and his CSI Golden Eagles.

It is the kind of pressure that one puts on oneself because, by and large, no one should expect the Eagles to top themselves year after year.

But somehow, they seem to which has to be a continuing tribute to Trenkle and his doggedness in making his charges tireless and relentless competitors, both mentally and physically. Still, one could almost see

the same in Trenkle's shoulders the other day when a telephone call informed him the Eagles probably would be ranked No. 2 in the on-season national poll.

This is, of course, a gracious tribute from the national organization. It reflects some respect for getting second place with a team that some worried might be unable to get through the difficult Region 18 playoffs.

"We may be better than last year," said Trenkle of this year's edition, referring mostly to talent, depth, height and quickness — the tangibles.

"But that team (last year) eked by, scrapped by and lucked by game after game. It found a dozen ways to

win. That is a very intangible asset a team develops. That ability to rise one more notch. Not every team can find it, the coach pointed out.

"Last year," said Trenkle of the brilliant records CSI has posted in all but one of the past 24 seasons, "we're not going to win on the road." That's gotten to the point that the fans expect CSI to win all the close games — even on the road. That's the monster that's been created."

Trenkle said it will be already hearing from fans that it will be nice for CSI to go back and win "the Central Florida Invitational over the Thanksgiving weekend."

There are going to be summer strong teams there. Four of the seven other teams there could make the top 10 sometime during the year. Those teams come from successful programs with long traditions of winning.

You get to this level, playing this type of schedule, and the difference always is the intangibles," he said. "Yes, I can assure fans that this team is going to be a very nice team. It has the ability to do everything physically. It will be a much quicker team than last year. It will run and be able to handle it. But sometimes..."

Trenkle says he isn't trying to make any excuses — simply point out that other schools' other teams recruit and try hard, too.

"You get to this level, playing this type of schedule, and the difference always is the intangibles," he said. "Yes, I can assure fans that this team is going to be a very nice team. It has the ability to do everything physically. It will be a much quicker team than last year. It will run and be able to handle it. But sometimes..."

"You get to this level, playing this type of schedule, and the difference always is the intangibles," he said. "Yes, I can assure fans that this team is going to be a very nice team. It has the ability to do everything physically. It will be a much quicker team than last year. It will run and be able to handle it. But sometimes..."

"But feeling off those 30-win seasons with only a couple of losses depends on chemistry, things like that. You only find out if a team has those things after you've

seen them under adversity — and adversity only comes on the road in hostile places against strong competition," Trenkle said.

There is little doubt that CSI will have strong competition from Region 18 again.

Most of the Utah teams consider themselves improved from last year. Not much is known about the northern division teams but there is great rivalry there;

In addition, the Eagles will be playing three-year schools plus that German professional team and the powers that be at the Central Florida Invitational.

"Right now I am very pleased with the progress of this team," the coach said. Our returning sophomores are working hard and leading by example and effort. We are very pleased with our freshmen. In fact, right now I'd have to say that Bart Leach (Boise High) and Trent Rose (Skyline of Idaho Falls) would be in our top six if we ranked the individuals right now. And that does not say we are in any way disappointed in the others."

We have certain people really coming into their own. It's going to be a very interesting team to watch," Trenkle concluded.

Larry Hovey is a sportswriter for The Times-News.

Challenger Holyfield favored over Douglas for title

11"	Thighle	10"

AP

LAS VEGAS (AP) — The heavyweight championship is on the line and nowhere to be seen are Iron Mike's scowling face or his promoter's wind-blown beard.

James "Buster" Douglas will risk boxing's most prestigious title against unbeaten Evander Holyfield in a 12-round bout tonight outdoors at The Mirage.

The fight carries a \$28.1 million purse, one of the biggest in boxing history, with Douglas earning \$19.9 million and Holyfield \$8.2 million.

The only thing bigger than Douglas' purse in this fight is Douglas himself. The champion officially weighed in Wednesday at a whopping 246 pounds, 14% pounds more than he weighed when he beat Mike Tyson in February 1988.

"I can't worry about his weight now; it's a done deal," said Douglas' trainer J.D. McCauley, who admitted that Douglas was never weighed during his training.

It will be Douglas' first defense of the title since that shocking 10-round knockout of Tyson on Feb. 11 at Tokyo.

And while Tyson and promoter Don King, two dominant figures in the heavyweight scene for several years, are out of sight, they have not been out of mind.

It seems Douglas has been asked about a rematch with Tyson almost as many times as he's been asked about fighting Holyfield.

King appears to have informed ev-

Evander Holyfield

Slim and trim at 208 pounds, everyone within reach of a telephone, the champion's bodies insist Thursday night's winner must fight Tyson next. Promoter Dan Devu, however, says Holyfield will fight George Foreman next — win or lose against Douglas.

Holyfield was a 7-5 favorite, which would make Douglas the 11th heavyweight champion to be an underdog in a title defense.

Tyson, in Atlantic City, N.J., training for a fight Dec. 8 against Alex Stewart, looks at the fight as an elimination bout for the right to fight him.

It is, however, an intriguing

matchup built around the elements of size and psyche.

Much has been made about the size advantage the 6-foot-4 Douglas holds over the 28-year-old Holyfield, a former light heavyweight (175 pounds) and cruiserweight (190) champion.

Douglas' weight, however, seems much too high and could be a definite negative as he attempts to retain the title against the 6-2 1/2% Holyfield, who weighed from 202 to 213 pounds in six previous fights as a heavyweight.

"We're home, we're home," shouted Lou Davis, one of Holyfield's trainers, when Douglas' weight was announced.

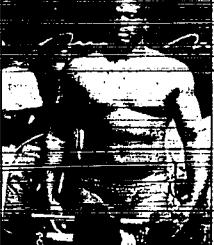

Only two heavyweight champions, Primo Carnera and Jess Willard, have been both taller and heavier for title defenses than Douglas.

"I always like the bigger guy," said Tyson, meaning he favors a natural heavyweight over a fighter who has been built up to be a heavy weight.

Holyfield, besides having boxing trainer George Benton, has prepared for the fight with the help of two strength coaches, a conditioning coach and a flexibility coach.

He hopes to be a bona fide contender in the heavyweight division, Douglas said of Holyfield.

Douglas believes his boxing ability and speed are what make his advantage in size meaningful.

Buster Douglas

Weighed in at 246 pounds

"There isn't any advantage if you can't use it," the champion said. "You have to have the mobility and the speed to catch a smaller guy. If you don't have that, then it's a disadvantage."

Holyfield thinks he can overcome his lack of size through speed and stamina, which he feels will enable him to set a pace that Douglas won't be able to maintain.

"The longer the fight goes will favor me because of my size and mobility," Douglas countered.

The most important weapon I have is my mind," Holyfield said. "I feel that Tyson let Buster Douglas — people aren't used to a struggle."

do what Buster wanted to do. I've got to make Buster realize, 'Hey, I'm not Mike Tyson and you're not going to do that to me.'

A lot of boxing observers believe Tyson was fat from overconfidence and that it was a case of his losing more than Douglas winning — that Douglas got lucky.

If it was a lucky day, it was one hell of a lucky day," said Douglas, who noted that he didn't win with a desperation plan, but that, with the exception of being knocked down in the eighth round, he dominated Tyson.

I hope that luck continues. I knew I had the ability, I had to house it right. There have been traditions throughout my career. I was making mountains out of molehills.

Douglas' 30-42 record with 20 knockouts, is dotted with uninspired performances. In a bid for the vacant International Boxing Federation title in 1987, he gave in to Tony Tucker in the 10th round when he still led a decision victory within his grasp.

Holyfield has not mentioned it recently, but he once said that he would "make Douglas quit."

"You ask how I feel, I'm going to tell you," said the undefeated challenger (24-0 with 20 knockouts). "He has quit before. You say anything to make him think about his weaknesses. I mean, it's up to him. Some people are frontrunners. Some people are fighters. People aren't used to a struggle."

Burley ends 4-year stay in Class A-1 football

By Brad Breland
Times-News Writer

BURLEY — When the Bobcats take to Budge Field for the season finale of the 1990 football campaign, it will be at the end of an era.

For four years, the Bobcat football team has been put to the test of the Class A-1 football programs. Next season, the Bobcats will drop back to the Class A-2 classification.

Gone will be the games against Twin Falls and Caldwell as well as Friday's opponents, the Mountain Home Tigers, but that shouldn't take away luster off the importance of the 7:30 p.m. contest.

"We've got to beat Mountain Home to get into the playoffs," said Burley Coach Bill Torborg, a freshman this season. "This year would send the Bobcats off with Mountain Home and Caldwell into a three-way tie. It's something that Burley would like to avoid at all costs."

"It's not anything I want to be stuck in," said Hicks.

A win means a trip to the first round. Despite their state ranking and pod standings, the Bobcats will probably see a first-round game in

ANDY AREND/Times-News

Burley's Duane Henry (50) helps clear the way for running back Brandon Ormond against Jerome.

side the Kibbie Dome in Moscow at Jerome are very different. Mountain Home, the University of Idaho:

If you take the argument of com-points, while the Bobcats won by 15 more opponents for the Friday night game, Burley looks, on paper, at 36-point favorite over Mountain Home, to be an even victor.

Both teams beat Buell with Mountain Home winning by 20 points and Burley by 23. The games against

"I don't feel that way at all," said Hicks. "Mountain Home has a quiet team and we may have troubles with

them again. There's always next year, but not in this case."

4-4 Bruins just 1 game away from making playoffs

By Larry Hovey
Times-News Writer

Tufts again on the doubtful list with a knee injury.

But Judd adds what happened in the second half at Capital last week probably is a harbinger of what the Bruins will see this time around.

"Capital basically came out in the second half and challenged us with a 10-man front," he said of Twin Falls' reliance on the running game. "We've been waiting for someone to do that all year because our quarterbacks simply haven't been getting the ball to our receivers."

"I doubt that lesson will be lost on Nampa and we expect them to come out in a 6-2 Friday night. They will challenge our quarterbacks and they (quarterbacks) will have to respond because our defensive line definitely is the strength of Nampa in our opinion," Jund said.

He listed senior Stan Raus, 230 pounds, and Ray Davens, 180 pounds, and juniors Rich Davis, 220 and John Trumbull, 199, as a strong defensive line.

"Because of them we will be trying to get outside as much as we can and eat down on their pursuit," Jund said.

"They've played well their last three games," they led Borah 8-2, Caldwell 15-13 and had Boise tied 7-7 at halftime. I'm sure they figure this will be their best chance of the year to win a

Class A-1 ball game.

On offense, the Bulldogs rely on quarterback Brock Berryhill, son of former Filer and Hansen coach Ray Berryhill, who "throws the ball quite well and runs the option very well. He's the main cog in their offense," Jund said.

Nampa also has moved back up quarterback Shown Turner to tailback because of his speed. And that play also has brought the halfback pass into play.

"They've thrown it four times the last two games," said Jund.

Passing continues to be the death of the Bruins as Capital threw for over 300 yards in whipping them last week.

"Defensive we did very well against the run," Jund said. "The third time we had them third and 11 and they threw the 65-yard bomb — their receiver was 12 yards behind our safety. The next series it was third and nine and the same thing."

With Tufts questionable, Twin Falls again will shift linebacker Tim Hoyer and T.J. Newton to running back. Phil Phimmonson has been

switched to cornerback and the other two will be at the field. If he throws, we will be looking for him.

With Tufts questionable, Twin Falls again will be the best tight end in the state and we always tell them they could be the best tight end and receiver too, but we can't get the ball to him," Jund said.

Pitcher Stewart leads baseball computer rankings

HOUSTON (AP) — The enormous purse in the Nabisco Championships can be illustrated, by some figures from Hale Irwin's record.

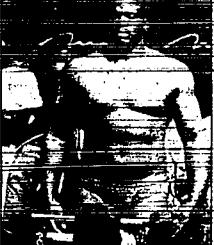

The U.S. Open champion has the possibility of winning more money in the next four days than he accumulated from 1986 to 1989.

In those four seasons Irwin won a

total of \$476,781 on the PGA Tour. He and 29 others — the top 30

money-winners on the tour this season — are competing for \$3.5 million in individual prize money this week, with as much as \$625,000 going to the winner.

It's been a fabulous year, but a very busy year," said Irwin.

do what Buster wanted to do. I've got to make Buster realize, 'Hey, I'm not Mike Tyson and you're not going to do that to me.'

A lot of boxing observers believe Tyson was fat from overconfidence and that it was a case of his losing more than Douglas winning — that Douglas got lucky.

Fielder earns AP Baseball Player of the Year honors

DETROIT (AP) — Cecil Fielder, whose baseball-bashing titan Japan-bashing less popular in Detroit, was named The Associated Press Player of the Year on Wednesday.

"Anytime you're compared with all your peers and you're selected the outstanding player,

that's a great honor for me," Fielder said. "That's awesome. That's unbelievable."

Fielder, whose 51 home runs made him only the 11th player to reach the 30-home plateau and first in 13 years, was a clear winner in the nationwide vote by sports writers and broadcasters.

Fielder received 90.5 votes, Oakland outfielder Rickey Henderson 39, and Pittsburgh outfielder Barry Bonds 27.

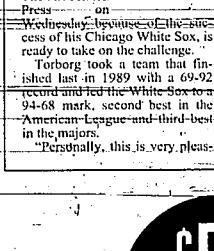

DETROIT (AP) — Jeff Torborg has a hard act to follow and he's doing it.

But Torborg, named baseball Manager of the Year by The Associated Press on Wednesday, is the new face of the Chicago White Sox, ready to take on the challenge.

Torborg took a team that finished last in 1989 with a 69-92 record and led the White Sox to a 94-68 mark, second best in the American League and third-best in the majors.

"Personally, this is very pleasant but it'll be tough to win 94 games again," said Torborg, recruited to Chicago from Florida.

Jim Leyland, who led Pittsburgh to the National League East title, finished second with 51 votes. Lou Piniella of the world champion Cincinnati Reds was third with 21 and Oakland's Tony La Russa was fourth with 11. Buck Rodgers of Montreal had 3 and one each went to Tom Lasorda of Los Angeles, Jim LeFebvre of Seattle, John McMullan of Cleveland and Joe Morgan of Boston.

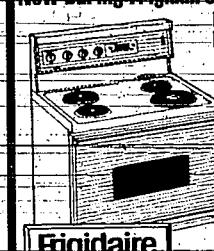

Torborg

Chicago Cubs second baseman Ryne Sandberg, who hit 40 homers, picked up seven votes, and four players — three of them

pitchers — received one vote each.

Pittsburgh outfielder Bobby Bonilla, Boston's Roger Clemens, Oakland's Dennis Eckersley and Chicago White Sox's Sox Bobby Thigpen.

Fielder is the third AP Player of the Year, following Oakland's Jose Canseco in 1988 and San Francisco's Kevin Mitchell in 1989.

Mortensen

Continued from D1

good chance at the state title, Lewiston, but she will face stiff competition from defending state champion Idaho Falls' Diane d'Alema.

Patterson, who has been tracking Yaten this season, said she and Mortensen have posted similar times, but it is difficult to compare their performances because they compete on different courses.

Yaten won the northern Idaho regional meet on the Lewiston course and will have experience on her side. Mortensen realizes she will be in the unfamiliar position of underdog.

"I think about her all the time," Mortensen said. Handling the mental stress, not the physical speed and endurance, is what she must work on to improve, her coaches say.

"She's still a beginning runner and she's not used to the stress at this level," said assistant coach Orlia Casiano Palomo, herself a former Minico track star.

But the constant attention and high expectations haven't affected Mortensen's concentration, Palomo said.

"She motivates everybody," she said. When she passes somebody

on the track, she always says "Come on, you can do it, keep it up."

The history of being the best steady progress. Her times have dropped steadily from the beginning of the season."

"More," Mortensen said.

Mortensen is accustomed to running long distances. She ran the 1,200 meters for East Minico Jr. High's track team last year, but the rigors of cross country almost proved too tough for her slight frame.

"She doesn't take it up to her head," Palomo said. "She enjoys what she's doing, and if she wins, that's just icing on the cake."

"I used to be sore all the time," said Andie first race was in 95-degree heat over a hilly course.

"I won, but I blacked out after the race," she said, admitting that she considered quitting the team at the beginning of the year. Aside from bruised ankles suffered during the regular season at rocky Red Hills,

Mortensen has remained injury-free, and she said getting hurt is the furthest thing from her mind.

The support of the other team members and her parents have kept her going, she said.

"I still get very nervous," Mortensen said. "I talk to my teammates, and I talk to my dad."

"Jenny has good running form,"

Patterson said. "She really has a good work ethic and she's made

the history of being the best steady progress. Her times have dropped steadily from the beginning of the season."

Thinking, thumping don't mix

SARATOGA SPRINGS, N.Y. (AP) — A college baseball coach whose doctoral dissertation is on the mental aspects of hitting a baseball thinks hitting and thumping just don't mix.

"If you're thinking, you're in trouble because you don't have your eyes to your hands and bypass the brain," he said.

A good fast ball takes four-tenths of a second to go from the pitcher's hand to the plate, which doesn't give you enough time to think once

"There's a story about Mickey Mantle going up to bat after a big night out."

"He was hung over and went up to pinch hit and hit a home run. His

"The key is not to get tense and anxious — that tightens muscles and it tightens the muscles,"

"Many people just concentrate on mechanics, but if you're thinking about mechanics, your head's in the wrong place," Hanson said.

"Great hitters reach the mental stage in different ways," according to Hanson.

Some eat chicken before a game; others step into the batting box backwards; and some rub the bat with certain "lucky charms."

"The classic example is Wadd Boggs who eats chicken every day before a game," Hanson said.

Jerome

Continued from D1
has had the opportunity of watching the Knights twice this season.

"They like to hit in the middle. They'll set to the middle about 95 percent of the time," said the coach.

The reasons are 6-foot, 1-inch middle blocker and hitter Stephanie Rumold and Mo Hagan, both members of the Snake River Valley first team all-conference squad.

The Tigers will counter the Knights' due with their own two-some of Gilbert and Jenny Faltner.

The Faltner to Gilbert combination

has worked miracles for the Tigers this season.

"I love hitting off her sets. She's there every second ball," said Gilbert of Faltner's efforts on the court.

Although she's not as visible as Gilbert, Faltner is the key to the team.

"I have to get to the second ball," said Faltner wanting to get that perfect set for a spike.

The trip to Jerome is a long one. The team will leave Thursday morn-

ing at 6 with a few stops in Oregon along the way including a practice at Pendleton High School before pulling into Post Falls about 12 hours after leaving Jerome.

To win the state tournament, Jerome probably will have to get by on parental powers Preston and St. Charles, who dominated the class in the past three seasons.

"We need to go and play well and as hard as we can," said Faltner. "We've taken one big step and need to take one or two more."

is they have to do," added Malone.

"They've thought about a state championship since they were in grade school. It's something they were raised wanting to accomplish."

Continued from D1
white's 11 and eight-game win streaks.

A runner-up finish in the 1989 state basketball tournament further

whetted their appetite for a state title.

"They're a very intense group and they have their minds set on what it

Plan ahead for best chance to survive

It can happen quickly.

You are enjoying a late fall deer hunt. The truck is only an hour away so you can continue to hunt into the afternoon. Then suddenly you find yourself stranded and unable to make it back to

**David
Hocklander**
Hunting

the safety and comfort of your vehicle.

Maybe you slipped on a rock and sprained an ankle or broke a leg. Perhaps a storm broke and the falling snow has forced a one-hour trip back to the road into a three-hour trudge with only two hours of daylight left. Or possibly you realize that you are lost and do not know which drainage will take you to camp.

As soon as the reality of the situation sinks in, you must face the fact that you will be spending a night on the hill. The seriousness of this turn of events depends upon what, if any, preparations you have made for surviving a night out.

If you have no survival kit you may survive the experience if the weather is not too severe, but the hours of darkness will not be very pleasant.

However, some planning ahead in the form of a survival kit which can be carried in a daypack, saddlebag, or even a belt, can make a night under the stars bearable if not comfortable. The kit need not contain everything but the "kitchen-sink" but termites are a must in any kit.

Three rules have to be first on any survival kit:

"A fire" not only provides warmth, but serves as a signal for search parties, a way to melt snow for drinking, and a comforting companion. Matches need to be waterproof. A butane lighter also works well and is more windproof than matches.

Please see SURVIVAL/D5

Briefly

Large rainbow trout released in valley-waters

JEROME — As part of the federal government's Urban Fishery project designed to promote better fishing close to population centers — several hundred large rainbow trout have been planted in several Magic Valley waters.

Chip Corsi, Region 4 fisheries manager, said 440 surplus brood stock from the federal trout hatchery in Ennis, Mont., were released by the Idaho Department of Fish and Game Tuesday.

The releases included 100 in Rock Creek at the county park west of the hospital; 150 at Emerald Lake near Burley; 40 at the Burley Kid's pond; 100 at Clarke's Lake and 50 in the Summer gravel ponds in the Thousand Springs area.

"Most were in the two to four-pound class but there was a fair smattering of fish in the seven-to-10-pound range. There were some real hogs," Corsi said.

Snake River fishery research continuing, F&G indicates

JEROME — The preliminary research work testing the validity of making a major trout fishery on Snake River through the lower reaches of western Twin Falls and eastern Elmore-Gooding counties is continuing, reports Chip Corsi, Region 4 fishery manager for the Idaho Department of Fish and Game.

Corsi said biologist Fred Partridge is still collecting data on current inventories from the Thousand-Springs-area through the three-dam complex ending in the C.J. Strike pool.

"The area below the lower Salmon dam to the C.J. Strike pool revealed very few fish except for the thousands of rainbow-cutthroat hybrids the department planted there recently."

Some fingerlings marked and planted last spring have been recaptured through electro fishing and those have shown good growth rates — three to four inches to 10 inches. Corsi said that indicates if we can get them to maturity we could have something there."

Some fishing spots will be closed beginning Oct. 31

JEROME — Although the general fishing season continues through November and many of Magic Valley's waters are open to year-round fishing, anglers are reminded that the Frank Oster Lakes and Anderson ponds on the Inderman Wild-life Management area will close Oct. 31.

Compiled from staff and wire reports

Pheasant hunters do well on opening day

By Larry Hovey
Times-News writer

JEROME — Magic Valley pheasant hunters had their best shooting day in several years, almost exactly fulfilling the predictions of the Idaho Department of Fish and Game.

In the two checking stations run for pheasants and ducks, both species provided improved harvest over the past year.

However, while the percentages were better for pheasants and hunters reported seeing more birds than anytime since 1980, the total population remains down.

Still there was some joy among Wood River area hunters who came largely into Jerome, Gooding and Lincoln counties to test their luck.

A few ventured into Twin Falls and Minidoka counties as well.

The department's Timmerman-Hill stu-

tion processed 182 hunters with 241 birds, averaging out to 1.3 birds per hunter and 2.8 hours of hunting per bird.

Those figures compare very favorably to the 139 hunters with 113 birds and averages of .8 birds per hunter and 4.6 hours per bird of a year ago.

But things were not so bright at the other traditional check station — the one at Ace's.

At that site, the department checked 50 hunters against 45 last year.

The hunters had 32 birds, up eight from last year and hunted 5.9 hours per bird against 7.1 last year.

The department also had conservation officers making field checks. In eastern Jerome County, one officer checked 44 hunters with 41 pheasant or 9 birds per hunter and 1.7 hours per bird.

At the Magic Water irrigation area in western Twin Falls county, field checks

look at the type of weather and temperatures we had at that time.

Both field and station checking showed local ducks might have enjoyed a better than average reproduction year.

"We checked a fair number of limits out of Silver Creek and off the Snake River," Kvale said. "It actually looks real good."

Kvale said state military bird manager Gary Will reports some movement of northern migrants into the state.

Kvale said some newcomers have been spotted in this area the past few days along with a good mixup in eastern Idaho.

"We're seeing tundra swan and snow geese in Eastern Idaho two weeks earlier than usual," he said.

"They reportedly have had some early cold snaps in some areas of Canada and the birds are leaving earlier."

Transplant moose killed in Fairfield poaching incident

The Times-News

FAIRFIELD — For the second time in two years, transplanted moose have been shot and left to rot by poachers in the Fairfield area.

Region 4 enforcement chief Steve Agte is soliciting the public for any aid it can provide in uncovering the culprits.

The moose, a yearling cow that probably was the one released earlier this summer after it wandered into an eastern Idaho town, was killed early Saturday on Lateral Creek near Little Smoky. The cow had been released on the South Fork of the Boise River near Bird Spring.

Agte said the public would appreciate hearing anything from the public no matter how seemingly innocuous. He noted types and colors of vehicles and reports on kinds of hunting groups or individuals seen in the area Saturday morning would give the department something to work on.

Carl Nellis, Region 4 supervisor, said the department was able to pretty well pinpoint the time of the crime because "it was turned into us and early enough that we managed to salvage the meat. So we know it had to be killed on Oct. 30."

Saturday also was the opening weekend of the deer season in the area, a large number of people with rifles were in the area.

"That's why we are anxious to get anything at all. Any leads might produce something," Nellis said. Two years ago, a cow calf and bull were shot and left. The department later brought charges against Magic Valley men. Court documents found one insufficient in evidence and charges were dropped. Anyone with information on the latest poaching incident is asked to call the departmental office in Jerome at 324-4350 or they may use the Citizen's Against Poaching number.

Please see SURVIVAL/D5

An honorable pursuit

A hunter outlined against the early morning light on cloudy peaks and fog-filled drainages reminds many Idahoans of one of the most exciting aspects of the great outdoors in the Wildness State. Fall brings with it the beginning of deer, moose, elk and other big-game seasons for Idaho sportsmen.

Mule deer harvest excellent in general, controlled hunts

By Larry Hovey
Times-News writer

JEROME — Good recruitment of yearlings into Magic Valley's mule deer herds resulted in excellent harvest in general and controlled hunts last year.

Craig Kvale, Region 4 wildlife manager, said the general hunting in units 48 and 49, or antlered-only, resulted in nearly similar success to 1989. But the controlled hunts in the St. Hildegard area were less successful.

"Most deer hunters were fairly happy," said Kvale, who worked the Timmerman Hill check station. "The animals caught onto things pretty quickly and by the weekend we were seeing the daytime drop-off. Wednesday evening (we) had 41 percent but it backed off to last year's lows for the combined two-day season."

In unit 48 on the antlered-only hunt, the department checked 79 deer this year against 79

last year. Some 313 hunter trips were counted this year against 338 in 1989. This year's 25 percent success rate was just two percent over last year. That 25 percent figure is in line with the last five years.

In unit 49, 164 hunters checked out 56 deer for a 34 percent success ratio.

"Antler size was up on adults and we're getting into some of those categories where we had real good growth," Kvale said. He noted the good production of four and five year

age are now showing up and "they're good looking bucks."

Kvale said a few three-point yearlings and one four-point were checked along with a 12 number of spikes. The length of the beam was up from last year, he said.

In the South Hills, the combined Rock Creek and Shoshone basin stations counted 478 hunter trips against 579 last year with 192 deer against 187 a year ago. Success percentage climbed from 32 to 40 percent. But sepa-

rated into antlered and antlerless, it amounted to 33 and 18 percent. In unit 49, combining Allard and Oakley stations, there were 380 hunters with 16 deer and 44 percent success.

This compared to 400 hunters with 128 deer and 32 percent a year ago.

Antlered success was 34 percent against 24 last year while antlerless was up to 56 percent.

Kvale said some of those antlerless included extra deer permits which may have some impact on success rates.

"Based on our winter conditions last year we thought our carryover would be in good shape," he summarized.

"We had very little fawn mortality last winter and we are very interested to get all these reports broken down into fawn-adult ratios. Last year our yearling harvest was way down because of some heavy winter loss in certain areas. A cursory look this year indicates yearling percentage of the harvest is back to more normal proportions."

New grizzly plan would not count male bears or lone females

The Associated Press

GREAT FALLS, Mont. — A revised plan for determining whether the grizzly bear no longer will be listed as "threatened" in the lower 48 states would not count male bears or lone females, an official says.

Public meetings on the draft proposal are scheduled Nov. 5 in Libby; Nov. 7 in Great Falls; Nov. 8 in Bozeman; and Nov. 20 in Kalispell.

The current plan, approved in 1982, was based on the assumption that the total number of grizzlies in an area could be estimated.

"In the past, we had an idea we could tell the total number of bears in the area and now we know we can't," said Chris Sierschew, the U.S. Fish and Wildlife Service's grizzly bear recovery coordinator in Missoula.

He said that under the proposed revised plan, only female grizzlies with cubs would be counted when trying to determine total population estimates in an area.

The ecosystems where officials are working for recovery of grizzly populations include the Northern Continental Divide Ecosystem and the Bob Marshall Wilderness in Montana; Yellowstone National Park; the Cabinet-Yaak area in northwestern Montana; and the Selkirks in northern Idaho and Washington.

The Bitterroot Mountains along the Montana-Idaho border,

the North Cascade Mountains in Washington, and the San Juan Mountains are being studied to see if they are suitable for grizzly recovery efforts.

Sierschew said that sightings of female grizzlies with cubs will be averaged over three years, the period in which female bears raise their litter.

Sightings will be compared to make sure the same bears aren't counted more than once, he said.

Each of the grizzly ecosystems is divided into a number of smaller areas used by the bears.

Sierschew's formula will also count bears in areas where they have moved in, but a few of those areas during a three-year period before

the population will be considered to be recovered.

The revised plan predicts that grizzlies will be able to be removed from the federal threatened species list by the year 2010 at a total cost of \$26 million, he said.

Chris Erickson, chief of the state's Wildlife Management Bureau in Helena, said that during the past three years, the Northern Continental Divide ecosystem has met the recovery plan's revised standards, based on the number of female grizzlies sighted with cubs and the number of grizzlies killed by humans.

But Hank Fisher of Missoula, an official of Defenders of Wildlife, said his organization may question assumptions about the percentage of females with cubs expected to be seen in a given area.

F&G extends early archery season 2 days

The Associated Press

LEWISTON — A flood of opinions from bowhunters has prompted the Idaho Fish and Game Commission to extend the early archery big-game season by two days.

And a suggestion by the state board's newest member Thursday helped break an impasse over archery and muzzleloader stamps.

Meeting in Lewiston Thursday, the commission addressed several portions of the Fish and Game Department's upcoming fall 1991 regulations, including the new 3,600 "sportsmen" to 21 public meetings. Hunters killed more than 1,000 letters to the department, commissioners, legislators and Gov. Cecil Andrus.

In the end, the full press by archers in early-season archery days — showed the most dramatic results. Fish and Game originally proposed to cut the season at a matter of fairness to rifle hunters. But archers, inun-

Activists, overproduction blamed for fur industry slump

RIGBY (AP) — In 1982, after working 35 years for state and federal wildlife agencies, Paul Jeppson of Rigby retired and took up trapping. He says it's been a good way to pass the time.

This winter, though, he's not sure he'll have another to buy a trapping license.

While trapping along the South Fork of the Snake River last January, he says he was followed by an airplane and a powerboat.

The next day, he found some trap missing, and several others tampered with.

Over the season, he figures he lost up to half of his traps; in one case, people went to the trouble of releasing a live beaver from one of his traps.

He lays the blame on animal rights activists.

While many Idahoans may feel fur removed from the debate over furs and trapping, Jeppson says the furor has hit him close to home.

"You wouldn't even know there's some kind of organization out there," he said.

Is there? The Idaho Department of Fish and Game isn't sure.

Some traps are stolen or tampered with, but the culprits seem to be jealous trappers or young pranksters, said Al Nicholson, a Fish and Game regional conservation officer in Idaho Falls.

But Jeppson isn't the only Idahoan in the fur industry who says he's had problems with activists.

Lee Moyl, who raises 35,000 mink a year on his Heyburn ranch, says he's received death threats. Some people have threatened to re-

Trapping has become more controversial in recent years with the surge of animal rights activists who want to protect many wild animals at all costs. Some trappers cite interference by animal rights group members as a reason they are curtailing or stopping their work completely.

lease his animals, and others have come to his ranch to argue.

"They come in here with a thousand sand insects on the windshield to tell us we shouldn't kill animals," he said.

Al Hultstone of Pocatello, who's been making fur coats for 63 years, hasn't had any problems with vandalism or threats, but he had some show up at his shop last year. To argue with him,

Hultstone, now 80, lets his visitor leave his shop "while he was still in one piece."

Even a spokeswoman for a major animal rights group says some anti-fur activists are too extreme.

I do think that death threats are a bit much," said Barbara Hale of People for the Ethical Treatment of Animals in Rockville, Md., which lists its national membership at over 250,000.

"We certainly don't condone leaving his shop while he was still in one piece."

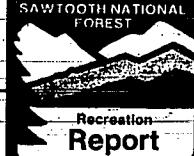

Tampering with traps is different, however. People for the Ethical Treatment of Animals would consider this, as a way of saving fur-bearing animals, Hale said.

Those in the fur business, and those who want to shut down the fur business, at least agree on one count. The industry is in a slump.

Jepson says it may not pay to

Snow reported at higher elevations of all Sawtooth National Forest districts this week

The Times-News

TWIN FALLS — All forest districts are reporting snow at higher elevations of the Sawtooth National Forest this week.

Snow level is at 8,000 feet with some patches noted 1,000 feet lower. The low thermometer reading this past week was 10 degrees at Sawtooth Valley with a high of 62 in the southern division.

Woodcutters are reminded... this year's personal use permits are valid only through Nov. 30 and cannot be renewed or used during the new cutting season.

If additional snow creates soft and muddy conditions on access roads, travel into cutting areas could be restricted.

Although most water systems have been shut down for the season, a variety of campgrounds are open for

hunters and other late season visitors. User must bring their own water and carrying out their trash.

Hikers are reminded hunting is now open in many areas of the forest. All visitors are advised to wear bright colors when in the wood.

Hunters are reminded it is illegal to discharge a firearm with 150 yards of a developed site.

Water and services will be provided and fees charged until Nov. 1 at

Brown and Canyon campgrounds. Baumgartner campground is open with no fees or water.

Seasonal road closures are now in effect on the Fairfield district and a map showing these closures is available at the Fairfield district office.

The road over Trail Creek summit is open on the Ketchum district. Seasonal road closures are in effect for the Baker Creek east Fork and North Fork of Hyndman Creek roads.

Visitors to the South Hills may use Twin Falls district campgrounds on a self-service basis. Water systems are off. Ample supplies of filled wood are available in the Wallowa Springs and Cotton Ridge areas.

For addition information about forest maps, trails and vehicle restrictions, district offices are open from 8 a.m. to 5 p.m. daily in Twin Falls, Burley, Fairfield, Ketchum and Stan-

ley.

you don't, it is nothing but worthless weight. So if you include a compass and maps make sure you know how to use them to overcome your problems not add to them.

Food may be satisfying to have along an overnight stay but the human body can go for a month or more without any intake. But water is a different story. The body can survive only about three days without water. Water is often easy to find during the fall hunting season but unfortunately, water from streams and lakes in most of southern Idaho is not safe to drink. So a useful addition to a survival kit is a bottle soaked in petroleum jelly will work well.

A reflective survival blanket is light and compact and can serve as both a shelter and a heat-retaining blanket. The kit should also contain materials to secure the blanket such as duct tape and nylon cord.

Signaling devices can greatly aid search and rescue attempts. Every kit should contain at least a mirror, and a flare, whistle, or bright ribbon are useful additions.

The new compact flashlight on the market makes taking along a light practical. Even a spare set of batteries adds little to the kit's weight.

A compass is a very crucial piece of survival equipment—if you know how to use it effectively. If

paper should be written a description of where you plan to be hunting and with whom you will be hunting. This is one survival item which must be left home—somewhere where it can't easily be found if needed.

Then hunt where you planned to hunt. This will greatly help any needed rescue attempt.

Put a survival kit together and take it with you wherever you venture more than a few minutes from the security of your vehicle. It will make a welcome companion if events leave you on the hill long after the sun sets some cold fall evening.

David Hocklander is a teacher and athletic director at Gooding High School.

Archery

Continued from D4
dated the department with a flood of mail.

The commission followed the department's recommendation of increasing the early season hunt by two days to 30. But that season should end—probably from the peak of the elk breeding time—and is scheduled to run through Nov. 30.

The final phase represents less victory than a tradeoff, said Jim Sherman of Lewiston, who represented the Idaho State Bowmen.

The archery season will be longer, but the early days of the season will not be as productive for bowhunters as said.

The commission is deadlock over timeoyer suggestions to alter the present Oct. 31 deadline for archery and muzzleloader stamps, necessary to hunt game with those weapons. Commissioner Keith Carlson of Lewiston proposed moving the deadline to Sept. 1, which three men

opposed. Facing a 3-to-2 vote, Commission Chairman Louis Racine Jr. of Pocatello waded in to side with Carlson.

Racine said the deadlock offered one more possible solution: The chairman would receive two votes.

"You might as well face this right now. You're not going to break it unless the chairman votes twice," he said. "But the vote technically was over a motion, which failed as a tie."

Region 4 Commissioner Wesley Rose of Jerome—the newest member, offered a solution—in keeping the Oct. 31 deadline, but archers and muzzleloaders would receive mandatory education during the next five years. It won four votes on its way to passage.

In working through the white-tailed plan, the commission ap-

proved allowing Panhandle hunters to pursue mule and white-tailed deer from Nov. 1 to Dec. 1 in game units 1, 2, 3, 4, 5 and 6.

Controversial strictures on the high-tech equipment that might be added onto primitive bows and blackpowder rifles were dropped from the long-range plan.

The specifications would have limited arrow weights and lengths, banned electronic equipment and restricted muzzleloaders to a single, all-lead metal projectile.

Michael Ferguson of Rexburg, owner of Sure-Trak, told the commissioners he has invested two years, and nearly \$2 million in gearing up to manufacture a lightweight radio transmitter that goes on arrows. When it hits prey, it sticks with the animal and the bowhunter can radio-track it.

"The reason it was developed was because I had lost animals in the past and it was so frustrating I was ready to give up archery," Ferguson said.

trap this winter. A beaver trap costs about \$10 to \$15, which is about as much as he can expect to get for a cleaned, processed beaver pelt.

Moyl only expects to work on 10 or 15 traps this year. Sales are way off, and his figures are off.

"If somebody comes and buys me out, I'll sell tomorrow," he says.

Moyl blames the current fur industry crush on overproduction, not activism.

A similar slump, coinciding with the "flower power" movement of the late 1960s, cut worldwide mink production by two-thirds and forced some 5,500 fur farms out of business, he says.

The current glut — coupled with the debate fueled by the animal rights movement — should have the same effect.

Until that happens, and prices go back up, Moyl is content to cut costs and treat water.

"If we go broke, we're going to be one of the last ones to go broke," he said.

Hale says this is more than just a slump. Corporations, entertainment and the public are coming around to oppose the fur industry.

"I think the fur industry is on a downward flight," she said.

Like the battle between hunters and anti-hunting activists, the fur debate runs heavily on emotion and tradition. Trapping, like hunting, is part of Western heritage and folklore.

A big part of the debate, however, is biological.

Moyl says his minks are "four-legged vacuum cleaners" that play

an integral part in the delicate balance of Magic Valley farming.

The minks eat tons of waste products from the trout, poultry, beef and potato industries that otherwise would have to be thrown out at great expense.

They produce manure to fertilize cattle pastures. Even mink remains are made into fish bait.

Supported by say trapping — such as the 51,871 mink, beaver and other mammals killed in Idaho last year, helps keep populations in check, and limits the spread of rabies and tick-borne disease.

"Because more animals, on average, thrive as a result of a balanced environment, each active trapper contributes more good than 10,000 bleeding heart human beings who do nothing to help wildlife," Tom Krause, n-Riverton, Wyo., trapping activist, wrote in the September issue of a National Trapping Association magazine.

Hale, however, thinks the biological arguments don't make sense.

Even if animals aren't "trapped mercilessly," or raised for their fur under "despicable conditions," the ecological balance will take care of it, she says.

"I don't think there's a tremendous overpopulation of minks and chinchillas running around out there," she said.

"I just really don't see how they can say they're helping the environment. They're not."

Outdoors**Forest Service debates how best to make use of biological diversity**

The Associated Press

The U.S. Forest Service has vowed to protect some of Idaho's most ancient trees, but it's not for the spotted owl's benefit.

The agency also has outlined plans to protect rare plants and animals not only in federally designated wilderness areas but also in logged-over public forests.

Under a little-known clause in the National Forest Management Act, national forests are obligated to provide a diversity of plant and animal communities to maximize biological diversity, or biodiversity.

But nearly all of Idaho's 10 national forests are applying the concept differently, if at all.

This isn't surprising. The Forest Service has yet to develop a national or regional definition and policy for protecting biodiversity. So it's an elusive concept that some forests have taken to heart, while others are awaiting direction.

J. Michael Scott, a research biologist for the U.S. Fish and Wildlife

White storks may become extinct soon

COPENHAGEN, Denmark (AP) — Ornithologists say the European white stork, a fabled carrier of good fortune and babies for centuries, is in danger of becoming extinct.

Bird-watchers are waiting to see how many storks return from their annual migration. Last spring, only 15 came back to Denmark; their northernmost meeting point in Europe.

That compares with an estimated 1,000 breeding pairs a century ago. Similar reductions in the number of white-storks, once common as far south as the Balkans, have been reported elsewhere in Europe.

Hans Skov of the Ornithological Society said the number of storks in Denmark had declined by half in only a decade, and "at this rate will disappear altogether by the year 2000."

He and aides are putting wagon wheels dressed with straw on farm house roofs, telephone poles and chimneys as convenient nesting places for the storks when they complete the 7,500-mile journey from southern Africa.

White storks are considered good omens, particularly of fertility, and traditionally have been encouraged to build their nests on rooftops.

Wagon wheels were a form of encouragement to storks in the Middle Ages, when it was believed a stork on the roof brought good luck to the house, Skov said in an interview.

Bird lovers should be careful to provide favorable nesting conditions because modern tile roofs are slippery, a poor foothold for the birds, he said.

Most of Denmark's remaining storks live in the Jutland peninsula in the North Sea. Ornithologists say about nine of 10 storks return from their annual migration to a spot within less than 350 feet of their old nests.

White storks, which have wingspans of 6½ feet and weigh about nine pounds, are on the retreat all along their migration route, Skov said.

African drought and human expansion into bird habitats took a toll in the 1980s, he said, and the birds are hunted in Lebanon.

Use of chemical fertilizers and the draining of fields for farming have destroyed European wetlands where storks feed on toads, snakes and insects, but the largest single cause of adult stork deaths may be high-tension power lines.

Electrocution kills about half the adult storks that die in Denmark and about 70 percent in West Germany, Skov said.

When the wild stork neared extinction in the Netherlands in the 1970s, the Society for the Protection of Birds began a rehabilitation project.

Adult birds were induced to mate in controlled conditions at a "stork village" in Groot-Ammers, a western town, and at 12 breeding stations around the country.

Offspring were released at selected locations. Erik Wanders, a spokesman for the society, said the Netherlands now has more than 200 "project storks."

"Project storks tend to migrate less than wild storks," he said. "They hang around the places where they were released and most of them remain here during the winter."

Service, and biodiversity is a sprouting issue that will quickly rise to prominence.

"It's a fairly new concept, one that people are trying to get a handle on," Scott said. "We want to maintain natural diversity because it's the very fiber of the Earth's infrastructure."

If the idea of biodiversity is to maintain the integrity of ecosystems and reverse the trend of species extinction, he said.

If forests take precautions to preserve critical habitat for wildlife and to protect rare plants, then society will not be forced to spend millions of dollars to rescue endangered species from extinction, he said.

"It's a proactive approach — getting ahead of the extinction curve," Scott said.

Joe Hinson, a Coeur d'Alene-based timber industry spokesman, said he agrees that the Forest Service has been caught somewhat by surprise by the biodiversity issue.

The Forest Service reaction has been one of mild bureaucratic panic — quick-lets-find-some-biodiversity-and-protect-it, he said. "But we shouldn't rush on the bandwagon without anyone raising the question: Is this a legitimate concern?"

Even if it is, Hinson said, most Idaho forests should have plenty of undeveloped forest to satisfy the goal.

Scott agreed. Idaho still has an abundance of virgin forest — some 13 million acres of protected and unprotected wilderness. "We still have options. We still have things to play with," Scott said.

Through little or no pressure from environmental groups, Idaho's national forests took small steps to enhance biodiversity.

The trend toward protecting and enhancing biodiversity will be much broader in scope than now envisioned, Scott said.

protect biodiversity in recently approved management plans. Some forests interpreted the biodiversity requirement to mean protecting a certain segment of old growth timber.

In the Panhandle National Forest, forest officials vowed to protect 10 percent of its old-growth, well-distributed timber throughout the forest. But when foresters conducted an old-growth inventory in the Priest Lake District, they found only 6 percent of old growth when they expected to find 13 percent.

The Audubon Society from Spokane, Wash., heard about the deficiency and asked the Forest Service to curtail all old-growth cutting.

"We're insisting that they get an accurate inventory," said Suzanne Hemplien of Spokane Audubon.

If they only found 6 percent on the Priest Lake District and they expect to find 13 percent, I think it's safe to assume that the whole Panhandle is short of the required 10 percent.

"We don't see how they can cut any more old-growth."

Panhandle Supervisor Bill Mor- den placed a moratorium on old-growth cutting for a year to get a better fix on its inventory. Some of the ancient western red cedar trees on the forest are more than 1,000 years old.

"They're the most ancient stands on the forest," said Art Zane, a Panhandle forester. "They're pretty cathedral-like trees."

The trend toward protecting and enhancing biodiversity will be much broader in scope than now envisioned, Scott said.

Riggins upset when students trash river area

RIGGINS (AP) — Residents and businessmen are up in arms over the sand beaches near Riggins and display and mess fraternity members from the University of Idaho and Washington State University made during fall parties on the Salmon River at Riggins.

Town leaders became alarmed after a private landowner threatened to close access to one of the beaches because of its condition after the parties were over.

Stock prices slightly higher as indecisive market drifts aimlessly

NEW YORK (AP) — Stock prices edged higher Wednesday in a drifting session that did nothing to break the indecisive pattern of activity since the start of the week.

Advancing issues just barely out-

numbered declines in nationwide trading of New York Stock Exchange-listed stocks, with 762 up, 728 down and 490 unchanged.

VOLUME ON THE FLOOR OF THE BIG

Board came to 149.29 million

shares, against 146.30 million in the previous session. Nationwide, consolidated volume in NYSE-listed issues, including trades in those stocks

on regional exchanges and in the over-the-counter market, totaled 181.59 million shares.

The price of crude oil for December delivery climbed more than \$1.50 a barrel, to the neighborhood of \$31 a barrel, on the New York Mercantile Exchange.

Analysts said that helped to put a damper on buying interest.

Business**Big ticket' sales decline 3rd time in 4 months**

WASHINGTON (AP) — Factory orders for "big-ticket" durable goods fell 1.7 percent in September, the government said Wednesday. Analysts said the report foretells a further production and employment dip in the industrial sector, which already has lost 500,000 jobs since January of 1989.

"It was another report indicating the economy is slowing down," probably "the start of a recession but probably not a recession will be mild," said Elliott Platt, di-

rector of economic research at Donlson, Lufkin & Jenrette, a New York securities dealer.

The Commerce Department said orders for durable goods — items expected to last more than three years — totaled a seasonally adjusted \$124.9 billion last month. Transportation orders slid 6.8 percent to \$32.8 billion, with declines in motor vehicles more than offsetting an increase in aircraft.

The main message is that dealers are not ordering 1991 model cars,

said economist Cynthia Latta of DRI/McGraw-Hill in Lexington, Mass.

Durable goods orders have fallen three times in the last four months and, Commerce said, the August decline was even steeper than previously reported — down 0.8 percent. While these orders often are a rather than 0.5 percent. For the year so far, it said, orders were off 0.5 percent compared to the first nine months of 1989.

Durable goods orders are a key barometer of manufacturing industry.

Plans for production. A decrease in orders can result in production cutbacks and layoffs.

Orders in the key category of non-defense capital goods jumped 6.3 percent to \$38.2 billion but failed to regain a 9.9 percent loss in August. While these orders often are a barometer of business plans to expand and modernize, Platt suggested that much of them may have come from overseas.

Orders for non-electrical machinery rebounded 3.6 percent.

Sears' earnings drop 30%

CHICAGO (AP) — Sears, Roebuck and Co. reported a 30 percent drop in third-quarter earnings Wednesday.

It was the third straight quarterly decline in profits for the retailing and financial services giant.

Sears blamed the weak third-quarter performance mainly on lower gains from property sales in its Coldwell Banker real estate subsidiary.

The company's struggling retailing division posted a 7.6 percent gain in the third quarter after suffering a decline in the second

quarter and a loss in the first.

Chicago-based Sears reported overall earnings of \$179.2 million, or 53 cents a share, for the three months ending Sept. 30, compared with \$257.5 million, or 75 cents a share, in the same period a year ago.

Total revenues rose 5.9 percent to \$13.9 billion.

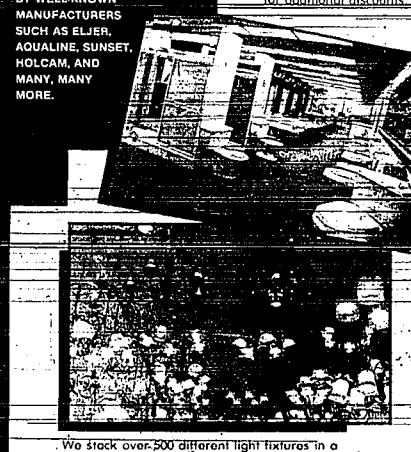

Coldwell Banker's operating income fell to \$1.8 million from \$4.2 million, reflecting a decline in after-tax gains from property sales to \$18.1 million from \$67.3 million.

PEARL BATHS

1542.80

WITH PROFESSIONAL THERAPEUTIC ACTION

- Two large jets, diagonally opposite each other, move 60 gallons of water per minute (90 GPM in Double Tubs) in a swirling motion — the same whirlpool action found in hospitals, clinics, and professional sports locker rooms.
- The jets used are highest quality venturi type, which emit a concentration of uniform size air bubbles which give a deep, natural massage.
- The tub itself is built like a boat hull, rigid and strong. The surface coating is marine quality NPG Gelcoat, the highest quality available.
- No-skid bottom, patented safety suction fitting, easy to install. This tub is special. See it at Grovers!
- Tub guaranteed 6 years, pump and motor 2 years.
