Idaho asks court to block waste

The Associated Press

BOISE — State attorneys say Idaho residents face immediate harm if the federal government resumes shipments of nuclear waste into the state, and they have asked a federal court to block them.

Idaho received notice Thursday that the Idaho National Engineering Laboratory will start receiving shipments from Public Service Co. of Colorado. Early Friday, Deputy Attorney General Clive Strong filed with the U.S. 9th Circuit Court of Appeals, San Francisco, a petition for a stay.

It will be heard by a three-judge panel on

Tuesday and could stop nuclear waste shipments which could begin as early as two days later.

"We anticipated the governor would do that," said PSC spokesman Kim DeVigil, at the utility's Denver headquarters. "It's not a surprise."

She said the utility, named as a defendant in the state's petition along with INEL and the Department of Energy, would file legal arguments opposing the state application for a stay.

Attorney General Larry EchoHawk said the state has a good legal argument to make and he hoped the stay will be granted. If not, Idaho will pursue other strategies.

"If the shipments are not blocked, we could have shipments within two to three weeks," he said. "Once the material gets here, it will be very difficult to move it out. It could be here for a long time."

Gov. Cecil Andrus in 1988 banned nuclear waste shipments into Idaho, saying he acted in part to spur the federal government into doing something about its long-neglected promise to start removing stored nuclear waste from INEL.

A federal judge ruled earlier this week that the action was illegal, allowing shipments to resume. But the state is pressing a petition with the 9th Circuit trying to block radioactive waste shipments

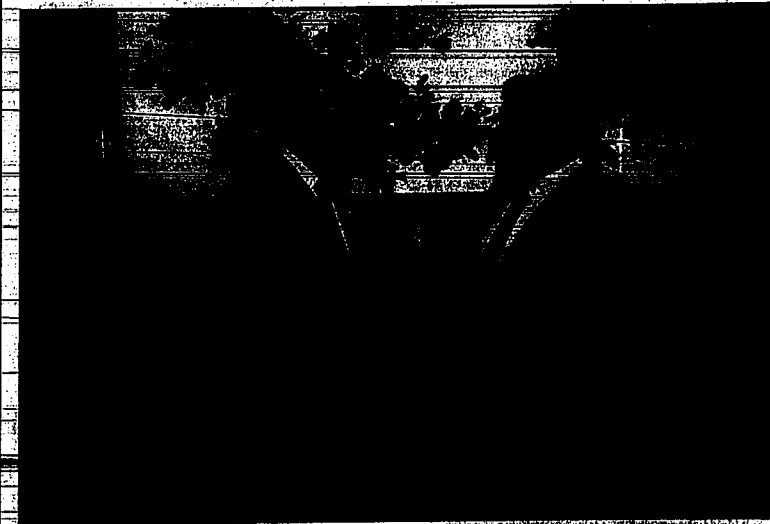

under the 1982 Nuclear Waste Policy Act. EchoHawk said the state was notified Thursday that Public Service Co., Colorado, planned to resume waste shipments to INEL from the decommissioned Fort St. Vrain nuclear reactor at Platteville.

Officials said exact date of the shipment isn't to be made public, but it requires at least seven days notice to state and local agencies, so the earliest it could be is next Thursday.

The state's new petition said Idaho residents face imminent harm from the shipment. PSC routinely made 121 similar

Pointed discussion

Before Friday's announcement, Gov. Cecil Andrus goes over some points with Mark Davis, president of the Le Sueur-owned Jerome Cheese Co.

Minnesota firm to construct huge cheese plant at Jerome

The Times-News

JEROME — A Minnesota company will build a \$36 million cheese processing plant south of Jerome.

The Le Sueur Cheese Co. of Le Sueur, Minn., plans to start construction this summer on 19 acres in the Jerome Industrial Park.

Mark Davis, president of the Le Sueur-owned Jerome Cheese Co., made the announcement here Friday, at a gathering attended by Gov. Cecil Andrus and local dignitaries.

At full operation, the plant will employ

75 to 150 people, all but three or four hired locally, plant manager Jim Ward said.

The plant will be able to process 2.1 million gallons of milk a day, enough to keep about 45,000 cows busy, Ward said.

The company will look first to the 30,000 cows in Jerome County, estimated 70 dairies, he said.

Davis said he found out about Jerome's potential as a cheese-processing site at a Chicago trade show in 1989. Gaylord Fowler, a former Jerome resident who works for Le Sueur, had

introduced Davis to the possibilities of expanding into Idaho, Davis said.

"The success displayed in Jerome is nearly an indication of what is possible in every Idaho community," Andrus said. "This is further proof that our strategy of encouraging value-added processing of Idaho agricultural products is paying major dividends."

The Le Sueur plant is a "win-win proposition," said Jim Hawking, director of the Idaho Department of Commerce. "The city of Jerome, the county, the state, the schools, the producers of milk in our state and the

LeSueur has 108-year history in home town

The Times-News

LE SUEUR, Minn. — The Le Sueur Cheese Co. has 108 years of history in this small Minnesota town.

The company recently expanded into a joint venture with a British company to extract 95 percent pure protein from cheese whey, according to a story published in Le Sueur's weekly newspaper, the News-Herald. The protein

is used in food products such as baby formula and frozen desserts.

The company, founded in 1882 as Le Sueur Creamery, employs 75 of the town's 3,700 residents. It processes about 1 million pounds of milk a day.

The company's Le Sueur plant, located about 50 miles southwest of Minneapolis, makes about 30 million pounds of cheese each year. Its cheddar cheese is sold primarily to Kraft General Foods, a

subsidiary of the tobacco giant Philip Morris.

Mark Davis and Stan Davis took full ownership of the company in 1983.

One year later, they added an \$8 million addition to make cheddar cheese and its nearly pure protein. Davis told the News-Herald that Le Sueur Isolates, its whey division, is the only company in the world that can produce 95 percent pure protein.

Panel sets standards for math

The Associated Press

WASHINGTON — Ending months of debate, a federal advisory panel on Friday set mathematics standards for students in the fourth, eighth and 12th grades.

For example, a fourth grader:

- At the "basic" level, should be able to tell the most reasonable distance for a person to walk in an hour if given a choice of two miles, two yards, two feet and two inches.

- At the "proficient" level, should be able to pick, from a list of four, the value of five dozen eggs costing 89 cents a dozen.

- At the "advanced" level, should be able to calculate the number of feet in 60 inches.

The standards, adopted by the National Assessment Governing Board after prolonged haggling between educators and policymakers, will be used in gauging the proficiency of students taking the National Assessment of Educational Progress, better known as the nation's report card.

The only member of the 24-person panel to oppose the standards, Dorothy Rich, president of the Home and School Institute, said more detailed information about the source of the data was needed.

"I am confident that the levels ... will be able to withstand scrutiny," said Roy

Ag secretary moves to help dairy farmers

The Associated Press

WASHINGTON — Under growing pressure from Congress, Agriculture Secretary Edward Madigan announced Friday a number of steps he said were designed to help price-depressed dairy farmers.

To include advance purchases by the Agriculture Department for donations of dairy products, to school lunch and other domestic feeding programs, he said.

Also, Madigan said the practice of selling off surplus stocks of cheese and non-fat dry milk from Commodity Credit Corp. inventories will be suspended while market prices are so low.

Dairy products also will be made "fully available" for export credits or food aid donation programs, he said.

Madigan said these and other measures should be an indication to dairy farmers that USDA is taking action to improve the current situation.

"They need our help," he said in a statement. "And I'm going to do everything I can, given USDA's budgetary and legislative constraints, to ease their most pressing concerns."

Venus like Earth's desert areas, 'native' declares

The Associated Press

TUCSON, Ariz. — Ormone Oncé, who landed here from Chicago, says life on her native planet, Venus, isn't all that different from life on Earth.

"It's like the desert areas here. It's amazing how adaptable the human species is," said Ms. Oncé, one of 30 speakers at The World UFO Congress that landed here this month.

The conference drew about 400 people to a Tucson hotel and included speakers from 14 countries — and, ah, elsewhere — plus

exhibits and copious amounts of literature for sale.

"Elvis: The UFO Connection" and "Why They Need Us: We Don't Need Them" were among available books, along with "Beamship Trainee" bumper stickers, "UFOs are Real!" baseball caps and T-shirts.

The mastermind of the extravaganza held May 3-7 was Wendell C. Stevens, a 68-year-old retiree from Tucson who plunked down much of the \$61,000 conference budget.

"We tried to introduce an exotic phenomenon at an acceptable level," Stevens

said, defending the credibility of all the speakers.

Many of those who showed up swapped UFO experiences. On the conference's second day, a woman burst into the hall claiming to have videotaped a mysterious object in the sky outside the hotel.

For some, the conference was a way to satisfy a growing curiosity.

Tim Petro of San Francisco said he had attended several UFO lectures in the Bay area and had concluded "this is too far out for me." Some of the events at the Tucson gathering "raised sufficient doubt in my mind," he said.

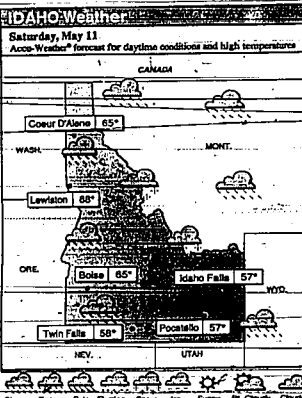

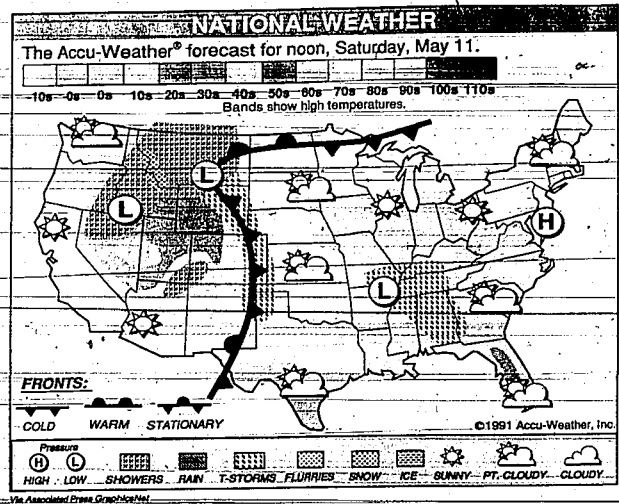

Exhibits included samples of Moldavia — billed as a "gem that fell to Earth" — pyramid power and a demonstration intended to show how gravity is a push, not a pull.

Mother-daughter team — Dorothy Brantelton and Maxine Moffett displayed photos taken above Mount Graham, south of Safford, showing what they said were regular visits by UFOs.

"This one here, some say is a bird," Ms. Brantelton said, pointing to a photo. "But when you blow (the photo) up, it looks like Star Trek."

Weather summary
The National Weather Service reports spring showers continuing over the Snake Valley.

An upper level low pressure system over Nevada moved into Idaho Friday afternoon, resulting in showers which will continue through Saturday. It is expected to rain in the valleys and snow in the mountains.

A break in the pattern Sunday will bring sunny skies and briefly warmer temperatures. Increasing clouds early Monday will bring thunderstorms and cooler temperatures through Tuesday.

The warmest temperature in the state Friday was 69 degrees at Bonanza Ferry. Stanley and Ketchikan reported the coldest at 39 degrees.

Elsewhere in the nation Friday, the highest temperature was 102 degrees at Lajitas and Presidio, Texas. The lowest was 20 degrees at Wells, Nev.

Skywatch
Visible evening planets
Venus, Mars, Jupiter
Visible morning planets
Saturn, Mercury

The Naval Air Station at Pensacola, Fla., was soaked with 2.97 inches of rain between 8 p.m. Thursday and 2 a.m. Friday.

Strong winds blew from the southern High Plains to the Dakotas and the upper Mississippi Valley. High winds also blew across Utah and in Arizona, where winds at Show Low gusted to 65 mph and gusts reached 20 mph in Springfield.

Dry weather prevailed across most of the Northeast and West Coast, with some sunnier days from the upper Mississippi Valley through the Great Lakes to northern New England.

Fair conditions also prevailed west of the Rockies, with clear skies over much of California and Nevada.

Temperatures slipped below freezing overnight in the Great Basin, the northern and central Rockies and northern Maine. The low for the nation was 21 degrees at Elko, Nev.

Forecast
Twin Falls, Burley, Rupert, Jerome and Gooding: Mostly cloudy with showers likely continuing today and Sunday. Highs 55 to 60, Lows 35 to 40. South winds 15-20 mph today.

Coast Range and Wood River Valley: Mostly cloudy with showers, mainly of snow, likely continuing today and Sunday with 1 or 2 more inches new snow possible. Highs in the mid- to upper 40s. Lows near 30.

Extended forecast: Southern Idaho - Mostly cloudy Monday and Tuesday with chance of showers. Partly cloudy Wednesday. Highs mostly in the 60s. Lows in the mid-30s to mid-40s.

Northern Utah and Nevada: Utah - Today showers likely with a chance of thundershowers and small hail. Continued cool. Highs in the upper 50s to lower 60s. Tonight and Sunday scattered showers decreasing late Sunday. Lows in the mid-30s to mid-40s. High 60 to 65.

Nevada - Fairly cloudy today with scattered rain or snow showers mainly afternoon. A decreasing chance of showers north and partial clearing central tonight. Becoming partly cloudy north and mostly sunny central Sunday. Highs today, 50s east to low 60s west. Warmer Sunday in the mid-50s and low 60s east to near 70 west. Lows mostly mid-20s to mid-30s.

More rain falls on Gulf Coast as winds buffet plains
The Associated Press
Rain kept falling Friday along the flood-plagued Gulf Coast and high winds blew over central and western parts of the nation, while much of the country basked in sunshine.

Nearly a month of rain in Louisiana has flooded more than 6,000 homes and covered more than 700,000 acres of farmland. Parts of Arkansas, Mississippi, Alabama and Georgia also have been flooded.

On Friday, more than 10 inches of rain fell in Baton Rouge, La., between 8 a.m. and 2 p.m. EDT. Rain Thursday pushed the total for the day at Shreveport, La., past the normal yearly total of 13.84 inches. By midnight Thursday, 1991 rainfall stood at 44.82 inches.

Showers also fell over southeastern Texas, western Arkansas, southern Missouri, western Kentucky, Alabama, and from northeastern Florida to eastern North Carolina.

Briefly

Radioactive water found near reactor.
AIKEN, S.C. — Radioactive water was discovered on pavement near a nuclear reactor at the government's Savannah River plant and 11 workers were tested for radiation exposure, Energy Department records showed.

The contaminated water, discovered last month, is one of about a dozen problems reported this year at the site.

Workers at the plant containing tritium were found April 8 on pavement outside the K-reactor building, said a Department of Energy report on daily operations.

The 11 workers tested for radiation showed exposure of 1 millirem to 3.5 millirem of tritium. The amount is not considered harmful. A typical American is estimated to be exposed to 100 to 180 millirems a year. A millirem is one-thousandth of a rem. A chest X-ray exposes a patient to about 20 thousandths of a rem.

Savannah River reactors are shut down pending safety reviews. The reactors are designed to produce tritium, a radioactive gas used to boost the power of nuclear weapons.

Business executives express gloom
HOT SPRINGS, Va. — Top business executives sounded down-right gloomy Friday about the economy, saying they saw few signs of an end to the 10-month-old recession.

In contrast to the view from the Bush administration, the chief officers of such corporate giants as American Telephone & Telegraph and General Motors said they are not all that certain about when the country's first downturn in eight years will end.

W. Mark expressed the hope that the economy will begin growing by this summer, some put the odds of that occurring at less than 50-50.

They said that until consumers start spending again, the economy is likely to remain in the doldrums.

Officers standing by not indicted
LOS ANGELES — A grand jury chose not to indict officers who stood by during the videotaped police beating of a black motorist, the district attorney announced Friday.

The Los Angeles County panel, which previously indicted four Los Angeles Police Department officers directly involved, was unable to indict the 21 others who were present because of California law which inaction a crime, District Attorney Ira Reiner said.

"No matter how reprehensible their action, or their inaction, no person can be charged with a crime unless they have violated a statute," Reiner said.

Seventeen LAPD officers, two California Highway Patrol officers and two district district officers also

were present when Rodney King was beaten March 3 after being stopped for speeding.

5th Korean student sets self ablaze
SEOUL, South Korea — A student protesting a fatal police beating poured paint thinner over his body and set himself on fire Friday, a news report said.

The protest came amid increasing anti-government demonstrations.

The national Yonhap News Agency said Yoon Yong-su was hospitalized in a critical condition following his protest in the southern opposition stronghold of Kwangju.

Yoon, 20, was the fifth student to commit self-immolation to protest the April 26 beating death of a Seoul student by police. Three of them have died.

Americans protest adoption delays
BUCHAREST, Romania — About 30 Americans whose adopted Romanian children have been denied immigration to the United States protested for a third day Friday outside the U.S. Embassy.

U.S. Ambassador Alan J. Green Jr. talked with some of the distraught parents for 45 minutes Friday and told them "he has called very high authorities in Washington" to try to help them, said Kathy Lyon of Coming, N.Y. Green made no promises, however, she said.

Since completing the adoption, she is their legal parent, as is the Romanian authorities are concerned. But officials from the U.S. Immigration and Naturalization Service have told her their children cannot get an entry visa because their natural parents are alive.

Eggs splatter German chancellor
HALL, Germany — Protesters threw eggs at Chancellor Helmut Kohl on Friday, and several of them hit the German leader in the face and on the suit during a visit to the eastern city of Halle.

Kohl, stopping in one of eastern Germany's economically depressed regions, was about to shake hands with people in the crowd when some demonstrators began chanting anti-Kohl slogans.

Chicago honors returning troops
CHICAGO — Thousands of people Friday solemnly remembered American servicemen killed in the Persian Gulf War during a brief interlude from a festive parade honoring returning troops.

Spectators lined up 15-rows deep, waving flags, tossing confetti and cheering the war veterans marching about a mile down Michigan Avenue. Parade organizers said the event was held on behalf of veterans of all wars, including the Gulf War.

Compiled from wire reports

Nuclear

Continued from A1
Secretary James Watkins for an stipulate before Congress issued his decision to resume receiving nuclear waste that followed Ryan's decision on Tuesday, but has received no response, INEL said the decision would have to come from Washington.

Under the 1982 Nuclear Waste Policy Act, federal appeals courts have direct jurisdiction over petitions for review. Idaho claims, among other things, that DOE did not make the necessary environmental reviews before allowing the shipments. DOE attorneys claim the contract signed with public service in 1980 to accept the nuclear waste at INEL predates the act, and the environmental study is not required.

Resolution of the state petition is expected to take at least several months, which would block nuclear waste shipments for that period.

DOE filed a motion to dismiss the state petition on March 1. The state's first brief is due July 5. DOE's opening argument is due one month later.

The state said it asked Energy

Math

Continued from A1
Truby, executive director of the board, adding that determining achievement level is a matter of judgment — not of science.

As examples of standards at the other grade levels:

- A basic-level eighth grader should be able to tell whether to measure the length of a pencil in centimeters, meters or kilometers.
- A proficient eighth grader should be able to find the average age when given the ages of five children.
- An advanced eighth grader should be able to calculate the probability that a person can draw a chip with an even number when nine chips are mixed in a sack.
- A basic-level high school senior should be able to determine the combined weight of 50 prize-winning tomatoes with an average weight of 2.36 pounds each.
- A proficient senior should be able to tell whether a triangle with a 120-degree angle is a right triangle.
- An advanced senior should be able to give the diagonal measurement of a TV screen when the width and length are given.

In taking the test, fourth graders must answer 44 percent of their questions correctly to be considered to have a basic understanding of math, 70 percent for proficient and 86 percent for advanced.

Eighth graders must get 48 percent of the answers correct for a basic-level understanding, 72 percent for proficient and 90 percent for advanced.

High school seniors must get 45 percent of the answers correct for the basic level, 72 percent for proficient and 90 percent for advanced.

Results from the 1990 math exam are to be released in June.

Cheese

Continued from A1
cheese plant owners will all win.

"This increase in demands for milk will help the price of milk to get back to a level that is a boon to the whole economy," said Greg Nelson, director of the Idaho Agricultural Department.

The city and county will apply for a \$500,000 Idaho Community Development Fund grant to upgrade the city's wastewater treatment plant, which will handle waste from the cheese processing.

The city also is seeking a \$800,000 federal grant to install a sewer line from the industrial park to the treatment plant, to widen the road at 100 South to handle truck traffic to the new plant, and to extend Bridon Way through the park to the county road.

The grant's approval depends on the city providing \$684,212 in matching funds. The city's contribution can city labor and equipment, as well as \$86,000 from the wastewater treatment plant reserve funds; City Administrator Larry Paine said.

Venus

Continued from A1
Lecture subjects included the appearance of mysterious crop circles in England, underground UFO bases in the United States, cow abductions in Missouri and the kidnapping of witness Paula Watson of Twin Falls by the Times-News.

Ms. Watson described how she was canning in her basement about seven years ago when she noticed a silvery alien with large eyes staring at her through the window after she witnessed a cow abduction by aliens earlier in the day.

Ms. Watson said she called out to the alien, who backed off, but she went to sleep and awoke on a spaceship.

She is standing up on a white table and the alien was running

participants claiming unearthly ties.

Ms. One — who in her Earth life lives in Chicago and is known as Sheila Gibson — said she is from Teutonia; Venus; where her kind live in the astral plane, as opposed to the physical.

"I lowered my vibrations to be able to come to Earth and pay off a debt I owed to a girl in a previous lifetime — a karmic debt," she said.

Idaho lottery
BOISE (AP) — The winning numbers drawn Friday night in the Idaho Fantasy Five lottery game, 11-13-19-21-31 (eleven, thirteen, nineteen, twenty-one and thirty-one).

Foreign firms want some well fire business

AIHMADI, Kuwait (AP) — A month after the Kuwaiti government promised to let other countries help halt hundreds of oil well fires, four North American firms still toil alone on a relatively small part of a big disaster.

There are no high-powered hoses, heavy cranes or hardy Texans on the vast majority of burning fields throughout Kuwait, where black skies and blazing gusts have blended into the scenery.

While Americans and Kuwaitis trade jobs over the slow march, foreigners complain that they're being shut out of the world's biggest firefighting job.

"The world's best firemen should be here," said Ernst Achilles, a German expert who helped the Soviets contain the fire at the Chernobyl nuclear reactor.

"I went to see an oil field in the north and there was nobody working on it," he added. "Nothing, it's just been burning for two months."

Red-Adair Co., Boots and Coos Co. and Well Control Co. of Texas, and Safety Boss of Canada, have the sole contract to put out Kuwaiti oil fires.

They have focused their efforts on one small section of the huge Greater Burgan Oil Field, which wraps around this oil town, the headquarters of the Kuwait Oil Co. and the firefighting firms.

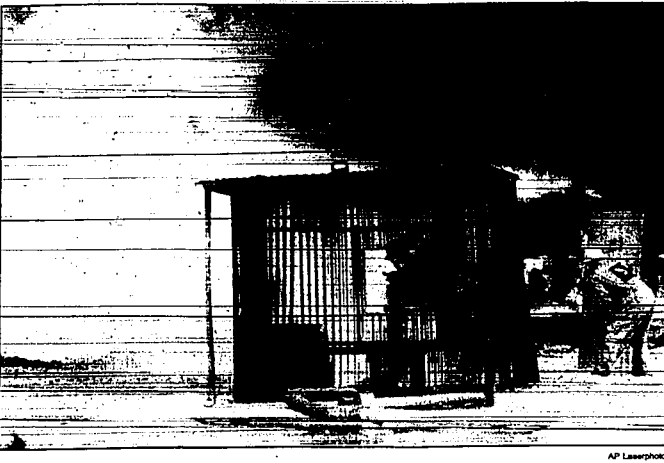

Vast fields to the south, west and the north also are burning.

Achilles said the American firms "are very good. But the job is too big for them."

"They won the war, and they want to put out the fires. They don't want competition. But we are not competitors. We are friends. We want to stop the blazes as firemen, not as contractors," Achilles said.

Achilles, an engineer and architect who worked for 30 years as the Frankfurt fire chief, was part of a German parliamentary delegation to Kuwait this week to offer firefighting assistance.

Last month, Kuwaiti Oil Minister Rasheed al-Amiri said he was going

AP Laserphoto

Metal barricades protect workers trying to put out oil well fires in Kuwait's Greater Burgan Oil Field.

to hire companies to help speed up the firefighting process, which would take more than a year at the current rate.

Since then, British, Chinese, Soviet and Iranian companies have trooped into Kuwait with their own ideas for containing and capping the roaring fields of fire, said Ali Muraid, spokesman for the Kuwait Oil Co.

"But what's going on, I don't know," he said. A Kuwait Oil Co. executive, speaking on condition of anonymity, said the state-owned company has been inundated with ideas, but said would-be contractors lack experience, are asking too much, or are offering unsound, unproven methods for capping the wells.

Achilles is the inventor of a liquid to foam when it comes in contact with fire. He said he flew to Moscow and supplied the advice and technique — using concrete and his foam — that contained the Chernobyl fire.

In Kuwait, Achilles said the foam containing sand and water is pumped into a well and eventually cap it.

He said the Kuwaitis were receptive to his ideas. "They believe that the Americans' technique is not the very latest technology," he said.

Larry Flak, a Houston oil engineer who is coordinating the firefighting effort, scoffed at the variety of ideas. "A lot of these guys have never

put out oil wells," he said. "They don't know how to do it."

He said the four North American firms had capped 96 of 630 burning or spewing wells as of Friday. But the firms have concentrated on those considered the easiest to extinguish.

The American-led effort has been fraught with problems and complaints. Firefighters have been critical of the Bechtel Group Inc., the huge U.S. construction and engineering firm that is providing supplies and materials needed to put out the fires.

The Kuwait Oil official contended Bechtel was way off on its initial assessments of what supplies would be needed.

"We wasted millions of dollars because of Bechtel," said the official.

Iraqis pull some troops from city

ZAKHO, Iraq (AP) — The U.S. Army said Friday that Iraq has withdrawn some forces from the strategic northern city of Dohuk, raising chances of a confrontation with allied soldiers ready to help in the Kurdish relief effort.

To the south, U.N. peacekeepers formally proclaimed the Iraq-Kuwait border a demilitarized zone and said there were no reports of cease-fire violations.

However, confrontations between Iraqi civilians have been reported in the southern Iraqi town of Safwan between supporters and opponents of President Saddam Hussein.

The allies in northern Iraq are endeavoring to pave the way home for Kurdish refugees who fled to the mountains after Iraqi forces crushed the rebellion they launched after the Persian Gulf War.

Dohuk, a provincial capital of 380,000 residents about 25 miles from the Turkish border, is home to many of the Kurdish refugees remaining in the border camps and thus is a key to ending the saga of their flight.

Allied intelligence officers had said Iraq was toughening its position around Dohuk, placing more than 1,000 soldiers on the surrounding hills and bringing units from southern Iraq to highways leading into the city.

However, Army Lt. Col. Terry Ryal, a spokesman at Incirlik Air Base in Turkey, said Friday that Iraqi troop withdrawals from Dohuk were being consistently reported by intelligence people.

He said by Friday only about 100 soldiers remained in the city and immediate vicinity, and their number remained steady. He said

the withdrawals began about a week ago, but did not give a motive for the departures.

During a meeting Thursday in Zakho, eight miles from the Turkish border, allied officers had said Iraq voiced concern about allied intentions for Dohuk. Many believe the allies must take the city before the refugees will return.

The allies have begun repairing an airfield at Sirsenk near Amadiyah in the secure zone, Army Capt. Marcela Adams, a spokeswoman for the allied relief effort, based at Incirlik, said today.

She said the purpose of the airfield hadn't been determined, but it could be used to speed the allied relief effort. Recently, Turkey imposed stricter border checks following news reports that relief supplies entering Iraq overland have included arms destined for Kurdish rebels in Iraq.

In Baghdad, meanwhile, U.N. envoy Marack Gouling explained Friday that Iraq welcomed humanitarian aid in the north, but not help with security.

"They expect a successful outcome to talks and feel the only role of international agencies is humanitarian," Gouling said before leaving Iraq after three days of meetings with Foreign Minister Ahmed Hussein and others.

He referred to high-level talks in Baghdad between Iraq government officials and a Kurdish delegation led by Massoud Barzani, the leader of the Kurdish Democratic Party.

U.N. Secretary-General Javier Perez de Cuellar told Bush in a meeting Thursday that Iraq had rejected the U.S.-backed proposal for the U.N. police force in northern Iraq.

U.S. might move forces for Kurds

The Baltimore Sun

WASHINGTON — Gen. John R. Galvin, who heads the Kurdish relief effort in northern Iraq, said Friday that U.S. and allied forces would have to move further south if a deal was not struck with Baghdad for the safety of Kurds moving home.

He said that he was "optimistic" about resolving the problem and said, "We do not have a confrontation with the Iraqis."

Galvin plainly did not relish the idea of expanding his present area of operations in Iraq, where he has thousands of troops strung across a 60-mile band in the north, running roughly from Zakho to Amadiyah.

"The general is commander of North Atlantic Treaty Organization forces in Europe and doubles as commander of U.S. forces in NATO. The relief operation is being run from Turkey, a NATO member, and now involves 12,000 troops, 8,000 of them Americans."

"We have to extend our protection further or get an agreement with Iraq for the Kurds to keep on moving" southward, he said.

"I don't want more terrain," he added, a remark that appeared to reflect his desire to avoid committing forces to Dohuk, a provincial capital immediately south of the zone controlled by the U.S.-led coalition.

Galvin elected not to regard Baghdad's turn-down Thursday of a U.N. police force as a rejection. He saw the impasse rather as "a question of working out details... a question of procedures" which he thought might be settled fairly soon.

NEW AT CACTUS PETE'S
AN AMAZING
SATURDAY NIGHT
PRIME RIB
BUFFET FOR \$7.95

Enjoy the prime of your life... Prime Rib, that is, at a price that's *not* prime, just \$7.95.

Prime time is every Saturday night from 5:00 to 9:30 p.m. in Cactus Pete's new Canyon Cove Buffet.

Our selection of more than 50 items changes each week to offer a delightful variety that features favorites like:

- Carved Prime Rib
- Beef Lasagna with Marinara Sauce
- Spanish Rice
- Vegetable of the Day
- Carved Ham or Turkey
- Stuffed Pork Chops
- Southern Fried Chicken
- Beef Stroganoff
- Pasta Carbonara
- Idaho Baked Potato

Bush raps Congress at Princeton visit

PRINCETON, N.J. (AP) — President Bush on Friday accused Congress of encroaching on his powers in an effort to weaken his authority, and wasting taxpayers' money in the process.

Bush, in his first trip outside the Washington area since his hospitalization a week ago, said lawmakers try to "micromanage the executive branch," then pass bills without knowing the contents when they return to their own business.

President Bush, with wife Barbara and John Sununu, gets ready for his first trip since his hospitalization.

The president, Yale Class of 1948, was at Ivy League rival Princeton University to accept an honorary degree and to help dedicate new politics and social sciences buildings.

He returned immediately to Camp David, Md., to rest after his first venture away from the capital area since an irregular heartbeat landed him in the hospital last Saturday. Bush swallowed a therapeutic dose of radioactive iodine Thursday to deal with thyroid problems, the doctors say, was the root of his erratic heartbeat.

After donning a black and orange sash at the degree ceremony, Bush offered a diatribe from "live-byword cabinet" that doctors say was the root of his erratic heartbeat.

"I'm feeling a little better than I did yesterday, a little less tired," he said.

His visit drew a few hundred demonstrators, including gay supporters, AIDS activists and others, who chanted "No Degree for Bush" as the presidential limousine pulled up to historic Nassau Hall, where the Continental Congress met in 1783.

"I'll hear the cries of spring over my shoulder out there, but it wouldn't be normal in my job if I didn't hear those rites changing out there," he said.

In his speech, Bush accused Congress of trying to "micromanage the executive branch."

"The most common challenge to presidential powers comes from a predictable source... the United States Congress," said Bush.

"Our founders never envisioned a Congress that would churn out hundreds of thousands of pages' worth of reports and

hearings and documents and laws every year," he said.

"They did understand that legislators would try to accumulate power," said Bush, quoting a warning from Princetonian James Madison that Congress was "everywhere extending the sphere of its activity and drawing all power into its impetuous vortex."

Bush said the legislative branch wastes the executive branch's time and energy with unnecessary requests, including some of the 750,000 congressional staff inquiries to the Pentagon alone each year.

In fiscal 1989, the Pentagon "devoted 500 man years and over \$50 million dollars just to write reports responding to congressional queries," he said, and had to answer to 107 committees and subcommittees.

He said he had been forced to veto a half-dozen bills "that would have weakened presidential powers," including congressional attempts to dictate how to handle "sensitive diplomatic contacts and discussions."

Bush denounced Congress for bundling "unrelated riders that would never stand a chance on their own" into "vast spending bills, such as a federal grant to study cowbodies or a Lawrence Welk museum."

Wholesale prices up 1st time in 5 months

WASHINGTON (AP) — Wholesale prices rose for the first time in five months in April, but the increase was a mild 0.2 percent as new declines for energy mostly offset a record surge in vegetable prices, the government reported Friday.

The good inflation news on the wholesale level, a product of the recession, is expected to filter through to consumers, analysts said.

"This is like Goldilocks and the baby bear's porridge — not too hot, not too cold, but just right," said Irwin Kellner, chief economist at Manufacturers Hanover Trust.

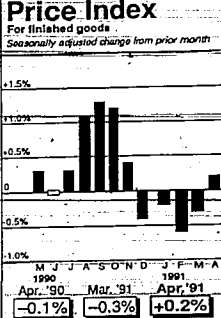

"It's great news. You don't want prices to fall, because that's a sign of recession, and you don't want prices to go up too rapidly, because that's a sign of further inflation."

"Put another way, Robert Dederick, chief economist of the Northern Trust Co., commented: "The recession is throwing off its dividend and the dividend is containment of inflation."

Analysts said that retail prices in April — which will be analyzed next week — probably rose modestly as well. That would help lower the nation's inflation rate from last year's sharp 6.1 percent.

April's 0.2 percent rise in the Labor Department's Producer Price Index for finished goods, which measures inflation one step before it reaches consumers, was the first hike since October.

Producer Price Index

Source: U.S. Dept. of Labor

The earlier declines were mostly energy-driven, reversing the oil price rises that followed Iraq's invasion of Kuwait.

In April, there were further declines in gasoline and home heating oil prices, but they were much smaller than in earlier months.

Jury finds man innocent in assisting wife's suicide

DETROIT (AP) — A 73-year-old California man who flew to Detroit to help his cancer-stricken wife commit suicide was found innocent Friday of second-degree murder.

A Detroit Recorder's Court jury deliberated about two hours Thursday and today before finding Bertram Harper did not commit murder by pulling a plastic bag over his wife's head and securing it after she had washed down pills with liquor.

"I feel wonderful, like I just won the lottery or something," Harper said of the verdict, choking back tears. "Thank God for that. It's over."

Virginia Harper died Aug. 19, 1990, in a room at a suburban Detroit motel.

Prosecutors had urged jurors to set aside their sympathy for Harper and find that instead of helping his wife kill herself, he had murdered her. An

autopsy showed Virginia Harper suffocated.

He faced up to life in prison if convicted of second-degree murder.

Harper and his 69-year-old wife came to Michigan from their Loomis, Calif., home along with Mrs. Harper's daughter after reading that Michigan has no law specifically against assisting suicide, as does California.

The Michigan Legislature is considering a bill to prohibit assisted suicide.

In his closing argument, Wayne County Assistant Prosecutor Timothy Kenny told the jury that Harper committed an illegal "mercy killing," not an assisted suicide.

Food costs rose 0.4 percent, led by a record 34.3 percent advance for fresh and dried vegetables. It was the largest spike in vegetable costs in the nearly 25 years that the government has tracked such statistics, the Labor Department said.

The huge increase in vegetable costs was blamed on unseasonably warm weather in Florida, which hurt tomato and sweet corn crops, and on supply problems with onion crops in the Rocky Mountain states, Labor Department officials said.

Analysts expected the April spurt in vegetable costs to be a one-time event.

The Labor Department's report showed that so called core inflation rate — prices excluding volatile food and energy prices, rose 0.2 percent as well, the same as a month earlier.

These moderate increases in the core rate eased earlier concerns spurred by sharp gains in that calculation in January and February.

With April's slight advance in producer prices, wholesale costs

have now fallen at an annual rate of 2.9 percent through the first four months of 1991.

Friday's inflation news should give the Federal Reserve further maneuvering room to lower interest rates, analysts said.

But they said it was doubtful the central bank would touch rates any time soon because the Fed eased them just last week. In addition, the Fed may believe it's done enough for now to get the economy moving again, in light of figures from last week showing that unemployment was declining, analysts said.

Wholesale prices are expected to rise further in the coming months as energy prices firm up, but analysts still expect this year's overall increase to be far below last year's steep 5.7 percent rise.

Much of the 1990 increase was blamed on the huge increases in energy prices, which shot up at an annual rate of nearly 120 percent from July through September, but have fallen sharply in recent months.

Twin Falls man found guilty of molesting girl

By Brad Bowlin
Times-News writer

TWIN FALLS — It took a jury less than three hours Friday to find a Twin Falls man guilty of sexually abusing a teen-age girl.

Thomas G. Phillips, 51, will remain free on \$15,000 bond until he is sentenced. Phillips was ordered not to initiate any contact with the victim or members of her family.

A packed courtroom listened to closing arguments Friday morning, Phillips' family sitting on one side and the victims' supporters and family members sitting on the other.

The girl, now 16, said she was visiting Phillips' daughter when the incident occurred between Dec. 26, 1988, and

Jan. 1, 1989.

She and Phillips were alone inside his house at 155 Monroe St. when Phillips began tickling her and then put his hand inside her shirt, the girl testified.

Defense attorney Monte Carlson said an appeal is "a strong possibility." He and Phillips will wait until 5th District Judge Daniel Mechl passes sentence before deciding whether or not to appeal, Carlson said.

Mechl's decision to allow three women to testify that Phillips sexually abused them when they were children could spur the appeal, he said.

"I thought the state had a very weak case," Carlson said. But Thursday's emotional testimony by the three women practically decided the case, he said.

"It's very hard to listen to testimony of three other

crimes and not use that even though the fourth crime was much less serious," Carlson said.

Mechl told the jurors not to use the women's testimony as evidence of Phillips' character.

Twin Falls County Deputy Prosecutor Julie Sturgill said the evidence was presented to show Phillips intended to touch the girl sexually, and that it was not an accident.

Sturgill was trying her final case in Twin Falls County. She said after the verdict that a second case of sexual abuse against Phillips will be dropped.

A trial would be very hard on the alleged victim in that case and little would be gained by a second conviction, Sturgill said. Even if convicted on the second charge, Phillips probably would not receive any additional prison time, she said.

Moscow school teacher tapped as CSI dean

TWIN FALLS — The business manager of the Moscow School District has been named dean of finance at the College of Southern Idaho. John "Mike" Mason, who supervises the Moscow schools' financial operations, will resign his post as CSI, first as business instructor and then as business manager. If the Idaho State Board of Education approves his appointment, Mason will begin work at the college in July.

Before joining the Moscow School District in 1989, Mason served as business manager for the Idaho State School for the Deaf and the Blind in Gooding from 1985-89. He worked in the Legislative Auditor's Office in Boise from 1983-85.

Mason, a certified public accountant, holds a bachelor's degree in management from Boise State University.

Former Hailey receptionist faces charges of embezzlement

HAILEY — Criminal charges have been filed against a former receptionist at the Hailey Medical Center.

Helen Walker of Bellevue has been charged with embezzling \$10,000 from the medical center during a one-year period, according to court documents filed this week in 5th District Court.

The criminal complaint filed by Chief Deputy Prosecuting Attorney Fritz Hernandez charges Walker with 33 felony counts of embezzlement.

The first episode is claimed to have taken place March 23, 1990, with a theft of \$423.79. This was followed by 32 separate incidents involving amounts ranging between \$20 and \$589, with the final incident Feb. 13, 1991, for a total of \$10,038.

Walker is scheduled to appear for arraignment on March 20 at 10 a.m.

Fraud case against vet delayed to give defense more time

TWIN FALLS — The fraud case against Twin Falls veterinarian David Stinford will be heard, although not this month as scheduled.

A motion to dismiss the case, which alleges that Stinford collected money for performing surgery on a dog without actually doing the operation, was denied Friday by 5th District Judge Daniel Hurlbut.

Stinford's attorney, Tim Williams, wanted the case thrown out because two empty vials that previously contained tissue from the dog were thrown away. The pathologist who tested the tissue in the vials testified that there was not enough tissue left in the containers to warrant accusations of destroying evidence, Hurlbut said.

Hurlbut said he agreed to delay the May 28 trial date because prosecutors were slow in providing some evidence to defense attorneys.

Former Gooding city lawyer named as chief legal counsel

BOISE — A former Camas County and Gooding city attorney has been chosen as chief legal counsel for the Idaho Department of Law Enforcement.

Department Director Richard L. Cade announced the appointment of staff attorney Margaret P. White to the post Friday.

Before joining the Department of Law Enforcement in 1989, White was prosecuting attorney for Camas County for three years. She also served as city attorney for Gooding and the northern Idaho city of Troy. White has prosecuted drug-related asset forfeiture cases and assisted local agencies in similar cases while with the Department of Law Enforcement.

White will take over the department's top legal spot Sunday.

Open house set for retiring Minidoka superintendent

RUPERT — The public is invited to an open house for retiring Minidoka County Superintendent of Schools Gene Snapp next Thursday.

Snapp will be recognized for his 34 years of work in the Minico schools. Snapp's service has included two years as a teacher at Washington Junior High, five years as principal at Lincoln Elementary, 13 years as principal at both Lincoln and Memorial elementary schools, five years as principal at Memorial and the past nine years as superintendent.

Also being honored at the open house will be Darwin Andersen, who is retiring after seven years of service as director of personnel and curriculum for the district.

The open house will be held from 5:30 to 8:30 p.m. at Memorial Elementary, 10th and D streets.

Compiled from staff and wire reports

Bowen tells CSI graduates to avoid being swallowed up by organizations

The Times-News

TWIN FALLS — The president of Idaho State University advised College of Southern Idaho graduates Friday night to learn how to thrive as individuals within organizations.

"People, not organizational structures, cause things to happen or not to happen," Richard Bowen told the 391 graduates and their families at CSI's 25th annual commencement. "The best organization lets people do what they do best while chaining them down the least."

Bowen, a former political science teacher and U.S. Senate aide, who has been president of ISU since 1985, said most of the CSI graduates would end up working in organizations over which they have limited control.

"Organizations prevail because they provide overwhelming advantages within society," said Bowen. "(But) people become so riveted on the form of the specific organizational structure that they lose sight of the issues which are important."

Success in an organization often depends on whether or not individuals seek personal control, personal advantage and personal credit, he said.

"You are the forces that can potentially make good things happen if you're allowed that opportunity and are willing to exploit it," he said.

"You are also the forces that can stifle, smother, paralyze, misdirect, derail. How you perform and whether or not the benefits of your presence, depend on your support and your own character and motivation."

Some 545 CSI students were honored at the commencement exercises, including 313 academic graduates and 232 vocational stu-

While waiting for commencement to start, College of Southern Idaho graduates, including Stacie Hite and Mib Kelly, both waving, greet faculty.

dent. Two popular faculty members received awards as the top educators this year at the school.

Tony Mannen, assistant professor of dra-

ma, and Wayne Hinc, assistant professor of computer applications, received the CSI Foundation-First Security Bank of Idaho Award for Teaching Excellence as the top two educators at CSI this year.

Mannen, who came to CSI in 1975, and Hinc, who began teaching in the CSI Diesel Mechanics Program in 1981, were nominated for the outstanding faculty award by students.

Getting dirty is all part of the job

By Deborah Shimkus
Times-News correspondent

BELLEVUE — The City Council and community volunteers will install a new underground sprinkler system in the City Park this Sunday.

Beginning at 8 a.m., the city officials and residents will take a sledgehammer to the pipe for the system, which will cover one city block.

The council members decided earlier this year to purchase the system and install it themselves to help save the city money, according to Councilwoman Henty Morgan.

"Between organizations donating money toward the purchase of the system, and volunteer efforts putting it in, the costs to the city will be minimal," she said.

Employees from Webb Landscaping are donating equipment and their time to provide expertise.

The city has had to spend more than \$100 each year to replace stolen hoses and sprinklers from the park, according to Mayor Dennis Wright. The installation of the underground system will decrease the

Bellevue councilman resigns

Less than one week after Bellevue's newly elected council members and mayor were initiated, Councilman Brian Saska turned in his resignation. Saska was required to resign because he moved out of the city limits.

He was appointed to the council by Mayor Wayne Lovvill in June 1989 to fill a vacant seat. He was re-elected in 1990.

The council seat vacated by Saska will be filled through an appointment by Bellevue's new mayor, Dennis Wright. The council must confirm Wright's recommendation.

When filling a vacant council seat, the

city in the past has considered the candidate who received the next highest votes in the last election, according to Wright, who himself was originally appointed to the council in the same manner.

Wright offered the position to Roy Cross, the candidate that received the next highest votes in the April election. Cross declined, saying that he has taken on additional obligations.

Though there were two other candidates on the ballot, Wright said there are several people he is now considering for the position. He hopes to have a recommendation for the council at the next meeting.

amount of money spent on equipment replacement and maintenance of the park, he said.

"Anyone interested in helping for an hour or so can go to the park and join the council,"

members. Coffee and doughnuts will be served in the morning, and a barbecue lunch will be provided at noon.

Volunteers are encouraged to bring show-

Officials look at new juvenile sites

By Brad Bowlin
Times-News writer

TWIN FALLS — A spot near the Blue Lakes Shopping Center and a corner of the county grounds are being considered as possible sites for a regional juvenile detention center.

Officials from six counties and the state Department of Health and Welfare spent Friday afternoon looking at the two sites and two others already being considered.

Jerome, Twin Falls, Camas, Gooding, Blaine and Elmore counties have joined forces to build a nine-bed secure detention center for juveniles, but they haven't decid-

ed where to build it yet.

Until February, the six-county board was leaning toward a 10-acre parcel in rural Jerome County.

Twin Falls County then acquired what looked to be a more attractive spot in a southeast Twin Falls industrial zone.

Radioactive waste could be leaching

By Michael Hofferber
Times-News correspondent

KETCHUM — Radioactive waste buried at the Idaho National Engineering Laboratory needs to be exhumed as soon as possible, according to the state's environmental oversight team.

"We have a vulnerable aquifer out there, and we have contaminants that are migrating," said Dean Nygard, the state of Idaho's Superfund project supervisor.

Nygard and seven other state scientists reported on the progress of the INEL Over-

sight Program during a public meeting in Ketchum on Thursday. A dozen local citizens attended the three-hour information session, raising questions about the progress of environmental restoration at INEL.

More than 350 contaminated sites have been identified on the 39-year-old Department of Energy reservation. What materials were dumped at each site and how they should be cleaned up is still being assessed.

"Some are mere rubble piles," said Nygard. "Others are more serious."

One of the most serious is the Radiocesium Waste Management Complex, where an estimated 6.3 million cubic feet of low-level and transuranic waste was buried.

Radioactive plutonium has been found 110 feet below the complex, about 400 feet from the Snake River Plain aquifer.

Although a Federal Facilities Agreement ensuring environmental restoration at INEL in compliance with state and federal laws has not yet been signed, the state oversight team has been given access to the site and opportunities to research the

It's OK for skiers to pay tax

The Associated Press

BOISE — The city of Sun Valley can collect its 2 percent local option tax on ski lift tickets sold in the city, regardless of where the tickets are used, an attorney general's opinion says.

"It is the point of sale, not the location of the ski lift, the skier may use, that determines the incidence of the tax," the opinion said.

Attorney General Larry Echo Hawk was asked by Sun Valley Attorney Bruce Collier for an opinion after a city audit found Sun Valley Co. was not paying the tax on lift tickets sold.

The City Council plans a special meeting on Tuesday to consider how to pursue the matter with Sun Valley Co. "Our first response is to talk to the company," City Administrator Roy Rainey said.

The opinion said Sun Valley Co. sells lift tickets at a number of locations, some in the city of Sun Valley, some in Ketchum and some not in either city.

The opinion, prepared by Tax Commission attorney Ted Spangler, said a skier who buys a ticket in the city must pay Sun Valley's 2 percent tax, even though the skier decides to use lifts outside the city.

"A skier who purchases a ticket at a location outside the city is not subject to the city's sales tax, even if the skier decides to use lifts inside the city," he said.

The opinion also said the city could collect sales tax on building materials delivered from retailers outside the city to purchasers in Sun Valley.

Spangler said unless it is otherwise specified, a sale is not completed until delivery to the goods and if that happens inside city limits, Sun Valley can collect its sales tax.

Task force hears WIPP updates

SANTA FE, N.M. (AP) — A state task force was told Friday that the cost of ceiling in the Waste Isolation Pilot Plant may prevent scientists from ever conducting tests within the radioactive waste disposal facility.

Robert Neill, the director of the Environmental Evaluation Group, the state's federally-funded WIPP oversight organization, said he has questioned parts of all of the experiments proposed during the initial operation of the radioactive waste storage facility near Carlsbad.

The task force, the DOE's Waste Isolation Pilot Plant Task Force, said the rooms designated for the so-called dry-burn tests are nearing the age where some deterioration of the walls might begin.

The tests could, and perhaps should, be done on the surface at WIPP, said Neill.

Consultants have told the DOE that the ceilings in an existing room will last seven to 11 years, but with the stability of the walls and ceiling deteriorating after seven years.

Neill said using a five-year-old room for tests designed to last five to seven years is questionable under

Layers of salt that form the ceilings of some rooms have collapsed recently, including a 1,400-ton slab up to 11 feet thick last February.

those circumstances.

Arlen Hunt, the DOE's WIPP project manager, said because of the rate of roof collapses at the WIPP site, the life expectancy of the first pile of excavated tests rooms may not be long enough for the dry-burn tests.

He said engineers are working on ways to extend the life of the rooms. Layers of salt that form the ceilings of some rooms have collapsed recently, including a 1,400-ton slab up to 11 feet thick last February.

In the dry-burn tests, 78 bins of radioactive waste would be placed in a room, along with instruments that measure the rate at which decomposing metals result in the buildup

of gas and pressure over time.

The Idaho National Engineering Laboratory has packaged the first, six-barrel bin. Neill said that at the current rate, it will take at least two years to have enough barrels for a dry-burn test.

He said that within two months, all of the prerequisites for the WIPP to open will have been completed — a final "integrated-systems-checkout," to see if the WIPP site is ready to handle the drums of waste that will be tested, and a final-safety analysis.

Two other major decisions are to be made before the WIPP can open for waste — the designation of a transportation route from the north and the passage of a law by Congress permanently transferring the 10,000-acre WIPP site from the Department of Interior to the DOE.

The WIPP is the designated repository for trash, such as tools, clothing and metal parts, that has been contaminated by radioactive materials in the development, testing and manufacturing of nuclear weapons.

The repository is located 2,150 feet underground in ancient salt beds east of Carlsbad.

Forest service takes comment on Caribou project

POCATELLO (AP) — June 5 is the deadline for public comment on a proposed gold exploration project on Caribou Mountain in the Soda Springs District of the Caribou National Forest.

Forest officials said Newmont Exploration Limited wants to up-

grade a road, build 1.4 miles of new road and drill nine exploration holes with truck-mounted and helicopter-supported drill rigs.

The project also includes reclaiming 2.5 miles of exploration road constructed in 1988 and 1990.

The Forest Service and other state and federal agencies said they are studying the impact of the project on peregrine falcons near Gray's Lake National Wildlife Refuge and the visual impact of road development.

Wendell city delays decision on controversial zoning matter

By Terrell Williams
Times-News correspondent

WENDELL — After almost an hour of public comments Thursday, the Wendell City Council remained undecided on whether to grant a rezoning request that would allow a business to move into a residential area.

Jerrad Durfee asked for permission to locate a commercial business — an auto repair and body shop — in a residential zone on North Wendell Street.

Council members decided to table the matter and contact Durfee's neighbors who have not answered the variance letters and ask them for their opinions.

Durfee said his business would meet state and federal requirements for environmental protection.

He said if the city allows him to have this business, he will buy the property from — But-Holmes-of-Hagerman.

Durfee said commercial property is scarce in Wendell and this is the only affordable place he can find to run his business.

And Jeff Houk said he, Alaska and Wendell from Homer, Alaska, and is considering buying house on Holmes property located about 30 feet from the shop Durfee wants to buy.

Houk said he and Durfee will buy the eight lots together, since neither can afford to buy it all. Houk said Wendell should allow new business and new growth. Durfee's house will be quiet and clean, Houk said.

But Robert Holston, who lives near the Holmes property, said he does not approve of a commercial business in a residential area.

Already, Holston charged, Durfee is creating a neighborhood nuisance with "noise, filth and in-

ability to comply with EPA regulations.

Durfee said he does not have specifics on the government requirements but plans to get them right away. "It could be expensive," Goedhart said.

In other business:

Pam Thomas and Ray Weister complained about a bulldog owned by their neighbor, Gary Ferriere.

The dog runs loose, damages lawns and frightens children, they said.

Mayor George Benson said the city will take care of the problem.

A sale of city surplus equipment is set for 2 p.m. on June 22 at the city shop.

Councilman Dale Bunn noted that, since the high school is ending its vocational education programs, those students will no longer provide free cleanup of city alleys, such as spring.

Residents can no longer depend on that service, Bunn said, and people should not let their garbage pile up in the alleys.

Benson announced that Police Chief Kevin Blankmeyer has been named "Citizen of the Year" by the Wendell Grange.

And Councilman Jack Green commended Blankmeyer for being accepted into the Executive Command College, a regional education seminar for selected officers, being held this year in Sun Valley.

He agreed there is a shortage of business sites in Wendell. However, Durfee's shop recently and, with his car windows up, could smell paint.

Durfee said there would be no odors if he buys the shop and builds it to code as planned.

Councilwoman Pat Goedhart asked about Durfee's financial

status.

Fire Chief Keith Hosack said the department has agreed to a request by Von Potter to burn down an old house on the corner of Fourth Avenue West next to the city water tower.

The house will be burned when the weather allows, Hosack said. A firetruck and crew will be at the scene.

Also, Jazwick said she may make the power company to make a donation of all or part of the charge as a community service.

City Clerk Coletta Lloyd said she has opened a savings account for money to replace the park bleachers.

She said that the McGrath family, represented by the park and recreation commission, last month sent the city a \$25 check for the park.

Lloyd said she used that check to open the new account.

Winter said the park needs seven sections of metal bleachers to replace the old wooden ones.

Each section, he said, will cost \$900 plus labor.

Jazwick said the city has budgeted money for two sections and the park and recreation commission has promised to buy one section.

Dave Snider, representing softball teams that use the park, said this month's one-pitch tournament raised \$510 that will be donated to the bleachers.

In other business:

In his monthly report for April, County Fairgrounds in Filer, Blass said.

Board members and newly-acquired consultant Kurt Friedenauer toured all four sites.

Friedenauer is the administrative director of the Youth Services Center in St. Anthony.

That center is the state's only state-operated, long-term juvenile detention facility.

A newly-created state Office of Security, Detention and Assessment Programs will help the counties plan

Obituaries

Douglas H. Hansen
SHOSHONE — Douglas H. Hansen, 76, of Shoshone, died Wednesday morning, May 8, 1991, at his home at 415 E. California.

He was born July 16, 1914, in Rockland, Idaho, the son of John Clyde and Jennie Hellday Hansen. He attended Rockland schools. He married Ruby Crewekins in the Salt Lake City LDS temple on Oct. 31, 1935. Doug worked for J.C. Penney Co. in Buhl, Twin Falls and Rock Springs, Wyo., prior to coming to Shoshone in January 1935 where he managed the Penney's store. He joined the LDS Church in 1957. He opened the Hansen Department Store here in the same building in 1957 and operated it until the fall of 1985.

He was a lifelong member of the LDS Church. Doug was a very active community worker and was a past member of the Shoshone Chamber of Commerce and the Shoshone Rotary and was a past president of both. He served as Lincoln County Commissioner, Bishop of the Shoshone Ward, had served on the Stake High Council and the Stake Sunday School. He enjoyed being outside and working in his yard and was an avid fisherman.

Surviving are his wife, Ruby of Shoshone; one son, Lloyd Hansen of Seattle, Wash.; one daughter, Karen (Douglas) Rose of Fountain Valley, Calif.; two brothers, Edwin Hansen of Chicago, Ill., and Boyd Hansen of Salt Lake City, Utah; one sister, Isabelle Jones, of Pocatello, Idaho; 10 grandchildren; and two great-grandchildren. He was preceded in death by one son, his parents, two brothers, two sisters and one grandchild.

The funeral will be at 1 p.m. Saturday, May 11, 1991, at the Shoshone LDS Chapel, with Bishop Byron Hall conducting. Burial will

be in the Shoshone Cemetery. Friends may call from 11:30 a.m. until the time of the funeral at the Shoshone LDS Chapel. Arrangements are under the direction of the Bergin Funeral Chapel in Shoshone.

Ralph D. Clark
TWIN FALLS — Ralph "Woody" Duane Clark, 78, of Twin Falls, died Friday, May 10, 1991, at Magic Valley Regional Medical Center.

He was born Dec. 31, 1914, in Sugar Creek, Mo.; to Clarence E. and Ethel May Parrish Clark. He married Clara Lorraine Snyder on April 10, 1940, in Fairbanks, Neb., and she preceded him in death. He married Hazel Johnson on Aug. 4, 1965, in Winnemucca, Nev. He served in the G.I.C.C. from 1935 to 1938. In 1938, he went to work for Union Pacific Railroad, retiring in 1978. They had lived in Twin Falls since his retirement. He served on the City Council in Glenns Ferry from 1953 to 1963. They also lived in Burley and Shoshone at various times.

He was a member of the Moose Lodge and was chosen Idaho Moose of the Year for 1989-1990. Duane held the Highest Degree of Merit in the Moose Lodge.

Surviving are his wife of Twin Falls; three daughters, Joyce-Anne Bowman of Bloomfield, Colo.; Judy Morrison of Mountain Home; and one son, James E. Clark of Burley, Idaho; one stepson, Roy Elden Thompson of Pocatello; three sisters, Edith Hughes of Council Bluffs, Iowa; Ethel Bailey of Syracuse, Neb.; and Agnes Gordon of Sacramento, Calif.; one grandchild; and six great-grandchildren. He was preceded in death by his parents, one brother and two daughters.

For obituary rate information, call 733-0931, extension 278

The funeral will be at 11 a.m. Monday at White Mortuary in Twin Falls, with the Rev. Harry Johnson and the Twin Falls Moose Lodge No. 185 officiating. Burial will follow at the Glenns Ferry Cemetery. Friends may call from 4 to 8 p.m. Sunday at White Mortuary.

James E. Veatch
FILER — James Everett Veatch, 81, of Filer, died Friday, May 10, 1991, at West Magic Care Center in Twin Falls.

He was born July 30, 1909; in Shoshone; the son of James C. and Eva Simpson Veatch. He came to Idaho in 1927 and worked in the area orchards. He married Katherine Galls Hoyle on Oct. 17, 1931, in Twin Falls. He worked in the orchards for several years and was self-employed in trucking farm commodities. They resided in several Magic Valley communities. They also farmed near Filer, Utah; New Jer for 10 years. They now live back to Filer where he worked for the Potato Growers Institute for 10 years, retiring in 1983.

He was a member of the Seventy Day Adventist Church.

Surviving are his wife of Filer; two sons, Robert Veatch of Twin Falls and James F. Veatch of Clayton, Calif.; two daughters, Barbara Shaak of Twin Falls and Margery Jordan of Sandpoint, Idaho; three sisters, Lola Cox and Edna Lamers, both of Selma; Nan, and Ellen Evans of Fort Worth, Texas; 10 grandchildren; and seven great-grandchildren. He was preceded in death by one brother, two sisters and his parents.

The funeral will be at 2 p.m. Monday at White Mortuary in Twin Falls. Friends may call from 4 to 8 p.m. today and Sunday at White Mortuary.

Hagerman park to be spruced up

By Terrell Williams
Times-News correspondent

HAGERMAN — The City Park will get new power services and new bleachers, though the cost will be high.

City Council members Tuesday said they were surprised that it is estimated it will cost \$2,000 to bring power to new power services and new bleachers, though the cost will be high.

The council approved the \$2,000 hook-up cost unanimously, although Councilman James Winter called the price "ridiculous."

Mayor Gloria Jazwick said Thursday she is going to meet with an Idaho Power Company official to get more information before making a work order to bring power to the new pole from a pole outside the park.

Also, Jazwick said she may make the power company to make a donation of all or part of the charge as a community service.

City Clerk Coletta Lloyd said she has opened a savings account for money to replace the park bleachers.

She said that the McGrath family, represented by the park and recreation commission, last month sent the city a \$25 check for the park.

Lloyd said she used that check to open the new account.

Winter said the park needs seven sections of metal bleachers to replace the old wooden ones.

Each section, he said, will cost \$900 plus labor.

Jazwick said the city has budgeted money for two sections and the park and recreation commission has promised to buy one section.

Dave Snider, representing softball teams that use the park, said this month's one-pitch tournament raised \$510 that will be donated to the bleachers.

In other business:

In his monthly report for April, County Fairgrounds in Filer, Blass said.

Police Chief Todd Peterson said he made two felony arrests, five traffic arrests, four citations, a regional agency, investigated one vehicle accident and made 13 traffic stops with six citations and seven warnings.

Peterson also said he is working on 12 burglary cases and 45 cases of theft.

Peterson said Reserve Officer Gail Watson, who started volunteer service in July, has completed training, education courses and service to attain the rank of corporal.

Dave Snider reserved the city park for four different weekends in May, July and August of 1992.

He said softball tournaments will be held on those dates along with a carnival with rides, and a triathlon races of swimming, cycling and running.

The council turned claims of Robert Ross over to the city insurance company.

Ross said last month that the city is responsible for the fire lines that broke under his mobile home this winter.

and build the region's juvenile detention center, Friedenauer said.

Once the facility is ready to open, the counties could pay the state to administer the center.

The joint board will meet again June 4 and plans to hear proposals from architectural firms interested in designing a center.

Only two Idaho firms, both from Boise, have experience in juvenile detention center work, but local firms will be given the project and contact their county commissioners for information.

Juvenile

Continued from A5

Both of those sites would have required the counties to build the detention center from the ground-up.

A new report being considered on Fillmore Street across from the Blue Lakes Shopping Center, already has a 55,000 square foot building that could be remodeled.

The parcel is privately owned and is up for sale for \$29,500. Twin Falls County Commissioner Norma Blass said.

Another possibility for the center is a vacant corner of the Twin Falls park.

County Fairgrounds in Filer, Blass said.

Board members and newly-acquired consultant Kurt Friedenauer toured all four sites.

Friedenauer is the administrative director of the Youth Services Center in St. Anthony.

That center is the state's only state-operated, long-term juvenile detention facility.

A newly-created state Office of Security, Detention and Assessment Programs will help the counties plan

oped or treatment methods are perfected.

"Just getting it out of the ground though, would be a step in the right direction," said Steve Hill.

Waste

Continued from A5

contamination problem.

"It's like going back and trying to piece together a large puzzle," Nygard explained.

"Where we lack a lot of information is details on what kind of waste and how much waste went down an injection well, or what kind of waste went into a particular disposal pit."

While the Idaho scientists enjoy finding out what the waste are, having trouble obtaining data in the time-frame we need to," said program administrator Steve Hill.

They (INEL staff members) are so concerned about the accuracy of the data that they are giving us what the data indicate, validate, validate."

Warren Barrash, an environmental hydrogeologist, described an institutional attitude of secrecy that dates back to the Cold War era.

"We're dealing with a culture that's not used to being looked at

he said. "Any one issue may require a month's worth of a person's work just to get to look at a piece of information."

Actual cleanup of the contaminated sites is expected to begin in 1992, according to the oversight team's "Target date-for completion" is 2020.

What will be done with the waste retrieved from sites is still undetermined.

"A lot of the technologies needed to do the cleanups, in most cases, either aren't available or don't exist," noted Lance Nielsen, manager of the state's Hazardous Materials Bureau.

Promising "waste management technologies like in situ vitrification and vapor vacuum extraction are being tested."

Waste exhausted from disposal sites likely will be placed in drums and put in temporary storage until a permanent disposal area is devel-

oped or treatment methods are perfected.

"Just getting it out of the ground though, would be a step in the right direction," said Steve Hill.

'60 Minutes' correspondent learns safety tip the hard way

MIAMI (AP) — When "60 Minutes" correspondent Lesley Stahl came to Miami for a news story, she learned an important safety tip: Keep your car doors locked.

Stahl, in town this week to report on the 1988 beating death of a drug dealer by police, was driving with producer Barbara Dury when an intruder flung open an unlocked back door and jumped in.

Mrs. Dury struggled with the intruder, police spokesman David

Riverno said on the Wednesday evening incident, adding, "Lesley was in shock, and Barbara started weaving in traffic."

Deliberately trying to cause a commotion, Ms. Dury accelerated and crashed the car into a wall. The mugger fled, stealing Ms. Dury's purse, about \$100, a checkbook and a briefcase with newspaper clippings.

"Barbara was cool as ice," Stahl said.

Less than three hours after the incident, it almost happened — again — to Stahl and producer Jim Jackson. Another mugger pounded on the car. This time, they had the doors locked.

As of Friday, police had made no arrests and had no suspects, said spokesman Fernando Gabeca.

Stahl

Schwarzenberg, visited the castle of Jezeri, about 45 miles northeast of Prague in northern Bohemia.

"This place is not safe," he boasted of CTU, quoted Milan Uhdle, the Czech republic's minister of culture, as saying when welcoming the prince.

Jezeri, a gothic castle rebuilt in the 18th century, has been badly neglected during more than four decades of Communist rule in Czechoslovakia.

and accounting services, according to TBS' proxy statement. In 1989, Turner was paid \$729,952, including \$53,000 in accounting services.

Turner controls 55.1 million shares of TBS Class A stock, and 32.7 million shares of Class B stock. At Thursday's closing price of \$13.87 and \$13.25 respectively, Turner's holdings were worth about \$1.2 billion.

Turner Broadcasting completed its first profitable year in 1990, reporting net income of \$4.6 million. In 1989, TBS reported a loss of \$70.7 million.

Incompetent vets lose benefits in budget deal

WASHINGTON (AP) — Chauncey Corwin is nearly 100 and has been mentally incompetent since he was gassed in World War I.

Now the government has discontinued the veteran's disability check as a way to reduce the federal deficit.

"How can I tell him, 'Chap, they've stopped your veteran's payments?'" asked Joyce Ackerman, who's looked after Corwin for more than 20 years.

President Bush is giving extra benefits to Desert Storm veterans. But what about veterans like Corwin, said Mrs. Ackerman, who with her late husband, Corwin's cousin, took Chap into their home after they found him in a Florida institution in the late 1960s.

AP Wirephoto

Corwin now lives in a nursing home in Fredericksburg, Va., is one of 1,400 incompetent vets deprived of his disability check as a result of a statute buried in the five-year deficit reduction budget worked out by Congress last year.

The rule cuts off disability payments to incompetent veterans who have no dependent spouse, child or parent and who has estates greater than \$25,000. Payments resume when savings fall below \$10,000.

Linda Staley, a spokeswoman for the Department of Veterans Affairs, said the measure was taken because in some cases "remote heirs" received windfalls after the vet's death, "despite the intent of helping the veteran in his lifetime."

She said suspending the payments would save the VA \$125 million in fiscal 1991, a large chunk of the \$620 million the department was mandated to cut as part of last year's omnibus budget bill.

John L. Heilman, national legislative director of Disabled American Veterans, a non-profit group with more than 1 million members, said there have been cases of distant relatives taking advantage of incompetent wards. But those who will suffer most, he said, are parents, siblings and children who have made sacrifices to secure the financial and physical well-being of family members.

"It's not the business of the government who this money goes to," Heilman said, adding that in the end the taxpayer will save little because the VA has no money to fund other programs if VA funding dries up.

Mrs. Ackerman said the \$1,800 a month which Chap was entitled to entirely to his nursing home expenses. The \$100,000 nest egg built up for him through years of saving would quickly disappear if he needed extended hospital care, she said.

The disabled veterans' group challenged the constitutionality of the statute in a class-action suit in Schuylkill County, Pa., filed in federal court in Philadelphia.

The suit alleges that singling out the mentally incompetent violates their rights to equal protection under the law.

"It's a classic case of Congress doing something without really thinking about it," said Wayne D'Alcamo, one of the attorneys representing DAV and the 13 plaintiffs named in the New York District Court suit.

The families of those losing benefits also are a real slap in the face," D'Alcamo said, particularly when the nation is honoring and helping those returning from service in the Persian Gulf War.

Joséphine DeCasperis said she and her husband Albert promised his late

mother they would never put Albert's incapacitated brother in an institution. Peter DeCasperis has been unable to care for himself since suffering a stroke in a 1937 Army training exercise that killed two other recruits.

Peter's compensation check has paid the nearly \$2,000 a month for live-in attendants in their Brooklyn home. Mrs. DeCasperis says they're afraid the day will come when they can no longer give Peter a home.

"It's so unfair," she said.

Another plaintiff, Larry Simpson of Fredericksburg, Pa., suffered debilitating brain damage in the 1983 terrorist attack on the Marine barracks in Beirut. He can work a few hours a day in his mother's restaurant, but needs more brain surgery and will never lead an independent life.

Anna Simpson, his mother and guardian, said the VA had always encouraged her to save Larry's disability payments for the future, and his estate had grown to \$25,100, just \$100 above the cutoff point.

"I come from a military family and always thought that if you keep your mouth shut the military will take care of you," said Mrs. Simpson, who has a brother serving in Saudi Arabia. "I found out that this was not true."

Rep. Robert Dornan, R-Cal., and H. Martin Lancaster, D-N.C., introduced a bill in March that would repeal the law. And a non-binding Senate resolution has recommended compensation to incompetents be restored.

"They realize they've done something philosophically terrible," said Heilman of the DAV.

But he said the measure would be difficult to repeal because it was part of the deficit-reduction package. Heilman predicted that, at most, Congress will refuse to go along with a Bush administration plan to extend the life of the law to 1995. It's slated to end in September 1992.

Rep. Sonny Montgomery, D-Miss., chairman of the House Veterans Affairs Committee, told Mrs. Ackerman in a letter that "while most of us don't feel comfortable" cutting benefit entitlements because of budgetary pressures, "in this case I have to tell you we had little in the way of options."

'Midnight Caller' star gets chance to be radio man

COPENHAGEN, Denmark (AP) — Actor Gary Cole, who plays a late-night radio talk show host in NBC's series "Midnight Caller," will become a radio man when he visits Denmark in July.

Radio Sydlyst, a radio station south of Copenhagen, said Cole accepted its invitation to be the "Nighthawk" for once.

"He's becoming a popular radio personality," said Carsten Elsted of Radio Sydlyst, which has about 60,000 listeners.

In "Midnight Caller," Cole plays a former San Francisco police officer who has become a popular radio host, chatting live on the air and running into trouble.

Folk singer Seeger sees hopeful times in Nashville

NASHVILLE, Tenn. (AP) — The more things change, the more they stay the same, says folk singer Pete Seeger.

Seeger, 72, was in Nashville for Thursday's opening of "Some Sweet Day," a musical drama about Arkansas sharecroppers who strike for better wages.

"It's a subject that's completely timely even though the subject is 55 years old," said Seeger. "It's right up to date."

Seeger was here to lend moral support to fellow folk singer Si Kahn, whose songs provide the basis for "Some Sweet Day."

Seeger, who recorded American folk songs and songs for protest, said improved race relations are one hopeful sign he sees in modern times.

"I just watched a group of about 20 black and white sub-teens walking through here, laughing and talking together, and it wasn't so long ago that you would have never seen that in Nashville," he said.

"You've got to stay hopeful!"

Astrological Forecasts

IF MAY 11 IS YOUR BIRTHDAY: You are intuitive, a good teacher, relationship with mother could be termed "out of the ordinary." Leo, Aquarius-Cancer persons play significant roles in your life. You succeed when utilizing unorthodox methods. Your intuition is highly developed, on more than one occasion you've had experiences that border on the "paranormal." In June you'll be away from home for a time.

ARIES (March 21-April 19): Accent initiative, be ready for new proposals, fresh start, challenge of different direction. Cycle continues high — you'll arouse combination of admiration, envy, resentment. Leo represented.

TAURUS (April 20-May 20): Family member reveals secret. Confidential matters related to money, savings, interest rates, return of lost article. There will be greater public acceptance of your views/preferences.

GEMINI (May 21-June 20): Individual who is chronicler means well but is desperately self-conscious. Accent humor, versatility, be perfect host to one who is in slight panic. Major wish fulfilled. Libra involved.

CANCER (June 21-July 22): Rebuild on more solid base. Individual in position of authority wants you to succeed, will provide it. Physical attraction plays minor role, but can't be ignored. Scorpio involved.

LEO (July 23-Aug. 22): Articulate feelings, read and write, realize that "mini-railroad" could develop into something serious. Focus on communication, publicizing, advertising, unique method of disseminating.

VIRGO (Aug. 23-Sept. 22): Domestic

adjustment includes renovation of residence, serious consideration of marital status. Focus also on "finances; legal agreement." Short trip involves "business relation."

LIBRA (Sept. 23-Oct. 22): Keep careful watch on legal aspects, maneuvers. Agreement could be ill-timed and might not hold water. Day, training, crime, immune, delay. Attention also revolves around marital status.

SCORPIO (Oct. 23-Nov. 21): Work pressures increase but ample reward could follow. Spotlight on responsibility, survival, production. Relationship strong but stormy — Capricorn plays dominant role. You'll be inspired!

SAGITTARIUS (Nov. 22-Dec. 21): Cycle complete — you'll know where you stand and you could experience flash of deja vu. Emotions at white-hot temperature. Old flame returns, looks just grand. Aries plays major role.

CAPRICORN (Dec. 22-Jan. 19): Stress, impatience, freedom-willingsness to experiment with new product. Security might depend upon your pioneering spirit. Aries status quo. Your future is now "Aquarius in picture."

AQUARIUS (Jan. 20-Feb. 18): Family reunion dominates. You'll be invited for gourmet treat tonight. Relative says, "We should get together more often." Financially, you're more optimistic. Cancer native plays role.

PISCES (Feb. 19-March 20): If you ultimately profit will result. Focus on personal, all possessions, create a hobby that could mean additional funds. Attention revolves around entertainment, apparel, body image.

What's what?

LEMURS ARE RUBY
In lemon peels is a chemical said to be a sexual attractant. Methyl jasmonate, by name. A male pheromone. It's said to be what's emitted by the male Oriental fruit fly to let females know he's available. But women do not chase wildly after a man who has eaten lemon peels. Such a man doesn't even interest female Oriental fruit flies. Research goes on.

Q: What's "elevator's" A: British for "coffee break."

Q: In the archaic code of linguo of elderly intelligence agents, a deft death by murder that appears to be a death by natural causes is known as "measles."

Q: Why coined the term "Dark Continent" for Africa? A: Henry Stanley of the Stanley-Livingston saga.

Q: The Original Pony Express riders signed contracts wherein they promised to deliver mail in 10 days, no matter what young ladies.

Q: If that atomic clock gains or loses more than a second every 30,000 years, it needs to be fixed.

traffic, a wasp flew under your collar. You can't predict whether another person might ever be dangerous!

According to the personnel experts, if an employee repeatedly takes one day off at a time, odds are that person will quit the job within a year.

It's a bucket-ry country, it's grizzly bear country. Or would be, if people insist on "come along." That's what a bear expert says.

Chinese physicians 2,000 years ago told patients with gaiter problems to eat seaweed.

Rich in iodine, that seaweed. Today's medical research suggests those ancient doctors couldn't have prescribed better.

Philadelphia jailers say they don't want the inmates to get too jumpy; that's why their prison coffee is defat.

The Original Pony Express riders signed contracts wherein they promised to deliver mail in 10 days, no matter what young ladies.

Q: If that atomic clock gains or loses more than a second every 30,000 years, it needs to be fixed.

Soviet foreign minister pledges work toward Mideast peace

JERUSALEM (AP) — Soviet Foreign Minister Alexander Bessmertnykh, on a historic first visit to Israel, said Friday his country and the Jewish state have agreed to work together for Middle East peace.

Bessmertnykh said his meetings with Prime Minister Yitzhak Shamir and Foreign Minister David Levy "allow me to speak with greater conviction about the fact that the chances for achieving peace... for starting talks... is quite great."

The Soviet official also said his trip was "an important stage in renewing ties between Israel and the Soviet Union."

The six-hour visit, the first by a Soviet foreign minister, underscored the transformation of Soviet-Israeli relations since President Mikhail S. Gorbachev came to power. The supervisor that urged the Arabs and boycotted Israel for nearly 24 years was hailed Friday as an ally in peacemaking.

"Whoever thinks the Soviet Union will play a role that leads to war in the Middle East is an enemy of peace," said Levy. He added the Soviet Union was working "for peace" to make its contribution, and Israel welcomes it with joy.

After his two-hour discussion with Levy, Bessmertnykh said the two countries would cooperate on organizing a Middle East peace conference.

"We have agreed to continue the talks and to be in constant touch on the issues in every way possible... to move in the direction we all wish, and that is peaceful settlement of all issues that trouble the region," he said.

Bessmertnykh came from the Jordanian capital of Amman and left later for Cairo, where he was to meet Egyptian officials and U.S. Secretary of State James A. Baker III. With Baker, he was to discuss prospects for American- and Soviet-sponsored peace talks.

His visit here seemed to dispel the uneasiness over his remarks Thursday in Jordan, in which he hinted that the Soviets might use their control over Jewish emigration as a weapon to halt Jewish settlement building in the occupied territories.

At a news conference, Bessmertnykh denied he intended to put pressure on Israel over the settlement issue, and Israeli radio reported his discussions with Levy did not touch on settlements or other contentious issues.

The Soviet Union broke relations after Israel captured land from its Arab allies in the 1967 Middle East war. It has since insisted

the occupied territories be returned.

Both the Soviets and the United States have objected to Jewish settlements in the territories as obstacles to peace.

Shamir's government opposes returning any land and has said it will continue to expand the settlements, where about 100,000 Jews live among the territories' 1.7 million Palestinians.

In Amman, Bessmertnykh had said he "can't accept a situation where a peace conference is in session while settlements are being built" in the occupied West Bank and Gaza Strip.

Soviets surround Armenian town after ambush

MOSCOW (AP) — Soviet helicopters fired machine guns into an Armenian village on Friday in an apparent reprisal for an ambush on a column of troops, Armenian officials said.

One was killed and eight wounded in the ambush by Armenian militiamen near the border between the southern republics of Armenia and Azerbaijan, news reports said. There were no immediate reports of casualties from the Soviet fire in the Armenian village of Paravakar.

The attack on the troops was the first major act of resistance by Armenian militiamen in two weeks of fighting along the tense, 600-mile border.

At least 48 Armenians have died in the two-week campaign by Soviet troops and Azerbaijan riot police to disarm Armenian border settlements. Until Friday, no casualties had been reported among the Soviets and Azerbaijanis.

According to Soviet media accounts, Armenian militiamen using rifles and grenades ambushed two Soviet military trucks at dawn Friday in Akastya province of northwest Azerbaijan, about two miles from the Armenian border.

Eight of the 14 soldiers riding in the trucks were wounded, and the Azerbaijan news agency Assa-Irada said a ninth died before reaching a hospital. Two of the wounded were in critical condition, Assa-Irada said.

A few hours after the ambush, Soviet troops crossed the border into

A Soviet officer confronts an Armenian woman during a heated discussion in the town of Artzavashen that was surrounded by Russian military tanks.

Armenia, surrounded the village of Paravakar with 11 armored vehicles and six helicopters, and demanded that it turn over all its weapons, the Armenian Interior Ministry reported. Harun Khachatryan, a ministry official, said the helicopters fired machine guns into the village, which has fewer than 500 residents and is about 90 miles northeast of Yerevan, the Armenian capital.

"There are some indications that the attack on Paravakar may be a reprisal for the attack in Azerbaijan," on the Soviet troops, Khachatryan said.

No casualties were immediately reported in Paravakar. Khachatryan said three representatives of the village were negotiating with Soviet officers to prevent bloodshed.

Ennity dates back centuries between mainly Christian Armenians and the mostly Muslim Azerbaijanis.

More than 200 have died since 1987 in intermittent fighting for control of Nagorno-Karabakh, a re-

gion inhabited mainly by Armenians but legally part of Azerbaijan.

Because of the ethnic violence, hundreds of thousands of Armenians have fled from Azerbaijan, and vice versa.

Soviet Interior Minister Boris Pugo said this week the campaign to disarm Armenian militiamen was aimed at restoring peace. But Armenian President Levon Ter-Petrosian called it an attempt by Soviet and Azerbaijani authorities to "terrorize the Armenian people" into leaving disputed areas.

Ter-Petrosian also contended that the joint Soviet-Azerbaijani military actions were aimed to punish Armenians for trying to secede from the Soviet Union.

He and other Armenian officials have alleged the central government in Moscow is siding with Azerbaijan because it remains a loyal Communist republic, while Armenia has nationalized Communist Party property and refused to sign President Mikhail S. Gorbachev's new Union Treaty.

At least six Armenian settlements on both sides of the border have been seized and disbanded by Soviet army and Interior Ministry troops. The town of Artzavashen, an Armenian enclave in Azerbaijan, was left in peace Thursday after it surrendered 38 rifles and machine guns.

Residents of Artzavashen and other border villages claim they need weapons to defend themselves against Azerbaijan extremists.

Swiss insist cut off by rockslide

ZERMATT, Switzerland (AP) — This Alpine resort remained cut off Friday from the outside world after a huge rockslide, the second in three weeks, severed its rail and road links.

No injuries were reported in the slide, which occurred Thursday night when boulders nearly the size

of mountain chalets crashed to the Matter Valley floor.

Officials said two dozen structures were buried in a hamlet about 10 miles from Zermatt, located at the head of the valley in the shadow of the Matterhorn. The buildings were uninhabited or had been evacuated after the previous slide.

Pope starts on 50th pilgrimage, including stop in Portugal, islands

LISBON, Portugal (AP) — Pope John Paul II arrived Friday in Portugal to venerate the Virgin-Mary of Fatima, who he believes saved his life after an assassination attempt in 1981.

The pope's second trip to the shrine at Fatima and his 50th foreign pilgrimage.

He made the first trip in 1982, the year after being shot by a Turkish gunman in Rome's St. Peter's Square.

The pope was greeted at Lisbon's Francisco de Sa Carneiro Airport by President Mario Soares and Prime Minister Anibal Cavaco Silva.

One of the church's most sacred shrines is built on the spot at Fatima where three illiterate shepherd children said they saw the mother of Jesus—Christ—appear to them in 1917. The children prayed for the conversion of Russia.

The pope said he made the trip Friday to give thanks to the Virgin for "protection" she gave to the church in these years which recorded swift and deep social transformations, allowing new hopes to many people oppressed by atheist ideologies.

The Polish pontiff was expected to make further reference to the state of the Roman Catholic church in

eastern Europe and the Soviet Union during his four-day tour of Portugal and its Atlantic islands, the Azores and Madeira.

The pope's veneration of Fatima stems from the 1981 attempt on his life, which occurred on May 13, the same day the first apparition of the Virgin is said to have taken place.

On Friday, John Paul II said he sought to thank the Virgin for her "special protection" in saving his life.

According to aides, John Paul frequently thumbed-through-church documentation about the apparitions at Fatima while recovering at a Rome hospital.

Bangladesh storm victims stranded by river

DHAKA, Bangladesh (AP) — Flood-swollen rivers and torrents pouring down from the hills in neighboring India stranded hundreds of thousands of people Friday, one day after three tornadoes claimed more than 50 lives.

There was no sign of a let-up in the relentless cycle of natural disasters in this impoverished nation still reeling from an April 30 cyclone in which at least 125,000 people perished. Few survivors of the nation seemed immune.

At least 300,000 people were stranded by rising flood waters in the east—and northeast, the Daily Star newspaper reported. The Relief Ministry, whose reports are usually slower than those in the newspapers, said at least 100,000 people were marooned when heavy rains swelled the rivers

and more water coursed down from the Himalayan mountains in India. By sundown, scores of fresh breaks in river embankments in the northeast were reported by United News of Bangladesh.

The flood reports came from the Moulvibazar region 100 miles northeast of Dhaka and the Comilla region

55 miles to the east.

So far no reports of deaths have reached Dhaka. Floods usually claim fewer lives than cyclones, because people have time to move to higher ground.

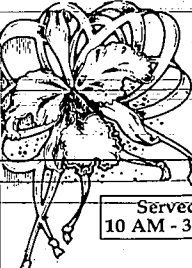

At least nine people died in the floods in the Indian state of Assam, which borders northern Bangladesh.

Communist officials given prison terms

BUCHAREST, Romania (AP) — A military court on Friday sentenced 12 former secret police and Communist officials to up to five years in prison for their role in repressing anti-Communist protests in December 1989.

Iulian Vlad, ex-head of the Securitate secret police, received a four-year sentence and a former Interior Minister Tudor Poenescu, already serving a life sentence for killing government opponents, was given five years.

They were convicted of "illegally detaining" and "abusively interrogating" an unspecified number of protesters during the revolution that brought down Nicolae Ceausescu's communist dictatorship.

Commission reverses itself, agrees to consider wiretap case

BOISE (AP)—The Public Utilities Commission has reversed itself and voted to consider the American Civil Liberties Union's claim that US West's Caller ID service violates state wiretap laws.

But in its order issued Friday, the regulators again refused to halt the six-month trial of caller identification service in the Boise area while a decision is made on its legality.

While the three-member panel's decision to reverse the wiretap issue was a victory for the ACLU, state Director Jack Van Valkenburgh said it was likely the ACLU

would go to court in an attempt to stop the trial, which runs through August, until the legal questions are answered.

First, decisions on the legality ought to be made," Van Valkenburgh said, "then the program allowed to go on if it is deemed appropriate."

A hearing on the issue was set for June 13 in Boise. On April 30, the commission voted 2-1 against reviewing the wiretap question, agreeing only to reconsider its earlier decision that the service was not subject to state regulation under the 1988 Idaho Telecommunications Act.

Commission President Joe Miller was the lone member backing an investigation of the wiretap question.

But Friday's order included review of that issue as well as the jurisdictional one and was signed not only by Miller but also by Commissioners Marsha Smith and Ralph Nelson. Nelson had also objected to review of the jurisdictional question.

"The ACLU's petition raises a substantial question regarding the legal propriety of Caller ID," the order said. "It is well settled that public utilities may only offer services that conform to the laws of Idaho."

With Caller ID, subscribers see flashed on a special box the number of the telephone originating the call and the name that phone is listed under. US West has agreed to block from disclosure the name and number the lines of persons who can prove their safety would be jeopardized. It has also provided a method that allows any caller to block disclosure of his name and number on a per-call basis. Over 2,000 people have subscribed to the service, the only one in the nation offering disclosure of the name as well as the number.

But the ACLU and a consumer group

claimed the service without line blocking being unconditionally available to all customers is an unconstitutional invasion of privacy. And under current state laws, they maintained, the display of the name and phone number of a caller violates prohibitions against the use of "trap and trace" devices without a court order except by a phone company in very limited circumstances.

Nelson had originally said the interpretation of nonutility laws was the responsibility of other state officials, not the commission, while Smith said the commission's jurisdiction covers only utilities, not their customers.

Evidence shows gun silencer used

IDAHO FALLS (AP)—A Wyoming judge's decision to unseal court records relating to a 2-year-old double Idaho Falls homicide will make it harder to investigate the case, the Bonneville County prosecutor says.

But the judge says investigators had no objections when he announced his decision. Among information revealed by the search warrant papers is the fact the FBI thinks the slayings were done by a 9 mm handgun with a silencer.

On Tuesday in Jackson, Wyo., 9th District Judge D. Terry Rogers unsealed the last of two search warrants he issued concerning the July, 1989, shooting deaths of Betty Lou Gray, 47, of Jackson, Wyo., and Reedy Runday, 49.

Their bodies were found in Runday's rural Idaho Falls home both women shot in the head.

No criminal charges have been filed. Six months ago Gray's children filed a wrongful death civil lawsuit against their father, William L. Gray Jr., alleging he killed his wife. He has denied the allegation.

Rogers said Thursday he sealed the warrants and accompanying documents at the request of the law officers. The warrants allowed searches of Gray's home and business last fall.

The judge said he decided to unseal them after press inquiries about how long they would be sealed.

"It seems to me the time ought to be a reasonable length of time for them to be sealed," said Rogers.

Tax measure will help GOP

IDAHO FALLS (AP)—Ada County Commissioner Gary Glenn says voting support for the "One Percent Initiative" will help Republicans, because it will turn out conservative, rural voters.

Glenn, a regional Republican chairman, was in eastern Idaho for Saturday's meeting of the "FRIDAY'S" GOP effort to rebuild the party from last year's election losses.

The Idaho Property Owners Association is circulating petitions to place another 1 percent property tax limit on the 1992 ballot. It would limit property taxes to no more than 1 percent of property value.

Endorsing the initiative will advance the Republican philosophy of limited government and lower taxes and less spending, he said.

Upscale mall opens downtown

COEUR D'ALENE (AP)—While many downtowns are losing business to suburban malls, this lakeside tourist community has a new mall downtown.

Businessman Duane Hagadone cut a ribbon Thursday to open the Coeur d'Alene Plaza, a 33-store mall he built across the street from his The Coeur d'Alene Resort.

Pat McCaughey, general manager of the Coeur d'Alene Chamber of Commerce, said the new mall should boost retail traffic throughout the city's eight-block business district.

About 250 employees work at the plaza's upscale shops, adding to a growing number of service jobs in a town whose economy is dependent on the tourist trade.

Caldwell man named to panel

BOISE (AP)—Byron S. Cook, Caldwell, is the newest member of the Governor's Committee on Employment of People with Disabilities.

The governor's office announced the appointment on Friday. Cook, who has a hearing impairment, is a judge analyst with the Health and Welfare Department.

The committee term runs until 1993.

Social Hall found

Work is continuing on a tunnel on State Street in Salt Lake City where on Thursday construction workers discovered the foundation of the city's Social Hall built in 1853.

Tribal water rights agreement is endorsed by Sho-Ban attorney

FORT HALL (AP) — After a month-long review of the Fort Hall Water Rights Agreement, Shoshone-Bannock attorney Jeanette Wolfley believes the pact meets the needs of the tribes.

"It has some weaknesses, but overall it does meet the needs of the tribes," Ms. Wolfley said. "I would vote for it, I think litigation would be uncertain."

But with a May 31 vote looming, Shoshone-Bannock leaders continue to disagree on the impact of the negotiated water settlement.

The legal review of the plan to quantify the tribes' Snake River water rights upstream from Hell's Canyon is favorable, according to Marvin Osborne, member of the Fort Hall Business Council.

"I think it's going to make things a little more clear," said Osborne. "I would say it is a favorable opinion."

But of course there are a lot of pros and cons.

The council directed Ms. Wolfley to review the pact between the tribes, the state and the federal government after Howard Funke, the tribes' water counsel, was voted out of office in March. She recently presented her opinion to tribal members and the business council.

"My conclusion is that the goals set by the tribe in the agreement were met," Ms. Wolfley said.

Mary Washakie, another business council member, continues to oppose the agreement and said Ms. Wolfley's findings simply laid out the provisions of the agreement without endorsing it.

"I still have reservations," Ms. Washakie said. "It sort of rips out a part of (tribal) sovereignty. When you go into negotiations with the state, the tribes lose something."

Shoshone-Bannock tribal members who vote will have the final say on the water agreement. It already has been ratified by Congress and the Legislature. If tribal members do not approve the pact, water claims likely will be handled through lawsuits.

Over the opposition of Ms. Washakie, the seven-member Fort Hall Business Council rescheduled a vote on the agreement from April 10 to May 31 in conjunction with the council's general election. One third of the 400 registered voters must cast ballots for the election to be binding. The agreement must receive a simple majority to pass.

The plan grants the tribes 581,000 acre-feet of water annually from the Snake River for present and future needs. It calls for \$22 million from the federal government over three years to establish a tribal water management system.

Civil rights leader blasts handling of racism charges

IDAHO FALLS (AP) — The head of the "Nirvana" Coalition Against Malignant Harassment is criticizing the Bonneville County prosecutor for failing to file felony charges against three teenagers accused in an Idaho Falls hate crime.

Bill Wassmuth contends Prosecutor Kimball Mason sent the wrong message when he only filed misdemeanor charges against the trio for spray-painting racial epithets on the home of an Hispanic family.

"This is a serious offense and you need to deal with it as a serious offense," Wassmuth said.

But Mason is standing by his decision — charges against Ryan Jensen and Michael Ellingford, both 18, and a 16-year-old carrier this week.

The three were charged with injury by graffiti, which carries a maximum penalty of six months in jail and \$300 in fines. Wassmuth, in Idaho Falls on Thursday to meet with the city's Cultural Awareness and Human Relations Committee, said Mason should have taken the advice of Attorney General Larry Echohawk and filed malicious harassment charges. They carry a maximum penalty of five years in prison and \$5,000 in fines.

Mason again maintained the evidence would not have supported a felony charge, and Echohawk, while disagreeing, refused to criticize the prosecutor.

School officials, students clash over junk food sales

IDAHO FALLS (AP) — Leonard Leming, who operates Junk Food Heaven out of a vending truck, is among vendors opposing a bid by school officials in Idaho Falls to block the sale of fast foods at two junior high schools.

Students say they like it and the food tastes better than what's offered in the school cafeteria.

But school officials have asked Mayor Tom Campbell for an ordinance banning the lunchtime sales. Campbell says the City Council could bar vending in certain areas of the city, but it won't.

"The council is not interested in an ordinance that would ban street vending," he said. "They think it is a legitimate activity on the street. It's just at the schools where it is a problem."

Vendors operate out of trucks and cars and sell burgers, hot dogs, pizza, and fries and soft drinks during lunch at Clair E. Gale and Eagle Rock junior high schools. Superintendent Jerry Jacobson said vendors create a safety hazard because students congregate along the street to buy food, which is a nuisance to remove from school furniture and floors, he said.

Gov. signs bill to protect endangered desert tortoise

CARSON CITY (AP) — Gov. Bob Miller on Friday signed a bill to let Clark County impose fees to help protect endangered desert tortoises — and avert a federal shutdown of construction in booming southern Nevada.

Miller signed AB376, which lets the county impose construction fees of up to \$1,000 per acre of developed land to generate funds to set up the tortoise habitat.

The measure was backed by developers, state Wildlife Department officials and by conservation groups including the Nature Conservancy.

Builders told lawmakers that \$2.5 million already has been raised for the federally mandated habitat, but another \$3.5 million is needed.

Advocates said Nevada had to show a major effort to protect the tortoises or face a possible building moratorium.

The U.S. Fish and Wildlife Service placed the tortoise on the endangered species list two years ago after national environmental groups said many of the tortoises in Nevada, Southern California and Utah were dying from a respiratory illness.

The tortoises are found in prime Clark County development areas such as Laughlin and West Las Vegas.

Classified is being remodeled for a new easy look.

Starting this Sunday, May 12, we'll unveil a new classified section that will be easier to read and use.

The index featuring clean, modern graphics will allow you to easily locate merchandise and services.

Category headings will be designed so they can be easily spotted on the pages. These will lead you to our newly, more clearly defined classifications.

Scanning the classifieds will be further simplified by the indenting of the copy in each ad.

Briefly

Snow cuts state A, B tennis tournays short

SUN VALLEY - The 1991 Class A and B high school state tennis tournaments were halted about 4 p.m. Friday because of snow.

Officials will determine this morning if play can continue today; if conditions do not allow play, the team championships will be decided on matches completed Friday.

Potatoland Bicycle race runs today from Albion to Almo

ALBION - The 1991 Potatoland Bicycle Race sponsored by Pinetree Sports will take place today at 11:00 a.m.

The event is a USCF and IBRA sanctioned and will consist of two races - the citizen class race which will be 23 miles and go from Albion to Connor and back and a USCF class race which will be 55 miles and go from Albion to Almo and back.

Snake River Open bike race follows 23-mile loop near Buhl

BUHL - The Idaho Bicycle Racing Association Snake River Open will be contested Sunday over a 23-mile loop course which will play host to the state championships later this summer.

Registration for the event will get underway at 8:30 a.m. at Buhl High School. Racing starts at 10:00 a.m.

The race consists of three laps of the course with IBRA points going to the top finishers.

Hornets, Pilots win close meets

By Jeff Hokanson
Times-News writer

JEROME - The District 4 Class A-3 track and field meet provided what may well be a preview of next week's state meet.

The Declo Hornets used a second place finish in the 1,600-meter relay to hold off the Carey Panthers by one-half point, 68.5-68, on the girls' side. In the boys' division the Glens Ferry Pilots outkicked the Valley Vikings by 1 1/2 points, 97-95.5.

"I am really excited," beamed Pilots Coach Brent Taylor after the win. "I have never seen a group of kids rise to the occasion like these kids did."

Although the team title is a nice prize at this meet the individual placings become of utmost importance. The top four individuals and top two relay teams advance to the state meet.

Jan Kirkland and Trinity Patterson provided the Panthers with the highlight of the meet when both collected a sprint double, winning the 100 and 200 meter titles.

Kirkland, turned back Angela Boden, Ralf Rayer and Angie Hubbard - Shoshone, in the 100 and the same duo plus teammate Michelle Sparks, the 400 champ, in the 200.

Patterson picked up his win in the 100 at the expense of Keith Yost of Valley. Rob Morris, Valley, was Patterson's victim at 200.

The top performance of the meet belonged to Gina Miller, Declo. Miller, who has been hampered all year by an injury, ran away from the field in the 800 setting a new meet record in the process. Her time of 2:25.7 put her over eight seconds up on Tara Brown, Gooding.

In the boy's 800, Eddie Hamilton of Glens Ferry used a strong kick over the last 100 meters to retain his title in the event. He recorded a time of 2:03.6.

The team battle on the girl's side came right down to the final event and pitted the

Gina Miller of Declo sets a meet record in the 800.

two front runners head to head. Carey got a strong lead off leg from Kirkland and never looked back but the win left them a half point short.

The same situation occurred in the boy's 1,600 relay. Valley led the Pilots by 4 1/2 points going into the relay with Valley needing to finish in the top two to assure themselves of the team title. In the end the Vikings would settle for a fifth place finish with Glens Ferry claiming the runnerup spot behind Declo and the title was the Pilots.

Girls Division
Team scores - 1. Declo 68.5, 2. Carey 68, 3. Shoshone 66.4, 4. Buhl 64.5, 5. Filer 63, 6. Valley 62, 7. Declo 61.5, 8. Carey 61, 9. Wounded 58, 10. Valley 58, 11. Gooding 57, 12. Gooding 56, 13. Yankees snap losing streak against A's

NEW YORK (AP) — The New York Yankees snapped a 10-game losing streak against Oakland when Don Mattingly and Kevin Maas homered on consecutive pitches in the seventh-inning Friday night to beat the Athletics 3-2.

Maas' "Babe" Mohoric decided Dave Stewart on Sept. 8, 1989, had the Yankees defeated Oakland. The Athletics won 12 times last year, becoming the only team to sweep a season series from New York and took the first two meetings this season in Oakland.

AP Wirephoto

The major league record for consecutive victories by one club over another is 23, set by Baltimore in 1969-70 against Kansas City.

Angels 12, Indians 2

CLEVELAND (AP) — Wally Joyner hit his third career grand slam and Mark Langston pitched seven strong innings for California. The loss was the Indians' third straight since they outscored Oakland 35-12 in a pair of weekend games.

Joyner's grand slam with two outs in the seventh inning finished Eric King (3-3) two pitches after pitching coach Mark Wiley visited King to discuss the bases-loaded situation. Joyner also had an RBI single in the ninth.

California loaded the bases in the seventh on two walks and an infield single before Joyner hit his third

Pittsburgh's Mike LaVillero, left, tags out Atlanta's Francisco Cabrera at home plate during the Pirates' 5-2 win over the Braves.

home run of the year. Joyner had three hits, extending his hitting streak to six games.

Milwaukee's Mike LaVillero, left, tags out Atlanta's Francisco Cabrera at home plate during the Pirates' 5-2 win over the Braves.

Twins 5, Tigers 2
MINNEAPOLIS (AP) — Mike Pagliaro continued his comeback from a slow start with three hits and two RBIs and the Minnesota Twins snapped the Tigers' four-game winning streak.

Mark Guthrie (2-2), won his second straight start in May after an April in which he went 0-2 with a 16.88 earned run average. He went six innings, allowing seven hits, including Travis Fryman's two-run homer in the sixth.

Rick Aquilino got his fifth save.

Cougars send Indians to elimination bracket

By Ron Gates
Times-News writer

BUHL — South-Fremont High School capped off six consecutive singles and rode that to five sixth-inning runs Friday to drop Buhl 19-10 in the District 4 Class B Baseball Tournament.

The loss, Buhl's 22nd in 25 outings, sends the Indians into an elimination game at 1 p.m. today against the South Fremont-Shelley Cougars and Russets clashed in Friday's late game.

The survivor meets the unbent club at 1 p.m. in the first championship contest, with a second to follow at 3 p.m. if needed.

In an unusual turn of events, should South Fremont earn the district's automatic state berth, the second-place team would face the Dist. 5 runner

up in a playoff. If either Shelley or Buhl prevails there will be no playoff.

A measles epidemic, which nearly forced the top-seeded Cougars to drop out of the two-day slate quaffing toirney wasn't enough to keep them from driving Buhl from Cliff-loom-from.

By the time Buhl Coach Dave Slotten got Brian Kennison into the contest the Cougars owned a 4-0 lead. One more run, chargeable to Isom, crossed the plate before the inning ended.

The Indians, who scored in runs of two from the second through sixth frames, clipped back the mound just 11 pitches into the game.

Of the serious hitters, Jake Anderson and Boomer Walker singled and Duke Dodder sacrificed to help put together the four-run third.

The Eagles made it 5-1 in the fifth, when Dodder walked and scored on Ryan Hall's line shot into left field corner.

With Hall having a reputation of appearing to run in place, Walker the

coach wheeled the oxygen bottle onto the field from the clubhouse to raze his catcher about running so far without stopping for air.

In the sixth, Anderson walked and went to third on Brandt Hanes' second single of the day. Hanes stole second and Brandt scored off the pitcher in the bottom half of the inning, and first baseman Chad Rose struck two-run blows while Ryan Peterson picked up his team's final RBI.

"The irony of it is that South Fremont called Thursday, were quarantined, and weren't coming," added Slotten. "They decided to come. The state released them."

Buhl: Fremont (1), Schabot (5), Gary (5) and Vevic, Burned, Lukas (5) and Hanes (1).

CSI

Continued from B1

You got to sometime prove you can hit."

In preparation, the pitchers got a rare chance to bat during practice before the game.

With two pitchers already out of the game by the late innings, two others leading to a late rally.

McGruder led off the ninth with three hero swings, showing good power form but little control, setting for a foul no-out-to-third base.

He swore afterward that he was right on the curveball that he missed for strike two.

Hartsch, looking more like a pitcher unfamiliar with the workings of a ball, blooped a single into right.

Of the serious hitters, Jake Anderson and Boomer Walker singled and Duke Dodder sacrificed to help put together the four-run third.

The Eagles made it 5-1 in the fifth, when Dodder walked and scored on Ryan Hall's line shot into left field corner.

With Hall having a reputation of appearing to run in place, Walker the

Major Leagues

pitching of Matt Young and clutch hitting of Jody Reed and Mike Greenwell.

Wade Boggs broke a scoreless tie with a run-scoring double and Reed followed with a single in the fourth as the Red Sox posted their third straight win, sixth in seven games and ninth in 11.

Cubs 6, Reds 5

CHICAGO (AP) — Pitcher Rick Sutcliffe doubled in two runs, Ryno Sabers had a two-run homer and the Chicago Cubs withstood Hal Morris' five RBIs in a 6-5 victory Friday over the Cincinnati Reds.

Morris had a three-run homer in the first inning, a sacrifice fly in the sixth and a run-scoring single in the eighth.

Pirates 5, Braves 2

PITTSBURGH (AP) — Rookie Orlando Merced continued his hot hitting with a tie-breaking home run and John Smiley became the National League's second five-game winner leading the Pittsburgh Pirates to a 5-2 victory over the Atlanta Braves.

Smiley (5-1) pitched his first five-inning, allowed five hits, a run, struck out five and walked two over seven innings in joining Ramon Martinez of Los Angeles as a five-game winner.

Red Sox 5, Rangers 3

BOSTON (AP) — The Red Sox continued their hot play behind the

Bruins capture girls Region III golf title

The Times-News

BURLEY — Defending champion Pocatello captured the Region III boys golf title at Burley Golf Course Friday but not by the margin expected.

In the girls competition, Twin Falls' Lori Blackwood won medalist honors by seven strokes to lead the Bruins to the title and an appearance at state next week.

Highland's Troy Kruze won boys medalist with a 76. Four players, including Burley's J.V. Evans and Minico's Chris Hoggan, tied for second at 77.

Poký captured 313, 10 strokes ahead of Highland, Burley, at 325, also advances to state by matching the qualifying score. Hoggan gets a berth at state by finishing in the top five individuals.

Late 76ers 3-pointer cuts Bulls lead to 2-1

PHILADELPHIA (AP) — Hersey Hawkins' 3-point basket from the baseline with 10 seconds left lifted the Philadelphia 76ers to a 99-97 victory over Chicago on Friday night, cutting the Bulls' lead to 2-1 in their NBA playoff series.

The Bulls led 97-95 with 14 seconds left after a free throw by Michael Jordan, who scored 46 points.

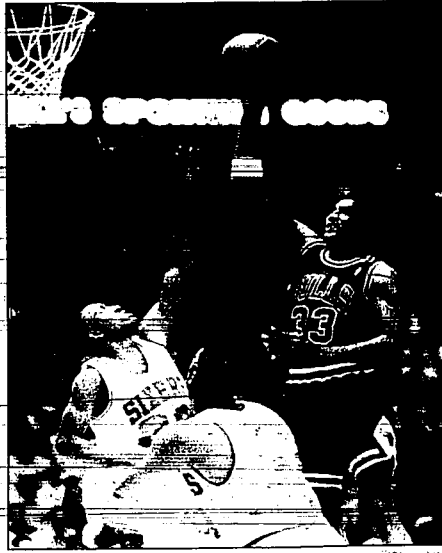

The 76ers inbounced the ball to Charles Barkley, who drove toward the basket, but passed to Hawkins just inside the baseline. His high-arching shot gave Philadelphia a 99-97 lead. Hawkins finished with 29 points.

After a timeout, Scottie Pippen's off-balance shot in heavy traffic from the top of the key bounced off the backboard without hitting the rim.

Philadelphia's Armon Gilliam grabbed the rebound and was fouled with 1:38 seconds left. He made one of two free throws to complete the scoring.

Gilliam had 25 points and 11 rebounds, and Barkley had 19 points, 16 rebounds, while Pippen had 22 points and 13 rebounds for the Bulls.

The fourth game of the best-of-7 second-round series will be played in Philadelphia Sunday, and the fifth in Chicago Tuesday.

Chicago's Scottie Pippen goes up for two points against Philadelphia's Hersey Hawkins, left, and Rick Mahorn.

Bream changes teams but not place in standings

PITTSBURGH (AP) — Sid Bream is at home this weekend and his team is in first place.

What's interesting is that Bream's team, the Atlanta Braves, is playing a road game. And while Atlanta Braves lead the Pittsburgh Pirates led the National League.

Atlanta hasn't finished higher than fifth since 1984, but the Braves took a 13-11 record and a .006 lead over San Diego into Friday night's game at Pittsburgh.

Bream, who still lives in Pittsburgh, knew he was leaving a first-place team when he left the Pirates to sign with Atlanta. He didn't know he would be joining another.

"I'd say I'm 95 to 98 percent happy now," Bream said.

The Braves are 100 percent glad they signed Bream, who has stabilized their infield at first base. He is hitting .267 with three homers and 16 RBIs and has yet to commit an error.

Bream wasn't the Braves' only off-season contribution from Pittsburgh. The Braves traded infielder Rafael Belliard, but all he's done is beat out Jeff Blausler and Andres Thomas for the starting shortstop's job.

And who would have thought that on May 10, Belliard, who drove in 24 runs the last four days, would have nearly as many RBIs (13) as NL Most Valuable Player Barry Bonds (14)?

Bream said he didn't want to sign with another team, but the Pirates wouldn't give him a no-trade clause. He even offered to re-sign with Pittsburgh for less than the \$5.4 million he's getting over three years in Atlanta.

At the way (Darryl) Strawberry talked last season, he was ready to leave New York," Bream said. "But my family was happy in Pittsburgh. We did everything we could to stay. We were not ready to leave, but things kind of took another turn.

"I miss the city. I miss my teammates. I miss (manager) Jim Leyland. These people are very special to me. ... I still have thoughts about going back. But at the same time, we're happy (in Atlanta) now, and we're going to be happy."

Atlanta certainly is happy with the young pitching that was battered for several seasons, but is maturing — and winning. Steve Avery (31-25 ERA), Tom Glavine (4-2, 2.29 ERA), John Smoltz (1-3) and Kent Mercker (1-1, 1.29) are among the best young arms in the league.

"I actually think our young pitching is better than Pittsburgh's. I really do," Bream said. "Bream certainly wouldn't mind an Atlanta-Pittsburgh matchup in the NL playoffs.

"I just don't want people to think I deserted Pittsburgh for the money," Bream said. "I would have taken less, but the Pirates weren't even reasonable. They thought my loyalty was so great that I wouldn't go anywhere."

Except back into first place.

Chevy passes Cosworth for Indy engine reliability

INDIANAPOLIS (AP) — Offenhauser-Miller-Duesenbergs. All dominant racing engines of their times but discarded as technology, inevitably, ushered in a superior product.

Before long, Cosworth may be added to the list.

This is the era of the Chevrolet engine, in the developmental stage and trying to prove its reliability at Indianapolis as recently as three years ago.

The Chevy was introduced in 1986 and tested first by the Penske Racing team. It has won 51 of the past 77 IndyCar races, including all 16 of the Indy circuit last year and the first three this season.

The Chevy Indy V-8 has been a real breakthrough in technology. ... It smooths everything out, with plenty of horsepower and torque, and is so reliable that you just depend on it to finish the race.

The turbocharged Chevy was developed by the British firm of Ilmor Engineering, manager of the Miller-Miller and Paul Morgan's with money and help from its partner, car owner Roger Penske and Chevrolet. Its first victory was with Mario Andretti at Long Beach in 1987, nine years after Al Unser's first victory in a Cosworth.

The Offenhauser, or, more familiarly, the Offy — traced its lineage from 1921, when the old Miller

the last driver to use an Offenhauser was Bill Vukovich Jr., who was 12th in the 1980 race and was the only one among three Offy starters who was still running at the finish.

The Cosworth, another British creation of Mike Costin and Keith Duckworth, was introduced at Indianapolis in 1976. After a 1-3-2-5 victory with his own Coy engine in 1977, the Cosworth powered every Indy winner from 1978-87. Chevrons have won each year since then, with Rick Mears in 1988, Emerson Fittipaldi in 1989, and Arie Luyendyk in 1990.

The Offy still speeds around about 10 mph, compared with about 6 mph over the previous four years.

Buick is in the developmental stage Chevy was in three years ago and is still looking for its first victory. A Buick-powered car driven by Pancho Carter won the pole position at a then-record 212,583 mph in 1985 but lasted only six laps before an oil pump failed.

Carter is using a Cosworth this year, along with Tero Palmroth, Randy Lewis, Salt-Walther and rookies Mike Groff, Buddy Lazier, Jeff Andretti and Guido Dacco.

Besides Bettenhausen and his Mendocino Racing teammate Kevin Cozart, other Buick drivers include Jim Crawford, John Paul Jr., Dean Hall and rookies Dave Matsushita, Mark Dismore, Dave Hamilton and Willy T. Ribbs.

63 earns Springer 1-shot lead in Atlanta Classic

MARIETTA, Ga. (AP) — Mike Springer, flying his true race last year on the Ben Hogan Tour, opened with five birdies in a row on his way to a 9-under-par 63 for the second-round lead Friday in the Atlanta Classic.

Springer had a 36-hole score of 131, 13 shots under par on the 7,018-yard Atlanta Country Club course. It gave him a one-shot lead over Tom Kite, who had a 68-72.

After twice failing to get his PGA Tour card in the qualifying school, Springer, 25, made it by finishing fourth on the Hogan Tour money list last year.

Ace on 16th again proves key in Crestar-Farm Fresh Classic

CHESAPEAKE, Va. (AP) — "Welcome to the Crestar-Farm Fresh Classic, where you better ace the 16th hole if you want to get to the top of the leaderboard today," says Tom Haskins.

Tom Haskins did it Thursday en route to a 4-under-par 68 that gave him a share of the first-round lead. On Friday, it was Tammie Green's turn. Once again, the clutch ace on the 146-yard hole was 7-iron.

The former University of Arizona star missed three putts of 10 feet or less. He had only one putt of more than 20 feet all day, a 35-footer with a big break that he put within 5 feet to save par on the 7th hole.

"This year has been a little bit of a struggle, but the last month, my game has been coming around," he said.

Springer opened his round with a 6-foot birdie putt on the 10th green. He scored from 10, 16, 12 and 15 feet on the next four holes before the string of birdies ended when he need two putts from 30 feet on the 15th green.

Dottie McBryre, who won this event by nine shots last year, the best margin of victory on the LPGA Tour in 1990, moved into contention Friday but was nonetheless annoyed at herself. She was at 1:30 after a bogey-free 68 that she said should have been a 63.

"I feel like I shot par today," McBryre said. "I could have made at least five more putts out there, but I doubt about it."

Briefly

Crash seriously injures Indy rookie

INDIANAPOLIS — Indy-car rookie Mark Dismore was seriously injured in a wild, fiery crash Friday during a practice session for the May 26 Indianapolis 500.

The 34-year-old driver from Greenfield, Ind., was removed from his shattered 1988 Penske race car by track medical workers and taken to the infield medical center. He was immediately airlifted to Methodist Hospital in downtown Indianapolis.

Speedway officials said Dismore was "awake, alert and stable." A report from the hospital described his injuries as a fractured neck, multiple injuries to his right foot, right knee and right wrist and several multiple injuries to his left foot.

He was scheduled to undergo 4-6 hours of surgery on his feet and wrist Friday night.

Dismore was running laps of about 216 mph when he brushed the outside wall coming off the fourth turn. The car spun and slid at high speed backward into the inside fence, the engine compartment exploded, the retaining wall dividing pit road and the track, with more flame spouting from the disintegrating car.

Expansion group denies contribution

WASHINGTON — The leader of a group trying to lure a National League baseball team to Washington on Friday denied reports he is negotiating with a company willing to contribute \$150 million.

Chip Akridge also denied a report Metropolitan Washington Baseball is negotiating with a company that has bid for control of the group.

Negotiations with several potential investors are ongoing, Akridge said. He declined to release details, but said the group plans to hold a news conference Tuesday.

On Friday, Washington radio station WMAL reported a major insurance company was willing to contribute about \$150 million in exchange for control of the group.

Times the group has only half of the money it needs for the league's expansion fee and other start-up costs.

Akridge has said his group has enough money to meet the league's requirements even without an additional investor.

The National League is scheduled to award two expansion franchises in a month.

Padres try shakeup with 6 moves

SAN DIEGO — The San Diego Padres, needing help in the outfield on the bench and in the pitching rotation, made six player moves on Friday.

The Padres recalled right-hander Adam Peterson and outfielder Thomas Howard from their Class AAA affiliate in Las Vegas, and purchased the contract of outfielder Kevin Ward from Las Vegas.

Ward was promoted into the starting lineup against the Montreal Expos Friday night in place of outfielder Gerald Clemons, who was put on the 15-day disabled list retroactive to May 1. Clark has a strained left Achilles tendon.

The Padres optioned left-hander Derek Lilliquist to Las Vegas and asked waivers on outfielder-pinch hitter Mike Aldrete for the purpose of giving him his unconditional release. Aldrete was hitless in 15 at-bats.

Peterson is scheduled to start Saturday's game against the Montreal Expos. He was 1-1 with a 4.78 ERA in five starts with the Stars, Peterson and Steve Rosenberg were acquired from the Chicago White Sox during spring training in exchange for Joey Cora.

2 USC football players will stand trial

LOS ANGELES — Two Southern Cal football players and another man were ordered Friday to stand trial on felony charges stemming from a string of robberies near automated bank teller machines.

West Los Angeles Municipal Court Judge Richard Berry ruled after a two hour preliminary hearing that there was enough evidence to prosecute cornerback Marcel Brown, safety Howard McCowan and Garlyn Coleman, a baseball player at Los Angeles Southwest College.

All three men are being held on \$100,000 bail. They each face one count of kidnapping and four felony counts of robbery and assault with intent to commit great bodily harm.

Brown, 19, and McCowan, 20, have been suspended from the Southern Cal football team by Trojan coach Larry Smith pending resolution of the criminal case.

The three men were arrested by Torrance police last month after they allegedly attacked and robbed a Redondo Beach man. Prosecutors allege the three were linked to a pair of robberies in Westwood and another in Redondo Beach after they were taken into custody.

Lawyers settle World Series profit rift

CINCINNATI — Lawyers for Cincinnati Reds general partner Marge Schott and other limited partners settled the court-ordered Friday over distribution of profits from the World Series champions.

It took more than eight hours of private negotiations to reach the settlement, which includes an agreement not to disclose terms.

Four of the eight limited partners had sued Schott in Hamilton County Common Pleas Court, contending she had failed to distribute money to them. The lawsuit was scheduled for trial Friday before Judge Robert Rushman, but was put on hold to allow negotiations.

The limited partners alleged that the Reds made a \$37.5 million profit between 1985 and 1989, but that Schott has refused to distribute \$17.7 million of that amount. Schott, who operates the club as general partner, has said the money needs to be held in reserve in the Reds' bank account.

Schott, the widow of a wealthy Cincinnati developer and industrialist, is became a limited partner in 1981 and bought controlling interest in December 1984 from general partners James and William Williams.

The four limited partners who sued Schott are Louis and Louise Nipper, who were majority owners before selling control to the Williamses; Carl A. Kroch; and George Strike's American Laundry Machine.

Stocks dive to end week at loss

The Associated Press

NEW YORK—The stock market ran into its worst selling since last March as investors unloaded shares in long-term interest rates rose.

The Dow Jones average of 30 industrial stocks tumbled 59.98 points to 2,920.17, for its biggest drop since it fell 113 points on March 19.

The average finished the week with a net loss of 18.69 points.

Declining issues outnumbered advances by more than 2 to 1 in nationwide trading of New York Stock Exchange-listed stocks, with 491 up, 1,122 down and 471 unchanged.

Volume on the floor of the Big Board came to 172.73 million shares, down from 180.21 million in the previous session. Nationwide, consolidated volume in NYSE-listed issues, including trades in those stocks on other exchanges and in the over-the-counter market, totaled 212.95 million shares.

In the credit markets, prices of government bonds dropped more than \$10 for each \$1,000 in face value, increasing their yields to the 8.32 percent-8.35 percent range.

Analysts said markets for both

bonds and stocks suffered a letdown after this week's \$37 billion sale of debt securities by the Treasury.

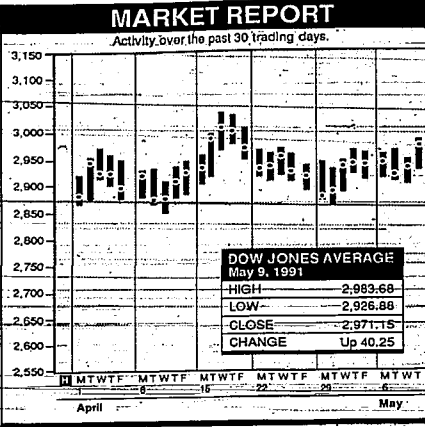

The Labor Department reported that the producer price index of finished goods rose 0.2 percent in April, ending in a bit above Wall Street estimates.

The so-called "core" CPI inflation rate, however, was right in line with expectations, also at an increase of 0.2 percent. But that news wasn't enough to sustain enthusiasm for stocks after the market's sharp rally on Thursday.

Point-plus losers among the blue chips included Philip Morris, down 1/4 at 67 1/2; Boeing, down 1/4 at 47; General Electric, down 2/4 at 74 1/2; International Business Machines, down 2/4 at 103 1/2; and Coca-Cola, down 1/4 at 54 1/2.

Banking and mortgage finance issues also were broadly lower as interest-rate expectations darkened. BankAmerica fell 1/4 to 38 1/2; Chase Manhattan 1/4 to 18 1/2; J.P. Morgan 1/4 to 51 1/2; and Chemical Bank 1/4 to 19 1/2.

Federal National Mortgage lost 1/4 to 47 and Federal Home Loan Mortgage 1/4 to 78.

Dole says votes are there for Soviet grain credits

Knigh-Ridder News Service

WICHITA, Kan.—After days of negotiations, Senate Minority Leader Bob Dole, R-Kan., said Friday he has put together enough votes to pass a resolution to repay the Soviet Union's grain credits.

Dole and the Bush administration have said the resolution is necessary to clear up questions over whether dealing with the Soviets would violate a section of the 1990 farm bill that requires a credit-worthiness test for all recipients.

But many senators have balked at the proposal, saying the U.S. government should not back the massive credit program in Moscow or prop up the Soviet economy.

Dole said he now has 30 co-sponsors for the resolution and expects to bring the measure to the floor for a vote on Thursday.

But even if the resolution passes, Dole said, administration officials don't know whether Bush would approve all of the \$1.5-billion in credits the Soviets have requested, because of concerns about the Soviet Union's ability to repay.

Dole said Agriculture Department economists have estimated that granting \$1.5 billion in credits could "cause wheat prices to rise as much as 20 to 25 cents a bushel in turn. Dole said the federal government could save as much as \$800 million in deficiency payments to farmers.

One test of the Soviets' ability to repay will come in July, when a \$3.1 million interest payment is due on the \$1 billion in grain credits received in December.

But weighing the Soviets' ability to repay the loans against the impact on farmers in the United States and the stability of the Soviet Union has led into a complex, plicated foreign-policy-and-trade issue, Dole said.

LEGAL NOTICE

INVITATION TO BID
NOTICE IS HEREBY GIVEN by the Twin Falls County Board of County Commissioners, Twin Falls County, State of Idaho, that sealed bids will be accepted for the installation of steel siding, up to 400 square feet, on the Office of the Board of County Commissioners, Twin Falls County Courthouse, 425 Shoshone Street, North, Twin Falls, Idaho. The bids received will be for installation of steel siding, acrylic latex window trim covering and 6 thermo-pane windows for the residence located at the Twin Falls County Fairgrounds, Fair, Idaho.

THESE GIVEN that the specifications for said siding may be obtained from the bids being opened at the Office of the Board of County Commissioners, Twin Falls County Courthouse, 425 Shoshone Street, North, Twin Falls, Idaho. Any and all sealed bids received will be publicly opened at 10:00 a.m. on May 11, 1991, at the Office of the Board of County Commissioners, in its capacity as the Board of County Commissioners, at the County Courthouse, Twin Falls, Idaho. Any and all sealed bids received will be publicly opened at 10:00 a.m. on May 11, 1991, at the Office of the Board of County Commissioners, in its capacity as the Board of County Commissioners, at the County Courthouse, Twin Falls, Idaho.

THEISEN MOTORS USED CAR CLOSE-OUT!

For as many years as I have been Used Car Manager, I have never had as many FINE, LOCALLY OWNED, CLEAN used cars on the lot. In fact, my used car lot is overflowing. I'm going to pass some savings on to you and make some room. All used cars have been drastically reduced. If these prices don't fit your way of thinking, come in and make me an offer.

Sincerely,
Dan Massie
