"America Not Going to Turn Back,"
Says Senator

JAPAN OBJECTS

GENEVA, (UP)—The United States delegation will not allow the Hoover one-third arms reduction project to be suffocated. Senator Claude A. Swanson announced today at a conference of the United States, British and French delegations.

"The bugle has been blown and the曲子 has been sounded," he said. "America is not going to turn back."

Also present were H. G. Wilson, Minister of War of the United States; Lord Londonderry and Sir Herbert Samuel, of Britain; and Joseph Paul Benétone and Henri de Jouvenal, of France.

The United States delegation refused the suggestion that Washington spring a surprise, maintaining that the Hoover plan merely took up the principal points previously made during the various stages of the disarmament discussions.

TOKIO, (UP)—A government spokesman today confirmed Japan's opposition to President Hoover's proposal for further disarmament.

He said the government had not thoroughly studied Mr. Hoover's proposal and there will do no harm in deciding this government's final attitude.

It was indicated that the Japanese government had been informed of the European powers' plan.

It was further pointed out that Japan's position is to be unopposed to further arms limitation because of its unfortunate situation in China and unsettled conditions in Manchuria and Russia.

The spokesman said the Japanese may be dissatisfied with the London naval treaty and already has announced that it will demand a higher ratio in 1935 for Japan.

An American spokesman toward disarmament is influenced by the war debts reparations in which Japan is uninterested, the spokesman was told.

While Japan is likely to reduce taxes, she does not consider her armaments as wasted. The spokesman compared the Japanese situation with the boundary defense against the Soviet Union. Japan must guarantee an "anti-Imperialist" Chinese front. For this purpose, Japan would treat revision to permanent peace to be put off until next winter at the earliest.

Highways Made of Cotton May Furnish Market For Farmers

By NEA Series

BATON ROUGE, La. — Highway engineers in the old cotton-growing states of the south now seem to believe that a new market for cotton may be created in the construction of roads built of this material.

Arnold Davis, engineer, and Harry Nelson, road builder, are the men who have been experimenting at present on stretches of a new type of road made of cotton and asphalt.

Davis, out of an engineering school only nine years, has been building roads in California, Mississippi, Texas, New Mexico, South Carolina, and Louisiana. It was four years ago, while working on a road project in Arkansas, that he hit on his cotton road idea, quite by accident.

"Mud and Water Cause Cracks"

Mud, out of an engineering school only nine years, has been building roads in California, Mississippi, Texas, New Mexico, South Carolina, and Louisiana. It was four years ago, while working on a road project in Arkansas, that he hit on his cotton road idea, quite by accident.

"We have been trying through the years to build a road that would withstand water. I decided to try this, and the idea was to get rid of the water."

Davis was in charge of a road construction job at Arkansas, when he hit upon his asphalt. After his contractor had his dirt turn off by the machinery, and it dropped to the ground, the dirt became saturated, and the road was completely ruined.

Some time later the road began to crack. Davis was sent to find the cause. He saw the road cracked and cracked from rain and mud action, but did spot something that he had never seen before.

He dug through the layers of asphalt and found the cotton shreds of the road water-proofed with asphalt, which prevented passage of water.

"It was the cotton that held the dirt there didn't make it last,"

An Old Story—An Ideal!

That was the young engineer.

Methodist Episcopal church was the leading dry adver-

sor in the early days of cotton

construction. The Bishop may endorse the plank shortly. It is understood to have whispered to the President that he would like to do it even though it went further. And then he wanted to go.

This means the moderate days are probably go along with him up to the point where they want to be all alone.

Third party.

The President was privately amazed at the dampness of the convention. He did not think he would have to go nearly so far to get the support of the delegates. He was beginning when it was over.

Things at the White House were not so bad. The Republicans were invited in to take all kinds of pictures. They have not been given sit-downs for months.

NOMINATIONS

Gov. Roosevelt has the delegates.

The question now is whether he can keep them. He will win no matter what they get control of the convention.

He will be determined to hold his own, however, and he will not let some of his delegates before they sit down.

Even Tammanyites have now realized, however, that Roosevelt can expect to be nominated on the first ballot.

The Republicans thought so too. They planned their convention on the expectation that they would have to fight the New Yorkers. They instead came up with a resolution that they would not conduct a campaign of Conservatism vs. Radicalism. They would pit the Radicals against the New York governors. Their whole platform was written with that end in view.

NOTES

Strong men went at the Mills convention speech for the nomination plan. . . . Mills is known to be a man of personal tact and a realist. . . . He made a big hit with the delegates. . . . They went away from it themselves about the Mills speech, and the Legitimists responded to the idea.

In private Mr. Hoover has never been wedded to the dry side. . . . His speech was a victory, not a triumph. . . . The convention was established by his tremendous vote four years ago against a repeat. . . . The admiring

National Whirligig

The low-down on what is going on behind the scenes at Washington and New York—for Evening Times readers everywhere.

WASHINGTON
By Paul Mallon

REPUBLICANS

Those who hover around the throne whisper that President Hoover will be wettor in his actions.

The partition vote at Chicago is the reason. It showed insiders conclusively the Republican party will split, and those who voted for representation of the party.

Without presidential pressure that vote would easily have been 3 to 2 in favor of the repeat anti-inflation plank.

Sen. Borah is pleased as punch to be plucked from his position at every step—�ough a world court, war debts, and relief.

Borah has a record of having failed to take advantage of such opportunities. He did not go through in 1912 when Roosevelt offered a much better choice. That situation is likely to repeat itself now. And his reputation as a crack 90-yard man in 1912 year rates it well enough to hold him.

One other is certain. He can not campaign for Mr. Hoover as he did four years ago. Neither can Charles Evans Hughes, or George Washington, or the three big shot Hoover orators in 1928.

This time the cabinet will carry the load—Mills, Burley and Stimson.

That pre-inflation plank was written by at least a hundred hands. It got water every time a hand touched it. The final draft was the wettest.

Retiring Bishop McFowell of the

Methodist Episcopal church was the leading dry adherer to the anti-inflation plank.

The Bishop may endorse the plank shortly. It is understood to have whispered to the President that he would like to do it even though it went further. And then he wanted to go.

This means the moderate days are probably go along with him up to the point where they want to be all alone.

Third party.

cracked and cracked from rain

and mud action, but did spot

something that he had never seen

before.

He dug through the layers of

asphalt and found the cotton shreds of the road water-proofed with asphalt, which prevented passage of water.

"It was the cotton that held the dirt there didn't make it last,"

That was the young engineer.

Arnold Davis, engineer, and Harry Nelson, road builder, are the men who have been experimenting at present on stretches of a new type of road made of cotton and asphalt.

Davis, out of an engineering school only nine years, has been building roads in California, Mississippi, Texas, New Mexico, South Carolina, and Louisiana. It was four years ago, while working on a road project in Arkansas, that he hit on his cotton road idea, quite by accident.

"Mud and Water Cause Cracks"

Mud, out of an engineering school only nine years, has been building roads in California, Mississippi, Texas, New Mexico, South Carolina, and Louisiana. It was four years ago, while working on a road project in Arkansas, that he hit on his cotton road idea, quite by accident.

"We have been trying through the years to build a road that would withstand water. I decided to try this, and the idea was to get rid of the water."

Davis was in charge of a road

construction job at Arkansas,

when he hit upon his asphalt.

After his contractor had his dirt

turned off by the machinery,

and it dropped to the ground,

the dirt became saturated,

and the road was completely

ruined.

Some time later the road began

to crack. Davis was sent to

find the cause. He saw the road

SENATE INVESTIGATIONS

The various investigations which the Senate undertakes from time to time are usually criticized bitterly by some men as being expensive and productive of no real benefits commensurate with the time and money spent.

Recent reports summarizing the work done by the famous Nye committee which looked into the affairs of the Continental Trading Co. furnish a pretty good answer to that sort of criticism.

To date the government has collected nearly \$6,000,000 as a direct result of this committee's work. It got more than \$8,600,000 from Henry M. Blackmer for evaded income taxes. It got more than \$1,300,000 from another man, whose name hasn't been made public, in the same way. It got \$600,000 in back taxes from Continental principals. It got other lesser sums.

And the entire investigation cost the taxpayers just \$25,000.

ADVICE FROM LONDON

Amid all the dolorous forecasts it is comforting to find a prominent London economist urging English investors to put money into American securities.

The present moment, this British expert declares, offers "an amazing opportunity"; increases in security values of 300 per cent within a few years, with corresponding yields, seem to him very probable.

As a result of this forecast, London newspapers are predicting a strong switch of English capital to the United States in the near future.

Whether or not this Englishman is correct in his optimistic view is perhaps a matter for argument; but it is at least encouraging to find that there is one economist who is not moved to despair by the sight of our present difficulties.

STEEL PRICES AND PROSPERITY

An interesting commentary on the chances for a return of prosperity in the near future is provided in a current bulletin from the Alexander Hamilton Institute, which estimates that the steel trade cannot revive until there is a 31 per cent reduction in steel prices.

In 1921, the institute points out, the steel industry slashed prices so heavily as to offset the increase in the value of the dollar. These bargain prices led to a flood of new orders which eventually brought the industry to a record high production; and the steel industry for years has been regarded as a barometer for American industry in general.

In this depression, however, steel prices have declined only 13.5 per cent from the 1929 peak, although the average price of all commodities has gone down 32 per cent. Barring inflation, the institute asserts, the steel trade cannot revive unless it brings prices down very materially.

MORE TREES

Idaho farmers planted 23 per cent more farm forest trees in 1932 than in 1931, reports S. C. Clarke, extension forester with the University of Idaho college of agriculture extension division. Forty-eight percent more black locusts were planted this year than last. One 5,000, several 2,000, and many 1,000 and 500 tree plantings were made in the Snake River valley. The total plantings reported amounted to about 93,000 trees, of which more than 65,000 were black locusts. Siberian elm was second in demand by farmers. About 6,000 coniferous trees were used for windbreak purposes.

Lincoln county farmers planted the largest number of farm trees, Gooding county was second, and Jerome county third. This year Lincoln county farmers took more than 16,000 trees for windbreak purposes, which was a large increase over the 1,100 used for the same purpose in 1931. Gooding farmers planted more than 15,000 farm forest trees, and Jerome county farmers more than 11,000. Other tree species planted in numbers were white ash, golden willow, Ponderosa pine, Scotch pine, Douglas fir, maples, and black walnut.

Ninety-three thousand forest trees added to Idaho farms do not represent a large amount of money, but they will add many times more than their cost to the value of the farms and also aid in making the farmstead a more agreeable place to live.

A court in New York recently ruled that a postage stamp 78 years old was worth more than \$7000. But that doesn't mean that we won't hate to pay three cents for a new one!

From the prominent men quoted, it would seem that the G. O. P. prohibition platform pleased everybody but the drys and the wets.

At last Mr. Roosevelt's forgotten man has been positively identified. It's Charlie Curtis!

Another thing that both parties may be expected

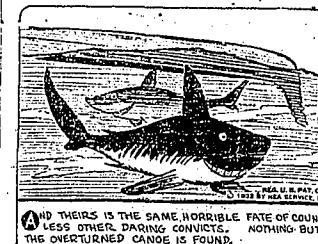

WASH TUBBS

APPARENTLY, ALL WENT WELL WITH THE LIFERS UNTIL THEY REACHED THE MOUTH OF THE RIVER, A PLACE NOTORIOUS FOR ITS TREACHEROUS CURRENTS.

UNTIL WASH LEARNS THE FATE OF THE TWO LIFERS, WHO DIED FOR HIMSELF AND HIS BROTHER CANOE, HE CONSIDERS HIMSELF THE UNLUCKIEST PERSON ALIVE.

SUMMER SUNDAY NIGHT FROCK

PATTERN No. 737

You'll wear this frock for summer nights, too. Styling nightie and not for any "play" at all when you want to look your best!

It's soft above the waist, and below the waist it's trim and distinctive—santa-claus-in-a-candy-store!

Look at that cool neckline—look at the new cap sleeves—look at them. And do look at that below-the-waist swing of that pattern!

Make it in the flinck fabric and the most flattering shades—blue crepe if you're a blonde; Jade green chiffon if you're brown-haired; and coral-colored

drop it, if you're a blonde; sizes 14, 16, 18, 20, 22 and 24. Size 36 requires 4½ yards of 36-inch material or 4½ yards of 39-inch material.

Send us your measurements for cutting and sewing and include with each pattern. They give complete directions for making those dresses.

Now all you have to do is obtain a pattern of this attractive model to send in to Col. 10—the Idaho Evening Times.

Kindly be sure to write very plainly on each pattern ordered your name and address and size. The fashion designer checks out the latest Paris designs, together with color supplement, can now be had at tea cents when ordered with a pattern and fifteen cents extra.

For 75¢, you get dependable Five Cent Cigarettes, 25 cent boxes and cellophane wrapped 2 for 10¢. Nails trimmed and your feet massaged free. Arch support 5¢. Location: Market Street opposite Elec-

Two Murtaughans Are Bridegrooms

MURTAUGH (Special) — Leo C. Pickett, son of Bryan Pickett, and Miss Jessie D. Nelson, daughter of Henry Nelson, were married Friday morning in the home of Mrs. Helen Hobson, home of Leo's mother, Mrs. Jessie Pickett. After a wedding trip they will make their home at the Pickett farm, where he is associated with his father.

The announcement of the marriage of Ray Decker, son of Mr. and Mrs. George Decker, Murphyland, and Mrs. Mahala (Murphy) Decker, Murphyland, June 14, has been announced. Bishop Grandall, Murphyland, officiated. They will make their home at the Decker farm.

MURKINNESS CHARGE LANDS MAN IN JAIL

(BURLIN, Special)—Peter Markevitch, 31, died \$100 in police court here Monday for drunkenness. His fine has not been paid and Markevitch jail where he will serve ten days should the fine not be paid.

The facts in this situation are as follows:

Fritz, along in 1928, the Village of Shoshone requested legal improvement of the railroad and ne-

Contributions from readers will be limited to 50 words. Letters should deal with matters of general interest. Material should be submitted to the editor. Letters should be signed, but initials will be accepted. Contributions will be considered unless signed, but initials will be accepted. All contributions should be addressed to Editor, Idaho Evening Times, and submitted through the mail.

Editor, Idaho Evening Times, Sir:

I have before me an editorial from your paper dated June 13, concerning the proposed bridge at the mouth of the Snake River.

This editorial deals with the question of re-opening Greenwood street in the Village of Shoshone, and the party here to have determined that the railroad should be allowed to do so.

The facts in this situation are as follows:

Fritz, along in 1928, the Village of Shoshone requested legal improvement of the railroad and ne-

gotiations extending over several months resulted in an agreement that the railroad would open Greenwood street to all forms of public traffic in consideration of the building of the dam.

Second: To carry out this agreement, the depot was built and the tracks and facilities rearranged at a cost of \$145,000. Third: The agreement between the railroad and the town called for the railroad to lend to the Village a strip of land twenty feet wide along the southwesterly end of the dam, the location of the dam being given and in now in effect.

Fourth: Subsequently, this same agreement was ratified and the performance of the agreement on the part of the railroad at an expenditure of \$145,000.

Fifth: The railroad and the party here to have agreed to let the railroad have the strip of land twenty feet wide along the southwesterly end of the dam, the location of the dam being given and in now in effect.

Sixth: The railroad and the party here to have agreed to let the railroad have the strip of land twenty feet wide along the southwesterly end of the dam, the location of the dam being given and in now in effect.

Seventh: The parties here to have agreed to let the railroad have the strip of land twenty feet wide along the southwesterly end of the dam, the location of the dam being given and in now in effect.

Eighth: The parties here to have agreed to let the railroad have the strip of land twenty feet wide along the southwesterly end of the dam, the location of the dam being given and in now in effect.

Ninth: The parties here to have agreed to let the railroad have the strip of land twenty feet wide along the southwesterly end of the dam, the location of the dam being given and in now in effect.

Tenth: The parties here to have agreed to let the railroad have the strip of land twenty feet wide along the southwesterly end of the dam, the location of the dam being given and in now in effect.

Eleventh: The parties here to have agreed to let the railroad have the strip of land twenty feet wide along the southwesterly end of the dam, the location of the dam being given and in now in effect.

Twelfth: The parties here to have agreed to let the railroad have the strip of land twenty feet wide along the southwesterly end of the dam, the location of the dam being given and in now in effect.

Thirteenth: The parties here to have agreed to let the railroad have the strip of land twenty feet wide along the southwesterly end of the dam, the location of the dam being given and in now in effect.

Fourteenth: The parties here to have agreed to let the railroad have the strip of land twenty feet wide along the southwesterly end of the dam, the location of the dam being given and in now in effect.

Fifteenth: The parties here to have agreed to let the railroad have the strip of land twenty feet wide along the southwesterly end of the dam, the location of the dam being given and in now in effect.

Sixteenth: The parties here to have agreed to let the railroad have the strip of land twenty feet wide along the southwesterly end of the dam, the location of the dam being given and in now in effect.

Seventeenth: The parties here to have agreed to let the railroad have the strip of land twenty feet wide along the southwesterly end of the dam, the location of the dam being given and in now in effect.

Eighteenth: The parties here to have agreed to let the railroad have the strip of land twenty feet wide along the southwesterly end of the dam, the location of the dam being given and in now in effect.

Nineteenth: The parties here to have agreed to let the railroad have the strip of land twenty feet wide along the southwesterly end of the dam, the location of the dam being given and in now in effect.

Twenty: The parties here to have agreed to let the railroad have the strip of land twenty feet wide along the southwesterly end of the dam, the location of the dam being given and in now in effect.

Twenty-one: The parties here to have agreed to let the railroad have the strip of land twenty feet wide along the southwesterly end of the dam, the location of the dam being given and in now in effect.

Twenty-two: The parties here to have agreed to let the railroad have the strip of land twenty feet wide along the southwesterly end of the dam, the location of the dam being given and in now in effect.

Twenty-three: The parties here to have agreed to let the railroad have the strip of land twenty feet wide along the southwesterly end of the dam, the location of the dam being given and in now in effect.

Twenty-four: The parties here to have agreed to let the railroad have the strip of land twenty feet wide along the southwesterly end of the dam, the location of the dam being given and in now in effect.

Society and Club News

SOPHOMORES TELL OF TRAVELS

One troupe of sophomores from the University presented their program at the Scribner's club meeting Wednesday afternoon at the home of Mrs. W. H. Stanley. Mrs. Stanley told of her recent trip to Colorado and Miss Kathryn Bryson enumerated interesting events of her trip to the West Coast during the week following graduation of school for the summer. Miss Harry Smeek read a short story of her composition, entitled "Little Witch," one of her short stories which has been published recently. Refreshments were served under the auspices of the club. Each member gave a review of a book she had read recently.

ARTESIAN OUTING PLANNED BY CLUB

Mrs. John Roodman entertained the Women's Progressive Club members at her home. Mrs. Mabel Bush reported the last Rural Federation meeting. A picnic at Artesian for families of club members was held Saturday, June 11, at Mrs. C. A. Heilrich's. Mrs. W. V. Parler and Mr. and Mrs. Parler. The club met next Monday evening.

BIRTHDAY PARTY

Oliver May McGrath, daughter of Mr. and Mrs. P. J. McGrath, celebrated her 10th birthday on Wednesday afternoon. Miss Alice Hutchison and Pauline Stude won the contest prizes. Favors were given.

Mrs. McGrath was assisted in serving and entertaining the children.

Guests were Katherine and Betty Gosselin, Mrs. and Miss Ruthie Buchanan, Mrs. Magaret Betzler,

Mrs. and Mrs. Sherman, Mrs. Wilkins and Mrs. Sorenson were guests.

The party was held at the home of George N. Taylor July 12.

BLUE LAKES CLUB PLANS PICNIC

Mrs. W. H. McDonald was hostess to the Blue Lakes. Hostess meeting was held Saturday afternoon. Mrs. S. R. Reiter presided over the business session. Later the meeting was turned over to the new officers. Mr. J. J. Lockle, the chair, Mrs. Reiter presided over a short talk on parliamentary law.

Refreshments were served by the Blue Lakes Club. The meeting will be a picnic dinner at the home of Mrs. Carl Stevens, July 29.

HUEY LONG RESTS DURING INTERVIEW IN CHICAGO HOTEL

(Continued from Page One)

Again he rapped.

"We've got to do away with the billionaires," he said. "There are too damn many of them. Every land is getting around to kicking them out, but they're almost too damn many."

More sleep.

"Last year 500 men had incomes far surpassing that combined incomes of the workers and cotton farmers. That's terrible."

This time the sterner went to sleep and remained asleep.

JOHN FOUND HIKELESS PROVIDENCE, ILL. (UPI)—The State Supreme Court has ruled

that the man who was blamed for causing the death of his wife, Mrs. Sherman, contracted pneumonia when his automobile stuck in the mud in Illinois. The court ruled that Dr. Sherman sought to have the town pay his doctor's bills.

It is estimated that there is enough coal in the United States to last 200 years and enough oil to last a century. There is probably enough oil to supply all the world's oil needs for at least 200 years.

CATHOLIC PILGRIMS GATHER IN IRELAND

(Continued from Page One)

At the annual pilgrimage to Knock, Ireland, the pilgrims gathered

in the early morning hours to

attend Mass and to receive the

communion of the Holy Eucharist.

When night fell over the Emerald Isle, the pilgrims were illuminated to burn until dawn, and the sky was enlaidened with

prayers cast by powerful electrical projectors, or electric lights, which became the most spectacular in modern history.

Before the sun rose, the pilgrims

were gathered in the Holy Land.

When night fell over the Emerald Isle, the pilgrims were illuminated to burn until dawn, and the sky was enlaidened with

prayers cast by powerful electrical projectors, or electric lights, which became the most spectacular in modern history.

Before the sun rose, the pilgrims

were gathered in the Holy Land.
