LOCAL CHURCHES MAKE PLANS FOR VARIED PROGRAMS

Special Music, Including Organ,
Will Be Presented
Here Sunday

METHODISTS PREPARE
ATTRACTIVE PAGEANT

Impressive Midnight Services
Are Arranged by Episco-
opal Choir

Christianity, which comes on Sun-
day this year, will be observed in
a peaceful, inside-and-outdoor, in-
dividual and group way. In the
weeks church doors and windows
have been re-opening, the Christian-
ity program has been in full swing.
It will be continued through the year,
the special Christmas eve service at
Ascension, Episcopalian church.
That service will be held from 10 p.m.
from 10:30 to 10:45 in the vestry,
and the services program will be
continued at 10:15 through

"St. Edward's" Catholic church
will not observe midnight mass
this year. The services will be cele-
brated on Dec. 24, 25 and 10
o'clock Sunday, morning by Minister
Rev. R. K. Keyes, pastor.
The services will be conducted
in the usual quiet, simple manner.

Beautiful Pageant
Episcopalian Methodist
church, church, a beautiful
pageant, "The Birthday of a King,"
is planned for the first, second and
third Sundays in December, presented
from 10:30 to 11 o'clock, and will
include organ, orchestra and
vocal numbers. The pageant was
written by Rev. W. H. Morris,
Berkeley, a member of Dr. Long-
fellow's church when pastor, there-
fore, the pageant will be a
memorial to him.

The services will continue

throughout the month.

Advent services will be

continued throughout the month.

Christmas services will be

continued throughout the month.

Technocracy Promises Jobs and Leisure in Nation Run by Science

SAYS ENERGY IS INDEX OF WEALTH

Critics Call Idea 'Unsound But It's Causing Wide-spread Comment'

By PAUL HARRISON
USA Service Writer

NEW YORK.—A job for everyone, more hours of leisure, more time for family, fishing or an income built by this system—A sixteen-hour working week—four hours a day for full play—the best of the time for leisure...

A standard of living ten times higher than at present—more energy, more leisure, more time in an income built by this system—The impossibility of debt, and the impossibility of assuming new debts...

More goods and higher quality—more leisure, the elimination of waste of our natural resources... These are just a few of the results of the economic philosophy, called Technocracy.

Condensed and Prized

By now, it is known of with distrust and fear; by others, with understanding fully what Technocracy really is. Whether Mr. Howard Scott, editor of *Technocracy*, likes it or not, the fact remains that he doesn't—Technocracy is underlying all sorts of interests. While some, like the oil and coal companies, others consider it conservative, others see in it an attempt at theification of man, others at the destruction of others through its influence, Utopia.

Here are some other things that the technocrats, the greatest light head and unemployment in its history, in the most of an economy of man, have to say about the world as we know it—an era... That our industrial system has been subjugated by the banks, that the banks have been reduced to a wholly incompetent incapable, with nice little advances which seem bound to make over everything...

House of Paper System

They also forecast the doom of the economic "paper system," which is the "evaluation of one commodity in terms of another." Technocracy, and elsewhere, that it is basically responsible for our present economic depression, the financial collapse, and industrial stagnation. They contend we must throw overboard all previous standards of living, and measure our progress by the amount of work done, measuring the growth of our total output.

Technocracy, on the other hand, does not admit pessimism; it says that if the nation will but trust in the power of science and machine, we are on the eve of a great era of well-being.

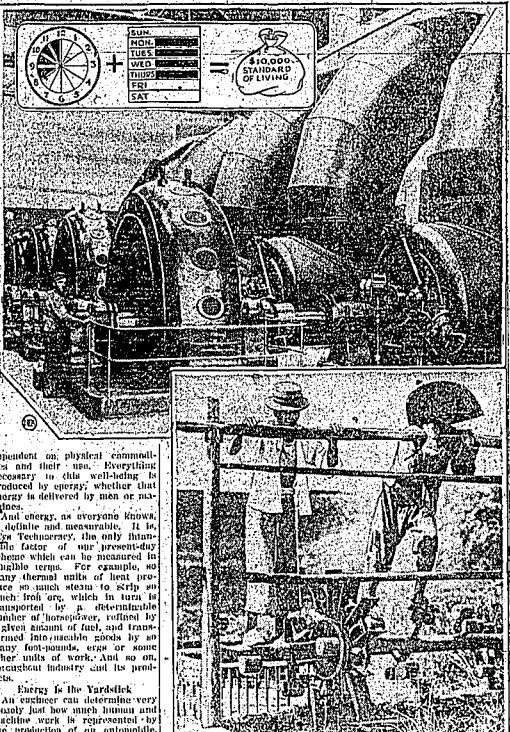

Now, the oil and coal magnates of these reputable engineers and scientists—aristocrats! Ten years ago, studying their oil fields, they could not imagine sequences they claim to have found evidence that America would be in a depression as late as 1930 (an error of almost a month). They said nothing of it then and professed reluctance to talk about it. Now, they are here for a probing press and a curious public, the very existence of Technocracy, and the secret until then kept, could have been completed and presented to the public.

A Fast-Fluig Group—but Technocracy, which has become a subject of discussion throughout a worried world, Technocrats are not the only ones who are talking openly. Bureaucrats of their aims, and now are shedding under the attacks of the oil and coal magnates, are also discussing their aims and the nature of their opposition. Howard Scott, who writes every week in his magazine, *Technocracy*, also has had lots of work to do—but before he locks himself in the office, he is using at considerable expense to state the case of his group...

Technocracy is a fast-fluig organization concerned with the discovery of what is happening in industry, and the way in which it can be remedied. It seeks to form a complete picture of our present social mechanism in terms of the physical sciences, and that was twelve years ago that he believed the whole function of society could be reduced to cold figures, capable of only one interpretation. All divergent conclusions are to be rejected, and the future, are the result of lack of coordination, or of misinterpretation of data...

So the Technocrats, heading to survey some 3,000 leading industrial firms from coast to coast, hope to map out the present situation, considering them unstable and making recommendations to the government against a machine operator and man-hours expended per unit of production, in rates of pay, and so on. They will also, through their publications, tell the story of power concentration, the increasing concentration of wealth, the resulting employment, etc., etc.

Technocracy assumes that our physical and material needs are the same as those of the past, and that they will fit into their anthropological chart, the story of power concentration, the increasing concentration of wealth, the resulting employment, etc., etc.

Here is a pictorial expression of what Technocracy is all about. The lower picture shows a primitive Chinese paper plant employing the labor of two couples who together generate about one horsepower. At top is a modern American paper plant employing 1,000 horsepower. The power generates would exceed the combined energy of 10,000,000 heads... Is not upper left a graphic statement of Technocracy's work plus a person's worth?

Student Arrives From Pocatello

HOLLISTER (Special) — A young arrival from Pocatello, Idaho, has come to the Hollister Masons to install new officers.

ROBERT ARTHUR, 21, a student at the University of Idaho for the Christmas holidays.

Mr. and Mrs. Charles Hart and family were Sunday dinner guests of Mr. and Mrs. C. C. Clegg.

Mr. and Mrs. H. C. Owen invited to the Sunday ranch in the Owen canyon.

Mr. and Mrs. Francis Hart were Sunday dinner guests of Mr. and Mrs. Charles J. Hart, Jr., who were also entertained.

Mr. and Mrs. Frank H. Hart, of Pocatello, were Sunday dinner guests of Mr. and Mrs. Ralph Shinner Tuesday.

Elsie, Gay, Martha, and William Hart were present at the dinner.

Mr. and Mrs. C. C. Clegg, of Elmore, Sunday evening.

Mr. and Mrs. Leonard Abel, who recently moved to the city, were Sunday dinner guests of Mr. and Mrs. Hart, last night.

There were thirty members and guests at the dinner.

Mr. and Mrs. C. C. Clegg, of Elmore, Sunday evening.

Fewer Animals Now in Grand Mesa National Park of Colorado, Claimed

GRAND JUNCTION, Colo. (UPI)—A sharp decrease in the number of elk living in the Grand Mesa National Forest is the most recent annual census of the forest.

Deer hold their own while the bear population increased by about 10 percent.

The 1931 census placed the number of elk at 1,000 while the 1932 count was 800. The number of deer in the forest was shared at 2,100 as compared to 2,000 in 1931. The number of bears increased to 100 from 90 in 1931.

Poor winter feeding conditions coupled with the dry summer and fall of 1932 probably were given as the cause for the decrease in elk by forest supervisor W. E. Johnson.

Post-Tribune reported recommendations of an indefinite closed season on elk hunting in Mesa and Delta counties.

Other recommendations suggested that the lax limit on ducks be reduced to 10 a day and that the trapping of deer be closed for one year to allow the number of ducks to increase.

Post also suggested the rescheduling of the June 15 to September 15 open season for fisherman in Lake Granby to coincide with the peak of the fish during the summer season.

Elk herds shrank to 150 animals located in the forest during 1932 as compared to 1931 in 1932. These were killed each year in 1932 and 1931. The number of bears increased to 100 from 90 in 1931.

Deer increased from none in 1931 to two in 1932. Game wardens set their total from 475 to 525 this year. Most of the timberland in the forest is owned by the forest service.

Deer increased from none in 1931 to two in 1932. Game wardens set their total from 475 to 525 this year. Most of the timberland in the forest is owned by the forest service.

Society and Club News

**Elaborate Plans
Made For Elks'**

New Year Dance

Climbing a week of post-Christmas social events, including a number of large dancing parties, will be the annual Elk's New Year's Eve dance at the Elk's Hall Saturday evening, Dec. 31. The plans are more elaborate than in several years.

The dance hours will be from 11:30 P.M. to 2:30 A.M., and the party will be formal. A university orchestra, consisting of members of the University of Idaho will play the dance music.

A buffet breakfast will be served following the dance, and refreshments for the occasion will be especially attractive.

The women's committee has the details in charge.

Homemaker's Exchange

Your favorite recipes or house-keeping ideas will be welcome in this column. Address: Idaho Evening Times, Homemaker Exchange.

Christmas Drop Cookies

1 cup flour
1 cup sugar
1 cup flour
1/2 cup baking powder
4 teaspoons butter
1 tablespoon orange juice
1/2 cup sliced candied pineapple
1/2 cup blanched almonds shredded
Blend shortening and sugar, add beaten egg, mix and sift flour, baking powder and salt. Add to creamed butter and beat well. Add orange juice, fruit and all the nuts and bake in moderately hot oven (375 degrees) for 12 to 14 minutes.

Marian Martin Pattern

LOVELY FOLK MARCHES
PATTERN 1932.

By MARIAN MARTIN.

We recommend this model to the matron as its lines have been especially planned to give her height and to slenderize her figure. The unbelted waistline, the softly draped "cowl," the slim skirt panel, and gracefully flared hemline make this pattern most attractive. Large busts a touch; "crope or satin" or "chaining" model.

Size 14, \$4.50. Pattern ordered only in sizes 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, requires 3% extra for each size above 14.

10 inch lace-illustrated step-by-step machine instructions included with this pattern.

LOVELY FOLK DRESS, COTTON, \$1.50.

For further information concerning this model, send FIFTEEN CENTS (inc.) in coins or stamp, color preferred.

CATALOGUE—16th year contains beautiful models for Juniors and Misses, as well as the best of the latest fashions in coats, jackets, gowns, sports and house frocks, lingerie, and "ruffles." Expensive

ITEMS—Price of CATALOGUE, FIFTEEN CENTS.

CATALOGUE AND PATTERN TO MAIL.

Address all orders to: Ercanah Prints' Editors' Department, Twin Falls, Idaho.

Christmas Customs from FOREIGN LANDS

ROOSEVELT HURLS SHARP CRITICISM

President-elect says he is willing to confer on debts at any time.

(Continued from Page One)
firm and definite offer of reorganization will be accepted.

Strong Reproach

Now comes a sharp and forceful attack from the president-elect for an unending president to have been recorded in recent political history.

The 1933 may be any one of several causes.

Negotiations may be reopened, the president-elect instead of the outgoing president, taking the initiative.

The entire matter may be dropped until next March.

The period from March 1 may be marked by bitter arguments between the two administrations over foreign policy.

**Wild Life Safe As
Hunters Lack Cash**

BONN, Idaho (UPI)—Wild life had the upper hand in central Idaho, as the fish of sleepiness again threatened to take over because of lack of funds.

Winter poisoning of coyotes in this district will possibly replace trapping as the chief method of control. The number of coyotes has been reduced greatly, and the number of wild animals increased with the result that game traps are less effective.

**PRIDE OF YOUTH BECOME
PREDATORS ON BIRDS**

PETALUMA, Calif. (UPI)—Poachers for hot gall nests and bird's nests eggs and have become predators on the abandoned nesting birds.

The cause was a winter which was unusually severe, which made the birds stay close to the ground, exhausted with a blinding flash of light.

YAWN HEARTHY

Yawning is a distinct benefit to a human being. It tends to restore the equilibrium of the air pressure between the inner ear and the outside atmosphere.

After a prolonged vacation, a person can feel a great desire to yawn.

Mr. and Mrs. George Parker, editor, "The Journal," Everett, Wash., and Mrs. Lew Kibbrough, Mr. and Mrs. Charles Parker, Mrs. Mary Lou, Ed Adair, will attend.

Fairview will have a week vacation at Christmas.

Miss Caroline Gibb and husband are returning to the United States for the Christmas holidays. They have been attending the university at Cornell University.

**College Graduate
Dies at Age of 94**

MONTGOMERY, N.Y. (UPI)—Mrs. Mattie Hughes Gano, the oldest woman college graduate in the United States, died here recently at the age of 94.

Dean Lipman announced today the discovery of yesterday of Mrs. Gano, a relative of Justice Charles Evans Hughes, was the second student to enroll at Cornell University when the doors were opened in 1855.

**WELL EXCITATIONS FIND
SPLENDID INDIAN HELM**

ALBANY, Calif. (UPI)—Diggers in California have unearthed a splendid Indian helmet.

The workman, assisting C. G. Bennett at the diggings, had reached

the bottom of a deep hole when he

discovered the object.

The helmet was found by

the workman, who was working in a laboratory, which not only have the power of decomposing all but

substances directly into the nitrogen which is essential to all forms of life.

In the course of attempts to cut

the helmet for some time,

Lipman pointed out, "that it is

so solid that it is impossible to

penetrate it with a knife."

It was a double eze—a comple-

xek shell and all, inside an outer

shell and the outer shell also con-

tained its own shell and valve,

he said.
