Washington Defeats New York; Pittsburgh Takes Double Header

Yankees and Pirates Lead Respective Leagues; Tommy Bridges of Detroit Blanks Browns; Red Sox Win

NEW YORK, April 21 (UPI)—The baseball world is impressed by the "booming of big guns" and the menace of "murderers row" as the New York Yankees have smashed out seven victories in eight starts, and the Pittsburgh Pirates have the same trick in the National league without fans or foulies.

Gengro Gibson's Cowboys have made the same number of runs as the world champions, 37, and have outift them 32 to 64. Meanwhile, the average home run per game allowed, 5.9, while the state fitters yielded 57. The Pirates are two and one-half games ahead of their nearest rivals, the Giants, while the Yankees are only one contest in front of the White Sox.

Two more teams picked these two teams to emerge in the 1933 world series, and while their achievements in eight contests are not quite as remarkable as they seem to be moving toward a classic. Should they meet, it will be a great game. And the Pirates will give the Yankees a mighty good fight.

Yanks Go Down

Washington annexed the Yankee domain last night, returning straight yesterday after a tussle with their first defeat of the season 6 to 3. Joe Cronin's outfit, which is rapidly getting into shape, scored 12 runs in the ninth to Earl Whitehill's triple in the eighth, and the Yanks, while Lefty Gomez and Waite Hoying pitched nine, were beaten.

Tony Lazzeri hit his 12th home run, but while Detroit blanked them twice, 2 to 0, though George Blaeholder and Jimmie Hostess each had two safeties, the Boston Red Sox rose from last to sixth place in the American championship. The record of a .702 batting mark by Philadelphia Athletics, made possible by Bernie Fingers' single, in the eighth, was bested, however, as A's dropped into a last place the with the St. Louis Browns.

Lyons In Turn

Another unusual performance was turned in by Ted Lyons, who limited Cleveland to two singles in a 7 to 1 victory. Lyons, who had 6 to 5 defeated the Cards into a triple tie for fifth place with the Cubs and Phillips-Boston, went on to drop to 6th by beating Brooklyn 3 to 1, dropping the Dodgers to fifth. Big Bill Terry's New York Giants moved into second place by downing the Cardinals 7 to 5.

Fredie Fitzsimmons put the game on ice with a home run in the fourth, and the largest winning club humbled the runner-up Chicago Cubs, 4 to 2, when Harry Rice's triple in the ninth, drove in two and won the game.

Hill Wins for Terry

Hill, Terry's New York Giants moved into second place by downing the Cardinals 7 to 5. Fredie Fitzsimmons put the game on ice with a home run in the fourth, and the largest winning club humbled the runner-up Chicago Cubs, 4 to 2, when Harry Rice's triple in the ninth, drove in two and won the game.

Some specimens of the Jack fruit have been observed. While weighing an 80 pounds and 40 feet long, it is the largest tropical fruit.

STANFORD TRACK WIN IS SURPRISE

Cardinals' Stuns Their Most Ardent Admirers

PALO ALTO, Calif., April 21 (UPI)—Stanford's Cardinal fleet floated like a condenser for the I. G. A. A. A. championship, but they showed their class in the battle over the University of Southern California last night Saturday.

The Trojans, ill-equipped to cope with Southern California's power on the clavier paths, Stanford adored him as its most zealous admirer.

Stringham, the Trojans to those bent them out by a 67 to 64 margin.

Stanford's spiffy legs set a record in the 200-yard dash, and all-arounder Hart in the Cardinal victory. They flashed across the finish line first in advance of Trojan spectators who had favored to win at least one race.

George E. Judd, who had been favored to win at least one race,

It was the Cardinals and Trojans' jump that Stanford proved most surprising, winning all three, though with a narrow margin.

The Trojans' long distance runners did well.

THE PENDING INFLATION LEGISLATION

The text of the Administration's important controlled currency inflation program—including a provision for the issue of \$3,000,000,000 of Treasury bills or other obligations of the United States, is brief but highly significant as will be seen by the following few provisions which are in the form of an amendment to the farm relief bill:

The program provides also that the President may reduce the weight of the gold dollar by a maximum of 50 per cent.

The third major provision would authorize the president for one year to accept silver up to an aggregate maximum of the value of \$100,000,000 in payment of war debts. There is a proviso that the silver may not be accepted at a value greater than 50 cents an ounce.

The administration bill is so worded that if the Federal Reserve banks refuse to cooperate in the issuance of a maximum of \$3,000,000,000 of new currency, or if such an operation would be inadequate to meet an emergency, the President may order the issue of \$3,000,000,000 United States notes.

It is provided, however, that notes so issued "shall be issued only for the purpose of meeting maturing federal obligations to repay sums borrowed by the United States and for purchasing United States bonds and other interest bearing obligations of the United States."

The amendment stipulates that all bonds so purchased shall be retired and cancelled.

How much of this program will be adopted by Congress remains to be seen. The week should see important developments in this regard.

Those of us who thought the news emanating out of Washington during March was precedent-breaking, have come to realize that April has equalled or exceeded the former in importance.

Each day's issue of this newspaper may be expected to herald the latest developments in this history-making drama, and this week should prove outstanding in importance.

Every indication now points to the fact that recovery is on the way; that the slow climb back to normalcy has commenced; that farm prices are being restored.

Certainly this is cheerful and important news, every detail of which will wish to be kept reliably informed upon as epoch-making events take place in Washington.

SECRETARY WALTERS

All Idaho should take reflected pride in the naming of T. A. Walters, Caldwell, Democratic state chairman, to the high position of first assistant Secretary of the Interior.

It is acoveted position—and one for which Mr. Walters should be highly complimented. Veteran lawyer that he is, former state attorney-general, state chairman of his party for the past four years, and member of the state board of education, he is possessed of ability, personality, character and a reputation for accomplishment which should well fit in with the new administration at Washington.

Idaho not only congratulates General Walters on this deserved appointment, but also the Roosevelt administration for thus recognizing the Gem state in this important branch of the national government.

General Walters' many friends and admirers will follow his career with increasing interest in the knowledge that he measures up to his responsibilities and he will continue to bring distinction to Idaho.

BUILDING UP BUYING POWER

James D. Tew, president of the B. E. Goodrich Rubber company, has issued a statement declaring that as an industrialist he is heartily supporting President Roosevelt's farm bill; and the interesting thing about this is that Mr. Tew's rubber company uses vast quantities of cotton, and will find its manufacturing expenses greatly increased if the bill boosts in price of cotton as the administration expects it to do. "We feel very strongly," says Mr. Tew, "that in the interest of the farmers and the welfare of the country as a whole, it is our duty to forget selfish interests and back up wholeheartedly the efforts of our president in restoring stability to the economic life of the nation."

For this project cuts both ways. It might boost the price of raw materials, but if it did it would also add greatly to the farmer's purchasing power; and Mr. Tew and his brother industrialists might discover that if their operating expenses rose their sales would rise even more rapidly.

VOTE TOMORROW

Twin Falls citizens are faced with the responsibility tomorrow of choosing a mayor and two councilmen. It is important that every qualified elector exercise his right of franchise at the polls. All the candidates have now had sufficient opportunity to present the issues. Last-minute canards can be disregarded by the voters and the choices can be made definitely from the standpoint of capability in the hope that the best men will be elected for the respective offices.

IDAHO EVENING TIMES, TWIN FALLS, IDAHO

by LAURA LOU BROOKMAN

a red, service novel

Listen, will you meet me this evening? I can't do that!" Janet interrupted quickly.

"But man went on as though he had not heard her. "Will you meet me at nine o'clock?" he asked.

"When she leaves half has where she has been. That's all that matters," Janet said.

Jeanette leaves the manager's office to file a complaint to his sister, Mrs. Billie. Mrs. Billie asks Janet to look after her.

"Now, just wait a minute," said Janet. "We're not back to the old days." Then she added, "I know what you mean. I'm not going to tell you who I am, but I'll tell you why I can't tell you about me." Janet turned to Jeanette.

Well, I'll be seated and settled in the right way, Roil said.

"It would know that I would do my best to help you," he said.

"Anywhere I just want to talk to you, that's all. Heard you were back and we're being good to you," Janet said.

"It's a long time since we last talked, I'm afraid," Roil said.

And then something happened when she stepped out of the house. A few moments later and she was gone. Her husband came running down the stairs.

"You know that's not so, Roil," Janet said. "It's Lucy's sight of me. I'm afraid I'm going to have to leave town."

A moment later she was back again to say that Mrs. Thornton was going to talk to her. "I don't think she has any time," Janet said.

"Lucy—she's a friend of mine," Janet said. "She's been in a class of chin-scratching, curly-haired people for a long time now. But I'll have to leave town."

"I'll stay in the room," said Roil. "I'll go up to the roof and see the stars."

The hands of the old man tightened on the railing of the balcony. "I'll go up to the roof and see the stars," he said.

"I'll only stay a moment," Roil said. "I'll come back after dark." She was gone.

"I'll be there," said Roil. "I'll be there after dark." She was gone.

Roil lay down on his bed. "It's hard to sleep here, but I'll get used to it," he said.

"He'll be back here again," said Mrs. Thornton. "I'll be back here again," said Mrs. Thornton.

"Lucy's eyes are blue," said Roil. "Lucy's hair is blonde, but her eyes are blue."

JAP PAPERS LOOK FOR PARLEY FLOP

Journals Skeptical Over Com-
ing Conference With Pres-
ident Roosevelt

TOKIO, April 24 (UPI)—The Japanese government pressed today for a conference between Japan and the United States to continue their economic conversations with President Roosevelt because of the United States' action in the gold standard by abandoning the gold standard.

The newsmen regarded the government as even more interested in maintaining the United States in a dominant financial position than in Japan's economic welfare.

Opinion, however, was ex-
pressed by the ministry of com-
merce and industry that a dollar would increase the Amer-
ican consumption of Japanese silk.

NEA Service Writer HOLLYWOOD (UPI)—Lady Luck has had its favorites among those who have sought success in the 72-word messages to Congress asking legalization of beer, now in effect.

A fortunate event has given many an actor an opportunity to go into show business. One reason he wasn't all that, because once the chance came, real ability was necessary to sell his potentialities.

Later, probably never, would have taken sufficient notice of it to sell her possibilities. It is a series of circumstances which started Al Jolson on his way to stardom when he first helped establish talkies, pictures, was a star on the legitimate stage, but had no motion picture work.

Warners were planning to make "The Jazz Singer," with Jolson in the leading role. Studio executive Jessie Jessee refused to let him appear on the stage here at that time.

The film was ready to go into production when he had to be secured for the lead. As a last resort, an offer was made to Jolson. He accepted and signed a one-year contract.

SACRAMENTO, Calif. (UPI)—The hills of northern California are drawing hundreds of prospectors to the hills and mountains of California.

And the result is that 1932 was an average year of \$2,000,000 in production of gold in California, with predictions by the State Division of Mines that this increase will continue.

The department reported an indication of continued increased in 1933, and two miners personally visited Los Angeles and San Francisco during last year.

Local miners and gamblers can purchase pleasure mining, were stimulated 1,300 copies of "commercial mineral notes" were mailed to miners in the state, and the notes were tested in the laboratory and 1,200 mineral prospectors were instructed in the art.

Such discussion as that of James J. Elliott, Portola plumber, above, the famous hopes of amateur prospectors for the hills of California, because "the world was never out west, not west, not west, not west," and he spaded out 20 acres and collected 65 ounces of gold with a hand pan.

At the first bank of the mountain prospectors come from the family of California's unemployed. "There are 150,000 people here," says one, "and they're mostly drawn by that same desire—desire of striking a bonanza have gone forth into the mountains to search only at the monetary tools.

MRS. ROOSEVELT SCRAMBLES EGGS

WASHINGTON, April 24 (UPI)—

The wife of the president of the United States, Eleanor Roosevelt, is the most popular lady in the country, especially when she is the subject of great British admiration.

She is the girl who has a garden in the White House, who keeps chickens, who is

the mother of a baby, who

has a son, and so on.

But the girl who is

so much loved by the public is

not a mere girl.

She is a woman who

has been married for twenty years, and a wife

who has reached the age of twenty

without having had a love affair.

"Incredible!" screams the party

that she is a girl who

quietly sneaks away and gets her

father (Colin Clive) who has been

fathomed to his wife (Billie Burke)

and someone else brings in an

aviatrix (Katharine Hepburn) who

violates the sanctity of the

marriage bed.

What is more it does not seem to

violate the sanctity of the self-

advocacy.

Each tray of CHESTERFIELDS

from the cigarette-making machines

passes under the watchful eyes of inspectors,

trained by long practice to see flaws such

as an end of torn paper, or a poorly filled

cigarette.

And there's still another safeguard

...two "electric detectives" on each pack-

aging machine. Electric fingers "feel"

each end of every cigarette, and throw

out every imperfect package.

Open your pack of Chesterfields, and

look at them. It's no accident that every

cigarette is round, firm and full. Some

body's been on the job every minute

to give you what you want...a cigarette

that's made right in every way and that's

milder and tastes better.

Bober, Douglas and Sanderson make a halfway promise. By a policy of hard work, strict economy and careful planning they have kept your city on cash basis. No member of this group has ever been in a position of high importance so long as they are in office.

II—ARE HEALTH AND SAFETY STANDARDS TO BE MAINTAINED?

Bober, Douglas and Sanderson have insisted on keeping occupational standards in the areas of health, food and milk products up to the same rigid inspection standard our ordinance set, as required by Federal regulations. This is a definite contribution to the health, safety and welfare of the citizens of Twin Falls and its environs.

III—DO YOU WANT AMATEUR FIRE AND POLICE PROTECTION?

Bober, Douglas and Sanderson know that dependable fire and police protection require expert and experienced men. They have provided for, and kept up, a faithful and competent fire department, one that works steadily for fire prevention, and one that is always prepared to meet an emergency.

City police are amateurish, slow and inefficient, unreliable and do not do their duty. Your city is one of the safest from serious traffic accidents of any in the United States. That is not the only fact, however, that makes the work of the Twin Falls police force unique. It means that there has been well and faithfully done, all the parts of its duty and its failures have not forced any other city in the state to become less safe.

MAKING THIS MODEL AND FORGET YOUR CURVES PATTERN 5000

"If you are tired and fatigued, then rest, rest. Here is the track to choose. The silhouette is a full, gracious one, achieved through the unbelted waistline, the pointed shoulders, flattering neckline and the flared hips, all in agreement with rippling flare. With such a charming model, a woman need not fear to show off her figure in her belief in selecting the fabrics. Small pelts and monograms are done to taste and the touch of lingerie is important."

Pattern 5000 may be ordered online in sizes 24, 26, 28, 30, 32, 34, 36, 38, 40, 42, 44 and 46.

With fabric and yard contrasting illustrated step-by-step sewing instructions included with pattern.

SEWING CLOTHES IN COLOR OR STAMPS (color preferred) FOR EACH MARTHA MARTIN PATTERN

Inflation Bill Before Senate

Thomas' Blunt Words Shock Bolson As He Explains Currency Measure

(Continued from Page One)
payments from one class in the United States value to the extent of about \$200,000,000,000. It will affect first those with the largest bank deposits and second from those who hold bonds. Their bank rents \$200,000,000,000 of bank deposits. They did not earn it.

"In my opinion," he declared, "that amount of money it would transfer—that \$200,000,000,000 from the hands of those who didn't earn it, all right, to the hands of the debtors class."

"Unless that's so, then Thomas' statement that the debtors class does not have substantial justice done to them."

"That is the senator's purpose," Reed pursued.

"My portions," Thomas replied, "is to raise commodity prices so they can pay their debts."

He declared that even with the finance or wealth tax and failure to collect it, there is still justice to the people of the United States.

Doubts Crash
Thomas said, "I am not satisfied with the bill to 30 billion."

"What has become of that 30 billion that was in the bank less than three months ago?" he inquired.

"That money is gone. It does not exist. It has evaporated. Vanished."

Sen. Borah, Repub., Idaho, asked how much was tied up in closed banks.

"The trouble is all off," Thomas replied.

"The trouble in this country is not because we haven't money but because it does not circulate."

"I need not remind you,"

Thomas told the Senate, "that when the banks of New York, Boston, and Mitchell closed on March 4, last, all banks were closed; 13,000."

"We kept it. Instead, was paraded, smokestacks were smokeless; dinner pails were empty; water tanks were empty;

default; insolvency resolutions were widespread."

Individual corporations, com-

mpanies, and most of the states were accepting "deeds" from the government, which effectively placed all state corporations and municipal sub-divisions in the federal bread-line."

FRENCH ABANDON OCEAN ZEP PLANS

Dirigible Transportation Over Water Found to Be Too Expensive

BY SAMUEL DASHER
Times Staff Correspondent

PARIS (UPI)—French aviation authorities virtually have abandoned various projects for building transatlantic airmail and freight service. This dirigible, according to the Paris government, will not be built.

With France, Britain and Germany engaged in Zeppelin-Zep flights, it is probable that no nation will enter the dirigible field and attempt to install a Zep line between the United States and Australia with a gainer to Australia.

For the present, however, the cross-Atlantic mail and cargo business between the United States and Germany will be conducted by the big propulsive plane.

Experts observe that no transocean service could function with a dirigible because of the difficulties and this only could be effected at a cost of millions of dollars.

French observers say little about Germany's protestation to a South American Zeppelein service. The original trip will be made in the first quarter of 1934. The French have selected a site near Paris.

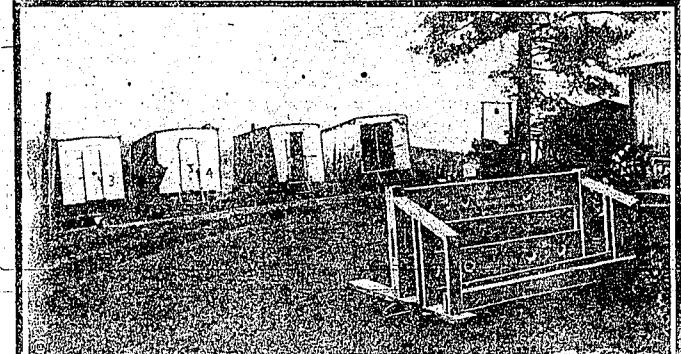

After a brief trial, the British government has suspended regulations providing for a mixture of air mail and airmail automatic telegraph.

Buyer, Mr. Thomas, has been asked to pay 15% more for his services, but the price has not been increased.
