LEGAL BEER
 Twin Falls and every other city and town in Idaho today face the prospect of an immediate beer problem.

The situation is more psychological than anything else, for the simple reason that most persons who wanted beer have been having it right along. Legalization of the brew is not in reality introducing beer to this section. Even before it was legalized in adjoining states, the home-brew fluid at had been in general use. Sale of the amber fluid at retail will simply mean a new method of distribution, and an improved product, albeit a more expensive one.

Also the feeling of law violation will be removed which will make the malt available to a larger number of persons than heretofore, either because they did not make it, or because they had scruples against law violation.

City authorities all over the state must utilize sound judgment in preparing to care for the demand for licenses. And furthermore, ample provision must be made to avoid setting up old-time saloons. The matter of fixing the amount of licenses and tax is a difficult task for the authorities, the entire situation resolving itself into a problem of no mean proportions.

A few months ago no one would have predicted the rapidity with which the sentiment for beer and repeal has spread. Crystallization of public sentiment is the only explanation. A year ago men in this state were defeated in the primary election for their liberal attitude on the question, while today we see Governor Ross being criticized because he did not act sooner on calling the legislature and in fixing the date for the state referendum on repeal.

A state legislature which four months ago refused to deal with beer, is now summoned back and will pass the measure with a whoop.

Surely we are moving fast, and those who do not keep up with the procession are lost on the political wayside, it seems.

But now we are to have beer and we are to vote on the repeal of the Eighteenth amendment. Starting as these statements would have been only a few months ago, they are now commonplace, and the only regret seems to be that the calls were not made sooner.

OVERPRODUCTION? NO, UNDERCONSUMPTION

The commonest way of explaining America's industrial difficulties is to say that the nation is suffering from great overproduction. This, as a technical explanation, is quite correct. But to accept it without looking into the things that lie back of it is to get an entirely lopsided picture of today's most pressing problem.

Technically, of course, we are overproduced. We can make more automobiles, electric refrigerators, steel rails, rocking chairs, electric light bulbs, shoes, auto tires, plows and what-not than we can possibly sell. In that sense, we are up against overproduction in a very real and unpleasant way.

But there is another side to it—another name for this problem: If, instead of calling it overproduction, we call it underconsumption, that other side becomes evident that the traditional method of solving the problem is very much out of date.

We may be making more of all of these things than we can sell—but we are not making more of them than we need, and we shall not be for a long, long time. Not until every citizen has all that he needs of this multitude of goods shall we truly have overproduction.

During the last few years farmers have had to burn corn and wheat while city workers have gone hungry; and the same farmers have had to drive supernumerary cars and wear wretched shoes while the city auto and shoe factories have been idle for want of orders. On every hand we have had millions of people needing all sorts of commodities very badly; but, because they have been unable to buy them, factories have operated at a fourth or a fifth of normal capacity.

The administration's industrial control bill is designed to get around this trouble by gearing production directly to consumption. In the long run, however, this will not do much good if it simply prevents industry from producing more than can be sold. It must increase consumption. It must, that is to say, raise the general purchasing power of the nation—if it is to get us out of our difficulty.

Let the ordinary man get his hands on enough money to buy the things he needs and we shall not have a broad and enduring prosperity. We shall not have to talk about overproduction for many, many years to come.

DARLING FOOL

"I remember," said Monte, thinking of Corah's cynical eyes. "I said, 'Who's the little bug? Paying excess on her this time?' Corah's color was high, he roared angrily. 'How could she?' She shrugged. 'She knew more 'bout regulations. She assumed there was something between us, but I soon got her straight. That's all.' Monte was different because when she said that I wanted to knock her down—"

"I'm not very patient, you see," he reminded her smiling assuredly. "I'm used to putting things through quickly. What do you say, Monte?" He asked with a boy's eagerness. "She gave him a level glance. 'I can't answer you now, she told him. 'I must have time to think.'"

"I'm not very patient, you see," he reminded her smiling assuredly. "I'm used to putting things through quickly. What do you say, Monte?" He asked with a boy's eagerness. "She gave him a level glance. 'I can't answer you now, she told him. 'I must have time to think.'"

"I'm not very patient, you see," he reminded her smiling assuredly. "I'm used to putting things through quickly. What do you say, Monte?" He asked with a boy's eagerness. "She gave him a level glance. 'I can't answer you now, she told him. 'I must have time to think.'"

"I'm not very patient, you see," he reminded her smiling assuredly. "I'm used to putting things through quickly. What do you say, Monte?" He asked with a boy's eagerness. "She gave him a level glance. 'I can't answer you now, she told him. 'I must have time to think.'"

HISTORY OF Twin Falls City & County

As Gleaned from Files of the Times.

15 Years Ago
 Mrs. E. J. Schroeder, president of the amateur circle, entertained the class at an evening of bridge on a charming evening of the circle's year. Mrs. H. W. Clouche won high score for the year. Mrs. E. J. Cox was elected president for the coming year.

Mrs. Hilda Montrose is here from Legent visiting her sisters. Mrs. B. Skinner, Mrs. G. W. Kerr and Mrs. W. J. Cook.

War Note: While the Austrians were driving against the Italians along the Isonzo, the German army launched a powerful assault in a desperate effort to storm the shell-wreathed city of Rheims in France. Two great battles have been raging for the past 24 hours. The new German force may be regarded as a continuation of the Alton-Marne offensive.

27 Years Ago
 J. W. Shields, attorney, has moved his office to the Smith-tray building opposite the Hotel Fort. He is believed to believe in expansion and wanted more room to do business in.

Men began cutting the grass in the city park last Saturday. When they got up the bandstand and start the evening concert, it will be the Mexican of the town people every pleasant evening.

Native strawberries will soon be on the market.

Chief administrator under General Johnson.

BUYING
 The railroad co-ordinator will do well to insist that the roads spend more money for new engines, rails and other equipment. R. F. C. loans will be arranged for them when necessary.

The War Department has been doing its quiet bit to push industry along. Unusually large orders have been placed with chemical, copper, brass and steel companies.

IMPROVEMENT
 A national industrial corporation made a careful estimate of its probable sales and earnings for May at the beginning of the month. When the month was over it found that dollar sales exceeded the estimate by 29 per cent and earnings by 109 per cent.

WHAT TO DO ABOUT MONEY
 The War Department has been doing its quiet bit to push industry along. Unusually large orders have been placed with chemical, copper, brass and steel companies.

THIS CURIOUS WORLD

NATIONAL WHIRLIGIG

The low down on what is going on behind the scenes in Washington and New York—inner workings of politics, for Evening Times Readers every day and everywhere.

BY PAUL MALLON
 WASHINGTON—You will hear that Mr. Roosevelt rushed to the rescue of the Glass bank that has been up to the neck in trouble. That does not appear to be true.

Mr. Roosevelt had a hand in the rescue of the Glass bank. He should go to some other part of the Ozark Arkansas lawyer now Congressman Steagall who killed the bill in question. This time he is not to be credited with the rescue.

The lobbyist of the New York banks had gone home. They wanted and reported the bill was as good as a defeated congressman. Senator Glass admitted it. He said he would do nothing further.

Steagall got busy. In a few hours he obtained 112 signatures to a petition inferring that Steagall would not go home without the Glass bill.

He took that petition privately to eight New York members of the Senate. The administration was having trouble enough adjourning Congress as it was without this threat from a new quarter. Senator Byrnes in the eye of Mr. Steagall to the president than any other politician.

The Steagall threat brought action from the White House. It was arranged that the conference should go back to work. They did.

The lobbyist of one New York bank walked back to Washington by airplane. When he arrived the bill had been agreed on by the conference.

ONE TOUCH OF NATURE MAKES THE WHOLE WORLD KIN

He asked her secretary for an appointment. He was informed that if you want to see Miss Zerkine you must make your appointment a day in advance. A New York helper a group of southern coal operators to find that out. They went to Washington with their feet. They thought they were going to have to raise wages to northern levels and were prepared to tell the world it would run them.

The fight was called off before it started. Their leaders were quietly assured that the directors of the coal operators and southern wage scales would be preserved and that they did not need to accept compulsory unionization.

What they will have to do is raise wages. That point was pressed on them. But their northern competitors will have to do the same thing. The same proportion and so the southerners will be under no handicap.

PUBLIC WORKS
 The office charges of the U. S. army will play a larger part in administering the public works program than you have heard of. R. F. C. and its engineers will have little or nothing to do with it. The idea is to put the program on a plane with Caesar's engineers. Only the army will be in charge of the program.

Some of the engineers in New York now on a private mission connected with public works program. Officials in the army are not even known. He's here. Actually he has already started up the machinery for a flying start as soon as he gets the word. He may turn out to

be chief administrator under General Johnson.

That's a hot one, eh, darling? The boys thought they would see me any more, after we got married.

That's a hot one, eh, darling? The boys thought they would see me any more, after we got married.
