

SUGAR QUOTAS GIVEN APPROVAL

House Passes Jones Measure Fixing 1,850,000-Ton Best Figure

(Continued from Page One)
wall, appearing in the house today on the Jones sugar bill.
There was no fault to find with the principle of this bill insofar as it provides for regulation of the sugar industry and the "Cuba" clause. But it has definite objections to these provisions which would reduce the output of an American industry to benefit a similar industry in a foreign country. This bill would discriminate against Hawaii and would seriously threaten the financial, economic and social stability of an integral part of the United States.

Wants Full Crop
The delegate proposed that the continental United States, Hawaii, Puerto Rico, the Virgin Islands and the Philippines be allowed to grow the normal amount of sugar production.
"The combined output would amount of approximately 5,000,000 short tons of sugar," he said. "The United States consumes roughly 6,000,000 short tons annually. This would leave 1,000,000 short tons to be imported from other sources to meet the national consumption demand."
"It would seem to be logical and fair to allow the American sugar industry to produce the 1,000,000 tons of sugar and to allow to foreign countries, of which Cuba is the principal foreign exporter, the balance."

Cuban Alignment
The Jones bill does not provide a specific sugar quota for the insular area, but President Roosevelt has said that Cuba is a "friendly" power. It has suggested that Cuba might be given a quota of 1,944,000 tons.
The present bill, McCandless charged, "would reduce the amount of sugar produced in the American enterprise in order to increase the importation from Cuba, a foreign country, to the detriment of the insular area." He proposed a quota of 1,500,000 short tons for the continental United States and a quota of 250,000 short tons for Florida and Louisiana cane, while quotas for the insular area would be left to the discretion of the secretary of agriculture.

Quota Discrimination
"Hawaii does not deserve to be discriminated against," McCandless said. "It is entitled to just as much consideration and protection of its industries as are the beet and cane producing sections of all districts except Hawaii, with a greater extent than this. It provides that if there is an increase in sugar production in the present quotas are based, the continental sugar quota at least 30 percent of this increase, while if there is a decrease, it is entirely from the insular and foreign sugar area. The continental sugar quota is increased, thus protected from every angle, while Hawaii is classed exactly the same as a foreign country."

Firetrap Charge STIRS NEW YORK

Acting Mayor Attacks Board of Education for Unfit School Buildings

NEW YORK, April 4 (AP).—Acting Mayor Bernard S. Jacobs today charged that at least 65 school buildings are "firetraps," endangering the lives of thousands of children, and harried the board of education, whose members were appointed during the Tammany years.
The board demanded that Deutsch charge on a charge he made several weeks ago that "many New York schools are firetraps" in reply, Deutsch told the board a letter not only listing the "65 firetraps," but severely criticizing board members for not having available their own information. Persons familiar with New York schools estimated that the accused structures housed at least 50,000 pupils.
Many of the schools, Deutsch declared, were antiquated wood-frame buildings, in fact, because of the overcrowded conditions, in case of fire, result in loss of lives.

SEE CHANGES IN REFRIGERATION

Scientists Predict Shifts as Result of Carbon Dioxide Experiments

ST. PETERSBURG, Fla., April 4 (AP).—Experiments of American scientists in the field of refrigeration with solid carbon dioxide are predicted to bring about a revolution in the refrigeration industry.
A magician's ice box, one of the marvels of science, was demonstrated at the annual meeting of the American Chemical society here.

By the simple turn of a dial the temperature of a solid carbon dioxide ice box can be changed from a range of 102 degrees below zero to 102 degrees above zero. For the first time, the inventor, Dr. J. H. Thayer, of the University of California, demonstrated a solid carbon dioxide, commonly known as dry ice. The advantages of dry ice have been known to science for a long time but its advantages could not be utilized until a solid which it could be used by the dry ice and circulates through the ice box. Control of the dry ice strength in circulation determines the temperature.

REPORTS CLEAR HINT INFERRING ROOSEVELT ILL

MIAMI, Fla., April 4 (AP).—President Roosevelt, lamed a deep brown by a blizzing rain, remained today in the vicinity of Yellow Key, Bahamas, in further quest of the elusive baracuda.

Reports from the National Guard dispatched rumors that the President was ill.

Fishing boats, whose size of the quarry was concerned, have been called to the White House, an expert angler, boated three blue herrings.

Temporary White House offices in the Miami-Biltmore hotel here were of the opinion that the President's cruise would be terminated in time to attend to regular duties beginning on Friday of next week.

BRAIN TRUST IS ELECTION ISSUE

"Red" Charges Put Roosevelt Intellectual Bloc Among Top Controversies

(Continued from Page One)
The government, by numerous "brain trust" boys, irrespective of their age—who having drunk deep of Plutonian power, have recently taken some heavy swigs of Russian vodka. We cannot solve our problems with (discredited) European theory and Marx's philosophy.

The country moves farther and further toward the left, for the application of it is the intention of the Roosevelt administration to collectivism, makes it harder and harder to retreat to Americanism, and practically impossible to turn around, something very close to the Russian system."

Brain trust boys are professed in congress, notably "Mr. American" Charles McNary, of Oregon, G. Tugwell, assistant secretary of agriculture, is a co-author. "The principal of Dugway's philosophy, Professor Howard C. Hill, University of Chicago is also a brain trust boy."

The experiments commenced in 1933 in the United States are the heaviest in the world, not only economic planning but they afford new opportunities for working out problems.

Democratic ranks are stirring for a counter attack against the brain trust. United auto unions are mistaken a Democratic effort in the making to trace the un-American trust campaign to Wall street and specifically to opposition to the administration's proposed stock exchange control bill.

STOMACH CAMERA LATEST MOVE IN FIGHT ON INTERNAL DISEASE

PHILADELPHIA, Apr. 4 (AP).—A slender, tube-like camera, which makes 16 photographs of the interior of the stomach, marks the latest invention of medical science in its fight against internal diseases.

The camera was used on the Howard Hughes, who is in a hospital when physicians were unable to diagnose an irritating stomach condition.

Harrington was taken to an operating room and the instrument in the long tube was handed to him. He swallowed it.

A button was pushed, a flash-light exploded in the interior of Harrington's stomach and a medical science had made 16 negatives of the stomach walls.

A tiny flashlight bulb, connected to a battery by a three-mile wire, is in the center of the camera. The camera is exposed in place above the light and another one is set below the stomach. The camera takes eight pictures of the stomach to the upper film and the same number of holes expose the lower film.

SOUTHERN IDAHO BASEBALL LEAGUE PLANS OPENING APRIL 29

MANAGERS PLAN TWO-PART DOB

Nine Teams Tentatively Lined Up, Others Expected to Enter Campaign

Playing season for the Southern Idaho baseball league will open Sunday, April 29, with competition scheduled in two divisions of four or six teams each.

That was the announcement made today by team representatives from nine cities who assembled at Kimberly Monday night to outline plans for the 1934 diamond campaign in south central Idaho.

The west end division, tentatively lined up today, will consist of Buhl, Filer, Kimberly, Hansen, Wendell and one more team to be selected probably this week. The east end division will be made up of Burley, Rupert, Paul, Declo, and one more team to be selected by Kimberly this week. Each team free to decide on either a four or six team competition in its division.

Will Convene Monday

Decision on the definite number of teams in each area and preliminary drawing-up of schedules will be made at meetings Monday night, with the west end group to gather at Filer and the east end group at Kimberly.

First half of the baseball season will run from April 29 through Sunday, July 1, it was decided this week. The league will be in full swing and cutting until the middle of September, the two leading teams in each group will meet in a final game to determine the champion.

Regulations on players will be retained in substantially the same form as those which ruled the league last year.

Clubs represented at the preliminary Kimberly session, the west end, together with their voting representatives were:

Buhl—J. H. Dadd, Filer—E. E. Lee, Kimberly—H. P. Dadd, Hansen—Sam Young, Paul—R. H. Bennett, Rupert—R. L. Bennett, Declo—Warren Roberts, Wendell—Horn Simpson.

Beatty Facing Showdown With Killer Lion Today

By HENRY McLEMORE

NEW YORK, April 4 (AP)—Sometime today, in a bare black cage pitched in the center of Madison Square Garden, Clyde Beatty will have a showdown with a lion.

The showdown will be one of the most dramatic and exciting of the season. Beatty, the world champion, will be up against a lion named Sam. The lion is a killer and has killed many men.

Beatty will meet Sammy there, with the lion of the cage bashed out. Sammy is a 600-pound lion, with teeth the size of a man's fingers, and his tawny paws, big as talons, are deadly.

INDIAN HEADED FOR 5TH PLACE

Scribe Says Cleveland Lacks Sustained Strength of Chief Rivals

By JACK CUDDY

NEW YORK, April 4 (AP)—The Cleveland Indians, who occupied fourth place in the American league standing for the past four years, appear slightly stronger but apparently have little chance of finishing in first division.

In the training stretch they seem incapable of matching the sustained strength of the Senators or Yankees, or of beating out the improved Tigers or Sox. Hence, fifth place seems their destination.

Johnson, First

"Big man" Walter Johnson, the popular pitcher who pitched for the Senators, is expected to start his first game as pitcher of this season's club. He is expected to play third, and Bill Kunkel, who played last year, is expected to play third.

Johnson's big worry in the infield particularly is about his left arm. He is expected to play third, and Bill Kunkel, who played last year, is expected to play third.

SO MAX BECAME REALLY SERIOUS

"If we get Max Baer up into the high Sierras, far from night life, he'll take his early training seriously," said the California heavyweight's handlers. But Max looked on getting fun even out of his roadwork. At Lake Tahoe, he's shown shunning snow on a Trainer Mike (Cantwell) while Buddy Baer, his brother, looks on. The Baer training camp has now been moved to summer California locations because Max didn't like the mountain storms.

M'LARNIN TOLD TO STAKE TITLE

NEW YORK, April 4 (AP)—Jimmy McLaughlin, welterweight champion, must sign within 30 days to defend his title against Van Kiveren of Holland or have his title vacated.

The New York State commission notified McLaughlin's manager, Pop Foster, of this yesterday.

Foster told reporters he would not be forced into such a match. He said he would fight for his place for Jimmy to fight if the commission vacated his title.

KANGAROO!

The kangaroo can run much more swiftly than man, but it does not have the endurance, nor the knowledge of how to conserve its strength. The hunter sets a steady pace and keeps it up until at length the animal becomes exhausted.
