D. R. DODGES HOUSING BATTLE

Private Business Reinsurance Hinted; May Clear Question In Fireside Chat

By LYLE C. WILSON

WASHINGTON, Dec. 4 (AP).—There is evidence that President Roosevelt has dodged the issue of private business reinsurance over a housing program.

Business leaders were alarmed by the huge outlays inevitable in relief and housing projects proposed by the New Deal. The New Deal faction, however, is expected to be informed privately, however, that Mr. Roosevelt will reserve considerable dividend-paying housing construction for private capital and private profit. But this has been no complete explanation to the public of the housing wrangle and how it is to be adjusted.

Mr. Roosevelt at Warm Springs and merely that there was no conflict between federal spending for relief, insurance or rural rehabilitation on the one hand and the federal housing administration's plans on the other.

Disagreement—A weakness of that explanation of one of the biggest New Deal controversies is that there is within the administration considerable disagreement upon the issue. Mr. Roosevelt finally will decide between the conflicting groups, allocating to each, probably, a share in a general housing program.

As far as the latter issue, no authoritative statement indicating where he will divide the construction.

Housing Administrator James A. Moffatt wants to make investment in new, comparatively low cost homes, attractive to private capital.

Want Low Interest—Public Works Administrator Harold L. Ickes and Federal Relief Administrator Harry Hopkins have been talking about housing relief projects with federal funds on terms private capital could not meet. A three per cent interest rate, for example, sums ranging from \$5,000,000 to \$12,000,000, have appeared as trial bids.

There is no real conflict between the clearance of slums or improvement of rural habitations and a social responsibility of government and the FIA plan to attract private dollars to the construction of homes for persons unable to pay for them. But the private publicity has confused the projects.

Moffatt Gets Chance—Much confusion has been aggravated by the scarcely concealed belief of left wing New Dealers that private capital will not go into housing under any circumstances and that the government will not work. There is evidence, however, that New Deal policy makers intend to give Moffatt a chance to utilize private funds in new home construction.

Some clarifying statement is expected from Mr. Roosevelt, perhaps in his fireside chat this month. Certainly by the time Congress meets Mr. Roosevelt will be ready to say definitely in his budget message how much the treasury must put up for slum clearance, rural rehabilitation and public housing and to explain how federal funds will be limited so treasury funds can be spent without competing with private capital and private profits.

In American, traveling flying exhibitions dated from 1909, and although some efforts were made to apply the airplane to commercial uses for passenger carrying, mail carrying and forest fire detection, these projects were not put upon a serious and efficient basis until after the war.

RUSSIANS HONOR MURDERED CHIEF

Stalin, Fellow Leaders Offer Tribute to Sergei Kirov, Blain Comrade

MOSCOW, Dec. 4 (AP).—Joseph Stalin and fellow leaders of the Soviet Union brought back to Moscow today the body of Sergei Kirov, their veteran comrade, to give it the highest honors that the government may offer its illustrious dead.

As the dreaded secret police of the Narcomindel, the commissariat of the interior which replaced the old Cheka, raided and examined persons suspected of antagonism to the government, the program was completed for Kirov's funeral.

Lies in State—It was arranged to place the body in state tomorrow in the house of the trade unions. The entire city was ordered to mourn. Theaters, cafes and other public entertainment places were closed until the funeral.

Tomorrow night the body will be cremated. Thursday all work-day activities in Moscow will be stopped for the funeral of the state funeral in the Red Square at 3 p. m.

COUNCIL REVISES HANDBILL RULING

Decrees Advertising Material Must Be Placed Inside Screens, Barches

Revision of the city ordinance regulating the circulation of advertising matter had been adopted today by the city council. The effect of the new municipal statute being to prohibit the indiscriminate throwing of advertising matter on lawns and in parked automobiles. It does away with the provision which heretofore compelled the use of envelopes to enclose dodgers and handbills.

Under the new regulation advertising matter when distributed in the city, must be placed inside screens or porches, and not left on steps. Officials reported that distribution of hand bills here had reached the point of becoming a nuisance.

Approved by the council were three applications for building permits. Applicants were: William Jackson, to erect a garage, 30 x 22 feet in dimensions, at 1207 Seventh avenue east, at a cost of \$50; Lee Snyder, 835 Main avenue west, to re-roof his home at a cost of \$111; and Mrs. Charles L. Hart, to repair a roof on a house on lot 1 in block 60, at an estimated cost of \$50.

STAGE CLEVER HALL—Oakley, Dec. 4 (Special).—A clever Seminary hall, an annual affair, was given in the Rainbow hall Thanksgiving night. Following each dance, prizes were given to the couples who stood under lucky numbers which were arranged above the dancers. Roy Layne's orchestra furnished music for the dance. SAYS MOTH BALL HAS LITTLE USE

Idaho Expert Points Out Best
Ways to Keep Pests From
Ruining Clothes.

UNIVERSITY OF IDAHO, Moscow (Special).—Moth balls are about as effective against hungry moths as printed signs, "Moths, Keep Out," would be, says Dr. Claude Wakeland, head of the entomology department at the University of Idaho.

Tests have shown that moths pay little attention to the odor of moth balls under ordinary conditions. The same is true of pure naphthalene, the substance from which moth balls are made. However, when used in tight containers such as trunks or chests, naphthalene and para-dichloro-benzene are equally effective in killing or keeping out moths. Of the two chemicals, Dr. Wakeland prefers the latter, because its odor is less objectionable and easier to remove from clothing.

Chest May Help

Tightly-built cedar chests give effective protection only if the clothes are free from moths when put in. Closets or wardrobes built of cedar will not protect unless tight and supplied with a protective chemical. De-mothing gadgets on vacuum cleaners, Dr. Wakeland said, are of little value other than in talking points for girls salesmen.

Airing furs and woollens in bright sunshine will rid them of moths; but keeping them out is the problem. Dr. Wakeland advises storing moth-free materials in tight chests, wardrobes or closets, along with a pound of para-dichloro-benzene for every seven cubic feet of air space. Keeping furs and woollens under well lighted and ventilated conditions will minimize moth damage. Most closets, unfortunately, are dark and unventilated. In addition, it is next to impossible to build them tight enough to keep moths out.

Moth infestation of upholstery, rugs, and the like, can be controlled only by fumigation, directions for which Dr. Wakeland will send on request.

TRAGEDY STALKS ON KING'S TRAIL

Death Strikes Along Route
Planned by Prajadhipok
of Siam

LONDON (AP).—Tragic coincidence has dogged the footsteps of the King and Queen of Siam. Every plan they have made recently has been spoiled by death or disaster.

The story is told by M. Smilesman, young confidential secretary to the King.

The King and Queen had planned first of all to visit King Albert in Belgium, said Smilesman. "He was killed."

"Next we were to go to Holland on a visit to the Queen. As soon as arrangements were complete, the Queen mother died."

Dollfus Siam
"Then we were to go to Vienna to stay with Dr. Engelbert Dollfus. He was assassinated."

"Finally the King and Queen again planned to go to Holland. Arrangements were made. Once more the visit had to be abandoned. The Prince Consort was dead."

"It happened during the last year. We believe there is something unlucky for royal personages in this present time."

Smilesman then talked about King Prajadhipok's offer to abdicate from the Siamese throne because of the government's alleged efforts to take away his power of life and death.

"If it were the wish of the people that the King should not have the power of life and death, I know he would grant it," said Smilesman. "But it is not their wish. It is the wish of unscrupulous statesmen."

"It is impossible to foresee what will happen. The King and Queen intend to remain here throughout the winter. They see no one. They do not go up to London from the country retreat at Cranleigh, Surrey, where they are staying. They play tennis and go for walks."

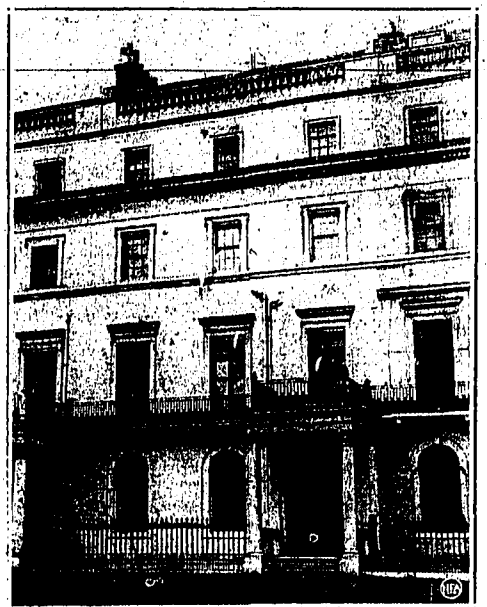

SHOSHONE

A group of young people enjoyed a high-spirited party at the W. H. Jackson home Friday evening. Those present were Billy Jackson, Robert Haddock, Gooding Smith, Karl Selander, Arthur Bernice, John Bernice, Bernice, Lois Hickman, Geneva Hickman and Katharine Carby. Refreshments were served.

PIONEER HONORED IN HUGE MURALS

Gen. George Rogers Clark Is
Memorialized in Glorious
Works of Art

CANAAN, Conn. (AP).—The winking of the mid-west by the American colonists under Gen. George Rogers Clark is depicted vividly in seven huge mural paintings just completed by Eliza Winter, famous artist, in his specially constructed studio on Undermountain road, South Canaan.

The murals are to be shipped to Vincennes, Ind., where they will hang in the six million dollar granite memorial building erected on the site of old Fort Sackville, on the banks of the Wabash. It was there that General Clark defeated the British and broke their campaign from Detroit to crush the revolution by an eastward drive.

Bronze Statues
The granite memorial, circular in design, has in its center rotunda a bronze statue of General Clark, designed by Herman McNeil.

Artist Winter's seven murals will surround the interior walls of the rotunda. Each painting is 28 feet high and 18 1/2 feet wide. More than 150 figures are depicted in the seven murals. Foreground figures are 8 1/2 feet high, each a portrait of an historically prominent person. Each panel represents one important episode in General Clark's western campaign.

The Panels
They are:
1. Settlers entering Kentucky from Virginia.
2. Clark's conference with Indians at Cohokla.
3. March of General Clark's soldiers across the flooded plains of the Wabash against Fort Sackville.
4. Battle of Fort Sackville, Vincennes.
5. Surrender of the British to General Clark.
6. Reading of the Northwest Ordinance at Marietta, Ohio.
7. Taking over the Louisiana Purchase at St. Louis.

Rep. Robert Cresser Permits

"Scramble"

CLEVELAND (AP).—Robert Cresser, of Cleveland, veteran 21st district Ohio congressman, will be a candidate for speaker of the house of representatives.

His decision to permit his name to be presented for preiding officer of the lower legislative body was made public by his colleague, Congressman Martin E. Sweeney. Sweeney revealed he had written Cresser urging him to seek the speakership, left vacant by the death of Speaker Henry T. Rainey, of Illinois.

Cresser replied to the letter, consenting to have his name presented, but asserted he would not "enter into any unseemly scramble for election."

CROW INDIANS TO RECEIVE BUFFALO

JARVIS, Mont. (AP).—Inspired, perhaps, by success of its famous experiments with importing reindeer herds for the American Eskimo, the government intends to launch a similar program on the Crow Indian reservation.

Superintendent Robert Yellowstone, full-blooded Crow leader, believes a similar experiment with buffalo may work out beneficially for the Crows.

Yellowstone said he has been promised by the government 50 head of buffalo cows and two, buffalo bulls from the Yellowstone park herd.

The park lions would be transplanted to the Big Horn canyon range on the reservation, and in time, Yellowstone hopes, the lions will multiply sufficiently to take care of a large portion of the Crows' food and clothing problems, just as the reindeer have for the Eskimos.

Paradoxically, before the white men invaded their domain, the Crows subsisted almost entirely on buffalo meat, wild herbs and used the skins for clothing. If the scheme works, history again will "repeat" itself.
