GREAT NATIONAL LEADER

If the presidential speech of Tuesday night is just the start of the Roosevelt drive for reelection, it becomes plain now that before it's over in November the present malicious campaign of the opposition will be so completely smashed as to discourage the most vociferous of the demagogues now assailing the courageous record of the matchless Democrat.

Mr. Roosevelt, eloquent and logical in his addresses, commands not only the intelligent respect of his listeners and readers, but "has the goods" with which to present a withering broadside against the futile arguments of small men who would detract from his accomplishments during this reconstruction period.

In his speeches the President fully demonstrates why it is that he is the greatest living leader in the nation today. He is inspiring, as he had to be to a distressed people back in the dark days of 1933; he is courageous, as he had to be to overcome the physical handicap with which he was stricken; he has forthrightness, as he had to lead the march of recovery back over those three and a half years; and he is above pettiness, which is one of the many qualities the people demand of one honored by being the President of this great nation.

Mr. Roosevelt's personality, as demonstrated in his public addresses, is such as to give new confidence and hope to the nation, and the people are certain that in him they can look forward during the next four years to progress, reform, continued improvement and statement in the executive office.

The contrast between this type of leadership, and the weak and ineffectual capacities of his opponent is too great for comment. The difference in broad experience, in international relations, in a knowledge of legislative and governmental affairs and in the necessary democratic spirit is so great, as to be immediately apparent to the most casual observer.

In Mr. Roosevelt the Democratic party is fortunate in having such a dauntless leader, one who is not only equal to the task, but who can rise above it, become master of the situation and by his record rally to his support an appreciable majority of his countrymen who see in him the epitome of true democracy.

And the Roosevelt record, as written in these few years come home to everyone, for there is not a person in this broad land who has not profited individually by improved economic conditions, greater opportunities for security, confidence in the future, and the vision of a national destiny which would not be possible in the hands of an administration less progressive and less democratic.

And every public act of the President, his every public utterance more and more demonstrate not only his incomparable gifts as an administrator, but that this nation indeed is fortunate in having at this time such a leader to guide its destinies.

Indeed his partisan critics base their puny arguments on such flimsy and unconvincing grounds as to demonstrate conclusively that they are fighting a lost cause, one in which they themselves are insincere, and one which the people are prepared to reject by such an overwhelming vote as to repudiate, for all time the present malicious type of opposition in a national campaign to a beloved and proved great national leader.

AN ODD OMEN

One of the queerest harbinger of good times has come recently from no less an institution than the United States Army. The army figures that the number of desertions is going to increase this year—and, thereby, deduces that the country is getting back to prosperity.

Since 1931 the number of enlisted men who have gone "over the hill" has been far below normal. Times were bad and jobs were scarce; the soldier knew that in the army he would be well fed and well housed and regularly paid, and—recognizing a good thing when he saw it—he stuck around.

Now, says Brig. Gen. E. T. Conley, acting adjutant general of the army, things are changing, and "it is reasonable to assume that the desertion rate will increase."

This may make it tough for the army authorities, whose plans are naturally interfered with by a flood in desertions. But it's a welcome sign of rising prosperity.

DIVORCE VICTIMS

The divorce rate probably would be cut sharply if married couples contemplating that step would stop and think that, as a result of their action, their children might end behind prison bars.

That this is not an unusual outcome of marital breakups was revealed by Police Chief George G. Henry, Baltimore, at a recent police chiefs' convention.

According to Chief Henry, 98 per cent of the malefactors with whom he has dealt came from broken homes.

"If children get proper home training," he contends, "that knocks out the criminal tendency."

If they realize just how great their youngsters would suffer for it, parents would think long and carefully before destroying the normal life of children in their protective years.

POT SHOTS

WITH

The Gentleman in the Third Row

FEROIOUS FIDO

My wife says I'm a wimp. She says I can't help it. We have a very large dog who looks ferocious.

As a kid, I was as gentle as a kitten. When peddlers come along, I used to sit on the dock sticks out His shaggy head.

The peddlers would back off, saying "that dog dangerous?" And my wife says, "You're a wimp."

So the peddlers depart. I started home. I took off my coat. Got a pat on the head And some buttered toast.

—The Rimeless Troubadour

—MERE MALE IN A DEN OF VICE SHOPPERS!

Pot Shots:

A picture of a man, male attempting to shop in a busy grocery store with a woman on Saturday afternoon.

He walks up to a counter. Says into slot with orders to be filled: "I need bread and butter."

So many women he can't count to.

Decides he'll wait on edge of Wait.

Wonders if he hadn't better try to go to the door.

Tries it.

Women give him icy stare.

Tries to signal clerk.

Woman why his wife couldn't buy biscuits and save all this trouble over a loaf of bread.

Then he sees opening in crowd. Opening isn't there.

Collapses with large woman who has been shopping.

Finally writes "bread" in large letters on paper sack he finds in pocket.

Holds me up.

Tosses coin to clerk.

Shows loaf of bread over heads of crowd.

He makes error on play but departs happily, battered loaf of bread tucked in his coat.

E. Pluribus Unum

AIN'T ANY ONE!

Pot Shots:

I'm in business. What business? Don't know. My business? It's expanding.

Puffed Up

DO YOU BY ANY CHANCE MEAN "HOT AIR"?

Pot Shots:

Here are a couple of "Do-Puns" for you.

His wife has fainting and fainting her with an "Idaho Evening Times." What am I doing?

He put a "B" on his hat and a "C" on his coat and stepping on it. What am I doing?

Answer: I'm stamping a fella.

HOW I DOING

SO WOULD WE?

Pot Shots:

Is all the guys who are making political speeches these days were laid end-to-end, I would pay high

for the privilege of using these wooden paddles on the upper turned ends.

—charlemagne

THAT MIGHT DISRUPT TOO MANY HOMES!

You beotch, with all these old farts getting faded off and think the time is not far distant when I personally get laid end-to-end.

Ask me why, I say ya. Well if you won't tell me, I'll be myself.

Because they may receive their old favorite, "post office."

NOW THERE'S FAD.

Understanded

OUR BULLETIN BOARD

Mr. and Mrs. Harvey Hoff are parents of a son, born Sept. 22, at a local hospital.

Mr. and Mrs. B. L. Mendelsohn are parents of a daughter, Dorothy, born Aug. 20, born Sept. 22 at a local hospital.

MUINDOKA SUGAR SEASON STARTS

Paul Factory to Be Operated
After 10-Year Period
of Idleness

RUPERT, Oct. 1. (Special) — With seven years of heats already behind it, the sugar cane campaign will soon be in full swing in Muindoka. Reports from the grower's association in the country indicate an exceptionally heavy tonnage this season. An average yield of about 16 tons per acre is expected.

Sept. 30, M. E. Cole of the Paul factory stated no definite statement as to when the sugar plant would start grinding. He believed that after the reconstruction of the factory practically wound up as it was, they could begin handling the cane.

After a 10-year period of idleness, the Paul plant sat on only 10 percent of its original site, has been entirely excavated and modernized.

Capacity Increased

The capacity has been increased until the plant is expected to handle 100 tons per day. Approximately 200 men will be employed. Modern power will be used and an electric plant will furnish power in the future for the factory steamplants.

New test-receiving equipment has been installed. Pulp will be taken from the mill and sent a quarter mile north of the refining room. An ultra-modern oil-fired boiler will be used.

About 10 acres east of the factory and adjoining the hot hospital grounds will be cleared and graded for best storage ground.

Club Organized by Hagerman Women

HAGERMAN, Oct. 1 (Special) — A women's Republican club was formed at Hagerman recently. Women met at the home of Mrs. Martin Curran, president, to organize.

Officers are: Mrs. Philip Kenneally, Jr., assistant chairman; Mrs. Harry Clark, treasurer; V. W. chairmen appointed were Mrs. E. G. McCall, Mrs. Earl Allen, Mrs. G. C. McCall, Mrs. C. Dodge, Mrs. Dale Cady.

A meeting of the group will be held Monday evening at the Clubhouse. Club rooms and all women interested are asked to attend. It is hoped refreshments will be given and refreshments served.

A Republican banquet will be given Saturday evening at the church in Gooding with a national speaker present.

Dr. Hoyniger, Post-Specialist, Officer C. C. Anderson, P.O. 233-J—Adr.

JUST WHAT ARE THEY DOING

Here's a "Do-It" for piano players—and apparently Leo Vitale, radio songwriter, has let Mark Warren, orchestra leader, in on the secret, for he gets knowingly as she plays song after song and asks: "What am I doing?" See half page for answer.

MICHELL TO BE GUEST SPEAKER

Boise Instructor Will Head Journalism Program Here Oct. 24.

Plans for the southern Idaho journalism convention to be held here Oct. 24-25, at the Hotel Idaho, were rapidly taking shape yesterday with the announcement of Douglas Mitchell, journalism department at Boise State College, as guest speaker and chairman of the program.

In a letter to Mrs. Mercedes J. Parker, president of the journalism instructor, Mr. Mitchell said, "I shall be very glad to come and speak at your meeting. I am interested in meeting the journalism advisors and staff members in your different schools and colleges."

Miss Duffy, the name given to him in a letter to Mrs. Mercedes J. Parker, president of the journalism instructor, Mr. Mitchell said, "I shall be very glad to come and speak at your meeting. I am interested in meeting the journalism advisors and staff members in your different schools and colleges."

One more something Miss Duffy has to say is that she is a graduate of M. A. degree from the school of journalism at the University of Washington.

Committees Worked

Other phases of the convention will be worked out by Mr. Clark, president of the association, Caroline Dudley, head of the exhibit, is working on the exhibits and printed papers from all over Idaho as well as the nation. At the time of the first 2,000th student, Barbara Mockler of Moscow, now a senior, total registration for year round holds true this year, as it usually does, the total enrollment for

March Hooper told Miss Parker, who is in charge of the registration.

Naturally Sister and Mack also will meet her. Then, every man for himself . . . and a lot

of fun will be had at the "Our Boarding House."

The 2,000th posthole of the Queen Mary trans-Atlantic liner contains 2,000 square feet of glass.

BOISE, Oct. 1 (Special) — The 2,000th posthole of the Queen

Mary trans-Atlantic liner contains 2,000 square feet of glass.

Boise, Idaho — June Sheehan, Betty Burke, Spokane; Cleo Hudson, Gooding; Dorothy McCall, Delta, Delta, Geneva Kramer, Plummer, Nampa; Helen Wagner, Helga Budde, Idaho Falls; Dorothy Patterson, McCall; Mildred Ryan, Weiser, Idaho; Ingolf Kellgren, Evelyn Williams, Boise; Gertrude Eleman, Ogden, Utah; Virginia Dale, Lewiston; Ruth McCall, Alice Colton, Salt Lake City, Utah.

A NEW BOARDER & OUT BOARDING HOUSE

ENROLLMENT UP IN IDAHO SCHOOL

New Records Set at Moscow as Student No. 2,500 Enters for Fall Term.

MOSCOW (Special) — Setting new enrollment records, now almost an annual habit at the University of Idaho, the school is off to another fall, with enrollment high of 2,500 students registered early this week, and a final total of 2,600 for the year, a reasonable prediction.

You never can tell what something is going to happen

in "WHAT peace and quiet . . . in "Our Boarding House."

Once more, something HAS happened — a new boarder has arrived.

Mrs. Duffy, the name given to him in a letter to Mrs. Mercedes J. Parker, president of the journalism instructor, Mr. Mitchell said, "I shall be very glad to come and speak at your meeting. I am interested in meeting the journalism advisors and staff members in your different schools and colleges."

One more something Miss Duffy has to say is that she is a graduate of M. A. degree from the school of journalism at the University of Washington.

LANDIS POSTPONES SECOND WORLD SERIES GAME

MUDGY GROUNDS
CAUSE DECISION

Ankle-Deep Muck and Pools
of Water Bring Delay
in Schedule

By GEORGE MURSEY
BOSTON JOURNAL, NEW YORK, Oct. 1 (UPI) — Andie-deep mud and big pools of water on the Polo grounds today caused baseball commissioners Kenesaw Mountain Landis to order postponement of the second world series game between the Giants and the Yankees.

The second game will be played tomorrow at the Polo grounds, weather permitting, and the series schedule set back one day.

Jules Landis made his decision at 10:20 a. m., after a careful inspection of the field from the time it took to get to the Polo grounds. He was accompanied by Joe McGinnity, manager of the Giants, and Travis Jackson, field captain and third baseman of the Giants. Landis agreed with Jackson that the diamond was in no condition to play and that the only way to have a world's champion was to postpone.

"Early Wet"

Landis said, "I offer a fair test of baseball. Outfielders simply couldn't run in wet turf. It's a bad place to play ball. A fielding ball would be pure guesswork."

Water stood in many places on the infield and there were yards of mud between second and third base.

Landis, in deciding to call the game off, also took into consideration the safety of the players, particularly dangerous for players to perform on such treacherous footing.

The greenwards were halfway ankle-deep in mud. The jolted, which deep in mud, the fielder, during his throw, lost control of the ball, which was soaked by yesterday's rain, also was faulty.

Walking

Outside the Polo grounds a crowd of 2,000 who refused to leave when the game was called, was waiting when word of the postponement was passed.

The skies at postponement time were overcast but the sun broke through several times during the rain today. The field showed good condition for the second game.

Handled Perfectly

Commenting on yesterday's game, Manager Bill McKechnie of the home team said he thought the umpires "handled the whole thing perfectly." The game had to be started because it wasn't raining and once under way they had to stop because the pitch always had been halted.

The postponement means President Franklin D. Roosevelt's home ground, instead of the Yankee Stadium if there is a game tomorrow, will be used to conduct the Friday game.

SERIES DATA

NEW YORK, Oct. 1 (UPI) — World series facts: Total attendance first game, 30,410.

Gross receipts, \$172,157.00.

Player's share, \$87,600.00.

Each club's share, \$20,260.00.

Each league share, \$20,260.00.

PORTLAND TAKES COAST'S PENNANT

Beavers Defeat Oakland 8-3
in Final Game to Earn
Championship

OAKLAND, Calif., Oct. 1 (UPI) — The Portland Beavers, of the Pacific coast league, held the 1936 Pacific coast league pennant after defeating the Oakland Athletics in the fifth and deciding game of a seven-game playoff series.

The Beavers, built up a telling lead in the first inning by landing on Ken Douglass for a home run, and Bill Peacock, Portland's ace hurler who stayed through the nine innings and held the lead, gathered a total of 11 hits from the two Oakland pitchers.

TWIN FALLS, IDAHO

IDAHO LAYS PLAN FOR HOMECOMING

University Officials Preparing for Annual Celebration at Moscow Oct. 10

MOSCOW (Special) — Members of the state bar association, supreme court justices, and other prominent people attended two luncheons by President M. G. Neals to attend Idaho's big Homecoming celebration Oct. 10.

Letters of invitation were mailed from the president's office earlier this month to all members of the official Homecoming guests. In addition to the No. 1 Homecoming game, the football game between the State football team, the invitations cover three other functions arranged by Dr. Neals.

Friday, Oct. 9, the night of the traditional Homecoming bonfire and picnic, the official guests and their wives and the university students and faculty at a dinner at the Blue Bucket Inn.

The following day, Homecoming Day, and Mrs. Neals, the wife of the board of education and their wives at a luncheon at their home on East First street.

Final event on the Homecoming program will be a football game between the University of Idaho and the following: Asst. B. Wilson, Twin Falls; Cheney St. Custer, Idaho Falls; and the University of Idaho's two representatives in congress, Clarence P. Miller, of Moscow, and Bert H. Miller, attorney general; Harry C. Parsons, state auditor; Fred T. Pease, state senator; Mrs. Myrtle Endicott, state treasurer; Arthur Campbell, state master in law; Alfred Judge, chief justice; Edwin M. Holden, Raymond L. Green, state attorney, and E. F. McVey, associate justice, all of Boise.

Other guests on the list are Dr. John R. Nichols, executive dean of the Southern Branch of Societies of the Idaho Alumni Association; Clarence D. Martin, governor of Idaho; Dr. W. G. O. Higland, president of Washington State college.

State officials — Gov. C. Ben Ross, Lt. Gov. W. Pope, Boise, United States senators from Idaho; Comptroller J. V. Vining, Boise; Senator James J. Day, Wallace; John F. Jenney, Coeur d'Alene, and J. W. Johnson, all members of the board of education.

State officials — Gov. C. Ben Ross, Lt. Gov. W. Pope, Boise, United States senators from Idaho; Comptroller J. V. Vining, Boise; Senator James J. Day, Wallace; John F. Jenney, Coeur d'Alene, and J. W. Johnson, all members of the board of education.

These meetings are for forming a local program for the western region.

The meetings in the various communities are for forming a local program for that territory.

CONSERVATION IS TOPIC OF MEETS

Agricultural Programs Call for Series in Idaho Before Oct. 5

MOSCOW, Oct. 1 (Special) — Plans for the 1937 agricultural conservation program in Idaho have been made in the various counties during the past week. Dean E. J. Edgington, of the Idaho agricultural extension service, has announced that farmers and stockmen will assemble in community or county groups with the county extension agent, conservation committee and members of the county agricultural adjustment planning board to discuss soil conservation this year and make recommendations for the 1937 agricultural conservation program.

All the meetings will be held before Oct. 5, since the extension agents have been summoned prior to the regional meetings to be held a few days later.

Program for Farmers

"The agricultural conservation plan for the farmers," Dean Edgington said, "is to have the farm program to be in effect next year will be a major measure upon what suggestions they make at the regional community meeting this fall."

The following questions will be discussed at these meetings:

What progress has been made in soil building practices under the 1936 agricultural conservation program?

What new programs should be recommended as most valuable from the agricultural conservation program?

Should the crop income insurance be established for each farm or ranch? If such a plan is adopted, how should it be carried out?

Should the crop income insurance program be enlarged?

Discussions Listed

Full discussion by the farmers and extension agents on the following topics will be held:

1. The fundamental objectives of the conservation plan.

2. The methods to be used to carry out the plan.

3. The county committees to formulate recommendations that will meet specific problems in the county.

4. The extension agent's role in carrying out the plan.

5. The extension agent's role in carrying out the plan.

SCHOOL ASSISTS TRAFFIC POLICE

CONTRACT BRIDGE

By William E. McKenney

END PLAY AVOIDS FINESSE

Nearly 100 Picked Men Take Special Training Course At Harvard U.

WASHINGTON Oct. 1 — Nearly 100 traffic officers from all departments of the east and middle west, having completed special training courses at Harvard University, have returned to their posts equipped to handle traffic problems and aid in reducing automobile accidents.

The officers selected from police forces of 14 states and 35 cities were chosen after a series of tests and classes conducted by the New England traffic officers' training school. The tests were correlated with results of the initial selection that the course probably will be repeated next year.

Selection was made by the International Association of Chiefs of Police and the Automobile Manufacturers Association, which has been in close cooperation with the Harvard bureau for street traffic research.

High Praise Awarded

Norman D. Haskins, manager of the safety department of the Automobile Manufacturers Association, said the course was "most significant and far-reaching developments in the field of traffic control."

Automotive industry will continue to build the safest cars in the world, he said. "We believe the safest roads in the world, not the safest cars can solve the problem of highway accidents without causing undue expense, backed by a broad educational program designed to obtain the maximum safety in traffic operation with the reasonable rules of the game."

New York Police Aid

Three members of the New York City police department were among the members of the faculty. Captain Charles W. Williams, head of the police safety bureau; Captain William Jones, and John J. Cuneo, who is a graduate of the New York City police academy.

The officers were taught scientific methods of traffic control and diplomatic handling of motorists by traffic officers; proper placement of traffic signs; the best means of controlling traffic on streets and highways; accident prevention; individual location of other subjects studied included the use of photography in the study of accidents, the use of the highway as an aid to safe driving, and up-to-date methods of accident prevention, recording and reporting of accidents and mobile accidents.

Watches originally were small clocks and were worn hung from the girdle because they were too large for the pocket.

After winning the first trick hearts, redoubled. Should he lead trump at once, after winning the last trick in his own hand,

South. Instead of playing the club jack, West won with the queen and cashed the ten, but now he

had to cash the jack of clubs to give declarer his contract.

ENGLAND SPEEDS NAVY AIR FORCE

(Editor's Note: The true story of the fall of the Toledo Air Force, the most factual story of what occurred in the fortresses during the siege and its delivery by the nationalists. Here is the factual and complete story by Webb Miller, star United Press war correspondent since 1917.)

By WEBB MILLER

LONDON, Oct. 1 (UPI)— British naval construction is making rapid expansion, and the Royal Navy is now second to no navy reveals.

Armament of Britain's sea forces has been increased, necessitating an additional supplementary navy estimate, being presented to Parliament.

A total of 45 ships of various categories under construction will be delivered to the Royal Navy before the year is out, and the number is expected to be increased to 67 by the opening of the next fiscal year.

Air Forces Expanded

During the current year, the Royal Air Force has opened four new airfields, landing fields on seaplane bases, and training fields on land.

On October 1, 1937, Britain had 28 military airfields, landing fields on seaplane bases, and another 100 land by 50 per cent during the past 18 months, being built, including 10 battlefields. Terms of the 1936 London naval treaty prohibit such construction, but Britain is well along.

Although battleships are not being built, armor, plane, gun and submarine equipment have been cast in sizable quantities.

Other equipment and supplies needed for the Royal Navy are being made and stored.

Ordnance Nearly Ready

During the past year, 100 guns for cruisers and eight destroyers will be commissioned. Under British accelerated program, this number is to be increased to 6 and 10 respectively next year.

Recently two cruisers, four submarines, nine destroyers and an aircraft carrier were added to the Royal Navy, and the development approved for the year.

Ships to be laid down during the next year will include two aircraft carriers, three aircraft carriers, 10 destroyers and 11 submarines.

While the Royal Navy's new ships is in progress, numerous vessels already in service are undergoing modernization and improved armament, heavier armor and increased speed. A number of ships are converted to three purposes to serve as scouts as a result of alterations.

"A" is the first letter in all the names of the world, except the

Spanish, French, Italian, German, Dutch, Portuguese, Greek, Polish, Hungarian, Czechoslovakian, Yugoslav, and the like.

Fears for Children

"Oh, we're afraid that my children are in Madrid and they would shoot them. I have given all my gold for Spain and my daughter could not bear it if ever I lost my children."

All of the garrison were literate, the weak, emaciated, emaciated.

They delivered one of the babies prematurely. Its birth caused by the explosion of a shell near the mother.

Most of the women and children remain here, the date unknown.

Here is the remarkable story of commanding staff of the Alcazar.

At 1:00, Monday, at the Alcazar, 1,100; killed, 82; wounded, 400; slightly wounded, 100; disappeared, 300; missing, 87; died of natural causes, five; suicides, three.

Women who entered the Alcazar, 1,000; children, 200 wounded,

many women were still there, living.

"I cannot tell you what happened then," an officer told me today, "but we were told that we must do our best except that we want. One moment repaid us for all we did."

When I asked his name, the officer cried:

Home-Made Bombs

Off came his coat, and bombs of tin cans which they filled with gunpowder, nails, spikes and hand grenades.

Surgeons operated on the wounded by light of the candles made from fat of the horses and donkeys.

Their deliverance of the babies

prematurely, its birth caused by the explosion of a shell near the mother.

Most of the women and children remain here, the date unknown.

Here is the remarkable story of commanding staff of the Alcazar.

At 1:00, Monday, at the Alcazar, 1,100; killed, 82; wounded, 400; slightly wounded, 100; disappeared, 300; missing, 87; died of natural causes, five; suicides, three.

Women who entered the Alcazar, 1,000; children, 200 wounded,

many women were still there, living.

"I cannot tell you what happened then," an officer told me today, "but we were told that we must do our best except that we want. One moment repaid us for all we did."

When I asked his name, the officer cried:

Home-Made Bombs

Off came his coat, and bombs of tin cans which they filled with gunpowder, nails, spikes and hand grenades.

Surgeons operated on the wounded by light of the candles made from fat of the horses and donkeys.

Their deliverance of the babies

prematurely, its birth caused by the explosion of a shell near the mother.

Most of the women and children remain here, the date unknown.

Here is the remarkable story of commanding staff of the Alcazar.

At 1:00, Monday, at the Alcazar, 1,1

JUNIOR CHAMBER TO VOTE MONDAY

Annual Election at Radioland
Buffet Will Act Upon
Nominations

Annual election of officers of the Junior Chamber International will be held Monday at 8 p.m. at Radioland buffet, members of the chamber invited.

Nominated by committee made up of John Boden, chairman; Lloyd Young, Vice-chairman; Bruce Johnson, Secretary; and Tom Johnson, Auditor. Roberton for president to succeed C. H. Detwiler, and Fulton Dunn for vice-president to succeed Rockwell. Both are unopposed.

Four have been nominated for first vice-president. George E. Cook, William R. Reed, Harry H. Detwiler are candidates for first vice-president. George E. Cook and Cook and Alton J. Young have been named as candidates for second vice-president.

Other nominees:

Jack M. Kingsbury and James C. McLean, for treasurer; and Fred G. the treasurer, and for directors, there are to be elected from a list of the following: Charles L. Detwiler, George E. Cook, Coleman Ensign, William Gerber, Blasius C. Phillips, and J. H. Bartlett.

Other nominations may be made by any group of ten or more.

Four have been nominated for first vice-president of the opposition party? President Roosevelt.

If confided the great departments most closely

with the public works, the progressive Republicans Henry A. Wallace and Harold L. Ickes. To the department of agriculture and the public works, the interior department was assigned the largest distribution of funds any government ever made in peace time.

Through Wallace and Ickes, President Roosevelt has the full support of the Democratic party.

It is well-known in Washington—a fact of which some of my Democratic friends frequently complain—that the administration has been in contact with more Republicans than Democrats.

I know nothing directly, of course, of the party's intentions, but it is well-known that the

power of the newspapers that are franky and so fiercely opposed to the New Deal, if there had been pariah scandal out through the press, would have been huge, but our cars would have been ringing with the story.

I can honestly say that under

none of his predecessors, the administration has been in closer touch with the administration of the civil service than he has been in the past.

There are facts that I have ob-

served. I want to be fair to the

Democrats, but I do not believe

that they shall be unfair to

President Roosevelt.

It is well-known that there

has been any exploitation of the

profession.

When the emergency ended it

would have given sufficient

indication to the public that the

administration had been

in close touch with the

administration of the civil service.

How much more severe would that attack have been if the administration had been made a permanent part

of the government by inclusion of

President Roosevelt.

It is well-known that there
